International Sports Law: An Introductory Guide

This book, written by an expert in the field, covers some of the following issues, namely high-profile WADA cases such as that of Maria Sharapova, the Bosman ruling, decisions by the Court of Arbitration for Sport (CAS), and footballers' employment contracts and transfers for enormous amounts. These issues have led to sport no longer being confined to the back pages of traditional media such as newspapers, but increasingly finding its way onto the front pages and into new media. Since ancient times sport has been practised but today it is a multi-billion dollar 'industry', and Sports Law as a discipline in its own right is developing apace and is increasingly being studied and practiced at all levels of interest and competency. Thereby creating a need amongst students, lawyers, accountants, sports marketers, promoters, agents, sports broadcasters, sports administrators and managers for some basic and general knowledge of the legal aspects of sport. This introductory guide to international sports law will serve to satisfy the needs currently not being met in present-day sports law literature, and should also be of interest to researchers and the general reader. Although the topics covered are necessarily selective, sports law being such a vast subject, they are representative of the main legal issues facing the world of sport today. Throughout the book, the reader is referred to articles, publications and other materials that provide further information on the various subjects treated in the text, thus enhancing its value and usefulness. The Law is stated as at 1 January 2017, according to the sources available at that date. Prof. Ian S. Blackshaw is an International Sports Lawyer, a Solicitor of the Supreme Court of England and Wales, and a Visiting Professor at several Universities, including Anglia Ruskin University, Cambridge, United Kingdom, and The University of Pretoria, South Africa. He is also a member of the Court of Arbitration for Sport, Lausanne, Switzerland.

Handbook on International Sports Law

Despite taking a wide variety of forms, sport is universal. Circumstances and events generating legal issues in sport are similarly universal, but sport operates under many legal systems worldwide. Fragmentation and inconsistency in legal outcomes often result. This innovative collection of essays by leading scholars of sports law addresses a gap in the literature. It advances understanding of how different legal systems respond to common issues and offers insights into the developing international system of sports law. Researchers will find this book of inescapable assistance and interest. Hayden Opie, Melbourne Law School, Australia Nafziger and Ross have provided an enormously useful collection of incisive and integrating essays that cover the gamut of important issues in the emerging field of international sport law. Andrew Zimbalist, Smith College, US This Handbook presents a comprehensive collection of essays by leading scholars and practitioners in the burgeoning field of international sports law. The authors address significant legal issues on two gradually converging tracks: the mainstream institutional framework of the law, primarily the International Olympic Committee, international sports federations, regional and national sports authority, and the Court of Arbitration for Sport; and the commercial sports industry. Topics include the institutional structure; fundamental issues, legal principles and decisions within those institutions; mediation, arbitration and litigation of disputes; doping, gambling and the expanding use of technology in competition; athlete eligibility requirements; discrimination; and protection of athletes. The book also covers a broad range of commercial issues related to competition law and labor markets; media, image, and intellectual property rights; event sponsorships; and players' agents. Comparative analyses of young sports models and practices in North America, Europe and elsewhere supplement the general theme of international sports law. This major collection of essays on some of the most controversial, cutting-edge issues in international sports law, will be a captivating read for academics and students of sports law, sports management, international law and comparative law, as well as practicing lawyers and players agents. Senior executives and other professionals in the sports industry will also find much to interest them in this well-documented Handbook.

Introduction to International and European Sports Law

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of "sport specificity" (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Sports Law in Switzerland

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Switzerland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policymakers access to sports law at this

specific level. Lawyers representing parties with interests in Switzerland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law. International Sports Law and Business

This comprehensive, three-volume set focuses on the legal and business aspects of sports in the United States and abroad. The authors have presented the subject matter from a practical and pragmatic perspective, yet with analytical precision and attention to fine points of detail. This book is composed of five parts: Part I deals with the law and business of sports in the United States, with the primary emphasis on the legal aspects of professional sports. Part II deals with the internationalization of sports from various perspectives, principally North American team sports. Part III explores the law and business of sports in 18 non-U.S. jurisdictions--subject matter hardly covered in other sources, if at all. Part IV treats the legal and, to some extent, business aspects of broadcasting and sports, both in the United States and in selected foreign jurisdictions. Part V focuses upon sports marketing in its various forms in the United States, as well as its international perspectives. This easy-to-read work is unmatched in that it covers subjects not addressed or only tangentially addressed in other works, presents insiders perspectives on the subject matter, and focuses extensively on international aspects of sports law and business in connection with many different subjects. Among its exhibits, International Sports Law and Business includes a World League of American Football Standard Player Contract form, a sample World League of American Football Acquisition and Operation Agreement, Statute of Court of Arbitration for Sport and Regulations. It also includes a comprehensive index.

Leading Cases in Sports Law

This book accounts for over 25 of the most influential cases in international sports law, as written by some of the leading authorities in the area. Authors from Europe, the United States, Australia, South Africa, Canada and New Zealand trace the evolution of this emerging discipline of law through an analysis of individual cases, as discussed under a number of key debates and themes in contemporary sports law, including: the "public" nature of legal disputes in sport; player employment mobility litigation; doping and the spirit of sport; TV rights holding proceedings; and enduring themes in sports law such as on-field violence, spectator safety, animal welfare and gender equality. Valuable for sports law academics, arbitrators and practitioners, sports administrators and governing bodies, but also for students (postgraduate and undergraduate) and all those with an interest in international sports law.

Advanced Introduction to Global Sports Law

Stephen F. Ross presents this succinct introduction to key topics of law specific to sports, comparing approaches to sports law across the globe, with particular focus on the United States, Europe, and common law jurisdictions. Contrasting the profit-maximizing approach of North American leagues with the global integrated approach of professional sports governed by national and international governing boards, the book offers a novel model for the latter.

