Airline Pilot

"This is the captain speaking..." You've heard the announcements, but have you ever wondered what's really going on "up there?" You can't visit the pilots during flight, but now you can get the inside scoop. Join an experienced Airbus flight crew as they face a typical day's work. From the hectic pace of irregular operations, turbulence, and quick turn-arounds, to landing in marginal weather with minimal fuel, this detailed description of a line pilot's job places you in the heart of the action. Captain Grant Corriveau (Uplift - A Pilot's Journey) once again takes you behind that locked door to see what real airline pilots are up to while you're invited to "sit back, relax, and enjoy the flight." Really? After thirty years of airline flying the captain has gained a few insights and formed some strong opinions. Now, he's happy to share... "Fuel gives us time and options. But now fuel is costly, and companies dole it out by the teaspoonful. They dispatch us with minimal fuel reserves based on the reliability claims of weather forecasts. I wonder if meteorology departments ever overstate the validity of their predictions, to justify the multi-millions spent on technical equipment and super computers. Or is this just another example of my old pilot skepticism morphing into cynicism?" Corriveau shares intimate details with typical humor and candor... "An old aviation maxim says: "We don't fly until the weight of the paper equals the weight of the pilot." And, just like my waistline, the paperwork has increased over the years. ... once on board, the datalink will start spitting out paper like... well, like it grows on trees. First Officer Paula hoists about an elm-and-a-half off of the counter, and we make our way back over to the luggage rack." ... "I hear the sounds of galley doors and storage units slamming shut behind me. I glimpse someone in the jetway swinging the main cabin door closed. It must be time to go." Here's your boarding pass, now hurry! Don't miss this golden opportunity to sit in the flight deck, and view the job of an airline pilot from the inside out.

A Day in the Life of an Airline Pilot

I thought you might enjoy reading about the actual life of an airline pilot. In this book I explain how I prepare for a flight; what happens in the flight deck; why delays occur; and what I do when I am done flying for the day. I also share passenger behaviors that drive flight crews crazy. Enjoy the trip!

One Last Sunrise

Every day thousands trust them with their lives, but what do they know of the men and women who fly the airliners of today. Many would agree that airline pilots are different, but their private lives remain a mystery to all but a few. Michael Collins has

A Pilot's Story

This is my story-the story of a pilot who flew airplanes for some thirty-seven years: ten years in the United States Air Force, primarily in jet fighters, and then twenty-seven years flying commercial jet airliners. I was inspired to write this story after reading the autobiography, a few years ago, of Gen. Chuck Yeager-he being the world-renowned test pilot, World War II fighter ace, and first man to break the sound barrier in the Bell X-1. My story is the story of an average pilot, an average guy who survived several close calls, had many interesting experiences along the way, and often wondered, "Am I still here because I was especially good or because I was especially lucky?" I think the answer is definitely a combination of the two, just as Yeager says or implies in his book. With him, it may have been a larger contribution of skill, but as he said, "The secret of my success is that I always managed to live to fly another day." I have to echo that comment. While flying around the country with American Airlines, during "hours of complete boredom" (as we say), we pilots often traded our "war stories" of our flying (and other) experiences. I often thought that I had many tales that were similar to some of Yeager's and that I should put my experiences down on paper, even if it would only be my family who might read it. So this, then, is my story, my life, primarily, as it revolved around my aviating experiences over some thirty-seven years, from the viewpoint of a pilot who has no particular claim to fame but who has survived "to fly another day." One of the best descriptions of a flying career says: "You start out with a big bag of luck and an empty bag of experience; you want to fill the bag of experience before you empty the bag of luck!" I guess I have done that.

