The Social Construction of American Realism

Kaplan redefines American realism as a genre more engaged with a society in flux than with one merely reflective of the status quo. She reads realistic narrative as a symbolic act of imagining and controlling the social upheavals of early modern capitalism, particularly class conflict and the development of mass culture. Brilliant analyses of works by Howells, Wharton, and Dreiser illuminate the narrative process by which realism constructs a social world of conflict and change. "[Kaplan] offers some enthralling readings of major novels by Howells, Wharton, and Dreiser. It is a book which should be read by anyone interested in the American novel."—Tony Tanner, *Modern Language Review* "Kaplan has made an important contribution to our understanding of American realism. This is a book that deserves wide attention."—June Howard, *American Literature*

The Constitution of Interests

Many of America's most important social and political movements--abolition, women's suffragette, civil rights, women's liberation, gay and lesbian rights--have organized in the shadow of the law. All are based in their theoretical opposition to the law. Yet at the same time, they are dependent on the laws that prohibit them. Law is thus formed as much through the dynamic tensions that govern how these laws are received as through their official decree. Legal forms such as contracts, property, and rights also constitute social and political life because they structure our world. John Brigham here focuses on four ideological movements and their strategies, among them the struggle over the closing of gay bathhouses in the early years of the AIDS crisis and the radical feminist use of rage and radical consciousness in anti-pornography campaigns. The effect of law on politics, Brigham convincingly reveals, is pervasive precisely because political life finds its expression in a surprising variety of legal forms.

The Anglo-American Conception of the Rule of Law

This book offers a multidisciplinary account of the 'rule of law' as a central pillar of the classical liberal tradition. The authors analyze the original meaning of this expression as first introduced by British jurist A. V. Dicey, before examining its subsequent elaboration by Leoni, Fuller, Hayek and Oakeshott. Addressing the main philosophical and legal aspects of the rule of law, this volume will appeal to all those engaged in law, political theory, philosophy, economics, business ethics, and public policy.

Law, Lawyers and Race

Critical Race Theory (CRT) is virtually unheard of in European scholarship, especially among legal scholars. *Law, Lawyers and Race: Critical Race Theory from the United States to Europe* endeavours to fill this gap by providing an overview of the definition and consequences of CRT developed in American scholarship and describing its transplantation and application in the continental European context. The CRT approach adopted in this book illustrates the reasons why the relationship between race and law in European civil law jurisdictions is far from anodyne. Law plays a critical role in the construction, subordination and discrimination against racial minorities in Europe, making it comparable, albeit in slightly different ways, to the American experience of racial discrimination. Anti-Semitism, Islamophobia, anti-Roma and anti-Black racism constitute a fundamental factor, often tacitly accepted, in the relationship between law and race in Europe. Consequently, the broadly shared anti-race and anti-racist position is problematic because it acts to the detriment of victims of racism while privileging the White, Christian, male majority. This book is an original exploration of the relationship between law and race. As such it crosses the disciplinary divide, furthering both legal scholarship and research in Race and Ethnicity Studies.

American Legal Realism and Empirical Social Science

John Henry Schlegel recovers a largely ignored aspect of American Legal Realism, a movement in legal thought in the 1920s and 1930s that sought to bring the modern notion of empirical science into the study and teaching of law. In this book, he explores individual Realist scholars' efforts to challenge the received notion that the study of law was primarily a matter of learning rules and how to manipulate them. He argues that empirical research was integral to Legal Realism, and he explores why this kind of research did not, finally, become a part of American law school curricula. Schlegel reviews the work of several prominent Realists but concentrates on the writings of Walter Wheeler Cook, Underhill Moore, and Charles E. Clark. He reveals how their interest in empirical research was a product of their personal and professional circumstances and demonstrates the influence of John Dewey's ideas on the expression of that interest. According to Schlegel, competing understandings of the role of empirical inquiry contributed to the slow decline of this kind of research by professors of law. Originally published in 1995. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

Developments and Directions in Intellectual Property Law

Developments and Directions in Intellectual Property Law celebrates the 20th anniversary of award-winning intellectual property (IP) blog, The IPKat, originally founded in 2003. Over the past two decades, The IPKat has covered and commented on several of the most topical developments in the IP field from substantive, practical, and policy standpoints. Today, The IPKat is considered the "Most Popular Intellectual Property Law Blawg" of all time (source: Justia) and its readers are academics, members of the judiciary, policy and law-makers, practitioners, and students from all over the world. By bringing together several of the current and past contributors to The IPKat, this book reflects on the developments and directions that have emerged in the IP field over the past twenty years. Topics covered include changes within substantive IP rights, as well as IP law, policy, and practice broadly intended and from a global perspective. From copyright to trade marks, patents to designs, image and publicity rights to geographical indications, and developments in IP practice and the court system to contract drafting, readers of this book will find expert insights into some of the most notable developments in IP since the inception of The IPKat blog.