European Sports Law

The important theme “What is Sports Law?” was the topic of the international Conference on “The Concept of Lex Sportiva Revisited”, which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports Law in the European Union

Katarina Pijetlovic is the first author to address the issue of breakaway leagues in football and their treatment under EU law. In this book she guides the reader through EU sports law, the specificities of the sporting industry and the problems and power struggles in European football governance in the context of the breakaway threats by elite clubs. In order to analyse the legality of UEFA clauses that

restrict the formation of such breakaway structures, the author first provides a progressive interpretation of the applicable EU sports law and an in-depth analytical review of EU sports cases decided under internal market and competition provisions, including a novel perspective on the UEFA home-grown rule and the Bosman case. Thereafter, she sets out an original theory of convergence between TFEU provisions on competition and the internal market in the light of sporting exceptions. Finally, in applying the legal principles thus outlined Katarina Pijetlovic explores the legality of the restrictive UEFA clauses and the case for the formation of alternative leagues in European football under EU sports law. A number of surprising outcomes emerge from this analytical process. Conversely, she also tests the largely neglected issue of the legality of forming a breakaway league by the European elite football clubs. The systematic way in which the reader is guided through EU sports law and the legal issues under consideration makes the book accessible for EU lawyers as well as non-EU sports lawyers, on both an academic and a practitioner's level. Katarina Pijetlovic holds licentiate and doctoral degrees in EU sports law from the University of Helsinki. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. David McArdle, Prof. Ben Van Rompuy and Marco van der Harst LL.M.

Sport: Law and Practice

Match-fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim is to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing

and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

Sports Law in India

With a Foreword by Dr Michal Krejza, Head of Sport Unit, Directorate-General for Education and Culture, European Commission, Brussels Much has changed since the publication of Professional Sport in the EU: Regulation and Re-regulation (edited by Andrew Caiger and Simon Gardiner, The Hague, T.M.C. Asser Press 2000). The present book explores new territory and its scope and tone reflect the maturity of the discipline of EU sports law and policy. The book seeks to balance contributions from established authorities and the best of the new generation of sports law and policy academics. New theoretical insights are revealed which accompany in particular two further sections dealing first with governance and regulatory issues (also including freedom of movement and competition law issues) and second with questions of representation. The issue of the representation of stakeholders within sports governance structures (Social Dialogue between employers/clubs and employees/play-

ers) is arguably the most significant development in the last decade and the inclusion of the word 'Representation' in the title is merited. Contributions on anti-doping, football hooliganism and sports betting are added to the book. The editing team consisted of Simon Gardiner, Leeds Metropolitan University, United Kingdom, Richard Parrish, Edge Hill University, Ormskirk, United Kingdom, and Robert Siekmann, ASSER International Sports Law Centre, The Hague, The Netherlands. This book appears in the ASSER International Sports Law Series, under the editorship of Robert Siekmann and Janwillem Soek.

The Council of Europe and Sport: Basic Documents is the second volume in the Asser series of collections of documents on international sports law, containing material on the intergovernmental (inter-state) part of international sports law. The European Union and Sport: Legal and Policy Documents was the first volume devoted to the European Union. In previous other publications, non-governmental materials, i.e. statutes and constitutions, doping rules and regulations, arbitral and disciplinary rules and regulations of the international sports organisations were published. The book provides an invaluable source of reference for governmental and sports officials, legal practitioners and the academic world. With the increasing public interest in the legal aspects of sports, this collection of documents is a timely and welcome contribution to enhancing the accessibility of basic texts on international sports law and policy.

EU, Sport, Law and Policy

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Adopting a distinctive legal and political analysis, this book argues that the EU is receptive to the sports sectors claims for special treatment before the law. The book investigates the birth of EU sports law and policy by examining significant court decisions, the possibility of exempting sport from EU law, sport and the EU treaty, and more.

The Council of Europe and Sport

During the past decade, the media landscape and the coverage of sports events have changed fundamentally. Sports fans can consume the sports content of their choice, on the platform they prefer and at the time they want. Furthermore, thanks to electronic devices and Internet, content can now be created and distributed by every sports fan. As a result, it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant. Moreover, it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law. This book, illustrates that media law is still needed, even in an era of abundance, to guarantee public's access to live and full sports coverage. Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines, such as legal and public policy, political science, media and communications studies, journalism and European studies. Additionally it contains valuable information and points of view for policy makers, lawyers and international and intergovernmental organisations, active in media development. The book contains an up-to-date analysis and overview of the different competition authorities' decisions and media provisions dealing with the sale, acquisition and exploitation of sports broadcasting rights. Katrien Lefever is Senior Legal Researcher at IBBT - The Interdisciplinary Centre for Law and ICT (ICRI), KU Leuven, Belgium. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports law and policy in the European Union

Sport: Law and Practice, Fourth Edition is the leading legal title covering sports law and practice in the UK, and at the Court of Arbitration for Sport. It serves both as a comprehensive statement of applicable law and precedent, and as a very practical guide to circumnavigating a complex sector. The new edition retains and updates all of the key chapters from previous editions, including the extended sections on challenges to the actions of sports governing bodies, and on anti-doping regulation and enforcement (with an introduction to the new 2021 World Anti-Doping Code). There are important updates to the chapters on Regulating Financial Fair Play, Misconduct, Safeguarding in Sport, the Court of Arbitration for Sport, and Media Rights and Sport. The Fourth Edition also adds brand new chapters dealing with: -Effective sports regulation (including the first ever comprehensive discussions of the 'general

principles of law' applied by CAS panels in determining challenges to sports regulations, as well as of the principles of interpretation of sports regulations). -Best practice in sports governance (describing developments such as the strengthening of the competence and independence of boards and the emergence of independent integrity units). -Data protection law and sport (including discussion of the provisions of the Data Protection Act 2018 that facilitate the sharing of personal data by sports bodies for integrity-related purposes). -Exploiting commercially valuable sports data (explaining how sports rights-holders can fashion commercial agreements to meet the demand for sports data from the betting industry and others). -ESports (the first comprehensive treatment of the legal and practical principles underlying the regulation and commercial exploitation of the increasingly important ESports sector). Readers will also benefit from practice tips, precedent clauses, detailed explanations of key practical issues, and step-by-step analysis. This is an essential title for all sports law practitioners (solicitors and barristers, common law and civil lawyers), sports governing bodies, event organisers, clubs, participants, sports agencies and commercial partners, arbitrators, universities, and students.

