Lost Knowledge of the Ancients

Thinkers at the forefront in alternative theories on history, the origins of civilization, technology, and consciousness • With contributions by Graham Hancock, Robert Bauval, Mark Booth, Richard Hoagland, Robert Schoch, John Anthony West, and others • Topics range from quantum philosophy and paranormal phenomena to the secret history of NASA, instant polar shifts, and ancient Martian civilizations • Explores where our present time fits into the cycle of human existence A revolution of thought is under way in our world, fostered by decades of research and well-documented evidence by alternative theory pioneers such as Graham Hancock, John Anthony West, Robert Bauval, and Robert Schoch. These provocative, cutting-edge scholars now represent a direct challenge to the academic establishment as the paradigms of science and history shift and their ideas gain acceptance. Representing the latest, often controversial findings in scientific and historical research, this anthology of essays commissioned by Graham Hancock, bestselling author of Fingerprints of the Gods, covers the forefront in alternative theories on history, the origins of civilization, technology, and consciousness with topics ranging from quantum philosophy and paranormal phenomena to the ancient use of electromagnetism, the effect of cosmic rays on human evolution, and NASA's cover-up of ancient Martian civilizations. Recognizing that many recent discoveries are actually rediscoveries of lost knowledge from past civilizations, these authors seek to understand where, within the bigger picture of human knowledge, our present time fits into the cycle of human existence.

Hidden History

An archaeologist explores history's most fascinating enigmas, from the ancient Druids to the mysteries of the Mayan calendar and the lost city of Atlantis. Across thousands of years of history, so-called lost civilizations still speak to us through their artifacts and architecture. In Hidden History, archaeologist Brian Haughton fills the gap between archaeology and alternative history using the latest available data

and a common sense, open-minded approach. Divided into three sections, this expertly researched volume shares the secrets of Mysterious Places, Unexplained Artifacts, and Enigmatic People. Haughton introduces readers to the greatest mysteries of the ancient world, from the labyrinthine palace of Knossos on Crete to the pyramids of Egypt, the remote jungle temples of Peru, and the megalithic mystery of Stonehenge. But he also goes further to explore historical puzzles like the Coso Artifact, the possibility of ancient flight, and the Voynich Manuscript, as well as mysterious peoples from the Magi and the Druids to the Knights Templar and the Green Children. With more than 50 photographs and illustrations, this is the ideal reference work for those interested in the archaeology of these great enigmas.

Mysteries of the Ancient Past

Cutting-edge thinkers on the origins of civilization, the Giza pyramids, pre-Columbian and early America, and the power of human consciousness • With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and others • Topics range from the origins of the Inca to the architecture of the Giza plateau to unified theories of physics and consciousness • Companion volume to *Lost Knowledge of the Ancients* As we pull back the curtain from the European version of history, we discover the vast depth of knowledge of our ancient ancestors--knowledge that not only dispels our image of them as primitive peoples but also corresponds with the forefront of modern science, philosophy, and spirituality. With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and other provocative, cutting-edge thinkers, this collection of essays commissioned by Graham Hancock, bestselling author of *Fingerprints of the Gods*, represents the latest, often controversial findings in alternative science, history, archaeology, and consciousness research. Covering topics ranging from the origins of the Inca and the secrets hidden in Vedic literature, to the architecture of the Giza pyramids and the Sphinx, to unified theories of physics and consciousness, this book shows how, by recovering our lost history, we too can experience the higher consciousness and advanced wisdom of the ancients.

Wisdom of the Ancients

THE PERFECT READ FOR TROUBLED TIMES From the bestselling author of *The Story of the British Isles in 100 Places* comes this inspiring and beautifully written meditation on the wisdom inherited from our ancestors. For all we have gained in the modern world, simple peace of mind is hard to find. In a time that is increasingly fraught with complexity and conflict, we are told that our wellbeing relies on remaining as present as possible. But what if the key to being present lies in the past? In *Wisdom of the Ancients*, Neil Oliver takes us back in time, to grab hold of the ideas buried in forgotten cultures and early civilizations. From Laetoli footprints in Tanzania to Keralan rituals, stone circles and cave paintings, Oliver takes us on a global journey through antiquity. A master storyteller, drawing on immense knowledge of our ancient past, he distils this wisdom into twelve messages that have endured the test of time, and invites us to consider how these might apply to our lives today. The result is powerful and inspirational, moving and profound.

