MAGGIE: the Dog who Changed My Life

Nominated for the Dog Writer's Association of America 2008 Merial Human-Animal Bond Award The connection between Maggie and Dawn was powerful. Maggie's genuine and beautiful essence opened Dawn's heart and she became more real. Through their relationship Dawn learned that dogs are intelligent and emotional beings that can sense human thoughts. From housebreaking to adolescent escapades and on through old age, Maggie's radiant spirit became interwoven with the fabric of Dawn's life. The depth of their bond opens a surprising door to intuition and dream communication about Maggie's fate. Through their journey, Dawn experiences the joys of sharing life with a dog that so touched people as well as the profound grief that comes with the loss of her beloved Maggie.

Dawn and the Disappearing Dogs (The Baby-Sitters Club Mystery #7)

The hit series is back, to charm and inspire another generation of baby-sitters! Dawn feels terrible when her pet-sitting charge, Cheryl, disappears. She doesn't understand how the huge Great Dane could have just . . . vanished. Then Kristy's puppy, Shannon, goes missing, too, and Dawn knows something suspicious is going on. She doesn't think the dogs have run away; she thinks someone's taken them. And Dawn is determined to find those missing dogs. Because what could be more awful than having your favorite pet . . . stolen?! The best friends you'll ever have are detectives, too!

Gray Dawn

This is the story of Gray Dawn, a collie who lived at Terhune's Sunnybank kennels and who likes to do things his own way. Initially believing Gray Dawn to be a hopeless case, the Master plans to sell the dog to another breeder despite his wife's protestations. But, after enacting a deed of great courage, Gray Dawn is spared at the last moment and wins the affection and respect of his master. A wonderfully heart-warming tale, this book will not disappoint fans of Terhune's delightful fiction and constitutes a must-have for any dog-lover. Albert Payson Terhune (1872 – 1942) was an American journalist, author, dog breeder, most famous for his books detailing the adventures of a collie named Lad. This book was originally published 1927 and is republished here with a new prefatory biography of the author.

Catching Dawn

What would you do to save a dog? Night delivers a litter of eight puppies in a poor neighborhood in Springfield, Tennessee the week before Melissa Armstrong first meets her. As a volunteer for a local nonprofit, Melissa has experience with strays and plans to rescue Night and her litter within days. But nothing goes as planned. For the next six months, Melissa and a ragtag cast of characters try to trap the mutt with nets, catchpoles, spring traps, cheeseburgers, hot dogs stuffed with Benadryl, and the dog's crying puppies. They fail so many times that Melissa is on the brink of giving up. But when she learns about the brutal way the local police department controls the overpopulation problem in Night's neighborhood, she reaffirms her promise to a dog. She vows to rescue her, no matter the consequences. *Catching Dawn* is a beautifully written story of how Night became Dawn, and of the other dogs who have brought joy and heartbreak, moments of transcendence and despair, and unconditional love to the author's life. *Catching Dawn* is also a vividly told and thoughtful reflection on the many highs and lows of caring for animals and humans in difficult circumstances; a gritty exposé of the consequences of animal overpopulation in the rural South; and the story of how a homeless dog helps a woman move through personal grief and upheaval to rediscover the meaning of family.

Dawn of the Dog

In *Dawn of the Dog*, biologist Janice Koler-Matznick explains why it is unlikely the gray wolf is the dog's ancestor. The dog was a unique species closely related to wolves, before it attached itself to man. The science supporting this idea is explained in everyday language. The natural dogs, the dingoes and aboriginal village dogs, are showcased.

The Dogs of Dawn

The Dogs of Dawn: Abyss (serving as the first entry into *The Dogs of Dawn* series) follows Abyss, a man imprisoned in a dark cell and suffering from amnesia. As Abyss tries to piece together his situation, he is swept into disarray by both the reveal of his new water-based powers, as well as by the fact that he has been taken capture by a secret government organization known as The Observers.

Dawn and the Disappearing Dogs

Fifteen stories chronicling the lives and experiences of a variety of collies and their owners.