Legal Intellectuals in Conversation

In this unique volume, James Hackney invites readers to enter the minds of 10 legal experts that in the late 20th century changed the way we understand and use theory in law today. True to the title of the book, Hackney spent hours in conversation with legal intellectuals, interviewing them about their early lives as thinkers and scholars, their contributions to American legal theory, and their thoughts regarding some fundamental theoretical questions in legal academe, particularly the law/politics debate. Legal Intellectuals in Conversation is a veritable "Who's Who" of legal thought, presented in a sophisticated yet intimate manner.

Handbook of Intellectual Property Research

"The relevance of intellectual property (IP) law has increased dramatically over the last several years. Globalization, digitization, and the rise of post-industrial information-based industries have all contributed to a new prominence of IP law as one of the most important factors in driving innovation and economic development. At the same time, the significant expansion of IP rules has impacted many areas of public policy such as public health, the environment, biodiversity, agriculture, information, in an unprecedented manner. The growing importance of IP law has led to an exponential growth of academic research in this area. This Book offers a comprehensive overview of the methods and approaches that can be used to address and develop scholarly research questions related to IP law. In particular, this Book aims to provide a useful resource that can be used by IP scholars who are interested in expanding their expertise in a specific research method or seek to acquire an understanding of alternative lenses that could be applied to their research. Even though this Book does not claim to include all existing research methodologies, it represents one of the largest and most diverse compilations, which has been carried out to date. In addition, the authors of this Book comprise an equally diverse group of scholars from different jurisdictions, backgrounds, and legal traditions. This diversity, both regarding the topics and the authors, is a fundamental feature of the Book, which seeks to assist IP scholars worldwide in their research journeys." --

Beyond Our Control?

An examination of current and emerging issues in cyberlaw. This book provides a framework for thinking about the law and cyberspace, examining the extent to which the Internet is currently under control and the extent to which it can or should be controlled. It focuses in part on the proliferation of MP3 file sharing, a practice made possible by the development of a file format that enables users to store large audio files with near-CD sound quality on a computer. By 1998, software available for free on the Web enabled users to copy existing digital files from CDs. Later technologies such as Napster and Gnutella allowed users to exchange MP3 files in cyberspace without having to post anything online. This ability of online users to download free music caused an uproar among music executives and many musicians, as well as a range of much-discussed legal action. Regulation strategies identified and discussed include legislation, policy changes, administrative agency activity, international cooperation, architectural changes, private ordering, and self-regulation. The book also applies major regulatory models to some of the most volatile Internet issues, including cyber-security, consumer fraud, free speech rights, intellectual property rights, and file-sharing programs.

Legal Foundations of Capitalism

One of his most important American studies of labor economics published in the twentieth century, this book outlines an evolutionary and behavioral theory of value based on data drawn from court decisions. Analyzing the meaning of reasonable value as defined by the courts, he finds that the answer is based on a notion of reasonable conduct. Expanding this point to encompass the habits and customs of social life, he shows that court decisions are based on customs that are powerful forces shaping the economic system. In an early review Wesley Mitchell declared that Commons [1862-1945] carried this "analysis further along his chosen line than any of his predecessors. Into our knowledge of capitalism he has incorporated a great body of new materials which no one else has used adequately.": *American Economic Review*, XIV (1924) 253.

Dreiser and Veblen, Saboteurs of the Status Quo

In the first part of the 20th century, a group of law scholars offered engaging, and occasionally disconcerting, views on the role of judges and the relationship between law and politics in the United States. These legal realists borrowed methods from the social sciences to carefully study the law as experienced by lawyers, judges, and average citizens and promoted a progressive vision for American law and society. Legal realism investigated the nature of legal reasoning, the purpose of law, and the role of judges. The movement asked questions which reshaped the study of jurisprudence and continue to drive lively debates about the law and politics in classrooms, courtrooms, and even the halls of Congress. This thorough analysis provides an introduction to the ideas, context, and leading personalities of legal realism. It helps situate an important movement in legal theory in the context of American politics and political thought and will be of great interest to students of judicial politics, American constitutional development, and political theory.

Legal Realism and American Law

Cultural Analysis, Cultural Studies, and the Law is a field-defining collection of work at the intersection of law, cultural analysis and cultural studies. Over the past few decades the marked turn toward claims and policy arguments based on cultural identity—such as ethnicity, race, or religion—has pointed up the urgent need for legal studies to engage cultural critiques. Exploration of legal issues through cultural analyses provides a rich supplement to other approaches—including legal realism, law and economics, and law and society. As Austin Sarat and Jonathan Simon demonstrate, scholars of the law have begun to mine the humanities for new theoretical tools and kinds of knowledge. Crucial to this effort is cultural studies, with its central focus on the relationship between knowledge and power. Drawing on legal scholarship, literary criticism, psychoanalytic theory, and anthropology, the essays collected here exemplify the contributions cultural analysis and cultural studies make to interdisciplinary legal study. Some of these broad-ranging pieces describe particular approaches to the cultural study of the law, while others look at specific moments where the law and culture intersect. Contributors confront the deep connections between law, social science, and post-World War II American liberalism; examine the traffic between legal and late-nineteenth- and early-twentieth-century scientific discourses; and investigate, through a focus on recovered memory, the ways psychotherapy is absorbed into the law. The essayists also explore specific moments where the law is forced to comprehend the world beyond its boundaries, illuminating its dependence on a series of unacknowledged aesthetic, psychological, and cultural assumptions—as in Aldolph Eichmann's 1957 trial, hiv-related cases, and

the U.S. Supreme Court's recent efforts to define the role of race in the construction of constitutionally adequate voting districts. Contributors. Paul Berman, Peter Brooks, Wai Chee Dimock, Anthony Farley, Shoshanna Felman, Carol Greenhouse, Paul Kahn, Naomi Mezey, Tobey Miller, Austin Sarat, Jonathan Simon, Alison Young