Seed of Knowledge, Stone of Plenty

Burke and Halbert present the scientific evidence behind their startling, original theory: ancient peoples constructed temples, mounds, and megaliths to increase the fertility of crops. These peoples used an ancient technology, only now rediscovered.

The Golden Thread of Time

Crichton has discovered that the most important icon in Christian faith is not just what it seems to be and that the cross really was the most highly sophisticated and practical mathematical instrument ever devised by ancient Man. Having patented the working cross, Crichton then went on to discover one in the Great Pyramid at Giza proving that the cross is older than the pyramid and that the pyramid could not exist without the cross. Making an investigative voyage from the pre Ice Age peoples to the Free Masons of the present day, Crichton uncovers the mysterious and often tragic past of the real cross. This forgotten knowledge has been lost for over 2000 years reveals the true nature of ancient wisdom exposing the design and use of stone circles and pyramids. Crichton explains the meaning of the Serpent, the number of the Beast, the Vine of life at finally proves that ancient sailors really were able to cross the oceans of the world long before Columbus. Crichton goes on to show how Astrology and the Zodiac were invented and how the ancients used this knowledge to prophesy the

future and understand the very nature of Time itself. Using reason and commonsense, this well written and researched work exposes the lost knowledge of the most powerful Magicians to ever walk our planet.

Lost Technologies of Ancient Egypt

A unique study of the engineering and tools used to create Egyptian monuments • Presents a stone-by-stone analysis of key Egyptian monuments, including the statues of Ramses II and the tunnels of the Serapeum • Reveals that highly refined tools and mega-machines were used in ancient Egypt From the pyramids in the north to the temples in the south, ancient artisans left their marks all over Egypt, unique marks that reveal craftsmanship we would be hard pressed to duplicate today. Drawing together the results of more than 30 years of research and nine field study journeys to Egypt, Christopher Dunn presents a stunning stone-by-stone analysis of key Egyptian monuments, including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet. His modern-day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments in prehistoric times. Using modern digital photography, computer-aided design software, and metrology instruments, Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them. His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other, and his examination of the mysterious underground tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet. Providing never-before-seen evidence in the form of more than 280 photographs, Dunn's research shows that while absent from the archaeological record, highly refined tools, techniques, and even mega-machines must have been used in ancient Egypt.

The Lost Civilization Enigma

An examination of archaeological controversies, with arguments showing evidence of prehistoric civilizations not recorded as part of human history. Are history books giving us the whole story? Or is civilization far more complex and older than we have been taught? Our school textbooks barely mention the 6,000-year-old Sumerian civilization, yet the latest archaeological findings at sites such as Jericho and, most recently, Gobekli Tepe in Turkey have been dated to 10,000 BC. Civilization goes back at least another 10,000 years, if we are willing to believe what our ancestors themselves claimed. The Lost Civilization Enigma reveals the truth about: Lost magnitudes to known cultures, such as the Bosnian Pyramids and the civilization of "Old Europe." The fabled lost "golden" cities of South America and the Amazon, which are slowly being rediscovered. Fascinating examples of lost technology, such as the Antikythera Device. Atlantis and the fact that it was a real civilization. Analyzing the historical and archaeological record, best-selling author Philip Coppens demonstrates that there is substantial evidence that civilization is far older, far more advanced, and far more special than is currently accepted. Clearly, our history books have left out a great deal!

