This volume will mark the first time Johannes Vermeer's iconic painting will be seen in the Southeast. The painting headlines the exhibition, which highlights the artistic genius of Dutch Golden Age painters, including Vermeer, Rembrandt van Rijn, Frans Hals and Jan Steen, through the presentation of more than 35 exceptional works. Through landscapes and portraits, this book will explore the idea that Dutch artists more readily embraced paintings of everyday subjects than their southern European contemporaries, focusing on capturing commonplace scenes of daily life. Dutch artists not only recorded representations of the domestic interior, still lifes and boisterous crowds, but often imbued these scenes with moral undertones and humorous, sarcastic wit. (Exhibition: High Museum of Art, Atlanta, USA (22.6.-29.9.2013)).

A wildly entertaining and surprisingly educational dive into art history as you've never seen it before, from the host of the beloved ArtCurious podcast We're all familiar with the works of Claude Monet, thanks in no small part to the ubiquitous reproductions of his water lilies on umbrellas, handbags, scarves, and dorm-room posters. But did you also know that Monet and his cohort were trailblazing rebels whose works were originally deemed unbelievably ugly and vulgar? And while you probably know the tale of Vincent van Gogh's suicide, you may not be aware that there's pretty compelling evidence that the artist didn't die by his own hand but was accidentally killed--or even murdered. Or how

about the fact that one of Andy Warhol's most enduring legacies involves Caroline Kennedy's moldy birthday cake and a collection of toenail clippings? ArtCurious is a colorful look at the world of art history, revealing some of the strangest, funniest, and most fascinating stories behind the world's great artists and masterpieces. Through these and other incredible, weird, and wonderful tales, ArtCurious presents an engaging look at why art history is, and continues to be, a riveting and relevant world to explore.

Vermeer's Women

Johannes Vermeer's luminous paintings are loved and admired around the world, yet we do not understand how they were made. We see sunlit spaces; the glimmer of satin, silver, and linen; we see the softness of a hand on a lute string or letter. We recognize the distilled impression of a moment of time; and we feel it to be real. We might hope for some answers from the experts, but they are confounded too. Even with the modern technology available, they do not know why there is no evidence of any preliminary drawing; why there are shifts in focus; and why his pictures are unusually blurred. Some wonder if he might possibly have used a camera obscura to capture what he saw before him. The few traces Vermeer has left behind tell us little: there are no letters or diaries; and no reports of him at work. Jane Jelley has taken a new path in this detective story. A painter herself, she has worked with the materials of his time: the cochineal insect and lapis lazuli; the sheep bones, soot, earth, and rust. She shows us how painters made their pictures layer by layer; she investigates old secrets; and hears travelers' tales. She explores how Vermeer could have used a lens in the creation of his masterpieces. The clues were there all along. After all this time, now we can unlock the studio door, and catch a glimpse of Vermeer inside, painting light.

Art historians have long speculated on how Vermeer achieved the uncanny mixture of detached precision, compositional repose, and perspective accuracy that have drawn many to describe his work as "photographic." Indeed, many wonder if Vermeer employed a camera obscura, a primitive form of camera, to enhance his realistic effects? In Vermeer's Camera, Philip Steadman traces the development of the camera obscura--first described by Leonardo da Vinci--weighs the arguments that scholars have made for and against Vermeer's use of the camera, and offers a fascinating examination of the paintings themselves and what they alone can tell us of Vermeer's technique. Vermeer left no record of his method and indeed we know almost nothing of the man nor of how he worked. But by a close and illuminating study of the paintings Steadman concludes that Vermeer did use the camera obscura and shows how the inherent defects in this primitive device enabled Vermeer to achieve some remarkable effects--the slight blurring of image, the absence of sharp lines, the peculiar illusion not of closeness but of distance in the domestic scenes. Steadman argues that the use of the camera also explains some previously unexplainable qualities of Vermeer's art, such as the absence of conventional drawing, the pattern of underpainting in areas of pure tone, the pervasive feeling of reticence that suffuses his canvases, and the almost magical sense that Vermeer is painting not objects but light itself. Drawing on a wealth of Vermeer research and displaying an extraordinary sensitivity to the subtleties of the work itself, Philip Steadman offers in Vermeer's Camera a fresh perspective on some of the most enchanting paintings ever created.

From ancient Egypt to the Tudors to the Nazis, the film industry has often defined how we think of the past. But how much of what you see on the screen is true? And does it really matter if filmmakers just make it all up? Picking her way through Hollywood's version of events, acclaimed historian Alex von Tunzelmann sorts the fact from the fiction. Along the way, we meet all our favourite historical characters, on screen and in real life: from Cleopatra to Elizabeth I, from Spartacus to Abraham Lincoln, and from Attila the Hun to Nelson Mandela. Based on the long-running column in the Guardian, Reel History takes a comic look at the history of the world as told through the movies - the good, the bad, and the very, very ugly.

OILS. Equally suitable for spontaneous work as well as for large ambitious studio paintings, oils are perhaps the most versatile of all paints. And yet for many painters, their use is shrouded in mystery, while others regard them as "difficult" medium. This book, now back by popular demand, sets out to show that, with proper instruction, nothing could be further from the truth. The key to mastery of the medium is a full understanding of the constituents of oil painting - binders, dilutents, varnishes, mediums, driers - and their properties, all of which are clearly explained and illustrated with over 200 colour images, backed up by comprehensive information on supports, equipment and techniques.