Bottle to Throttle

...PILOT BUSTED! Recent TV and Newspaper headlines have brought to the public's attention yet another issue affecting the safety of our Nation's Airline Industry...the latest growing issue since Terrorism...BLOOD ALCOHOL LEVELS OF PILOTS! BOTTLE TO THROTTLE is the "first of its kind" sizzling and true account by Captain Rob...a seasoned Commercial Airline Pilot...and also a seasoned Drinker...(his book is presently under consideration as a screenplay). "Ladies and Gentlemen, this is your Captain speaking"... "It would be my last flight shamefully, from captain Rob to Captain Drunk." Minutes later he was blowing into a Breathalyzer...and also blowing twenty-six years of flying! Yesterday he had been on the brink. He takes you on an incredible journey to his past with the hope of sorting out how it had led to today's "LIVING NIGHTMARE"! Written with humor and compassion, covering sensitive issues of today that began long ago...his life begins as a kid growing up in the BRONX! The "seeds were sown" by an "Army of Drunks" on both sides of the family! Had his path to drinking begun at age seven with a sip of beer on Thanksgiving Day or perhaps with the "whiskey-dripping" cherries? Had his Catholic school nuns and priests given him and other kids good reason to drink? "It never dawned on me that this MAN OF GOD actually enjoyed beatings, especially at swimming practice...we in our skintight Speedos." Was he later charged as a pedophile? The Captain's life continues to lead you through numerous escapades of grade school beer, high school booze, more booze at college, the drinking man's Navy, Europe's bars, South American bars, the alcohol vending machines of Asia, plus more, more, more of everything in California...then later his drinking career comes to an abrupt halt in "SIN-CITY" Las Vegas, Nevada! The Author recently went through a rehabilitation program for his alcohol addiction and shares this positive turning point in his life with readers! He's the son of a New York City Fireman, a graduate of Fordham University, a former Naval Officer, and Senior Captain and Instructor. BOTTLE TO THROTTLE serves as a reminder to his fellow Pilots of their great responsibility

regarding the lives entrusted to them. It is also about Alcohol and the question...when does it become a problem? ...Statistics prove that 99% of all American households have at least one TV and that the public's demand for media truth escalated during the Clinton years and rose even higher with the events of September 11, 2001. While Rob's book may be particularly newsworthy on several subjects, his audience is not limited. His unique style of writing plus one continuous adventure after another result in a book that readers will not want to put down...regardless of profession, age, or gender

6 months in the life of an Airline pilot

Nicolas Tenoux, born in 1983 in Paris, has a triple training. He is airline pilot, holds an MSc in Aviation and Certificates in Management. Philanthropist through his community life activities, awarded with the Civic Star (Étoile Civique), he shares with us his daily life as a pilot and his advice on how to enjoy the crew life and how to best combine it with your personal life. This book follows the author from his Airline pilot training at the CAE Sabena Flight Academy to his position as First Officer on Airbus A320. He gives us his analysis on the aviation trainings and reveals little-known aspects of the air crew profession. Some secrets are also divulged... From Dubai to Bucharest, via Brussels, London, Paris and other major cities, this book is both a practical guide of the pilot job and a sharing of the beauty of mankind's oldest dream: flying. It is aimed at future pilots who will find a guide for their studies, for pilots currently in training in order to have further knowledge and for all of those who are passionate about the magic of flying. The preface is written by Fabrice Bardèche, IONIS Education Group VP (biggest private higher education group in France), IPSA (Aeronautical and Space engineering College) VP.

"This Is Captain Humphrys Speaking"

A memoir of Captain David Humphrys four decade career with Air Canada airlines. Humphrys began work for TransCanada in 1949, in an era when the industry was largely unregulated, and air travel was afforded by only the wealthy. Joining the company as an airline ticket clerk, he honed his golf skills in off hours and practically stumbled upon the idea of becoming a pilot. Humphrys gives insight into the early days of commercial aviation in an industry that has seen tremendous change in the last sixty years. One of few pilots to experience an emergency crash landing, he shares the view from inside the cockpit. Recalling events that are heartwarming, funny, and absolutely true, he imparts to the reader a day-in-the-life of a commercial airline pilot. Welcome aboard.

Skyfaring

****Sunday Times Bestseller**** ****Book of the Week on Radio 4**** 'A beautiful book about a part of the modern world which remains genuinely magical' Mark Haddon 'One of the most constantly fascinating, but consistently under-appreciated aspects of modern life is the business of flying. Mark Vanhoenacker has written the ideal book on the subject: a description of what it's like to fly by a commercial pilot who is also a master prose stylist and a deeply sensitive human being. This is a man who is at once a technical expert – he flies 747s across continents – and a poet of the skies. This couldn't be more highly recommended.' Alain de Botton Think back to when you first flew. When you first left the Earth, and travelled high and fast above its turning arc. When you looked down on a new world, captured simply and perfectly through a window fringed with ice. When you descended towards a city, and arrived from the sky as effortlessly as daybreak. In *Skyfaring*, airline pilot and flight romantic Mark Vanhoenacker shares his irrepressible love of flying, on a journey from day to night, from new ways of mapmaking and the poetry of physics to the names of winds and the nature of clouds. Here, anew, is the simple wonder that remains at the heart of an experience which modern travellers, armchair and otherwise, all too easily take for granted: the transcendent joy of motion, and the remarkable new perspectives that height and distance bestow on everything we love. 'A beautiful, contemplative book... What *Skyfaring* gives is something we need: elevation; another perspective... Normally when I find a volume where prose style and subject matter fuse so pleasingly, I tear through it in a day. Here, I found myself pausing on almost every page, as I absorbed its detail or phrasing.' Nicholas Lezard, *Guardian* ****A 2015 Book of the Year – The Economist, The New York Times, GQ and more****