Lost Knowledge and Forbidden Secrets in Ancient Egypt

We are not including in our history the stories of Herodotus and certain other writers who deliberately chose fables over facts and spun yarns for amusement only. We will, however, outline what the priests of Egypt wrote in their sacred records, which we have examined minutely and thoroughly. The author describes an arcane doctrine believed lost to time. It may be based on events that occurred more than 3,000 years ago, but Khaemwas still evokes the mystic heritage of Egypt. Traditional spiritual practices have always given people insight into their environments and allowed them to live harmoniously with them despite hardships that can only be imagined. Despite advancements in science and technology, we do not seem to be as equipped in the modern age. Undoubtedly, this is why we look to past cultures such as Egypt for the elusive insights and powers we miss. We are like Khaemwas in many ways. We want to comprehend the mysteries of daily life and discover the source of all wisdom. Egypt's mystic heritage continues to attract our attention for these reasons. So many ancients spoke of a legacy. What is it? Egyptian legends freely circulated among travelers, as noted by the Greek historian Diodorus Siculus (60 B.C.E.). Furthermore, the temples and tombs were regularly documented with similar stories. Some legends spoke of their gods, royal figures, sages, and adventurers who embodied the natural and supernatural forces of the world around them. A great deal of the information was gleaned from ancient texts. Yet they differed from myths of other cultures, including Greek myths, which viewed it as a symbol of natural phenomena or metaphor for the universe rather than a factual narrative. Ancient

Egyptians were not so rigid in their philosophical thinking; they made no distinction between myth and legend. Chronicles they inherited from Antiquity were believed to be actual events, either during a historical time when their gods inhabited the Earth or in a dimension they called "timeless time," when human beings had direct access to divine powers. Because legends gave meaning and purpose to the past, present, and future, they were vital and practical.

Disclosure

After the Great Flood, many of the Annunaki left and built a new home on the neighbouring planet: Mars. But their descendants remained on Earth and fell into the darkness of ignorance and superstition. The ancient knowledge was lost. In our modern times, the Annunaki reach out to us again, they have made contact, and they talk to us through the pages of this book. And they wish to help us, if only we let them! Like any Human on earth, they love, and fight, and dream, and they make errors. But they live longer. Much longer. Today, their hieratic, almost mystical thinking clashes with the rational and down-to-earth attitude of the Humans. Misunderstandings are inevitable. And the Extra-terrestrials are bringing gifts, even though the military of two powerful nations think of them as enemies and fire missiles at them. The situation is explosive. Literally.

Technology of the Gods

Technology of the Gods lays out the mind-bending evidence that long-lost civilizations had attained and even exceeded our "modern" level of advancement. Westerners have been taught that humankind has progressed along a straight-line path from the primitive past to the proficient present, but the hard, fast evidence (literally written in stone!) proves that the ancients had technologies we cannot even replicate today.

Feats and Wisdom of the Ancients

Examines what is known of ancient knowledge in the areas of healing, inventions, engineering, art, astronomy, sports, and explorations.

Ancient Knowledge Networks

Ancient Knowledge Networks is a book about how knowledge travels, in minds and bodies as well as in writings. It explores the forms knowledge takes and the meanings it accrues, and how these meanings are shaped by the peoples who use it. Addressing the relationships between political power, family ties, religious commitments and literate scholarship in the ancient Middle East of the first millennium BC, Eleanor Robson focuses on two regions where cuneiform script was the predominant writing medium: Assyria in the north of modern-day Syria and Iraq, and Babylonia to the south of modern-day Baghdad. She investigates how networks of knowledge enabled cuneiform intellectual culture to endure and adapt over the course of five world empires until its eventual demise in the mid-first century BC. In doing so, she also studies Assyriological and historical method, both now and over the past two centuries, asking how the field has shaped and been shaped by the academic concerns and fashions of the day. Above all, Ancient Knowledge Networks is an experiment in writing about 'Mesopotamian science', as it has often been known, using geographical and social approaches to bring new insights into the intellectual history of the world's first empires.