New Media and Sport

This book takes a close look at the Court of Arbitration for Sport (CAS), challenging existing claims and answering previously unanswered questions, by considering all of its publicly available decisions, both in its entirety as a body of jurisprudence and on a case-by-case level. It also investigates the actors involved in adjudication before the CAS, both the parties that bring disputes before the CAS and the arbitrators that resolve them, and in so doing establish precedents that govern sports generally. While the book relies upon and includes more traditional legal theory and analysis, it combines this with an empirical analysis of a large portion of the CAS's decisions. Hereby it relies upon and relates to the theory of the development of a transnational legal order in sports, the *lex sportiva*. The publication is targeted at and will benefit those professionally working in or interested in the fields of sports law, arbitration law, transnational law, or empirical legal studies. Johan Lindholm is a Professor of Law at Umeå University in Sweden.

Sport: Law and Practice

This comprehensive collection of leading articles covers legal issues that have arisen out of international sports competition and its management. These papers trace the burgeoning field of international sports law from its origins about a half-century ago, through the course of complex challenges ranging from political boycotts of competition to doping of athletes, corruption, discrimination, players' rights and commercial influences such as broadcast rights. Within a unique institutional framework of national, international, non-governmental and inter-governmental authority, the emerging regime of public law is of fundamental importance not only to the sports industry and bar but, quite obviously, to a global public. This authoritative collection puts particular emphasis on the central role of the Olympic Movement and affiliated sports federations, the regional mechanism of the European Union and the characteristics of the European and North American sports models. The collection, along with an original introduction, will be of interest and value to students, researchers, academics and practitioners interested in international sports law.

The Court of Arbitration for Sport and Its Jurisprudence

The Textbook was prepared in accordance with the Federal State Educational Standard for Higher Education as applied to specialisation 40.03.01 "Jurisprudence" (Bachelor (degree) qualification) and the syllabus of the academic discipline "International Sports Law", approved by the International Law Department of the Kutafin Moscow State Law University in January 2017. The Textbook consists of 17 chapters. They correspond to the themes of the syllabus of the academic discipline. In its General part, the history, object, subjects, sources, special principles of international sports law, the process of regulation of international sports relations at the universal level within the framework of the United Nations, its specialised agencies and programs, at the regional level within the Council of Europe and the European Union, at the bilateral level are considered. The Author makes a corresponding distinction with the object, subjects, sources, special principles of *lex sportiva*, a set of corporate norms elaborated by the International Olympic Committee, the International Paralympic Committee, international and national sports federations. Special attention is paid to the study of ways of resolving sports disputes through arbitration and appeal proceedings in the Court of Arbitration for Sport (CAS), by means of judicial proceedings in the European Court of Human Rights (ECtHR) and the Court of Justice of the European Union (CJEU). The Special Part of the Textbook identifies problem areas

that require additional efforts to implement international legal and corporate regulations: the use of doping in sport, violence and hooligan behaviour of spectators and fans, environmental protection when organising international sports competitions, economic crimes and discrimination in international sports, protection of property rights with regard to television and radio broadcasts of international sports competitions, the use of Olympic symbols, countering threats to a healthy lifestyle. International instruments and acts of the Russian legislation are as of May 2018. The Textbook will be of interest for Bachelor students of law, lecturers of higher education institutions, practicing lawyers, staff members of organizations of the Olympic and Paralympic movements, as well as for all those whose academic interests and practical activities are connected with international law, sports law and *lex sportiva*.

Sports Law

The aim of this book is to provide an account of how the law influences the operation, administration and playing of modern sports. Although the book focuses on legal doctrine it has been written bearing in mind sport's historical, cultural, social and economic context, including the drama and colour of sport's major events and leading personalities. And although it is inevitably very much concerned with elite professional sports it is not dominated by them, and seeks to cover the widest possible range of sports, professional and amateur. Initially, the book addresses practical issues such as the structures of national and international sport, and examines the evolution of the body of law known as 'sports law'. Thereafter three main themes are identified: regulatory; participatory; and financial aspects of modern sport. The regulatory theme is dealt with in chapters considering the manner in which decisions of sports governing bodies may be challenged in the ordinary courts and the development of alternative dispute resolution mechanisms in sport. The participatory theme includes the legal regulation of doping and violence in sport, as well as the broader topic of tortious liability for sporting injuries. The financial theme, reflecting the enhanced commercialisation of sport at all levels, is developed in chapters concerning issues in applied contract and employment law for players and legal matters surrounding the organisation of major sports events. The conclusion summarises modern sport's experience of EU law, pointing the way to the future direction of sports law more generally. While the book is aimed primarily at students, and is designed to cover fundamental and topical areas of sports law (sports law in general; sports bodies and the courts; arbitration in sport; corruption; doping; violence; civil liability; discrimination; the commodification of modern sport; and the likely future of sports law), it should also

prove of wider interest to practitioners, sports administrators and governing bodies; and though focused primarily on UK law it will also appeal to readers in Australia, Canada, New Zealand and the USA.

Sports Law in Italy

This book addresses the most important judicial aspects in relation to the FIFA Dispute Resolution Chamber (DRC), as well as the different categories of disputes, inter alia, the termination of player contracts, the amount of compensation, sporting sanctions, training compensation and the solidarity mechanism. The DRC was established in 2001 by FIFA for the purpose of resolving disputes regarding the international status and transfer of players. Since then the DRC has developed into a major and influential alternative resolution body, with an impressive and everincreasing caseload. In this updated and revised Second Edition the most important decisions of the DRC as of the date of its establishment in 2001 until 2016 are analysed. It is a reference work for those with a legal and financial interest in professional football, such as lawyers, agents, managers and administrators, but is also aimed at researchers and academics. Michele Bernasconi, Attorney-at-law in Zurich, Switzerland, Arbitrator at CAS and President of the Swiss Sports Law Association provided a foreword for the book. Frans M. de Weger is senior legal counsel working for the Dutch Federation of Professional Football Clubs (FBO). In 2015 he was, at the proposal of the European Club Association (ECA), appointed as an arbitrator for the Court of Arbitration for Sport (CAS). As a legal counsel and a CAS arbitrator he is involved in several national and international football-related legal disputes. This book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Ben Van Rompuy and Dr. Antoine Duval. “Frans de Weger’s work on the jurisprudence of the DRC is a “must-have” for anybody dealing with sports law and, in particular, dealing with football issues under the FIFA Regulations on the Status and Transfer of Players.” Massimo Coccia Professor of International Law and Attorney-at-Law in Rome and CAS Arbitrator “Where to go when trying to understand the FIFA Regulations on the Status and Transfer of Players? Now Frans de Weger has the answer with his new version of the much-awaited and needed Jurisprudence of the FIFA Dispute Resolution Chamber.” Juan de Dios Crespo Pérez Sports Lawyer “The second edition of this book, which is systematic and practical at the same time, will surely be of great interest to both specialists active in the world of “football law” and aspiring individuals.” Wouter Lambrecht Attorney-at-law, Head of Legal at the European Club Association, FIFA Dispute Resolution Chamber Member and Mediator at the CAS