The Seven Year-Old Pilot

Flying has been my dream since before I can remember... literally. My Aunt Odette tells me that when I was three years old, she took me with her to the Port-au-Prince International Airport to pick someone up, and when I saw an airliner up close for the first time, I excitedly yelled out, "I want to drive that!" I don't recall that event, but it serves as evidence that my fascination with flying began at a remarkably young age. My first memory of wanting to fly came a few years later at the age of seven. I was on my very first flight, from Port-au-Prince to New York City, where I was going to start a new life in a new country. I remember looking at all the people boarding the airplane and wondering how that "big silver bird" was going to get us into the air (that silver bird was an American Airlines Boeing 727). To this day, the whole experience is vivid in my mind: being greeted with a smile by the captain at the aircraft entry door, the funny feeling in my stomach as the plane accelerated down the runway, leaping into the air, and my utter disbelief that we didn't drop out of the sky! I was mesmerized by it all, and by the time the plane came to a stop at our gate, my dream had been born... I wanted to become an airline pilot. I have been blessed to be living that dream since 1999. It's a dream from which I hope never to awaken. This is the story of the lifelong journey I have taken in realizing that dream. I invite you to come along with me as we go from my birth in Haiti to the present day, as I live my dream every day. You will come with me as I move to America at the age of seven, a country I knew nothing about and whose language I didn't speak, a land that would truly prove to be "the land of opportunity." You will feel my sense of wonder and bewilderment growing up in New York City, trying to understand my new world. You will face my struggles to fit in with the kids in the housing project where my family lived for a decade as Mom and Dad saved money to buy a house. You will meet my parents, who encouraged my dream of flying, and my fifth grade teacher who helped me to see that it was possible not only to dream it, but also to achieve it. It's a story of potential fulfilled, and my family's sacrifices to get me through college and flight school. You will fly with me from my first lesson to my first airline job as a copilot, to the day I earned my four-stripes and first heard someone call me "Captain." You will sit with me in the captain's seat as I fly an airline jet over Haiti for the first time, looking down from thirty-eight thousand feet onto the land of my birth where my dream had been born. You will soar with me over the majestic Amazon jungle in Brazil, over the desert-flanked Nile River in Egypt, and the sparkling Mediterranean Sea. You will fly with me through New York City blizzards, Indian monsoons, and Arabian sandstorms. You will travel with me on adventures to Europe, South America, the Middle East, South Asia, the Caribbean, and other parts of the world I used to dream of going to as a child; places that have affected me profoundly and where I left a little part of myself. I have seen all these things through the eyes of the seven year-old boy from Haiti that I was and in many ways, still am; the little boy who had a sense of just how incredible the

world and life are, who dreamt of a life of worldwide adventure, and was blessed to have his dream come true. That is the reason for the title of this book, "The Seven Year-Old Pilot," because even after years of flying around the world, in many ways, I still feel like that little boy, and I always try to approach my travels and my life with his sense of gratitude, amazement, and awe. I truly believe that every one of us has life experiences and lessons worth sharing that can inspire, enlighten, teach, and benefit others because we have all lived

Exits over the wings, life jackets beneath the seats, oxygen masks drop out of the ceiling, put them on in the usual fashion. Seats up. Belts on. Read the cards. Enjoy your flight. Questions?" You're traveling too much when you see the same flight attendant twice in the same day. Tower: "Cleared to land; winds 270 at 21, gusting 29, heavy rain, severe turbulence below 300, RVR (runway visual range) 2,000 feet." Pilot: "Roger. Cleared to land; and Oh, let us know if it gets any worse." Tower: "Worse?" Jet Lag: "Wallet in refrigerator. Where's the milk?" "Delta Airlines is pleased to have some of the best flight attendants in the industry. Unfortunately, none of them are on this flight." "We're ready to begin boarding Flight 1234 with service from Miami to Atlanta. Due to a weight problem with the aircraft, we are going to limit you to one piece of carry-on luggage. Any additional items will have to be checked." After a real crusher of a landing in Phoenix, the flight attendant came on with: "Ladies and Gentlemen, please remain in your seats until Captain Crash has brought the aircraft to a screeching halt against the gate. Once the tire smoke has cleared and the warning bells are silenced, we'll open the door and you can pick your way through the wreckage to the terminal." Two airline mechanics were working on a 747 when lunchtime came. Rather than leave what they were doing, they just took their lunch break while sitting in the cockpit. As they were eating lunch, one mechanic bet the other that the landing gear wouldn't retract if he pulled the gear lever up. He lost. Near the conclusion of an extremely turbulent American Airlines flight, a cabin attendant finished his "stowed-tray-table-and-upright-seat" speech with a cheerful, "We'd like to thank you for flying American Airlines. But if you were displeased with the flight, thank you for flying United."

