Reports of Cases Argued and Decided in the Supreme Court of the United States

Four cases in which the legal issue was “race” — that of a Chinese restaurant owner who was fined for employing a white woman; a black man who was refused service in a bar; a Jew who wanted to buy a cottage but was prevented by the property owners’ association; and a Trinidadian of East Indian descent who was acceptable to the Canadian army but was rejected for immigration on grounds of “race” — drawn from the period between 1914 and 1955, are intimately examined to explore the role of the Supreme Court of Canada and the law in the racialization of Canadian society. With painstaking research into contemporary attitudes and practices, Walker demonstrates that Supreme Court Justices were expressing the prevailing “common sense” about “race” in their legal decisions. He shows that injustice on the grounds of “race” has been chronic in Canadian history, and that the law itself was once instrumental in creating these circumstances. The book concludes with a controversial discussion of current directions in Canadian law and their potential impact on Canada’s future as a multicultural society.

Reports of cases argued and determined in the Supreme Court of Louisiana and in the Superior Court of the Territory of Louisiana

The theme of the conference, “Language, Law and the Multilingual State”, was determined to investigate the state-juridical challenges facing multilingual societies. Several related issues were addressed, such as minority and indigenous languages, globalisation and diversity, language rights, language ideology and language legislation.

Reports of Cases Argued and Determined in the Supreme Court of Louisiana

This book is devoted to the study of the interplay between religious rules and State law. It explores how State recognition of religious rules can affect the degree of legal diversity that is available to citizens and why such recognition sometime results in more individual and collective freedom and sometime in a threat to equality of citizens before the law. The first part of the book contains a few contributions that place this discussion within the wider debate on legal pluralism. While State law and religious rules are two normative systems among many others, the specific characteristics of the latter are at the heart of tensions that emerge with increasing frequency in many countries. The second part is devoted to the analysis of about twenty national cases that provide an overview of the different tools and strategies that are employed to manage the relationship between State law and religious rules all over the world.

Cases Argued and Decided in the Supreme Court of the United States

Complete with headnotes, summaries of decisions, statements of cases, points and authorities of counsel, annotations, tables, and parallel references.

Freedom of Association

This book addresses one central question: if justice is to be done in the name of the community, how far do the decision-makers need to reflect the community, either in their profile or in the opinions they espouse? Each contributor provides an answer on the basis of a careful analysis of the rules, assumptions and practices relating to their own national judicial system and legal culture. Written by national experts, the essays illustrate a variety of institutional designs towards a better reflection of the community. The involvement of lay people is often most visible in judicial appointments at senior court level, with political representatives sometimes appointing judges. They consider the lay involvement in the judicial system more widely, from the role of juries to the role of specialist lay judges and lay assessors in lower courts and tribunals. This lay input into judicial appointments is explored in light of the principle of judicial independence. The contributors also critically discuss the extent to which judicial action is legitimised by any 'democratic pedigree' of the judges or their decisions. The book thus offers a range of perspectives, all shaped by distinctive constitutional and legal cultures, on the thorny relationship between the principle of judicial independence and the idea of democratic accountability of the judiciary.

"Race," Rights and the Law in the Supreme Court of Canada

La publication de ce Dixieme Volume marque une etape dans l'histoire de l'Annuaire Europeen. C'est en juin 1953 que le Comite des Ministres du Conseil de l'Europe approuvait une proposition presentee par mon eminent et regrette predecesseur, feu Leon MARCHAL, et mise au point par un autre grand Europeen, feu M. Arnold STRUYCKEN, premier Directeur politique et deuxieme Greffier de l'Assemblée du Conseil de l'Europe. La preparation de ce projet fut facilitee grâce au concours du Dr. B. LANDHEER, Directeur de la Bibliotheque du Palais de la Paix a La Haye, qui est maintenant le Redacteur en Chef de l'Annuaire et celui de la maison d'edition Martinus NIJHOFF qui a toujours publie cet ouvrage avec beaucoup de soin et de distinction. La Resolution du Comite des Ministres, en date du 30 juin 1953, stipulait que l'Annuaire Europeen serait consacre a l'etude objective des organisations internationales europeennes et de leurs travaux, sous la responsabilite d'un Comite de Redaction independant, sans caractere officiel ou politique, qui s'interdirait de formuler des opinions sur aucun aspect des affaires internationales. Le premier President de ce Comite de Redaction etait Lord LA YTON, publiciste connu, militant europeen et, pendant de longues annees, Vice-President de l'Assemblée Consultative.

Law, Language and the Multilingual State

The "European Yearbook" promotes the scientific study of nineteen European supranational organisations and the OECD. The series offers a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date overview of the member states of each organisation. This special anniversary volume celebrates 60 years of publication of the Yearbook, and its contents differs from that of the regular volumes therefore. It offers a selection of the most important articles, dealing with European cooperation and integration, to appear in the Yearbook during its 60 years of publication. These are of particular interest not only because they provide a unique historical snapshot of the many successes (and occasional failures) in the field of European integration but also because they discuss the ideals and aims that lay behind these efforts, many of which still resonate today as Europe confronts questions about its political destiny and ideal shape. This volume contains articles in English and French."