Cultural Analysis, Cultural Studies, and the Law

This exciting new book from Geoffrey Hodgson is eagerly awaited by social scientists from many different backgrounds. This book charts the rise, fall and renewal of institutional economics in the critical, analytical and readable style that Hodgson's fans have come to know and love, and that a new generation of readers will surely come to appreciate.

The Evolution of Institutional Economics

In this book the author interviews ten legal experts that in the late 20th century changed the way we understand and use theory in law today.

Legal Intellectuals in Conversation

Capitalism is the dominant economic framework in modern history, but it's unclear how it really works. Relying on the free movement and spontaneous coordination of seemingly infinitesimal market forces, its very essence is remarkably complex. Geoffrey M. Hodgson offers a more precise conceptual framework, defines the concepts involved, and illustrates that what is most important, and what has been most often overlooked, are institutions and contract the law. Chapter by chapter, Hodgson focuses in on how capitalism works at its very core to develop his own definitive theory of capitalism. By employing economic history and comparative analysis toward explanatory and analytical ends, Hodgson shows how capitalism is not an eternal or natural order, but indeed a relatively recent institution. If anyone were qualified to venture such a comprehensive and definitive analysis of such an important economic, legal, and social phenomenon, it is Geoffrey Hodgson. "Conceptualizing Capitalism" will significantly alter and carry forward our understanding of markets and how they work."

Conceptualizing Capitalism

Exploring legal treatises, court decisions, political illustrations, photographs, and modernist literature, this volume reveals that the ambiguous status of corporate intention in the first half of the twentieth century provoked conflicting theories of meaning and interpretation still debated today.

Modernism and the Meaning of Corporate Persons

Critical theory, characteristically linked with the politics of theoretical engagement, covers the manifold of the connections between theory and praxis. This thought-provoking Research Handbook captures the broad range of those connections as far as legal thought is concerned and retains an emphasis both on the politics of theory, and on the notion of theoretical engagement. The first part examines the question of definition and tracks the origins and development of critical legal theory along its European and North American trajectories. The second part looks at the thematic connections between the development of legal theory and other currents of critical thought such as; Feminism, Marxism, Critical Race Theory, varieties of post-modernism, as well as the various 'turns' (ethical, aesthetic, political) of critical legal theory. The third and final part explores particular fields of law, addressing the question how the field has been shaped by critical legal theory, or what critical approaches reveal about the field, with the clear focus on opportunities for social transformation.

Research Handbook on Critical Legal Theory

Based on sophisticated demographic analysis, Legal Construct, Social Concept argues that legal doctrine on social issues is shaped by the needs and values of society rather than by individuals and interest groups and that it evolves in response to social change but has little impact on that change. The book also explains why a substantial body of social science research has found that although law may be effective for some types of economic problems, its impact on social problems is generally small and of brief duration. At least in the United States, legal doctrine seems to operate primarily to provide symbols that enhance commitment to the social system and increase the cohesiveness of the system. Barnett's approach to legal thought derives from the practices and assumptions of the social sciences, particularly sociology, and not from those of critical legal studies. His main concern is with social issues

issues that substantively differ from economic issues. In addressing legal thought on social problems with the conceptual framework and quantitative techniques of macrosociology, he considers a topic that is infrequently investigated and employs an approach that is infrequently used. To illustrate this thesis, Barnett presents data on social patterns relevant to three current issues: sex discrimination, age discrimination, and the availability of contraception and abortion. His analyses of these data are compared to constitutional philosophy, judicial rulings, and federal statutes. Barnett then turns from the evolution of legal doctrine in the past to its possible change in the future and considers whether active forms of euthanasia are likely to be legalized. He concludes with an exploration of additional issues for future research and theory.

Legal Construct, Social Concept

Combining philosophical pragmatism with a methodological foundation, Tamanaha formulates a framework for a realistic approach to socio-legal theory. The strengths of this approach are contrasted with that of the major schools of socio-legal theory by application to core issues in this area. Thus Tamanaha explores the problematic state of socio-legal studies, the relationship between behaviour and meaning, the notion of legal ideology, the problem of indeterminacy in rule following and application, and the structure of judicial decision making. These issues are tackled in a clear and concise fashion while articulating a social theory of law which draws equally from legal theory and socio-legal theory.

Realistic Socio-legal Theory

Spanning nearly a century during which the divorce rate skyrocketed, *Love American Style* traces the treatment of divorce in the American novel.