The Way of a Dog

Note: This book is the beginning of a sequel series to the *Dogs of the Spires: The Original Series*. The Spires are a dangerous place, even for the daughter of an Alpha. After spending her entire life so far outside the Spires, Step's daughter, Raven, is finally given an opportunity to return to the place of her birth. However, the territory that she enters is hardly recognizable when compared to the stories that she grew up hearing. The world has changed, and strange occurrences are now commonplace.

Rumors tell of monsters that stalk the night, and it seems that she cannot trust anyone, not even her own father. It won't be easy, but she is determined to understand what Step and the pack are hiding, even if the truth ends up being far more horrific than she could have ever imagined. As the story of the Spires continues to unfold, it becomes increasingly apparent that history often repeats itself in the strangest and deadliest of ways. Winner of the Children's Choice Award at the New Zealand Post Children's Book Awards in 2003.

DAWN OF THE APOCALYPSE

Daphne is a blind dog who is bored because she doesn't know how to play with toys. She goes to a dog training school to learn to play and have fun. When she starts nose work classes, she is nervous and scared. Daphne doesn't understand the game of finding treats hidden in boxes, so she practises at home. At school, the teacher makes accommodations to support Daphne. Gradually, Daphne finds the courage to participate and begins to enjoy the class. Although she progresses at a different rate than the other dogs at school, Daphne succeeds at nose work. She has fun playing new games at home. With more confidence, she even learns to do some tricks. Daphne isn't bored anymore.

Why Do Dogs Sniff Bottoms?

All kinds of dogs have a number of hard-wired traits bred into them. Hounds love to follow their noses, Retrievers love to fetch and Herding dogs love to herd. With few exceptions, these are pretty harmless activities and don't stand in the way of training. Terriers, however, were bred to hunt and kill vermin independently, digging underground and barking excitedly, almost impervious to pain. Let's see...just a few challenges to overcome in training: strong prey drive, independence, feistiness, digging, barking, the list goes on. In Terrier-Centric Dog Training, author Dawn Antoniak-Mitchell takes up the challenge to help terrier owners train their dogs by making sure they understand the instincts bred into terriers and what the most effective training and management techniques are to use when working with a "natural born killer." You can train your terrier, but just don't let him loose off-leash in a park full of squirrels!

Daphne the Blind Dog Goes to School

Foreword Reviews 2011 Book of the Year Honorable Mention (Health Category) Medical studies have consistently shown that patients benefit from therapy dog visits. Now in *The Power of Wagging Tails*, Dr. Dawn Marcus showcases the wide range of research that shows the therapeutic and healing power of dogs for people of all ages and with a wide range of health conditions. She shows you how to unleash the healing power of your own dog, describes how to effectively add a dog to the home of someone with a chronic condition, explains how the family dog can help with chronic health conditions, and teaches how to train a companion dog to be a certified therapy dog to help others. *The Power of Wagging Tails* will be of interest to dog owners, people wondering how to help family and friends coping with chronic illnesses, and individuals considering training their dogs for therapy work. The Power of Wagging Tails

Charlie

Daphne is a blind dog who has arrived at an animal rescue facility. People are kind to her there, but she is still nervous and on guard. Daphne can't see anything, but her ability to smell, hear, feel, and know helps her to understand the world around her. Daphne copes as best she can, but she always longs for something better—and she's not sure what that might be. A new adult, a stranger, adopts Daphne and takes her home. It takes Daphne a little while to adapt to this unfamiliar environment, where everything is new again. But when she does, she understands what she was looking for all along—joy.

Black Star, Bright Dawn

In her latest book, Dawn Antoniak-Mitchell turns to the subject of managing and training what she labels "Power Dogs." This grouping includes dozens of breeds who were originally bred to hunt game or to protect people and their property, many of whom were also employed as fighting dogs. These are physically strong dogs relative to their size, usually with a mix of ancient Mastiff and Bulldog ancestry, and some have more recently been bred to Terriers as well. These dogs tend to be protective, tenacious, and often exhibit aggression toward other dogs, but at the same time are playful, energetic and smart.

