MANAGING OUTSOURCING TRANSITIONS Module 4 Fundamentals of Business Process Outsourcing 101

Transition Management is the set of activities that implements or executes the detailed movement or transfer of processes from the client to the service provider

A Transition Manager is responsible for migrating the function or the process from the client location outsourcing organization.

Because of the nature of the role, a Transition Manager needs to have a variety of skills and competencies

Definition This is the most common methodology used. When the process is mature, the 'Lift and shift' approach is used for migrating.

1. Process change will not affect process control points or output can be done by service provider independently Onshore approval of process changes is a good

Definition Fundamental rethinking and radically redesigning of the business process to achieve dramatic improvements in and speed