Love American Style

The articles in this new edition of *A Companion to Philosophy of Law and Legal Theory* have been updated throughout, and the addition of ten new articles ensures that the volume continues to offer the most up-to-date coverage of current thinking in legal philosophy. Represents the definitive handbook of philosophy of law and contemporary legal theory, invaluable to anyone with an interest in legal philosophy. Now features ten entirely new articles, covering the areas of risk, regulatory theory, methodology, overcriminalization, intention, coercion, unjust enrichment, the rule of law, law and society, and Kantian legal philosophy. Essays are written by an international team of leading scholars.

A Companion to Philosophy of Law and Legal Theory

A watershed event in the field of sociology, this text introduced "a major breakthrough in the sociology of knowledge and sociological theory generally" (George Simpson, *American Sociological Review*). In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

The Social Construction of Reality

This comprehensive volume is designed as a research guide that will both inform readers on the basics of US foreign policy from historical and political science perspectives and provide a look ahead at the means through which American policy makers will meet the future in an increasingly complex international system.

The Ashgate Research Companion to US Foreign Policy

Intellectual property has rapidly become one of the most important, as well as most controversial, subjects in recent years amongst productive thinkers of many kinds all over the world. Scientific work and technological progress now depend largely on questions of who owns what, as do the success and profits of countless authors, artists, inventors, researchers and industrialists. Economic, legal and ethical issues play a central role in the increasingly complex balance between unilateral gains and universal benefits from the "knowledge society". *Economics, Law and Intellectual Property* explores the field in both depth and breadth through the latest views of leading experts in Europe and the United

States. It provides a fundamental understanding of the problems and potential solutions, not only in doing practical business with ideas and innovations, but also on the level of institutions that influence such business. Addressing a range of readers from individual scholars to company managers and policy makers, it gives a unique perspective on current developments.

Economics, Law and Intellectual Property

Labour and the Wage: A Critical Perspective offers a new perspective on why labour law struggles to respond to problems such as low pay and under-inclusive employment. A Marxian-inspired ontological approach sheds new light on the role of labour law in a capitalist economy and on the limitations and potential of labour law when it comes to bringing about social change. It illustrates this through the lens of the wage. The book develops a legal genealogy that explores the shifting portfolio of concepts through which the wage has been conceptualized in legal discourse as capitalism has developed. This exploration spans from the Norman Conquest to the present day, and covers diverse issues such as the decasualization of the docks, sweated labour, the truck system, tax-credits, tips, and minimum wages. *Labour and the Wage* provides one of the most in-depth and comprehensive analyses of the wage to date, while, at the same time, shedding new light on the contradictory role, or function, of labour law in the context of capitalism.

Labour and the Wage

"These energizing, excellent essays address the international scope of Wharton's writing and contribute to the growing fields of transatlantic, hemispheric, and global studies."--Carol J. Singley, author of *A Historical Guide to Edith Wharton* "Readers will emerge with a new respect for Wharton's engagement with the world around her and for her ability to convey her particular vision in her literary works."--Julie Olin-Ammentorp, author of *Edith Wharton's Writings from the Great War Hailed for her remarkable social and psychological insights into the Gilded Age lives of privileged Americans*, Edith Wharton, the first woman to win a Pulitzer Prize, was a transnational author who attempted to understand and appreciate the culture, history, and artifacts of the regions she encountered in her extensive travels abroad. *Edith Wharton and Cosmopolitanism* explores the international scope of Wharton's life and writing, focusing on how her work connects with the idea of cosmopolitanism. This volume illustrates the many ways Wharton engaged with global issues of her time. Contributors examine both her canonical and lesser-known works, including her art historical discoveries, political work, travel writing, World War I texts, and first novel. They consider themes of anarchism, race, imperialism, regionalism, and orientalism; Wharton's treatment of contemporary marriage debates; her indebtedness to her literary predecessors; and her genre experimentation. Together, they demonstrate how Wharton's struggle to balance her powerful local and national identifications with cosmopolitan values, resulted in a diverse, complex, and sometimes problematic relationship to a cosmopolitan vision. Contributors: Ferdâ Asya | William Blazek | Rita Bode | Donna Campbell | Mary Carney | Clare Virginia Eby | June Howard | Meredith L. Goldsmith | Sharon Kim | D. Medina Lasansky | Maureen Montgomery | Emily J. Orlando | Margaret A. Toth | Gary Totten

Edith Wharton and Cosmopolitanism

The geopolitics of American law enforcement and how it changed corporate criminal accountability in other countries Over the past decade, many of the world's biggest companies have found themselves embroiled in legal disputes over corruption, fraud, environmental damage, tax evasion, or sanction violations. Corporations including Volkswagen, BP, and Credit Suisse have paid record-breaking fines. Many critics of globalization and corporate impunity cheer this turn toward accountability. Others, however, question American dominance in legal battles that seem to impose domestic legal norms beyond national boundaries. In this book, Cornelia Woll examines the politics of American corporate criminal law's extraterritorial reach. As governments abroad seek to respond to US law enforcement actions against their companies, they turn to flexible legal instruments that allow prosecutors to settle a case rather than bring it to court. With her analysis of the international and domestic politics of law enforcement targeting big business, Woll traces the rise of what she calls "negotiated corporate justice" in global markets. Woll charts the path to this shift through case studies of geopolitical tensions and accusations of "economic lawfare," pitting the United States against the European Union, China, and Japan. She then examines the reactions to the new legal landscape, describing institutional changes in the common law countries of the United Kingdom and Canada and the civil law countries of France, Brazil, and Germany. Through an insightful interdisciplinary analysis of how the prosecution of

corporate crime has evolved in the twenty-first century, Woll demonstrates the profound transformation of the relationship between states and private actors in world markets, showing that law is part of economic statecraft in the connected global economy.