Modern Sports Law

FIFA has accepted the jurisdiction of the CAS as from 11 November 2002. This date does not mark the beginning of the arbitration of the CAS in football matters, however it has to be stated, that from this date on football disputes in front of the CAS increased enormously. This book is dedicated to the most important decisions of the CAS in football disputes. These awards are analyzed by experts, practicing all over the world. Most of the authors have been directly involved in the proceedings before the CAS. The commentaries cover a broad spectrum of disputes, inter alia, disputes concerning the contractual stability, protection of young football players, doping, football hooliganism, match fixing, players release, multiple club ownership, player agents and the stays of execution. This book provides a wide range of valuable information and is a useful tool for those whose main concern is professional football, such as sports lawyers, sports managers and sports agents, but also academics and researchers. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

The Jurisprudence of the FIFA Dispute Resolution Chamber

I am very pleased and proud to write the Foreword to this Book on the occasion of the Court of Arbitration for Sport (CAS) having completed its first twenty years of operations. And I warmly congratulate the ASSER International Sports Law Centre and the Editors, Ian Blackshaw, Rob Siekmann and Janwillem Soek – in cooperation with Andrew Gibson, Griffith University, Brisbane, Australia, and Steve Cornelius, University of Johannesburg, South Africa –, on their joint initiative in putting together and publishing this Book. The CAS has come a long way since the idea of establishing it was first mentioned by Juan Antonio Samaranch, the former IOC President. His vision and confidence in its future have been truly vindicated. Since its creation and up to 31 December 2003, 576 cases have been submitted, of which 550 were requests for arbitration and 26 for an advisory opinion. In 2004, there was a sharp rise in the number of cases handled by the CAS and this trend continues apace. Thus, the CAS goes from strength to strength and has a great future, having, in the words of the Swiss Federal Tribunal in its

landmark judgement of 27 May 2003, “built up the trust of the sporting world [and] . . . now widely recognised . . . [as] . . . one of the principal mainstays of organised sport.

Comparative Public Law

This yearbook is a compilation of thematically arranged essays that critically analyse emerging developments, issues, and perspectives across different branches of law. It consists of research from scholars around the world with the view that comparative study would initiate dialogue on law and legal cultures across jurisdictions. The themes vary from jurisprudence of comparative law and its methodologies to intrinsic details of specific laws like memory laws. The sites of the enquiries in different chapters are different legal systems, recent judgements, and aspects of human rights in a comparative perspective. It comprises seven parts wherein the first part focuses on general themes of comparative law, the second part discusses private law through a comparative lens, and the third, fourth and fifth parts examine aspects of public law with special focus on constitutional law, human rights and economic laws. The sixth part engages with criminal law and the last part of the book covers recent developments in the field of comparative law. This book intends to trigger a discussion on issues of comparative law from the vantage point of Global South, not only focusing on the Global North. It examines legal systems of countries from far-east and sub-continent and presents insights on their

working. It encourages readers to gain a nuanced understanding of the working of law, legal systems and legal cultures, adding to existing deliberations on the constituents of an ideal system of law.

La Cour internationale de Justice, l'un des cinq organes principaux de l'Organisation des Nations Unies, et son organe judiciaire principal, est installée à La Haye, loin du Siège de l'ONU, dans la sérénité du Palais de la Paix, don d'Andrew Carnegie à l'idéal de la paix mondiale. Cet ouvrage très bien documenté paraît à l'occasion du jubilé des cinquante ans de la Cour. L'ouvrage comporte douze chapitres, et est préfacé par le Président de la Cour. Avec une riche iconographie, il illustre l'idée du règlement pacifique des différends à travers les âges, qui devait trouver sa consécration lors des conférences de la paix de La Haye. Il évoque la création de la Cour, remontant à l'époque de sa devancière dans l'entre-deux-guerres. Il traite du droit et de la procédure de la Cour internationale de Justice et décrit la composition de la Cour dans sa diversité juridique et culturelle. Des statistiques, la biographie de tous les juges et une bibliographie complètent cet hommage remarquable à un idéal universel et séculaire.

Cyberbiosecurity applies cybersecurity research to the field of biology, and, to a lesser degree, applies biological principles to the field of cybersecurity. As biologists increasingly research, collaborate, and conduct research online, cyberbiosecurity has become crucial to protect against cyber threats. This book provides an overview of cyberbiosecurity through the lens of researchers in academia, industry professionals, and government, in both biology and cybersecurity fields. The book highlights emerging technologies, and identifies emerging threats connected with these technologies, while also providing a discussion of the legal implications involved. This book takes on a multidisciplinary approach, and appeals to both professionals and researchers in the synthetic biology, bioinformatics, and cybersecurity fields.

An Introduction to Public International Law

Over the next 40 years the number of people aged 60+ in the world, many of whom live in developing regions, will grow by 11D4 billion. What will old age be like for them? This original book provides an analysis of links between development, population ageing and older people, challenging some widely held misconceptions. It highlights the complexity of international experiences and argues that the effects of population ageing on development are influenced by policy choices. The book will be of interest to a range of academic disciplines, including economics, gerontology, social policy and development studies as well as policy-makers and practitioners concerned with developing countries.