Ancient Knowledge - Ancient Know-how - Ancient Reasoning

Imagine: A Flatter Earth 40 days of steady, pouring rain. Hundreds of volcanoes exploding all at once. Thousands of new, large springs gushing out huge amounts of water. It is difficult for a human to believe that there was a greater civilization before our current civilization on this planet. It is even more difficult for a human to believe that they were destroyed due to mans wickedness and the corruption. Noah's ark--The World Before the Flood--Genesis Account of Creation--Ancient Maps--Ancient Aircraft--Evidence of Men of Giant Stature--What the Bible Says About Giants--Fallen Angels Giants of Genesis 6:4--Who Built the Great Pyramid of Giza--Ancient Aliens Were Fallen Angels--Ghost are Really Fallen Angels--Ancient Atomic Knowledge.

The Lost Ancients

Introducing the book that governments and mainstream academia donat want you to see. Evidence of Lost Ancient Civilizations: Case Closed is the ultimate reference guide for anyone interested in learning

the true, unfiltered history of ancient civilization and of mankind's earliest origins. This definitive resource guide uniquely presents and explores evidence not included in conventional history or science textbooks. Revealing evidence consisting of compelling eyewitness accounts, media reports, scientific journal articles, as well as indisputable physical evidence, has never been made available to the general public. You will see by the overwhelming shocking evidence and data presented throughout this book it is apparent that modern science and history have been offering a less-than-accurate account of evolution and the origins of mankind on Earth. The basic questions this book attempts to answer are: Where did we come from? What is the true history of mankind? Where will the truth lead us? What humanity may first discover from this explosive ancient evidence may shake the foundations of established world order and religion, and will certainly be difficult to comprehend or rationalize. However, what we may learn from our forgotten past could guide us in determining the direction of our future.

Evidence of Lost Ancient Civilizations

• Reveals evidence of advanced ancient technology, anomalous ancient maps, time travel, crystal science, ancient Armageddon, and Atlantis in the Bible • Explores the true age of the Sphinx, the Stone Age high-tech found at Gobekli Tepe, the truth of Rapa Nui (Easter Island), the Zep Tepi monuments of Egypt, the mysteries of the Gulf of Cambay, and what lies beneath the ice of Antarctica • Examines the advanced knowledge of the ancients and how the search for Atlantis and other lost worlds reflects the search for the lost soul of humanity We live within the ruins of an ancient civilization whose vast size has rendered it invisible. Remembered in myth as Atlantis, Lemuria, or other lost world archetypes, the remains of this advanced civilization have lain buried for millennia beneath the deserts and oceans of the world, leaving us many mysterious and inexplicable clues. Investigating the perennial myth of a forgotten fountainhead of civilization, J. Douglas Kenyon presents extensive physical and spiritual evidence of a lost great culture, the collective amnesia that wiped it from planetary memory, and the countless ways ancient catastrophes still haunt modern civilization. He explores evidence of advanced ancient technology, anomalous ancient maps, extraterrestrial influence, time travel, crystal science, and the true age of the Sphinx. He examines evidence of Atlantis in the Bible and ancient Armageddon, the Stone Age high-tech found at Gobekli Tepe, the truth of Rapa Nui (Easter Island), the Zep Tepi monuments of Egypt, the mysteries of the Gulf of Cambay, and what lies beneath the ice of Antarctica. He looks at extinction events, Earth's connection with Mars, and how our DNA reveals that humanity has had enough time to evolve civilization and lose it more than once. Exploring the advanced esoteric and spiritual knowledge of the ancients, Kenyon shows that the search for Atlantis and other lost worlds reflects the search for the lost soul of humanity. Drawing upon Velikovsky's notion of a species-wide amnesia caused by the trauma of losing an entire civilization, he reveals how the virtual ruins of a lost history are buried deep in our collective unconscious, constantly tugging at our awareness. As Kenyon reveals, by overcoming "the Great Forgetting," humanity can find its way out of the haunted labyrinth in which we find ourselves lost today and rediscover the heights of spiritual and technological advancement of our ancient ancestors.