Flying the Line

Yvonne Pope Sintès only ever wanted to fly. But in the 1950s, very few women were allowed into the male dominated world of aviation. Whilst many women were consigned to the role of house-wife, Yvonne chose a different path. Her dream was to join the ranks of the Royal Air Force, crisscrossing international skies. Despite an awareness of the pitfalls that might await her, she embarked upon her mission. Her story, told here for the first time and in her own words, is one characterized by gritty determination against the odds, a startling level of achievement and a continually modest approach to life and her own accomplishments.??A career trajectory marked by such landmark achievements as becoming the first female Air Traffic Controller with the Ministry of Aviation, the first female civil airline pilot in the UK, and the first female jet airline captain in Britain are relayed in this inspiring autobiography. ??Bomb scares, engine failures and other perilous episodes punctuated Yvonne's experience. All are enlivened during the course of the narrative. A raft of prestigious awards including the Brabazon Cup, the International Owner and Pilots Association award for best Air Traffic Controller in Europe, the Amelia Earhart memorial Scholarship for licensed pilots to advance in aviation, the Whitney Straight Award for courage and determination in pursuit of an aviation career (awarded by Princess Anne) and the British Airline Pilots Association Award for work towards air safety – all were awarded to Yvonne during the course of a spectacular career, the details of which make for a truly inspiring and engrossing read.??Yvonne has taken this opportunity to record the pitfalls and landmark successes of her career for posterity. She does so in a style that is at once both humble and immensely celebratory of a profession that has meant so much to her.??"I first met Yvonne and her husband Miguel in Mahon during September 1992 when I was researching my book on Dan-Air. It was immediately clear that she had a rare and fascinating story that deserved telling in its entirety to reach a much wider audience. I am pleased and proud to have played a small part in making that happen!" - Graham M. Simons, Editor??As featured in the Surrey Advertiser, Essence Magazine and Discover Your History

Most people who survived an almost unsurvivable plane crash would be tempted to sit back, take a good hard look at life and take things a little bit easier. Mike Allsop is not most people. Almost losing his life in a Twin Otter crash off the coast of Hawai'i awakened Mike's zest for life and his thirst for adventure. Mountaineering became Mike's passion and climbing led to him almost getting shot in Russia, narrowly missing a fatal avalanche in Peru, returning a replica of a stolen Yeti hand to a Nepalese monastery and then attempting the biggest climb of them all - Everest. Not content with being an exceptional climber, Mike decided to take up running. But he was never going to be a weekend jogger, he soon cooked up plans to run seven marathons, in seven continents, in seven days - the 777project - and also to run the world's highest marathon on the slopes of Mt Everest. He's currently planning his next big adventure - a journey to the North Pole. Whatever happens, one thing's for sure - he won't be sitting on the couch wondering 'What if?'

Always Be Yourself Unless You Can Be an Airline Pilot

Don't think you can become a pilot? I think you can - learning to fly is easier than you think! Have you always dreamed of becoming a pilot? Are you wondering if now is a good time to become a pilot? Do you want to get started with flight training, but need help choosing a school? All your questions will be answered in this book! This book may be the most important book you will ever read if you want to become a professional pilot... But first a warning, this is not a book about "learning to fly" in a literal sense. You won't learn how aerodynamics work or how to control an aircraft in flight - that's something you will learn once you start your flight training. Instead, this book contains information that flight schools won't teach you. The information you NEED to know before you should commit to flight training! The knowledge you gain from this book is essential for you to have a successful and enjoyable career as a commercial or airline pilot! The main focus of the book is on FAA and EASA flight training in the U.S., but most of the principles apply regardless of your nationality. Whether you want to earn your private pilot certificate, become a corporate pilot, or become a captain in a major airline - this book is for you. And one note to the ladies - it is now the golden age for female pilots! Did you know you could become a commercial pilot, or even a flight instructor, at the age of 18 with less than 12 months of training? Right now is an excellent time to become a pilot because there is a global pilot shortage that is expected to last for the next two decades or longer. Boeing estimates that there will be a worldwide demand for 790,000 pilots between 2018 and 2037. That's a lot of pilots! How do I know the pilot shortage is not just a myth? Currently, most airlines in China are hiring airline captains