This book examines the work of the World Trade Organization (WTO), with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals. By adopting an innovative interpretation of the precautionary principle and proportionality analysis, the work offers normative suggestions to develop what the author terms "a constructive bridge of knowledge" between decision-makers, scientists, social experts and expert witnesses, which can support a judicial balance by design rather than by chance. Biotechnology is sometimes regarded as a panacea for modern-day

challenges, such as feeding a growing world population and counteracting climate-change problems, and a means of offering significant economic opportunities. However, biotechnology can present uncertain, though serious, risks to human health and the environment (i.e., biosafety). Trading biotech products magnifies these risks and benefits globally. This book explores the topical, though still under-explored, question of how to find a point of equilibrium between the revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain, though potentially irreversible, technology risks. It offers a thorough analysis of normative, judicial and epistemic issues hindering a reasoned balance between trade and non-trade interests under the WTO. The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty, as well as innovative theoretical contributions. It will be a valuable resource for policymakers working on precautionary governance and management, scholars in the areas of trade law, human rights law and environmental law, law students and practitioners, as well as NGOs working in the field of new technologies, biosafety, sustainability and food safety.

An Introduction to Public International Law

The International Court of Justice is the principal judicial organ of the United Nations and plays a central role in both the peaceful settlement of international disputes and the development of international law. This comprehensive Commentary on the Statute of the International Court of Justice, now in its second edition, analyses in detail not only the Statute of the Court itself but also the related provisions of the United Nations Charter as well as the relevant provisions of the Court's Rules of Procedure. Five years after the first edition was published, the second edition of the Commentary embraces current events before the International Court of Justice as well as before other courts and tribunals relevant for the interpretation and application of its Statute. The Commentary provides a comprehensive overview and analysis of all legal questions and issues the Court has had to address in the past and will have to address in the future. It illuminates the central issues of procedure and substance that the Court and counsel appearing before it face in their day-to-day work. In addition to commentary covering all of the articles of the Statute of the ICJ, plus the relevant articles of the Charter of the United Nations, the book includes three scene-setting chapters: Historical Introduction, General Principles of Procedural Law, and Discontinuation and Withdrawal. The second edition of the Commentary adds two important and instructive chapters on Counter-Claims and Evidentiary Issues. The combination of expert editors and commentators, and their assessment of new developments in the important work of the ICJ, make this a landmark publication in the field of international law.

Since the Intangible Heritage Convention was adopted by UNESCO in 2003, intangible cultural heritage has increasingly been an important subject of debate in international forums. As more countries implement the Intangible Heritage Convention, national policymakers and communities of practice have been exploring the use of intellectual property protection to achieve intangible cultural heritage safeguarding outcomes. This book examines diverse cultural heritage case studies from Indigenous communities and local communities in developing and industrialised countries to offer an interdisciplinary examination of topics at the intersection between heritage and property which present cross-border challenges. Analysing a range of case studies which provide examples of traditional knowledge, traditional cultural expressions, and genetic resources by a mixture of practitioners and scholars from different fields, the book addresses guidelines and legislation as well as recent developments about shared heritage to identify a progressive trend that improves the understanding of intangible cultural heritage. Considering all forms of intellectual property, including patents, copyright, design rights, trade marks, geographical indications, and sui generis rights, the book explores problems and challenges for intangible cultural heritage in crossborder situations, as well as highlighting positive relationships and collaborations among communities across geographical boundaries. Transboundary Heritage and Intellectual Property Law: Safeguarding Intangible Cultural Heritage will be an important resource

for practitioners, scholars, and students engaged in studying intangible cultural heritage, intellectual property law, heritage studies, and anthropology.

This book examines the role of law in Europe at a time when economic policies have become dominant not only on this continent but globally. Can law be seen as a mere infrastructure? Or does it contribute to defining the social and legal order through its own inherent rules? If the second hypothesis is true, what might these rules be, and how may they be identified? Lastly, to what extent can agreeing a definition of the role of law affect the future of Europe? With the Next Generation European Union, the EU has introduced an unprecedented investment plan for economic recovery and resilience. In doing so, it has become the most important financial intermediary on the continent. But is this simply the prelude to a European economic and financial revival, or does it also aim to strengthen the European legal order in social, political, and constitutional terms? This book argues that the role of law in Europe should be to achieve a balanced relationship between freedom and solidarity; encouraging economic competition, but also social cohesion. Analyzing the role of law in the project of European integration, it maintains that law should be more than an infrastructure for finance and economics, showing how it can act as a guide and a binding force to achieve a more balanced relationship between economics, politics, and law. This book will be of interest to scholars in the fields of public law, European law, law and economics, the philosophy of law, legal history, political theory, and political science, as well as others concerned with the future of European integration.

Legal Education in Asia

Tax "justice" has become an increasingly central issue of political debate in many countries, particularly following the cardiac arrest of global financial services in 2008 and the subsequent worldwide slump in trade and production. The evident abuse of tax systems by corporations and rich individuals through tax avoidance schemes and offshore shadow banking is increasingly in the public eye. Above all, the political challenges of recovery and structural reform have raised core issues of burden-sharing and social equity on the agendas of both civil society groups and political elites. Democratic states need tax revenue to fund public goods and combat public "bads" with any degree of legitimacy. The contributions to this book discuss the haphazard evolution of contemporary taxation systems, their contradictory effects in a globalized economy, and the urgency of their reform as a precondition for social justice.

It showcases a wide range of methodologies and approaches, including those inspired by traditional social thought as well as less familiar literature, including computational linguistics, performance theory and economic sociology. The Research Handbook highlights anew the potential contribution of sociological methods and theories to the study of international law, and illustrates their use in the examination of contemporary problems of practical interest to international lawyers."--Publisher's description.