Ghosts of Atlantis

An increasing number of historical and archaeological finds made around the world have been classified as out-of-place artifacts (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples. Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.

Secrets of the Lost Races

In this astute mix of cultural critique and biblical studies, John H. Walton presents and defends twenty propositions supporting a literary and theological understanding of Genesis 1 within the context of the ancient Near Eastern world and unpacks its implications for our modern scientific understanding of origins. Ideal for students, professors, pastors and lay readers with an interest in the intelligent design controversy and creation-evolution debates, Walton's thoughtful analysis unpacks seldom appreciated aspects of the biblical text and sets Bible-believing scientists free to investigate the question of origins. The books in the Lost World Series follow the pattern set by Bible scholar John H. Walton, bringing

a fresh, close reading of the Hebrew text and knowledge of ancient Near Eastern literature to an accessible discussion of the biblical topic at hand using a series of logic-based propositions.

The Lost World of Genesis One

A guide to ancient accomplishments and inventions unearths the origins of modern creations, including computers in ancient Greece, plastic surgery in India in the first century B.C., and a postal service in medieval Baghdad

Ancient Inventions

The cultural battle known as the Quarrel of the Ancients and Moderns served as a sly cover for more deeply opposed views about the value of literature and the arts. One of the most public controversies of early modern Europe, the Quarrel has most often been depicted as pitting antiquarian conservatives against the insurgent critics of established authority. *The Shock of the Ancient* turns the canonical vision of those events on its head by demonstrating how the defenders of Greek literature—rather than clinging to an outmoded tradition—celebrated the radically different practices of the ancient world. At a time when the constraints of decorum and the politics of French absolutism quashed the expression of cultural differences, the ancient world presented a disturbing face of otherness. Larry F. Norman explores how the authoritative status of ancient Greek texts allowed them to justify literary depictions of the scandalous. *The Shock of the Ancient* surveys the diverse array of aesthetic models presented in these ancient works and considers how they both helped to undermine the rigid codes of neoclassicism and paved the way for the innovative philosophies of the Enlightenment. Broadly appealing to students of European literature, art history, and philosophy, this book is an important contribution to early modern literary and cultural debates.

The Shock of the Ancient

Many previously published works on the individual subjects of Lemuria and Atlantis are outdated and lack current academic and scientific findings. *The Ancients: Investigations into the Lost Civilizations of Lemuria and Atlantis* presents an analysis of information along an established historical timeline. This new research interlaces the sequence of events with esoteric elements: concepts that challenge our conceptual view of human history. Using a historical perspective, the author examines ethnographical and early written accounts related to the myths and legends of Lemuria and Atlantis, in an anthropological and archaeological context. The historical context that is presented relies on established scientific theories and obscure esoteric perspectives with the aim of bringing into light new possibilities. With a multi-cultural background consisting of American Indian and European-Spanish decent (or Mestizo), the author offers new perspectives related to stories of these mysterious and ancient civilizations.

The History of Many Memorable Things Lost, Which Were in Use Among the Ancients

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. Graham Hancock is featured in *Ancient Apocalypse*, a Netflix original docuseries. "A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought."—Kirkus Reviews In *Fingerprints of the Gods*, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking

number one bestseller in Britain, Fingerprints of the Gods contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And Fingerprints of God tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. “Readers will hugely enjoy their quest in these pages of inspired storytelling.”—The Times (UK)

Fingerprints of the Gods

Behind the great Himalayan range, there lies all-seeing, all-knowing power and enlightenment. It is a way of life that may now be destroyed for all time, a spiritual culture with roots in the ancient world, the remote lamaseries of Tibet. It is here that T. Lobsang Rampa journeyed on the road to self-awareness, to these age-old repositories of wisdom -- where the Lamas learn the meaning of life and death, where the mysterious relationship between the mind and the brain is uncovered, where the secrets of hypnotism, telepathy, clairvoyance, and reincarnation are a part of daily life. Here too Rampa learned power -- but not for abuse or misuse. For the power of supreme enlightenment and universal knowledge is only offered to a chosen few, to those introduced to the strange and exciting world of . . . THE CAVE OF THE ANCIENTS