from foreign countries because there are not enough Chinese pilots. And what's the pay like? Boeing 737 or Airbus 320 captains can earn an annual salary up to \$380,000! That's over 30k per month! ...and, wait for it--it's all tax-free (in China)! Yes, it will be a long road to become an airline captain earning a good salary. But guess what? Reading this book will help you decide if you want to pursue the career. Who is this Author? With Bachelor's and Master's degrees from Embry-Riddle Aeronautical University, Vesa knows a thing or two about aviation. With several years as a flight instructor, assistant chief flight instructor, and ultimately as the Chief Flight Instructor of a major flight academy, he is an expert in pilot training. Having trained hundreds of pilots who currently work for many airlines (including many Chinese airlines), he has the first-hand knowledge of the demand for new pilots. Because of his experience as a corporate airline captain, he understands the benefits and downsides of pilot life and can help you decide whether it's a good career path for you! Here are some of the questions this book will answer: Is a pilot career a good choice for me? How much does flight training cost? What are the medical requirements for pilots? How can I finance flight training without any savings or income? What are the benefits and downsides of a pilot career? What kind of certificates and ratings do I need to start working as a professional pilot? How to choose the best flight school (and flight instructor) based on my individual needs? Flight training is fast-paced, fun, and exciting. Why not get started now?

An Airline Pilot's Life

Alan Eugeni became an airline pilot late in life, following a long corporate and entrepreneurial career. While realizing his childhood dream of flying passenger jets, he came face to face with the unseen reality of modern commercial aviation in North America in the 21st century: Large carriers subcontracting commercial flights to the lowest bidder and the relentless race for padding profits at any cost - including safety - while corporate profits at the major airlines reach record levels. The book follows the author on his journey fresh out of flight school and into his daily trials and tribulations - starting at a small carrier and culminating at a regional jet carrier operating for one of North America's premier airlines. Each day, Alan Eugeni sees new frightening practices, including airplanes operating with broken essential equipment, the use of cheap repair parts that continually fail in flight, flying without proper navigation charts, operations managers deliberately asking pilots to break safety rules, incomplete pilot training.....all in order to reduce costs and increase profits. And those pilots that do object and refuse to fly noncompliant aircraft are reprimanded and demoted. In 2016, following an incident on a routine flight that could have cost the lives of all 50 passengers and his crew due to poor maintenance, the author decided to speak out. He recounts how air travel became so safe in the 20th century and how those gains are slowly being eroded by the so-called "regionals" which will do almost anything to cut costs - regardless of passenger safety and federal aviation regulations.

Voluptuous, Spirited Skipper

Tricky maneuvers, curious passengers, and other kinds of turbulence The star DJ who spontaneously invites the entire flight crew to his concert in Rome, the businessman who has his forgotten cigars flown in by private jet, and the oil millionaire who has the stewardesses crawl through the cabin on all fours to the sound of Pavarotti arias—there's nothing that Pilot Patrick has not experienced in his job. Germany's most famous airline captain takes us on a joyride to the most beautiful places in the world, telling us how he made his dream of flying come true, what really helps against the fear of flying, and what you should consider if you want to become a pilot yourself. From wild party nights on the Côte d'Azur to sex above the clouds, Pilot Patrick gives us an exclusive look behind the normally closed doors of the international jet set—and reveals a secret that, until now, has always flown below the radar.

The Next Plane Crash

Though we routinely take to the air, for many of us flying remains a mystery. Few of us understand the how and why of jetting from New York to London in six hours. How does a plane stay in the air? Can turbulence bring it down? What is windshear? How good are the security checks? Patrick Smith, an airline pilot and author of Salon.com's popular column, "Ask the Pilot," unravels the secrets and tells you all there is to know about the strange and fascinating world of commercial flight. He offers: A nuts and bolts explanation of how planes fly Insights into safety and security Straight talk about turbulence, air traffic control, windshear, and crashes The history, color, and controversy of the world's airlines The awe and oddity of being a pilot The poetry and drama of airplanes, airports, and traveling abroad In a series of frank, often funny explanations and essays, Smith speaks eloquently to our fears and curiosities, incorporating anecdotes, memoir, and a life's passion for flight. He tackles our toughest concerns, debunks conspiracy theories and myths, and in a rarely heard voice dares to return a dash of romance and glamour to air travel.