Corporate Crime and Punishment

Hayek's theory of cultural evolution has always been a controversial topic. Interest in the theory, and others analysis and criticism of it, has been rising of late. This volume aims to explore the relevance of Hayek's theory for its own sake and for evolutionary economics more generally.

Entrepreneurship, Money and Coordination

In recent decades, the culture, society, politics, and economics of Bahrain have been transformed, driving its global ambitions while retaining to a degree the rule of law and cosmopolitanism. *Islam and Capitalism in the Making of Modern Bahrain* examines the transformation of Bahrain from the 1930s, from a regional trading port and then an important oil producer into the financial hub for the Gulf and into a global centre of Islamic finance. It focuses on the changes and tensions that transformation brought to Bahrain's political, legal, economic, religious, and social structures. In this book, Rajeswary Brown explores the rising force of youth populism driven by the persistence of poverty and unemployment, notably among rural Shi'ite communities and unemployed middle-class youth, as well as examining Bahrain's skillful reconciliation of the demands of Islamic faith, expressed in the Sharia, to the requirements of modern financial capitalism. In this, Bahrain's experience can be set against the modern history of much of the rest of the Middle East, most strikingly with respect to the position of Islamic charities, notably in Syria, comparisons of which are fully explored here.

Islam and Capitalism in the Making of Modern Bahrain

First published in 1952, the *International Bibliography of the Social Sciences* (anthropology, economics, political science, and sociology) is well established as a major bibliographic reference for students, researchers and librarians in the social sciences worldwide. Key features * **Authority:** Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced. Articles and books are selected on merit by some of the world's most expert librarians and academics. * **Breadth:** today the IBSS covers over 2000 journals - more than any other comparable resource. The latest monograph publications are also included. * **International Coverage:** the IBSS reviews scholarship published in over 30 languages, including publications from Eastern Europe and the developing world. * **User friendly organization:** all non-English titles are word sections. Extensive author, subject and place name indexes are provided in both English and French.

International Bibliography Of Economics 2003

Realism and constructivism are often viewed as competing paradigms for understanding international relations, though scholars are increasingly arguing that the two are compatible. From one of the leading proponents of realist constructivism, this volume shows what realist constructivism looks like in practice by innovatively combining exposition and critiques of the realist constructivist approach with a series of international case studies. Each chapter addresses a key empirical question in international relations and provides important guidance for how to effectively combine both approaches in research. Addressing future directions and possibilities for realist constructivism in international relations, this book makes a significant contribution to the theorizing of global politics.

The Social Construction of State Power

García-Villegas compares the scholarship on the relationship between law, political power, and society in the United States and France.

The Powers of Law

The Politics of Method in the Human Sciences provides a remarkable comparative assessment of the variations of positivism and alternative epistemologies in the contemporary human sciences. Often declared obsolete, positivism is alive and well in a number of the fields; in others, its influence is significantly diminished. The essays in this collection investigate its mutations in form and degree across the social science disciplines. Looking at methodological assumptions field by field, individual essays address anthropology, area studies, economics, history, the philosophy of science, political science

and political theory, and sociology. Essayists trace disciplinary developments through the long twentieth century, focusing on the decades since World War II. Contributors explore and contrast some of the major alternatives to positivist epistemologies, including Marxism, psychoanalysis, poststructuralism, narrative theory, and actor-network theory. Almost all the essays are written by well-known practitioners of the fields discussed. Some essayists approach positivism and anti-positivism via close readings of texts influential in their respective disciplines. Some engage in ethnographies of the present-day human sciences; others are more historical in method. All of them critique contemporary social scientific practice. Together, they trace a trajectory of thought and method running from the past through the present and pointing toward possible futures. Contributors. Andrew Abbott, Daniel Breslau, Michael Burawoy, Andrew Collier, Michael Dutton, Geoff Eley, Anthony Elliott, Stephen Engelmann, Sandra Harding, Emily Hauptmann, Webb Keane, Tony Lawson, Sophia Mihic, Philip Mirowski, Timothy Mitchell, William H. Sewell Jr., Margaret R. Somers, George Steinmetz, Elizabeth Wingrove

The Politics of Method in the Human Sciences

This collection of eminent contributions discusses the ideas and works of Mark Blaug, who has made important and often pioneering contributions to economic history, economic methodology, the economics of education, development economics, cultural econo

Mark Blaug: Rebel with Many Causes

An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science, technology, and society. This pioneering book, first published in 1987, launched the new field of social studies of technology. It introduced a method of inquiry—social construction of technology, or SCOT—that became a key part of the wider discipline of science and technology studies. The book helped the MIT Press shape its STS list and inspired the Inside Technology series. The thirteen essays in the book tell stories about such varied technologies as thirteenth-century galleys, eighteenth-century cooking stoves, and twentieth-century missile systems. Taken together, they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical, social, economic, and political questions, and they demonstrate the illuminating effects of the integration of empirics and theory. The approaches in this volume—collectively called SCOT (after the volume's title) have since broadened their scope, and twenty-five years after the publication of this book, it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way.

