- I bought this **Nintendo Wii**, as part of **a**, bigger lot 10 **Wii's for**, \$50 to restore and repair them. It's however not working. It turns on but ...

Nintendo must be supporting the world's screw industry alone

The issue with no signal is usually due to bad/loose bluetooth or WiFi module

It works, kind of. The sensor bar is only 2 sets of leds which a sensor in the controller can "see"

Everything works great and the disc drive is silent

Nintendo

The Wii does not taste good.

Don't Let an angry snowman near your Wii.

Please, don't fall in love with your Wii.

Don't pour Orange Juice on your Wii.

Don't put a disk with designs on your Wii. Just plain blue ones

Even though it's called a nunchuck, you can't use it to fight ninjas.

It doesn't matter how bad you're doing at a game; don't stick a four leaf clover in your Wii.

Don't try kill yourself with the Wii. (Or with anything else)

The Wii is not a book. You should know that

The Wii is not a funny hat

Your Wii does not need to be warm. It can start thinking for itself and result in a robot uprising.

Your Wii is not a soldier and will not fight your battles for you

Like the Wii, the sensor bar does not taste very good.
