Corporate Communications

The field of corporate communications describes the practices organizations use to communicate as coherent corporate 'bodies'. Drawing on the metaphor of the body and on a variety of theories and disciplines the text challenges the idealized notion that organizations can and should communicate as unified wholes. The authors pose important questions such as: - Where does the central idea of corporate communications come from? - What are the underlying assumptions of most corporate communications practices? - What are the organizational and ethical challenges of attempting truly 'corporate' communication? Clearly written with international vignettes and executive briefings, this book shows that in a complex world the management of communication needs to embrace multiple opinions and voices. Rewarding readers with a deeper understanding of corporate communications, the text will be a 'must read' for advanced undergraduates, graduate students, and scholars, in the arenas of corporate communications, organizational communication, employee relations, marketing, public relations and corporate identity management. Practitioners in these areas will be provoked to re-examine their assumptions and habits.

By understanding the ontogenesis of NGOs as civil society organizations from a historical-anthropological, communicational, sociological, economical and managerial perspective, Evandro Oliveira outlines the Instigatory Theory of NGO Communication (ITNC). Those models were tested using a mixed-method research design.

She presents a concise systematization of the theoretical discourse in both disciplines since the beginning of the twentieth century by differentiating key phases of development and evaluating current research approaches. This study argues for a stronger connection of both disciplines and a better profiling within the mother disciplines of communication and business studies by fostering critical and interpretative approaches. This book is strongly recommended to everybody interested in the history and epistemology of marketing and public relations theory and the relationship between both fields.

Today almost everyone in the developed world spends time online and anyone involved in strategic communication must think digitally. The magnitude of change may be up for debate but the trend is unstoppable, dramatically reconfiguring business models, organisational structures and even the practice of democracy. *Strategic Communication, Social Media and Democracy* provides a wholly new framework for understanding this reality, a reality that is transforming the way both practitioners and theoreticians navigate this fast-moving environment. Firmly rooted in empirical research, and resisting the lure of over-optimistic communication dreams, it explores both the potential that social media offers for changing the relationships between organisations and stakeholders, and critically analyses what has been achieved so far. This innovative text will be of great interest to researchers, educators and advanced students in strategic communications, public relations, corporate communication, new media, social media and communication management.

Online Reputation Management in Destination and Hospitality

Communication in the public sphere as well as within organizational contexts has attracted the interest of researchers over the past century. Current forms of citizen engagement and community development, partly enabled through digital communication, have further enhanced the visibility and relevance of non-profit communication. These are performed by the civil society, which is 'the organized expression of the values and interests of society' (Castells, 2008) in the public sphere. Non-profit communication feeds the public sphere as 'the discursive processes in a complex network of persons, institutionalized associations and organizations,' whereas those 'discourses are a civilized way of disagreeing openly about essential matters of common concern' (Jensen, 2002). Despite the relevance in the public sphere, non-profit communication was never properly defined within communication research. The aim of the present book is to offer an overview and report on Strategic Communication for Non-Profit-Organisations and the Challenges and Alternative Approaches. Considering the assumption that a key principle of strategic communication is the achievement of organisational goals, the majority of research developed in the field has used business environments to develop theories, models, empirical insights and case studies. Here, we take a step towards new approaches centred on the concept of non-profit in various dimensions and from various perspectives, showing the diversity and complexity around this subject and at the same time the need of further theoretical and empirical work that provides frameworks and also tools for further understanding of the phenomena.

It contains over twenty chapters from well-known and eminent academic authors, who were carefully selected for their expertise and asked to provide a broad and critical overview of developments in their particular topic area. The development of an international perspective and body of knowledge is a key feature of the book. The Handbook secondly makes a case for bringing back a social science perspective into the study of the field of health care management. Legitimizing ESS

Introduction to Media Production began years ago as an alternative text that would cover ALL aspects of media production, not just film or just tv or just radio. Kindem and Musburger needed a book that would show students how every form of media intersects with one another, and about how one needs to know the background history of how film affects video, and how video affects working in a studio, and ultimately, how one needs to know how to put it all together. Introduction to Media Production is the book that shows this intersection among the many forms of media, and how students can use this intersection to begin to develop their own high quality work. Introduction to Media Production is a primary source for students of media. Its readers learn about various forms of media, how to make the best use of them, why one would choose one form of media over another, and finally, about all of the techniques used to create a media project. The digital revolution has exploded all the former techniques used in digital media production, and this book covers the now restructured and formalized digital workflows that make all production processes by necessity, digital. This text will concentrate on offering students and newcomers to the field the means to become aware of the critical importance of understanding the end destination of their production as a part of pre-production, not the last portion of post production. Covering film, tv, video, audio, and graphics, the fourth edition of Introduction to Digital Media promises to be yet another comprehensive guide for both students of media and newcomers to the media industry.