The Social Construction of Technological Systems, anniversary edition

Global Political Economy (GPE) is a broad and varied field of study and draws insight from a great number of fields and approaches. One of the serious problems confronting academics and students is the sheer mass of theories and debates in the field. This textbook provides up-to-date summaries of the debates and approaches that are currently at the forefront of both European and American GPE. This new revised and expanded second edition contains updated versions of most of the original chapters. In addition, there is a new section entitled 'Emerging issues in contemporary Global Political Economy (GPE)' and six new chapters. The second edition is structured around three themes: Part I focuses on the six central concepts of GPE: state, firm, power, labour, finance and globalization. Each one of them has been increasingly subjected to a rigorous and critical evaluation in recent scholarship. Part II covers a select number of theories and debates currently at the forefront of GPE: game theory; behavioural economics; neo-, sociological and evolutionary institutionalism; neo-Marxism; development and post-development; libidinal economies; and economic constructivism. Part III, which is new to this edition, is entitled 'Emerging issues in contemporary Global Political Economy (GPE)' and focuses on war, state and International Political Economy (IPE); race, gender and culture; environmental politics; and the rise of China. This is essential reading for all serious scholars and advanced students of IPE.

Yale Journal of Law & the Humanities

International legal rules are profoundly embedded in diverse social factors and processes. International law thus often reflects and affects societal factors nationally and internationally. This book exposes some central tenets of the sociological perspective and presents a sociological analysis of significant topics in current international law.

Global Political Economy

Under the impressive editorship of Warren Samuels et al, this book addresses the state of the history of economic thought today. An important contribution to the study of the history of economics, this eagerly-awaited book will develop an unsurprisingly large following.

WHAT IS THE BACKGROUND? - Citation

WHAT ARE THE FACTS? What are the facts of the case? Who are parties? What? Injury/remedy? Claims?

WHAT IS THE LEGAL QUESTION? What is the question the court is asking? The holding is the answer to this question.

WHAT IS THE ANSWER TO THAT QUESTIONS This is the court's holding The court affirms, reverses, and/or remands back to the lower court for further proceedings.

REASONING Ask yourself "Why" the court answers the question in this way. What "test" does the court use to answer the question?

ANY OTHER OPINIONS? Not all judges may agree Majority-binding precedent Dissent=Disagree with the outcome Concur= Agree with the outcome but wants to elaborate or agrees with the outcome for different reasons

HOW FIT WITH OTHER CASES? In what way does this case address issues that I've seen before? Schenck v. United States | BRI's Homework Help Series - Schenck v. Business Structures

This book makes the Business Associations or Corporations course accessible to students whether or not they already know anything about business. In a conversational tone, the original text and problems emphasize the legal issues that 99% of lawyers will encounter in their professional career. The book is organized around the life-cycle of a business. And while it includes landmark cases, the focus is on the legal issues encountered when starting a business, growing a business, and ending a business. This is the only current casebook for an introductory course in business associations that is co-authored by a business school professor. The book thus consistently and clearly provides students with the business context for understanding the legal issues explored.

Epstein, Freer, Roberts, and Shepherd's Business Structures, 5th - CasebookPlus

This book makes the Business Associations or Corporations course accessible to students whether or not they already know anything about business. Business Organizations

Reflecting ongoing changes in the structure and regulation of modern business practice, Business Organizations: Cases, Problems, and Case Studies, Fourth Edition offers a unique combination of doctrine, problems, and case studies. Recent, high-interest cases are balanced against classic teaching chestnuts. Brief, innovative problems are used in combination with longer case studies. Recent Delaware Supreme Court decisions, updated case studies, and a strong website support a clear and sustained examination of the role and purview of the law in business transactions. New to the Fourth Edition: Recent Delaware Supreme Court and Chancery Court cases, including eBay v. Newmark; DFC Global v. Muirfield Value Partners; In re: Trulia; Kahn v. M&F Worldwide (MFW); Corwin v. KKR; and new parent/subsidiary vicarious liability cases New textual coverage of developing trends such as shareholder activism, exploding deal litigation and judicial efforts to reign it in, hedge fund appraisal arbitrage, and Public Benefit Companies Revised Uniform Partnership Act materials, as updated through 2013 Updated case studies and problems that consistently reinforce topical coverage Professors and students will benefit from: A discriminating selection of fresh cases and classic chestnuts In-depth coverage of how the law applies to modern business structures, (such as joint ventures, venture capital arrangements, franchises, and new limited liability business forms) as well as growth industries (such as computers, biotechnology, and telecommunications) Short problems after selected topics that give students practice applying the legal principles covered in that section Case studies styled on the B-school model that provide opportunities for in-depth analysis of the law in business transactions Hybrid entities treated in detail, including a separate chapter on limited liability companies

Corporations and Other Business Enterprises

Hardbound - New, hardbound print book.