The Lost Solar System of the Ancients Discovered, Volume 2 - Scholar's Choice Edition

A New York Times Notable Book Boldly challenging conventional wisdom, acclaimed science writer and Omni magazine cofounder Dick Teresi traces the origins of contemporary science back to their ancient roots in this eye-opening and landmark work. This innovative history proves once and for all that the roots of modern science were established centuries, and in some instances millennia, before the births of Copernicus, Galileo, and Newton. In this enlightening, entertaining, and important book, Teresi describes many discoveries from all over the non-Western world—Sumeria, Babylon, Egypt, India, China, Africa, Arab nations, the Americas, and the Pacific islands—that equaled and often surpassed Greek and European learning in the fields of mathematics, astronomy, cosmology, physics, geology, chemistry, and technology. The first extensive and authoritative multicultural history of science written for a popular audience, Lost Discoveries fills a critical void in our scientific, cultural, and intellectual history and is destined to become a classic in its field.

Lost Discoveries

*****THE SUNDAY TIMES TOP TEN BESTSELLER***** 'Hancock's books provide a fascinating, alternative version of prehistory. America Before, detailed and wide-ranging, turns what was myth and legend into a new story of the past.' Daily Mail Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Graham Hancock, the internationally bestselling author and television presenter, has made it his life's work to find out -- and in America Before, he draws on the latest archaeological and DNA evidence to bring his quest to a stunning conclusion. We've been taught that North and South America were empty of humans until around 13,000 years ago - amongst the last great landmasses on earth to have been settled by our ancestors. But new discoveries have radically reshaped this long-established picture and we know now that the Americas were first peopled more than 130,000 years ago - many tens of thousands of years before human settlements became established elsewhere. Hancock's research takes us on a series of journeys and encounters

with the scientists responsible for the recent extraordinary breakthroughs. In the process, from the Mississippi Valley to the Amazon rainforest, he reveals that ancient 'New World' cultures share a legacy of advanced scientific knowledge and sophisticated spiritual beliefs with supposedly unconnected 'Old World' cultures. Have archaeologists focussed for too long only on the 'Old World' in their search for the origins of civilization while failing to consider the revolutionary possibility that those origins might in fact be found in the 'New World'? America Before: The Key to Earth's Lost Civilization is the culmination of everything that millions of readers have loved in Hancock's body of work over the past decades, namely a mind-dilating exploration of the mysteries of the past, amazing archaeological discoveries and profound implications for how we lead our lives today.

America Before: The Key to Earth's Lost Civilization

Graham Robb's The Ancient Paths will change the way you see European civilization. Inspired by a chance discovery, Robb became fascinated with the world of the Celts: their gods, their art, and, most of all, their sophisticated knowledge of science. His investigations gradually revealed something extraordinary: a lost map, of an empire constructed with precision and beauty across vast tracts of Europe. The map had been forgotten for almost two millennia and its implications were astonishing. Minutely researched and rich in revelations, The Ancient Paths brings to life centuries of our distant history and reinterprets pre-Roman Europe. Told with all of Robb's grace and verve, it is a dazzling, unforgettable book.

The Ancient Paths

Navigate your way around the prehistoric world with the book. This brilliant book is an investigation into the original and ages-old knowledge nurtured by priests, shamans and occultists from the earliest times. Dissatisfied with theories of 'Gods from Outer Space' and 'lost Atlantis', the author was still convinced that the Ancient Wisdom must be more than legend.