Celebration of the Centenary of the Supreme Court of Canada (1875-1975)

Regulating Religion: Case Studies from Around the Globe presents, through the inclusion of contributions by international scholars, a global examination of how a number of contemporary societies are regulating religious groups. It focuses on legal efforts to exert social control over such groups, especially through court cases, but also with selected major legislative attempts to regulate them. As such, this analysis falls within the broad area of the sociology of social control and more specifically, legal social control, a topic of great interest when studying how contemporary societies attempt to maintain social order. The factual details about social and legal developments in societies where religion has been defined as problematic include Western and Eastern Europe, Asia, Oceania, and the Americas. This book will be of interest to researchers and students in the sociology of religion, the sociology of law, social policy, and religious studies as well as policy makers.

Religious Rules, State Law, and Normative Pluralism - A Comparative Overview

Cet ouvrage revisite l'histoire intellectuelle et politique canadienne entre la révolution américaine et les rébellions de 1837-1838 au Haut et au Bas-Canada en la réintégrant dans le cadre des Révolutions atlantiques qui ont secoué l'Europe et l'Amérique entre 1776 et 1838. Reposant sur un cadre théorique inspiré des travaux des historiens intellectuels du monde atlantique, il traite plus particulièrement de l'importance du concept de liberté dans le développement de l'État dans les deux colonies. Il démontre que ces dernières se sont développées dès 1791 en suivant un idéal de liberté qui, tout en étant différent de la liberté à l'oeuvre au sein des mouvements révolutionnaires de la fin du XVIIIe siècle, n'en était pas moins issu des Lumières. Il présente également les rébellions de 1837-1838 comme étant en partie le résultat d'un affrontement entre deux concepts très différents de liberté.

Cases Argued and Decided in the Supreme Court of the United States and Others

This book offers a comprehensive presentation of the Pratyabhijñā philosophy (elaborated in the 10th and 11th centuries by Utpaladeva and Abhinavagupta) by showing how its main concepts arose from the confrontation of Zaiva religious dogmas with Buddhist and Brahmanical systems. Cet ouvrage offre une présentation détaillée de la philosophie de la Pratyabhijñā (élaborée aux 10e-11e siècles par Utpaladeva et Abhinavagupta) et montre comment ses principaux concepts ont émergé d'une confrontation entre les dogmes religieux [ivaïtes et les systèmes bouddhiques et brahmaniques.

Originale, insolite, renaissante, l'action religieuse émergente bouscule les habitudes, ébranle les certitudes, construit ici, maintenant, l'autre monde. Peut-on courir le risque ? Voilà que la question se pose et se résout en rumeurs publiques, poursuites judiciaires et tensions scolaires, lesquelles mettent à nu des mécanismes inédits d'institutionnalisation de l'expérience religieuse en modernité : groupes tactiques d'intervention, cellules gouvernementales de crise, commissions parlementaires, cercles technocratiques précurseurs d'une ingénierie pluraliste. Sur fond de traditions religieuses, nationales ou républicaines, avec la perspective de la menace sectaire, s'esquisse sous nos yeux un religieux correct, acceptable. Comment est-il possible aujourd'hui d'inscrire l'exceptionnel, l'originel, le merveilleux, le transcendant religieux dans le quotidien ? Et dans quelle mesure, paradoxalement, les gestionnaires de dieux ne repoussent-ils pas toujours plus loin la frontière religieuse ? -- By their nature, emerging religions explore unfamiliar territory and probe uncharted regions of human creativity. For these same reasons, religious transactions that venture beyond the boundaries of traditional religious frontiers often rouse suspicion, anxiety or even fear among the general population. As new religious movements seek to carve out their own niche in society, public controversy and opposing beliefs can spark bitter debates, and can even lead to calls for state intervention. How then do new or borderline religious groups negotiate or mediate the building of public space? What impact can the media have on new religions? How does the law withstand the "creative destruction" of religious innovation? In this provocative collection of essays, twelve experienced specialists break new ground in the sociological study of religion.

Fair Reflection of Society in Judicial Systems - A Comparative Study

The search for a republican morality provides an exciting new study of an important event in the French Revolution and a defining moment in the career of its principal actor, Maximilien Robespierre, the Festival of the Supreme Being. This day of national celebration was held to inaugurate the new state religion, the Cult of the Supreme Being, and whilst traditionally it has been dismissed as a compulsory political event, this book redefines its importance as a hugely popular national event. Hitherto unused or disregarded source material is used to offer new perspective to the national reaction to Robespierre's creation of the Festival and of his search for a new republican morality. It is the first ever detailed study in English of this area of French Revolutionary history, the first in any language since 1988 and will be welcomed by scholars and students of this period.

European Yearbook / Annuaire Europeen 1962

This book provides a comparative perspective on one of the most intriguing developments in law: the influence of basic rights and human rights in private law. It analyzes the application of basic rights and human rights, which are traditionally understood as public law rights, in private law, and discusses the related spillover effects and changing perspectives in legal doctrine and practice. It provides examples where basic rights and human rights influence judicial reasoning and lead to changes of legislation in contract law, tort law, property law, family law, and copyright law. Providing both context and background analysis for any critical examination of the horizontal effect of fundamental rights in private law, the book contributes to the current debate on an important issue that deserves the attention of legal practitioners, scholars, judges and others involved in the developments in a variety of the world's jurisdictions. This book is based on the General Report and national reports commissioned by the International Academy of Comparative Law and written for the XIXth International Congress of Comparative Law in Vienna, Austria, in the summer of 2014.