Choose to Heel

The Last Dog is a Readers' Favorite 5-Star Review and was awarded the silver medallion 8-2018. After the Unified World Pact of 2045, people lived in a state of peace and prosperity previously unknown in human history. The World Guild, a new global government, managed all the needs of humanity and the animals it loved. Then in 2086, a security breach of Xavier Labs in Colorado and Zheng Industries in China released the deadly experimental agent XSKL435. Anyone outside was dead within minutes. As statistics on the death toll are gathered from all over the world, Abby, the six-week old dog-daughter of Bill and Teresa Maxwell, was one of only four known surviving canines. News services soon announce that the other three dogs had succumbed to the deadly poison. Abby was now the last dog. You're invited on a journey with a puppy who longs for home after she is confiscated and held captive at a lab, and the family who are determined to get her back at all costs. After escaping from the lab, Abby must quickly learn how to survive in the wild. Bill and Teresa must devise a plan to find Abby without being arrested themselves. Neither Abby, or her parents know whether their plans will work, if they will survive the journey, or if they will be reunited. But love of family drives them onward.

Empowerment Training for Your Power Dog

Dogs that visit patients with cancer have been convincingly shown to reduce stress, loneliness, and mood disturbance that may complicate cancer care. In addition, dogs may provide important motivation for patients to maintain rehabilitation programs that have been shown to reduce cancer risk and improve cancer survival. Outlining all of these issues and many more, *Therapy Dogs in Cancer Care: A Valuable Complementary Treatment* is a ground-breaking, highly innovative addition to the literature on cancer care. Detailing a comprehensive summary of truly impressive research demonstrating the ability of dogs to serve an important therapeutic role within the cancer arena and in other serious medical conditions, the text provides highly practical advice and very helpful "tips" to ensure that those who wish to employ dogs to assist the cancer patient have the necessary knowledge and "tools" to optimize outcomes. Authored by Dawn A. Marcus, MD, an expert in both pain management and health improvement through human and dog interaction, *Therapy Dogs in Cancer Care: A Valuable Complementary Treatment* is an extremely well-organized, well-researched, and highly readable book. Providing practical suggestions to effectively incorporate dogs into cancer care, with detailed instructions about requirements for therapy dogs to ensure visits are safe and limit unwanted spread of infection, *Therapy Dogs in Cancer*

Care: A Valuable Complementary Treatment is an invaluable reference that will inform and delight both the clinician desiring a "how-to" text as well as the casual reader.

Delta Dogs Ultimate Edition Volume 1

"Exploring the natural history of these creatures, the Coppingers explain how the village dogs of Vietnam, India, Africa, and Mexico are strikingly similar. These feral dogs, argue the Coppingers, are in fact the real representative dogs, nearly uniform in size and shape and incredibly self-sufficient. Drawing on nearly five decades of research, they show how dogs actually domesticated themselves in order to become such sufficient scavengers of human refuse. The Coppingers also examine the behavioral characteristics that enable dogs to live successfully and to reproduce, unconstrained by humans, in environments that we ordinarily do not think of as dog- friendly."--From publisher description.

The Last Dog

He can retrieve—but can he sit, lie down and stay?

Sporting dog breeds can be relatively easy to train to do what they have been bred to do be it retrieve, point, flush—even act as a decoy to attract game! In addition, most sporting breeds have a gregarious personality and love people and other dogs. These attributes make these dogs very popular pets, but at the same time present all sorts of problems when they are not working in the field. Have you ever tried to ask your Lab to sit and stay near a pond with the ducks? Why is it that Golden Retrievers are notorious for jumping up on people (not to mention other dogs) when greeting them? Does your sporting dog eat every smelly item he encounters before you can stop him? In this new book, author Dawn Antoniak-Mitchell offers answers to solving and preventing the often surprising set of problems that owners of sporting dogs encounter at home and in their local communities.

You will learn

- Many of the overly friendly traits associated with sporting dogs can cause problems with other people and other dogs if you cannot control your dog's enthusiastic (and sometimes obnoxious) greeting behaviors.
- How to make yourself more interesting than birds, as impossible as that might seem, to make walks and outings more pleasant for all involved.
- How to train a strong "leave it" behavior to keep your dog from eating things that might be dangerous.