Ancient Mysteries

Reveals the true purpose behind the pyramids of Giza and the location of the secret vault of Egyptian treasures hidden on the Giza plateau • Details how the first 16 pyramids represent the allegorical "dismembered body of Osiris" and the legendary missing part is a secret underground chamber • Explains how the pyramids were built as recovery vaults and with the secret chamber contained everything needed to rebuild civilization after the Deluge • Examines the technology used to build the pyramids and "fly the stones into place" After nearly 200 years of the pyramid-as-tomb theory, a growing body of evidence suggests the first 16 pyramids of ancient Egypt were not royal tombs but nearly indestructible recovery vaults designed to revive civilization after an anticipated major catastrophe, the Deluge of Thoth. Scott Creighton examines the prophecy of catastrophe and the ancient Egyptians' massive undertaking to ensure the survival of their civilization. He explains how the pyramids acted as easily located storehouses for seeds, tools, and civilizing knowledge, yet they would have been too visible to house the precious treasures necessary to restore the rich culture of ancient Egypt. For this, the ancients created a secret chamber whose existence was hidden in myth and whose location was encoded in the Giza pyramids. Creighton shows how, collectively, the first 16 pyramids represent the allegorical "dismembered body of Osiris," the Egyptian god of agriculture and rebirth, and, as in the myth of Osiris, one part is missing or hidden--a secret chamber under the sands of the Giza plateau. Creighton reveals how the 3 great pyramids of Giza "point" to the secret location and how they were built with technology akin to modern hot air balloons, used to "fly the stones into place" as cited in Egyptian legends and shown in ancient art. Offering a new understanding of this remarkable civilization, the author concludes with a startling revelation: shortly after he revealed the location of the secret chamber of Osiris--a location never before explored--it became the site of a major excavation by the Egyptian authorities, the results of which have yet to be made public.

The Secret Chamber of Osiris

Time is the most important commodity on Earth, we live by it and we die by it, it gives order to our lives and we control all of our modern society using time and its modern instruments. We think we have mastered time, what if we are wrong? We are told in the Bible in Genesis 1 verse 14, that our ancestors measured time by the stars and moon and we are told by evolutionists that ancient people used basic astronomy to achieve a crude understanding of time. What if the war between science and religion has psychologically obscured an obvious and indisputable fact from us all? If our ancestors could measure

time accurately, then all our science and technical achievements would have been inherited in a tree of knowledge that brought us to where we are today. What if the Church in its desperate struggle to keep a profitable business alive and functioning has created such division over the ages that we do not understand the simple messages left by our ancestors on the real nature of time. What if both church and crown in their pact to rule Europe, obscured a scientific system inherited from Palaeolithic and Neolithic sea faring hunter gatherers that was used for thousands of years to keep time while measuring and travelling the planet and developing a philosophy that maintained a balance with Nature? There is a golden thread of truth running through our history that millions cannot see, but that if we did, it may give us hope for our children in a world adrift without an anchor, where time runs faster, exploitation is rife and honesty is a bye word from a lost time, imagined to be better, where society cared about its people and families about their children living by rules that were easy to understand and no one old, poor or disabled lived in isolation. The Golden Thread of Time is designed to give hope where it does not exist, providing answers where there have been none while motivating people to look beyond the mundane toward the light. Do you care?

Golden Thread of Time

Are there 10,000-year-old secret societies that still exist today? Was there a race of giants that once inhabited the Americas? Did ancient Egypt and ancient China have heretofore undiscovered ties? Lost Secrets of the Gods delves into these ancient mysteries and many more in articles by some of the world's most intrepid and knowledgeable researchers. The old paradigms of history are being radically transformed as we discover more evidence of little-known cultures and what they achieved. Many ancient cultures spoke and wrote of visitors that gave them knowledge and helped shape their societies. Who were they, and where did they come from? We now know that many ancient cultures had advanced knowledge of science, agriculture, and astronomy, only some of which has been rediscovered in the last 100 years. Were The Iliad and The Odyssey really about an epic struggle in pre-Celtic Europe? What happened to the Persian army that completely disappeared from Egypt 2,500 years ago? Did the ancients know how to create psychic guard dogs to protect sacred sites? There is much more to history than what has officially been recorded. Lost Secrets of the Gods reveals startling truths and asks fascinating questions traditional historians have long ignored.