Corporations and Other Business Enterprises, Cases and Materials - CasebookPlus

CasebookPlus Hardbound - New, hardbound print book includes lifetime digital access to an eBook, with the ability to highlight and take notes, and 12-month access to a digital Learning Library that includes self-assessment quizzes tied to this book, leading study aids, an outline starter, and Gilbert Law Dictionary.

Corporations and Other Business Enterprises, Cases and Materials

In addition to the law of corporations, the casebook explores the law of partnerships and the law of limited liability companies. It contains specialized treatment of fiduciary duties and closely-held corporations. It addresses the federal securities laws, Sarbanes-Oxley, SEC proxy rules, and insider trading. The casebook also discusses mergers and acquisitions, corporate finance, and the role of corporate lawyers in effectuating business transactions. Suitable for use in basic as well as advanced courses.

Corporation Finance

This documents supplement accompanies the coursebook International Business Transactions: A Problem-Oriented Coursebook, 13th.

Documents Supplement for International Business Transactions, 13th

This casebook, intended for the basic course in Business Entities, encompasses corporations, agency, partnership, and LLCs. Its extended coverage of alternative business entities distinguishes it from the more limited corporations-focused coverage of most business entities texts. The author includes elaborate problems designed to help the students become practice-ready as well as enhanced coverage of LLCs and principal cases that were decided within the last 20 years. The recipient of numerous teaching awards and a former clerk at the California Supreme Court and the U.S. District court, Chiappinelli has taught, written, and practiced extensively in business entities, corporate law, securities regulation, and civil procedure. Features: New developments and cases Added emphasis on LLCs, which will be deeper and more up to date than other casebooks' coverage Revised Chapter 14 (the Enron chapter) that includes TARP and other bailout provisions New in-depth problems created to help students develop practice-ready skills Updated, comprehensive Teacher's Manual, with suggested syllabi, including suggestions for (a) using different casebooks and (b) variously focusing on all entities, some entities, and corporations alone; teaching notes and discussion pointers; additional problems. PowerPoint slides covering all principal cases are available from the author

Cases and Materials on Business Entities 3e

A comprehensive book describing principal forms of business, exploring the considerations and strategies in making an appropriate selection, sample forms and documents, and much more! By carefully considering the forms of business entities that are available and then intelligently choosing an appropriate one the entrepreneur can reduce exposure to liabilities, save taxes and launch the business in a form capable of being financed and conducted efficiently. The sooner a choice is made, the more flexibility and wider selection the business owner will have. Moreover, formalizing a business helps prevent misunderstandings among the participants by defining ownership roles and duties in the business. Look inside: What Structures Makes the Most Sense? Choice of Name, Choice of Business Entity, Sole Proprietorships, Partnerships, Limited Liability Companies, Corporations, Corporate Management, Corporate Records, Changes in Corporate Structures, Corporate Stock Matters, Capital Stock Structures, Employee and Other Matters, Tax Matters, and Doing Business in Other States. Including sample agreements, forms and checklists, such as: a limited partnership agreement, a management agreement, a limited liability company operating agreement, articles of incorporation, bylaws, an indemnity agreement, a stock purchase agreement, and much more! Carrington is set to reach new readers with the simultaneous release of her debut companion books: Business Structures and Incorporation, Trademark Protection and Prosecution, and Writing Winning Business Plans.

Business Structures and Incorporation

This special break-out edition is adapted from the authors' widely used International Business Transactions: A Problem-Oriented Coursebook, now in its 11th edition (2012). The purpose of this volume is to facilitate a focused study of issues arising out of planning, operating, and terminating foreign investments. After a brief introduction to the conduct of business in the world community, the book uses hypothetical problems to present some of the most typical and important issues arising out of the initiation of a foreign investment, as well as operational, financing, and termination issues. The primary focus is on lawyers as problem solvers .

International Business Transactions

"The planning discussions reflect the impact of tax changes through the close of 2010 and include new commentary on today's toughest challenges: the struggle to crawl out of a debilitating recession; the drop in global demand and associated deleveraging; the causes and effects of chronic unemployment; unprecedented government debts and deficits; the scope and impacts of the banking financial crisis; the perpetual uncertainty of taxes; the challenges of health care reform in the years ahead; and tax prospects for the future."--Publisher's website.