The essays are concise, yet comprehensive, and each essay contains a substantial set of references, which an interested researcher or student could follow up. . . In addition to representing multidisciplinary interactions, this collection encompasses several different perspectives within development economics, so the reader can learn, for example, both about neoclassical approaches and dependency theories in the same volume. This makes the collection unique and all the more valuable. . . This is a very good reference collection, as the individual essays are informative and provide a good overall perspective on the topic that they set out to address. The extensive bibliography at the end of each essay adds further value to this collection. Ashwini Deshpande, *Economic and Political Weekly* These new volumes impress along two dimensions. First, they highlight important connections between economic development and variables such as culture, warfare, and ethnicity, which are sometimes ignored by mainstream economists. Second, they analyze the economic development experience of different regions such as Africa, Latin America, and East Asia. . . a valuable reference for scholars and practitioners in the field. Highly recommended. H.A. Faruq, *Choice* This two-volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field. Authors are drawn from around the world and write on a wide range of topics. After providing an introduction to the subject (by examining issues like the meaning and measurement of development, historical and interdisciplinary approaches, empirical regularities and data problems), the contributors provide a wealth of perspectives on, and analyses of, development economics. They discuss alternative approaches to development, the macroeconomics of growth, factors and sources of economic development (such as capital, labor, entrepreneurship, resources and technology), major sectors of concern (such as agriculture, industry, services and the informal sector) and international issues (such as trade, capital and labor flows and technology transfers). Income distribution and poverty, the state and other institutions, and actual development experiences are explored. The contributors provide analytical contributions, as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives. Scholars, students, policymakers and other development practitioners will all find this comprehensive reference invaluable.

The Statute of the International Court of Justice

The impetus for change in African legal reform is coming primarily from African women themselves, as they respond to their personal and practical experiences with the law. Top-down imposition of norms has not worked; if legal reform is to lead to sustainable equity for women, the voices of these women must be heard. Given that previous efforts to ensure greater equity in personal laws have not been fully successful in eastern African countries, any new legal initiatives must not repeat the mistakes of the past. Law must not again remain merely on the books as a legitimizing tool that reinforces or supports gender discrimination, but must actively protect and guard the interests of both men and women. This paper attempts to draw out some possible lessons from past experience to inform new efforts at legal reform in these countries. It examines the laws related to allocation of economic resources within households in the broader historical, social, and cultural context in some of these countries, and examines the effectiveness of these laws in challenging gender relationships.

The book presents comparative analyses of five elementary mathematics curriculum programs used in the U.S. from three different perspectives: the mathematical emphasis, the pedagogical approaches, and how authors communicate with teachers. These perspectives comprise a framework for examining what curriculum materials are comprised of, what is involved in reading and interpreting them, and how curriculum authors can and do support teachers in this process. Although the focus of the analysis is 5 programs used at a particular point in time, this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general. Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program, in terms of sequencing, the nature of mathematical tasks (cognitive demand and ongoing practice), and the way representations are used. Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics, one another, the teacher, and the textbook around these mathematical ideas, as well as the role of the teacher. In order to examine how curriculum authors support teachers, we analyze how they communicate with teachers and what they communicate about, including the underlying mathematics, noticing student thinking, and rationale for design elements. The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors.

Commonwealth Caribbean Law and Procedure: The Referral Procedure under Article 214 RTC in the Light of EU and International Law is about the referral procedure set out in Article 214 of the Revised Treaty of Chaguaramas (RTC), which Treaty established the Caribbean Community Single Market and Economy (CSME). Article 214 RTC bears clear parallels to Article 267 of the Treaty on the Functioning of the European Union (TFEU), the most important being that that both articles pursue the same objective, i.e. they seek to ensure that CSME law and EU law, respectively, are uniformly applied in all Member States. Although Article 214 RTC was inspired by, and modelled on, Article 267 TFEU, it is not its exact replica. The similarities and differences between Article 214 RTC and Article 267 TFEU are critically assessed in this book. Also, the book: Examines how Article 214 RTC operates in the Caribbean context, how it interacts with other provisions of the RTC, and how it fits into the various national legal systems of the Member States of the CSME. Explores possible reasons why, so far, national courts of the Member States of the CSME have not made any referrals to the Caribbean Court

of Justice (CCJ). Puts Article 214 RTC in a comparative perspective; in particular, the book compares and contrasts it with Article 267 TFEU. Examines some of the aspects of Article 214 RTC in the light of public international law, bearing in mind that under Article 217(1) RTC, the CCJ is required, when exercising its original jurisdiction under Article 211 RTC, to "apply such rules of international law as may be applicable." This is to ensure that the CCJ will not bring in a finding of non liquet on the ground of silence or obscurity of CSME law, which Article 217(2) RTC expressly prohibits. This book will be of interest to academics and students studying CSME law, EU law, and comparative law, as well as judges, lawyers, and governmental and non-governmental organizations from the Caribbean region.

Commonwealth Caribbean Law and Procedure

"Transitions in Caribbean Law: Law-Making, Constitutionalism and the Convergence of National and International Law traces Caribbean legal thought and its development across many areas of law. Issues of administrative, constitutional, corporate and commercial, international, and labour law are explored in the context of the analyses of the Privy Council, the transnational dimensions of law and within the purview of the intrusive role of international law in domestic law. Edited by David S. Berry and Tracy Robinson, Transitions in Caribbean Law is the first legal collection to truly critique the work of the Caribbean Court of Justice alongside that of the Privy Council. Through the examination of well known Caribbean cases, the contributors dispel the myth that Caribbean law is flawed and posit other legal reasoning that reconcile the foundation on which Caribbean Law is based with the unique needs and realities of the Caribbean. "

Tort law is a subject of primary importance in the study and practice of the common law in Caribbean jurisdictions. This work is now well established as the leading text on tort law in the region, and this fifth edition has been updated throughout to incorporate developments in law and legal thinking, including special contributions on medical negligence and the misuse of private information from the Hon Justice Roy Anderson and Dr Vanessa Kodilinye. The accessible writing style and integration of up-to-date material enables students to grasp the salient points and develop a thorough understanding of Tort Law in the Caribbean. Although conceived primarily as a text for the LLB degree courses in Caribbean universities, Commonwealth Caribbean Tort Law is also essential reading for students preparing for the CAPE Law examinations and the various paralegal courses in the region. Legal practitioners will find the book useful as a work of ready reference, and it will also be of interest to those business executives, industrialists, insurance agents and journalists who require some knowledge of this most important area of the law.