The History of Many Memorable Things Lost, Which Were in Use Among the Ancients

Navigate your way around the prehistoric world with the book. This brilliant book is an investigation into the original and ages-old knowledge nurtured by priests, shamans and occultists from the earliest times. Dissatisfied with theories of 'Gods from Outer Space' and 'lost Atlantis', the author was still convinced that the Ancient Wisdom must be more than legend.

"The Lost History of Liberalism challenges our most basic assumptions about a political creed that has become a rallying cry - and a term of derision - in today's increasingly divided public square. Taking readers from ancient Rome to today, Helena Rosenblatt traces the evolution of the words "liberal" and "liberalism," revealing the heated debates that have taken place over their meaning. In this timely and provocative book, Rosenblatt debunks the popular myth of liberalism as a uniquely Anglo-American tradition centered on individual rights. It was only during the Cold War and America's growing world hegemony that liberalism was refashioned into an American ideology focused so strongly on individual freedoms."--

THERE ARE THOSE WHO WOULD LIKE TO LEAD HUMANKIND IN A MORE SPIRITUAL DIRECTION, AND THEY ARE RESIDING ON THIS PLANET EVEN THOUGH MOST OF US DO NOT KNOWLEDGE THEIR EXISTENCE! The Monks entered the subterranean abode to meet with the Masters of Universal Wisdom in the Halls of The Akashic Records. While deep inside the Earth, it was revealed to them fascinating accounts of ancient space visitors, lost civilizations, advanced gravity ships, and much more knowledge long forgotten by humankind. The Lama opened the again and said, "In a far-off country across the seas the general ability to see Nature Spirits has been lost. If one sees such a Spirit it is a matter for jest, the Seer is literally accused of 'seeing things.' Western people do not believe in things unless they can be torn to pieces or held in the hands, or put in a case. A Nature Spirit is termed a Fairy in the West --and Fairy Tales are not believed!" This is one of Rampa's most exciting adventures and has been received with a great deal of pleasure by this multitude of readers all over the world. Behind the great Himalayan range, there lies all-seeing, all-knowing power and enlightenment. It is a way of life that may now be destroyed for all time, a spiritual culture with roots in the ancient world, the remote lamaseries of Tibet. It is here that T. Lobsang Rampa journeyed on the road to self-awareness, to these age-old repositories of wisdom -- where the Lamas learn the meaning of life and death, where the mysterious relationship between the mind and the brain is uncovered, where the secrets of hypnotism, telepathy, clairvoyance, and reincarnation are a part of daily life. Here too Rampa learned power -- but not for abuse or misuse. For the power of supreme enlightenment and universal knowledge is only offered to a chosen few, to those introduced to the strange and exciting world of . . . THE CAVE OF THE ANCIENTS

The Cave of the Ancients

The ancient world saw the birth and collapse of great civilizations. In mainstream history the Classical world is dominated by Greece and Rome, and the Biblical world is centred on the Hebrews. Yet the roughly four-and-a-half thousand years (4000 bcad 550) covered in this book saw many peoples come and go within the brawling, multi-cultural mass of humanity that occupied the ancient Middle East, Mediterranean and beyond. While a handful of ancient cultures have garnered much of the credit, these forgotten peoples also helped to lay the foundations of our modern world. This guide brings these lost peoples out of the shadows to highlight their influence and achievements. Forty-five entries span the birth of civilization in Mesopotamia to the fall of the Roman Empire in the West, offering an alternative history focusing on the names we arent familiar with, from the Hurrians to the Hephthalites, as well as the peoples whose names we know, such as the Philistines and the Vandals, but whose real significance has been obscured. Each entry charts the rise and fall of a lost people, and how their culture echoes through history into the present. Important ancient artefacts are illustrated throughout and fifty specially drawn maps help orientate the reader within this tumultuous period of history. Philip Matyszak brings to life the rich diversity of the peoples founding cities, inventing alphabets and battling each other in the ancient world, and explores how and why they came to be forgotten.