Praise for *From Birdbrained to Brilliant*

Having bred and trained sporting dogs for almost forty years, Dawn's ideas are spot on for understanding that the mindset and work ethics of sporting dogs is based around them being "people dogs." As a tracking judge, trainer and exhibitor I can attest that Dawn is correct when she says training sporting dogs is "an investment worth making." Just like making an investment in this book!

Ed Presnall, noted trainer and judge, author of *Component Training for TDX* and four other books on the subject of tracking

From Birdbrained to Brilliant gave me more insight into my beloved retrievers than anything I've read in my 25+ years of working with assistance dogs. Ms. Antoniak-Mitchell provides a treasure trove of information for those of us who love sporting dogs. As entertaining as it is illuminating, this book has earned a center spot in my library!

Jennifer Arnold, author *Through a Dog's Eyes* and *In a Dog's Heart*

Hunt, point and/or retrieve yourself a copy of this book. Working with your sporting breed dog's natural traits instead of against them is what *From Birdbrained to Brilliant* is all about. I'm so excited to see a down to earth and practical book that gives clear training and management exercises for field bred dogs.

Inga From, CPDT-KSA, owner Positive Gun Dogs of Minnesota

FIRST OF ALL who could resist this title? I work with all breeds and each group brings something a little different to the table. Dawn's knowledge of sporting dogs is going to be invaluable to you because her insights into their instincts will improve your training and your dogs will live better lives because you will have learned how to understand and communicate better with them.

Therapy Dogs in Cancer Care

Help! He's herding the neighborhood kids!!

Herding breed dogs such as Border Collies, Corgis, and Australian Shepherds have incredibly strong instinctive behaviors to do the work they were bred for—controlling various kinds of livestock. These behaviors manifest themselves in modern herding breed dogs kept as companions or family pets in a number of ways. These include chasing cars and bicyclists, herding kids, nipping at vulnerable heels, barking incessantly, and acting as the "fun police" in dog parks. All behaviors that are entirely appropriate and necessary when dealing with sheep or cattle, not so great in a suburban neighborhood. Fortunately, these instincts can be redirected in a number of ways that keep these energetic dogs busy and happy as well as out of trouble. That is why so many of these dogs can be taught to excel in agility

and obedience trials, love to retrieve, and make great running companions. In her latest book, author Dawn Antoniak-Mitchell offers solutions to solving and preventing problem behaviors associated with herding breeds living in the modern world. And no, even though your Border Collie or Corgi might love it, you don't need to buy a farm!

As the owner of two obsessive but outstanding herding dogs, I found myself nodding along in agreement with this book from start to finish. Dawn offers tips to allow a handler to work with, rather than against a dog's herding instincts and her easy-to-read writing style and the depth of information she shares makes this book a must read for anyone who works or lives with herding dogs.

Nicole Larocco-Skeehan, CPDT-KA and member of the Board of Directors, CCPDT

A super resource that explains how instinctive behaviors impact dogs in their every day activities. I especially like the training tips—very clear and helpful explanations to manage problems often brought out by a variety of herding instincts.

Lynn Leach, owner of Downriver Stock Dog Training and creator of the popular *All Breed Herding* DVD series

A wonderful mix of training information, management suggestions, psychology, and commonsense advice for herding dog owners. Easy to read and filled with gems of information for all dog owners—like eliminating annoying barking! I highly recommend this book for trainers and owners of any breed of dog.

Gail Tamases Fisher, CDBC and author of *The Thinking Dog*

If you have chosen to bring a herding breed in to your life and home this is the book for you! Dawn takes the reader through the history of herding breeds in order to help you understand the why behind some of the obsessive-compulsive behaviors your herding breed may be exhibiting. Better yet, Dawn then offers up specific exercises and training techniques to help herding breed owners become as valuable as livestock in the eyes of their herding dog. You owe it to your herding breed to read this book!

What Is a Dog?

A dog can be a human's best friend, but taking care of a canine buddy is a lot of work. This expert guide teaches readers everything they need to know about caring for their furry best friend. They'll learn all about different breeds of dogs through stunning full-color photographs and discover which one is perfect for their home and lifestyle. They'll also learn important information about dog behavior, and what to do if their dog gets sick. Fun sidebars on famous and newsworthy dogs will captivate even reluctant readers. Informative and playful, this book introduces readers to both the joys and responsibilities of taking care of a pet dog.