Business Planning

This book is designed for a corporations or business organizations course that introduces fundamental entity concepts in the context of legal planning challenges and through exercises that develop analytical, problem-solving, writing, and communication skills. The book features: 62 mini case study problems, Core doctrinal concepts and contemporary issues, such as say-on-pay, latest shareholder proposal trends, director election bylaws, JOBS Act of 2012, advance notice bylaws (round two), and more: Comprehensive discussions on a wide range of planning challenges: choice-of entity,

buy-sell agreements, employee protections, owner operational deal points, ethical challenges, shareholder debt, securities law exemptions, structuring business sales, director protections, controlling shareholder risks, hostile takeover bids, executive compensation, and more. Practical, understandable discussions on financial statements, fundamental financial concepts, business entity taxation, going public realties, bonds, drafting key organizational documents, business valuations, and more. Court opinions and statutory materials that eliminate the need for supplementary materials.

Business Organizations in a Planning Context

A popular and highly-adaptable casebook for use in either a three-credit or four-credit course on business organizations or corporations. The second edition continues the traits that made the original so popular. The book is intended for all law students, whether they will practice on Wall Street or Main Street. It is aimed not only at those who were finance majors and know that they will take advanced corporate courses. It's also for the poetry majors who assume that they are going to dislike the course. Students who use the book are often shocked at how much they enjoy the subject and class. The book best meets law students' need to understand not only the legal issues that arise in battling for control of a large, mature public corporation, but also the legal and business issues that arise in starting and growing a new business. The book is student-friendly; it speaks to the student and conveys much meaningful information, much like a text book in other fields. It features problems and questions that integrate and develop doctrine. Unlike many other casebooks that merely cobble together a series of cases and open-ended questions, the book carefully teaches, in an enjoyable but organized way. During class, the professor can focus on the fun material; the book has already taught students the nuts and bolts. The book has a unique structure, as students follow a business (Bubba's Burritos) through every phase of each of the business structures. The course builds with the same cast of characters, as they explore how to form a business, how to make it grow, how to raise capital, how to transfer ownership, how to assess liability issues, and how the business may come to an end. This same business life cycle is experienced for the sole proprietorship, general partnership, close corporation, public corporation, limited partnership, and LLC. Students will compare and contrast the advantages and disadvantages of each business structure. The book draws on special resources. The contributions of Mike Roberts, of the Harvard Business School, are especially obvious. Students benefit from B-School materials, excerpts from periodicals, problems, and lots of original text to focus on both business and legal issues. Likewise, new co-author George Shepherd, a legal scholar and economist, offers economic theory-made-easy: he translates important economic concepts into simple language that all can enjoy. And it's SHORT. It provides a comprehensive view of business organizations in fewer than 850 pages, including some light-hearted (and light-headed) efforts at humor. We don't force the professor to spend hours trying to determine what parts of a bloated book are important enough to assign. We have done the distilling for you. The book features the innovation of asking questions before most cases (as well as after), to focus the students' reading. The combination of cases is compelling - the old classics plus new teaching vehicles that will become classics. In addition, the second edition features up-to-the minute discussion of new developments such as CEO compensation and Sarbanes-Oxley. These materials can be adapted to almost any need. For those desiring full coverage of publicly traded corporations, no problem, as the book treats Section 16b, proxy fights, and takeovers. Those desiring to leave those materials out will find plenty for a full three- or four-credit course on the variety of business structures.

An Introduction to the Law of Business Organizations

Intended for the basic course in Business Organizations, Cases and Materials on Business Entities encompasses corporations, agency, partnership, and LLCs. Its extended coverage of alternative business entities distinguishes it from the more limited corporations-focused coverage of many business organizations texts. The author includes elaborate problems designed to help students become practice-ready as well as enhanced coverage of LLCs and principal cases that were decided within the last 20 years. The recipient of numerous teaching awards and a former clerk at the California Supreme Court and the U.S. District court, author Eric Chiappinelli has taught, written, and practiced extensively in business entities, corporate law, securities regulation, and civil procedure. Key Features: Over 20 new cases, including *Shawe v. Elting* (Del. 2017). All principal cases are less than 20 years old. Corporation chapters reflect MBCA (2016), and Partnership materials reflect UPA (2013). LLC chapter has been revised and updated. New materials on ultra vires and ultimate beneficiaries. New discussion of DGCL 204 and 205 and MBCA (2016) Subchapter E (ratifying defective acts) New real-life examples: Kate Spade acquired by Coach and Toys R Us bankruptcy.

Unincorporated Business Entities

Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

National Union Catalog

Vol. 1-14 include the proceedings of the Oregon Bar Association, previously issued separately as: Proceedings of the Oregon Bar Association at its ... annual meeting.

Business Structures

Vols. for 1980- issued in three parts: Series, Authors, and Titles.

Cases and Materials on Business Entities

This is still the most comprehensive business organizations casebook to focus on closely held business. The book offers more coverage on LLCs than any other business organizations book, and the principal change in the new edition focuses on the most recent uniform LLC Act (as well as Delaware law). Everything else has been brought up to date, including material on the Model Business Corporation Act (which now speaks as of December 2010), Delaware law (which includes corporations, limited partnerships, and limited liability companies), and federal securities law (included in the public corporation supplement).

Catalog of Copyright Entries. Third Series

The casebook reflects developments through the most recent Term of the United States Supreme Court. This supplement includes material from the 1997 to date Terms of the Supreme Court, as well as some developments in the lower courts.

Oregon Law Review