Comparative Law Studies

Fully updated and revised to fit in with the new laws and structure in the Commonwealth Caribbean law and legal systems, this new edition examines the institutions, structures and processes of the law in the Commonwealth Caribbean. The author explores: - the court system and the new Caribbean Court of Justice which replaces appeals to the Privy Council - the offshore financial legal sector - Caribbean customary law and the rights of indigenous peoples - the Constitutions of Commonwealth Caribbean jurisdictions and Human Rights - the impact of the historical continuum to the region's jurisprudence including the question of reparations - the complexities of judicial precedent for Caribbean peoples - international law as a source of law - alternative dispute mechanisms and the Ombudsman Effortlessly combining discussions of traditional subjects with those on more innovative subject areas, this book is an exciting exposition of Caribbean law and legal systems for those studying comparative law.

"Developing Countries, including those in the Caribbean, have always contributed significantly to the growth of international law. The establishment of the Caribbean Court of Justice (CCJ) now challenges the frontiers of international law by serving not only as the judicial organ of CARICOM but also as an international judicial tribunal basing its judgments, advisory opinions and orders on rules of international law. The Court also sits as the final Court of Appeal for those Member States that have chosen to adhere to its Appellate Jurisdiction. In The Caribbean Court of Justice: Enhancing the Law of International Organizations, Sheldon McDonald, an expert in international dispute resolution, discusses the role of the CCJ as a judicial organ of CARICOM and the interplay between its original and

appellate jurisdictions. The institutional and jurisdictional distinctiveness of the Court is also analysed together with a discussion and examination of the role of precedent at the international level. "

Transitions in Caribbean Law

The population of the Caribbean territories of the Dutch Kingdom - Aruba, Curaçao, Sint Maarten and Bonaire, Sint Eustatius and Saba - can be described as a strongly "transmigrating population". This means that both domestic and foreign legal practitioners are regularly confronted with a question that can only be answered with the help of the rules of private international law of the Caribbean territories. Identifying these rules is not an easy task: textbooks, journal articles and an overview of relevant (published) recent case law and regulations in this field, are absent. This collection of the written rules of private international law - treaties and domestic regulations - applicable in the Caribbean territories, attempts to fill a part of that gap.

Caribbean instruments on international law

This book is one of the few comprehensive works focusing on the sub-regional institutions in the Latin American and Caribbean region. These organisations and institutions enrich the co-operation at sub-regional level, but, in most cases, are neglected in legal literature. They have mainly economic purposes but they also contribute to new forms of institutional co-operation in other areas, including financial, political and social matters. The volume addresses some of the most representative of these institutions, such as the Mercosur, the Andean Community and sub-regional financial organisations (e.g. Central American Bank for Economic Integration and Andean Development Corporation) as well as new developments including the UNASUR and the Alliance for the Pacific. It provides updated information on the structure and changes of the institutions, and constitutes a valuable resource for those wishing to keep pace with legal developments in the fast-moving world of international institutional law. The book will appeal to a wide audience including researchers and practitioners specialising in international law and international organisations and related disciplines. Marco Odello, JD (Rome), LLM (Nottingham), PhD (Madrid) is a Reader in Law at Aberystwyth University, Wales, UK. Francesco Seatzu, JD (Cagliari), PhD (Nottingham) is Professor of International and European Law at the University of Cagliari, Sardinia, Italy.

Commonwealth Caribbean Tort Law

"Describes the basic rules governing the environment in the jurisdictions of the 15-member states of the Caribbean Community with a particular emphasis on those in the British Commonwealth. This one-of-a-kind coursebook explores relationships between the environment and traditional legal subjects, such as international and constitutional law, contracts, torts, and trusts; and undertakes a detailed examination of such specific topics as town and country planning, environmental impact assessments, pollution regulation, management of wastes, protection of endangered species and habitats, and coastal zone management. Justice Anderson provides a detailed analysis of the relationship between international trade and environmental protection. He also demonstrates how international law is the primary driver of domestic regulation and illustrates its influence on municipal law. This book reflects the policy aspirations of the Caribbean people toward the environment"--Page [4] of cover.

The issues of Law and Policy which affect the Caribbean go far beyond the widespread conception of a sand and sea paradise. There are real, serious and complex issues in the policy making and

The fourth edition of this best-selling book has been thoroughly revised to take into account recent developments in the law in criminal practice and procedure across the region. The only textbook that explores criminal practice and procedure as it relates to the Commonwealth Caribbean, the book clarifies the state law in each of 11 jurisdictions, at the same time making it clear when laws are the same or similar and highlighting where differences among jurisdictions occur. Both statute law and common law are examined in the relevant jurisdictions, which include Trinidad and Tobago, Guyana, Barbados, Jamaica and Grenada amongst others. The impact of statutory changes in the laws are analysed, as well as recent developments in the common law. Throughout the text the statutory law in the Commonwealth Caribbean is compared to similar English legislation, in the light of the analysis of such legislation in English case law. Commonwealth Caribbean Criminal Practice and Procedure is the recommended textbook for all professional law schools in the Commonwealth Caribbean and is used at regional universities as a reference book for criminal justice students. In addition, as the only book that deals specifically with criminal practice and procedure in the regions, it has proved a valuable reference tool for legal practitioners, judicial officers and police officers.

Principles of Caribbean Environmental Law

Bringing together academics and private international lawyers from a wide range of jurisdictions and institutions, this volume explores how private international law can best contribute to the development of the global legal architecture needed to integrate our emerging multicultural world society.

International Courts in Latin America and the Caribbean

The establishment of the Caribbean Court of Justice sees the countries of the Commonwealth Caribbean at an important and exciting judicial crossroads. Debate, often acrimonious, continues over the abolishment of ties to the Judicial Committee of the Privy Council and, increasingly those influencing the debate are a more educated and articulate Caribbean people, insisting on proper governance of the area's public bodies. This new book analyzes judicial review, a mechanism for achieving public justice, through emerging case law in the hope that it will cast light on the jurisprudential evolution of Caribbean society in the twenty-first century. Bringing together cases and materials on judicial review in the Caribbean for the first time, this book examines what judicial review is, before going on to discuss the grounds, obstacles and conduct within the judicial review process. It concludes by examining the future of judicial review and justice more generally in the Caribbean. Legal professionals in the Caribbean will find it a useful and comprehensive reference tool.