The Art of Meditating with Dogs

In this book six little dogs form a group after they are constantly told to "shut up!" They first of all put on a show at the local school and this is followed up by some luck when they are invited to perform at the circus when it arrives across the road. This is followed up by a flight to the seaside when they go there to perform once more with the circus.

In a magical world where fairies play, a naive gnome and a lost bird become unexpected friends who find themselves swept away into an exciting adventure. They team up with a collection of magical friends who are assigned by Laurelwood to get this gnome up to Mount Kadosh. They meet and befriend a giant hare who helps them in their goal of reaching the mountain. The gnome unknowingly carries in his pocket the one thing that could keep the world from falling into deep darkness. Laurelwood distracts her mother, the evil queen witch, and her wicked son so that the gnome and friends can get away. Laurelwood escapes from their torturous clutches to try and meet with her friends on the mountain. She is delayed by enchanted ingatherings and royal councils as forces outside of her control seek to

stop her. Laurelwood encounters murder, assault, bigotry, and deceit as she tries to make her way to the mountain. Her half brother keeps trying to stop her as the ultimate battle between light and dark ensues. The friends and Laurelwood must stop evil's encroaching, as all the world balances on the choices that are made.

Training the Best Dog Ever, originally published in hardcover as The Love That Dog Training Program, is a book based on love and kindness. It features a program of positive reinforcement and no-fail techniques that author Dawn Sylvia-Stasiewicz used to train the White House dog, Bo Obama, and each of Senator Ted Kennedy's dogs, among countless others. Training the Best Dog Ever relies on trust and treats, not choke collars; on bonding, not leash-yanking or reprimanding. The five-week training program takes only 10 to 20 minutes of practice a day and works both for puppies and for adult dogs that need to be trained out of bad habits. Illustrated with step-by-step photographs, the book covers hand-feeding; crate and potty training; and basic cues—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to make your dog comfortable in the world—a dog that knows how to behave in a vet's office, is at ease around strangers, and more. In other words, the best dog ever.

Lolly and the Noisemakers

Introduces the English mastiff and related breeds of dog, describing its physical characteristics, its long history as a guard and working dog, mastiffs as pets, and its life cycle.

Dawn's Prevail

Your little one will love Dawn DeVries Sokol's cute and funny illustrations, from the tiny Cheeky Chihuahua to the huge Gracious Great Dane. The droopy ears of the Brave Beagle and the Kindhearted Corgi's sweet hug are sure to delight little dog-lovers, and kindle a life-long puppy love.

Dog Grooming Without Fear Or Force

Discusses Newfoundlands as "lifeguard dogs," their history and appearance, and Newfoundlands as pets and in popular culture.

Training the Best Dog Ever

Dawn Sylvia-Stasiewicz is a very special trainer. She knows dogs instinctively, and, drawing on lessons she learned from raising three children, she uses the power of positive reinforcement and bonding to train dogs to be joyful, obedient, and devoted members of a family. Dog lovers throughout the Washington, DC, area know her: She trained each of the late Senator Ted Kennedy's dogs, and when the Obama family were deciding on a puppy—and could have chosen any trainer in the world to work with—it was Ms Sylvia-Stasiewicz who trained Bo. In The Love That Dog Training Program, a lively, accessible, authoritative book, she shares her invaluable and proven program. Her method is based on positive reinforcement. She believes in trust and treats, not choke collars; in bonding, not squeezing or hitting. Her dogs are happy and self-confident, spirited yet very well-behaved. The basic program is five weeks, it takes only 15 or 20 minutes a day, and it works for both puppies and dogs, including retraining a dog with bad habits. Illustrated with step-by-step photographs, The Love That Dog Training Program covers hand-feeding. Crate training and potty training. Simple commands—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct common behavioral problems including jumping, barking, noise phobias, hiding, and more.

Then: how to make your dog comfortable in the world—a dog that travels well, knows how to behave in a dog park or vet's office, is comfortable around strangers, and more. As the author points out, dog training never ends, it just gets easier—and even more rewarding.
