Ophthalmonics

This manual is collection of the mnemonics I made, found in books or internet when studying for the Final MD exam and Senior Residency Entrance Exam in ophthalmology. Till last few months of exam, I believed that I will understand and remember all important facts and will hardly need specially devised mnemonics for it. As exam fever comes nearer, all things started to evaporate. I do not pretend that this manual will cause a lot improvement in your preparation, despite that, I am proud of what I have produced and hope you will find it a useful memory aid and help to increase your confidence in memorizing some confusing but important facts! Many of these may be just simple fundamentals, but during your exams or MCQ test, there may not be time to recollect your basics and you may give wrong answer. I hope this manual of mnemonics may help to reduce your evaporation.

Annemarie Schimmel, one of the world's foremost authorities on Persian literature, provides a comprehensive introduction to the complicated and highly sophisticated system of rhetoric and imagery used by the poets of Iran, Ottoman Turkey, and Muslim India. She shows that these images have been used and refined over the centuries and reflect the changing conditions in the Muslim world. According to Schimmel, Persian poetry does not aim to be spontaneous in spirit or highly personal in form. Instead it is rooted in conventions and rules of prosody, rhymes, and verbal instrumentation. Ideally, every verse should be like a precious stone--perfectly formed and multifaceted--and convey the dynamic relationship between everyday reality and the transcendental. Persian poetry, Schimmel explains, is more similar to medieval European verse than Western poetry as it has been written since the Romantic period. The characteristic verse form is the ghazal--a set of rhyming couplets--which serves as a vehicle for shrouding in conventional tropes the poet's real intentions. Because Persian poetry is neither narrative nor dramatic in its overall form, its strength lies in an "architectonic" design; each precisely expressed image is carefully fitted into a pattern of linked figures of speech. Schimmel shows that at its heart Persian poetry transforms the world into a web of symbols embedded in Islamic culture.

Knowledge Management Systems in Law Enforcement: Technologies and Techniques

Security is the hottest topic in the current Web-centric computing environment. This issue becomes the single largest concern for IT professionals who are stakeholders for Web applications, such as administrators, programmers, and users. In this IBM Redbooks publication, we discuss this security issue with the implementation of IBM WebSphere Portal Extend for Multiplatforms in an IBM Lotus collaborative environment. This discussion is scenario-based and aims to assist in the deployment of WebSphere Portal with Lotus Collaborative Components in a secure implementation. We describe several degrees of security, noting their advantages and disadvantages. The primary goal of this scenario is to have a WebSphere Portal server with Lotus Team Workplace (formerly called QuickPlace) and Lotus Instant Messaging and Web Conferencing (formerly called Sametime) environment set up

and running securely. We discuss proxy authentication with IBM Tivoli Access Manager for e-business Version 5.1 and discuss the use of various identity providers, such as IBM Tivoli Directory Server, Domino LDAP, and Microsoft Active Directory.

NATIONAL BESTSELLER • The triumphant true story of a woman who rode her horse across America in the 1950s, fulfilling her dying wish to see the Pacific Ocean, from the #1 New York Times bestselling author of *The Perfect Horse* and *The Eighty-Dollar Champion* “The gift Elizabeth Letts has is that she makes you feel you are the one taking this trip. This is a book we can enjoy always but especially need now.”—Elizabeth Berg, author of *The Story of Arthur Truluv* In 1954, sixty-three-year-old Maine farmer Annie Wilkins embarked on an impossible journey. She had no money and no family, she had just lost her farm, and her doctor had given her only two years to live. But Annie wanted to see the Pacific Ocean before she died. She ignored her doctor’s advice to move into the county charity home. Instead, she bought a cast-off brown gelding named Tarzan, donned men’s dungarees, and headed south in mid-November, hoping to beat the snow. Annie had little idea what to expect beyond her rural crossroads; she didn’t even have a map. But she did have her ex-racehorse, her faithful mutt, and her own unfailing belief that Americans would treat a stranger with kindness. Annie, Tarzan, and her dog, Depeche Toi, rode straight into a world transformed by the rapid construction of modern highways. Between 1954 and 1956, the three travelers pushed through blizzards, forded rivers, climbed mountains, and clung to the narrow shoulder as cars whipped by them at terrifying speeds. Annie rode more than four thousand miles, through America’s big cities and small towns. Along the way, she met ordinary people and celebrities—from Andrew Wyeth (who sketched Tarzan) to Art Linkletter and Groucho Marx. She received many offers—a permanent home at a riding stable in New Jersey, a job at a gas station in rural Kentucky, even a marriage proposal from a Wyoming rancher. In a decade when car ownership nearly tripled, when television’s influence was expanding fast, when homeowners began locking their doors, Annie and her four-footed companions inspired an outpouring of neighborliness in a rapidly changing world.

This is the documented autobiography of a victim of government mind control. Cathy O'Brien is the only vocal and recovered survivor of the Central Intelligence Agency's MK-Ultra Project Monarch mind control operation. Chiseled deep into the white stone of the CIA's Langley, Virginia headquarters is a partial verse lifted from the Holy Bible and writings of Saint John...""and the truth shall set you free." This statement, like the agency, is total reality. The building that it is engraved upon houses the world's most successful manufacturer of lies to facilitate psychological warfare. The "Company" uses truth and technology as their raw materials to produce "pure" lies for control of you and America's allies.

Lightning Returns: Final Fantasy XIII

Living in a world circumscribed by up-to-the-minute news and electronic tools we barely master before they are out-of-date, we attempt to shield ourselves from environmental events which threaten to overturn our constructed reality. Naturally, in such fast-paced and topsy-turvy surroundings we watch the sky and earth for signs of regularity; looking to the changing seasons for hope and rejuvenation, and seeking out the voices of those who speak of constancy in the changes of the natural world. Hal Borland was such a voice. Every week, beginning in 1941, in the editorial pages of The New York Times he would speak of living on the land—this natural world we all try to understand. In this collection of 365 of his essays, arranged daily within the twelve months, he writes with a familiarity of the ways of the country that is at once humble and resiliently knowledgeable. In Sundial of the Seasons you will find page-long ruminations on such topics as "Fog" ("a unique blend of mood and weather"), "The Bumblebee" ("Bumblebees tolerate man, up to a point"), "Dandelions" ("Neither flood nor drouth seems to discourage it"), and "Fishing" ("The fish caught are only a lesser part of the catch"), all in celebration of the everyday events of life in the country. Begin each day with the gentle wit and wisdom of the person who, for nearly four decades, wrote his "outdoor editorials" in an engaging and inimitable fashion eagerly read by thousands.

Trance Formation of America

'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, *Observer Book of the Year* Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

Odes

To make an open marriage work, Franklin and Celeste knew they needed to make sure no one ever came between them. That meant no overnights, no falling in love, and either one of them could ask the other to end an outside relationship if it became too much to deal with. It worked for nearly two decades--and their relentless focus on their own relationship let them turn a blind eye to the emotional wreckage they were leaving behind.

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Yamaha FJR1300, model years 2001 through 2013. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Yamaha XV V-Twins '81 to 96'

* Outboard motor repair for the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge

or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours’ work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You’ll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair / maintenance information at your fingertips, even when out on your boat.