Private International Family Law

This book compares the two golden ages of private international law (PIL): the first is the era of Story and Savigny in the nineteenth century, while the second comprises the last fifty years. The period between 1970 and 2020 has been one of rapid changes and dense legislative responses, exemplified by the adoption of over one hundred national PIL codifications and almost as many international or regional conventions and regulations. These instruments provide a rich source for this book's incisive and instructive comparisons and a fertile ground for a reliable assessment of the progress of PIL as a discipline. This book skillfully uncovers and meticulously documents the gradual—and largely unnoticed—transition of PIL from the idealism of the nineteenth century to the pragmatic eclecticism and pluralism of the twenty-first century.

Legal Problems of Caribbean Integration

Is Private International Law (PIL) still fit to serve its function in today's global environment? In light of some calls for radical changes to its very foundations, this timely book investigates the ability of PIL to handle contemporary and international problems, and inspires genuine debate on the future of the field.

This book is a worldwide survey of legal aid containing more than seventy responses from ministries of justice, attorney generals, law societies, bar councils and individual lawyers to a detailed questionnaire. The results, set out here in summary form, are probably the most complete survey of its kind since the Lane and Hillyard edition of the Directory in 1985. The Editor of The New International Directory of Legal Aid, former legal aid solicitor Peter Soar, says: 'In preparing this new edition I have learnt from previous users that the Directory is a valuable aid for Legal Aid Boards and law schools as well as individual lawyers.' In these pages you will find the ground work of legal aid systems in some of the most diverse legal jurisdictions from the Common Law countries of England and the Commonwealth to those which employ the approach of the Napoleonic Code. Here are systems adapted to the needs of the inhabitants of Caribbean islands, central European and Baltic states, emerging African peoples, the successors to ancient Indian empires, and countries of the Pacific Rim. The different forms of legal aid are of interest to practitioners and academics but the claims of the book go further than that. Just and fair societies depend on the maintenance of the rule of law. If the legal system, and in the last resort, the courts themselves are not within the reach of all citizens then talk of their rights is empty. If poor, weak, or powerless members of society are denied access to the courts because of lack of means, or if that access depends on the willingness of some lawyers to undertake cases pro bono, it is difficult to argue that in that state human rights are any more than forms rather than reality. If lawyers themselves exchange their independence for involvement in the very process of litigation (so-called 'no win, no fee'), can it be said that freedom is not compromised? Here the reader can judge what in his or her opinion is the standing in these debates of each of the jurisdictions surveyed, with the help of editorial comments and the Editor's Introduction.

Diversity and Integration in Private International Law

Transport and communications technologies have made international disputes common, and a frequent practical issue is which country or countries have jurisdiction to resolve the dispute. Existing literature on private international law tends to emphasize choice of law rather than jurisdiction. Cases tend to show that the practical significance of Jurisdiction has yet to be appreciated. This groundbreaking book fills in these gaps and offers a critical analysis of the principles and the theoretical foundations applied to resolve private international jurisdictional disputes and of the manner in which those principles are applied in practice by: Describing the context in which international jurisdiction disputes are determined Explaining and critically analysing the principles of jurisdiction Explaining and critically analysing the manner in which the principles are applied Identifying the interests which motivate principles and the courts' application of the principles Recommending reforms to the principles by demonstrating that the existing principles of jurisdiction are flawed, and ought to be reformed by taking into account the law's objectives, defined by relevance to state and private interests.

Private International Law

In an increasingly globalized and digitized world, transactions, communications and data flow freely across national borders. When lawsuits arise as a result of those trans-border events, the question of which court or courts have jurisdiction and can provide the appropriate forum becomes critical. This two-volume collection provides a survey of personal jurisdiction across both time and legal systems. It includes articles ranging from the early 20th century to present day and to the problems created by jurisdiction in cyberspace. It also examines the jurisdictional premises of major common law countries and those in the civilian tradition. With an original introduction by the editor, these comprehensive volumes will appeal to scholars and practitioners alike.

The Elgar Companion to the Hague Conference on Private International Law

This book highlights the importance of optional choice of court agreements, and the need for future research and legal development in this area. The law relating to choice of court agreements has developed significantly in recent years, reflecting their increased use in practice. However, most recent legal developments concern exclusive choice of court agreements. In comparison, optional choice of court agreements, also called permissive forum selection clauses and non-exclusive jurisdiction clauses, have attracted little attention from lawmakers or commentators. This collection is comprised of 19 National Reports, providing a critical analysis of the legal treatment of optional choice of court agreements, including asymmetric choice of court agreements, under national laws as well as under multilateral instruments. It also includes a General Report offering an overview of this area of the law and a synthesis of the findings of the national reporters. The contributions to this collection show that the legal treatment of optional choice of courts differs between legal systems. In some countries, the law on the effect of optional choice of court agreements is at an early stage in its development, whereas in others the law is relatively advanced. Irrespective of this, the national reporters identify unresolved issues with the effect of optional choice of court agreements, where the law is unclear or the cases are conflicting, demonstrating that this topic warrants greater attention. This book is of interest to judges, legislators, lawyers, academics and students who are concerned with private international law and international civil procedure.

Private International Law in Australia

Countries that have a domestic final appellate court have established a judicial institution over which they have control as part of the policymaking governing structure and how they view other existing and emerging extraterritorial courts will be influenced by their perception of the court and the role it will play when the policies of the governing coalition are challenged. This book analyzes that phenomenon in terms of the broader construction and understanding of the state in the era of international law, legal tribunals, and globalization. By zooming in on the Judicial Committee of the Privy Council (JCPC), an ancient colonial court, Harold Young examines how the Caribbean Community, specifically, the 15 former British colonies comprising the Caribbean Basin are navigating their changing political environments and transitioning to its own extraterritorial court, the Caribbean Court of Justice. Using historical reviews, descriptive analyses, and statistical methodologies Young finds that the choice to retain the JCPC at independence is influenced by the colonial experience, the length of colonial rule, and how deeply embedded the JCPC is on the governing structures of the new state.

The New International Directory of Legal Aid

The International Investment Law system (IIL) is the result of a colonial project within a capitalist system that has been influenced by developmentalism discourse and neoliberal ideology. This book shows how it has become an instrument that facilitates forms of systemic violence against so called "Third World" countries.
