Fodor's Essential France

This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

A mysterious new patron who's slipped out of Paris and is traveling under a different name has made an unusual request--to have his lunch served to him at the nearby villa he's secretly rented ... Pablo

Picasso is at a momentous crossroads in his personal and professional life--and for him, art and women are always entwined ... New York, present day. Caeline, a Hollywood makeup artist who's come home for the holidays, learns from her mother Julie that Grandmother Ondine once cooked for Picasso"--

A Year in Provence

This Special Issue addresses relations between tourism activities, smart specialization strategies, and sustainable development at different territorial levels, including the local, regional, national, and international. Framed by appropriate conceptual frameworks to define the contemporary dynamics of innovation in tourism, case studies supported by advanced quantitative methods and developed in rural and urban areas of Asia, Europe, and Africa are presented and discussed. The concept of smart specialization inspires the formulation of regional innovation policies and strategies, emphasizing the importance of endogenous resources and existing territorial capabilities. By exploring the diversity and variety of each economy to develop inter-sectoral relations, this approach aims at promoting the creation of spillover effects of innovation processes supported by adequate key enabling technologies, potentially leading to the sustainable development of places, regions, and countries. As an activity that mobilizes contributions from different economic sectors, tourism may play a central role in such strategies. As described and discussed in this Special Issue, aspects related to the creative sectors of economies, information and communication technologies, traditional products and lifestyles, food production, or diverse cultural values can be mobilized to generate innovative and sustainable solutions for tourism development.

French Riviera and Its Artists

A reflection on our changing relationship with the sea, imagined by artists such as Jeff Koons and Alison Katz It goes without saying that our relationship to the natural world, especially the sea and its enigmatic and unfathomable contents, is complex and fraught. Far from a wholesale critical condemnation of anthropocentrism, *The Imaginary Sea* seeks to present a balanced, multifaceted perspective of our evolving relationship with the natural world. It operates, if not in different temporalities, then in different imaginations, compiling work inspired by the sea from artists such as Jeff Koons, Miquel Barceló and Alison Katz, working across a wide range of mediums. This publication, released alongside the eponymous exhibition at the Fondation Carmignac, considers not only how artists are reevaluating our relationship with nature, but also how nature, particularly the sea, sparks our imagination. Akin to

the emotional range of a Shakespearian comedy or tragedy, *The Imaginary Sea* intends to evoke joy, mystery, wonder and melancholy, as well as loss.

Eurostat Regional Yearbook 2011

At the collège for a parent-teacher interview, I met my daughter outside in the courtyard and she showed me up to her classroom. Her teacher was busy chatting, so we waited patiently in the corridor. When he did come out, he indicated that the meeting would take place downstairs and headed off with us in tow. Before sitting down, I introduced myself using my first name, and put out my hand to be shaken. He mumbled back his full name as he took my hand, although I suspect he would have been shocked if I had actually dared use it. By this stage, I had already understood that teachers did not expect to be questioned about their practices. Of course, I did--question him, that is; politely and almost deferentially. There was a slight pause, as he dipped his head to better digest what he had heard. Then, with the assurance of a perfect, unarguable answer, he replied, "But you are in France, Madame". Some months before, my husband, three children and I had casually unzipped and discarded our comfortable Australian lifestyle and slipped on life in the country of haute couture. On arrival, there was no celebrity designer waiting for us, ready to pin and fit our new life to us; so we threw it on and wore it loosely, tightly, uncomfortably, any old how--until we learned for ourselves how to trim, hem and stitch à la française. This book is testament to the joyous, but not always easy, journey that we took along the way.

Guidelines for Success in the Chinese Outbound Tourism Market

Remittances sent by African migrants have become an important source of external finance for countries in the Sub-Saharan African region. In many African countries, these flows are larger than foreign direct investment and portfolio debt and equity flows. In some cases, they are similar in size to official aid from multilateral and bilateral donors. Remittance markets in Africa, however, remain less developed than other regions. The share of informal or unrecorded remittances is among the highest for Sub-Saharan African countries. Remittance costs tend to be significantly higher in Africa both for sending remittances from outside the region and for within-Africa (South-South) remittance corridors. At the same time, the remittance landscape in Africa is rapidly changing with the introduction of new remittance technologies, in particular mobile money transfers and branchless banking. This book presents findings of surveys of remittance service providers conducted in eight Sub-Saharan African countries and in three key destination countries. It looks at issues relating to costs, competition, innovation and regulation, and discusses policy options for leveraging remittances for development in Africa.

'Universal Tongue' celebrates the great diversity of the global dance kaleidoscope in the era of the Internet. It was born from visual artist Anouk Kruithof's fascination with dance videos distributed online as a representation of self-expression, cultural identity, empowerment and fun. In collaboration with a team of 50 researchers from across the globe, she sourced over 8800 dance videos online, which were edited down to a 1000 unique dance styles that she blended into a dynamic 8 channel video installation with a four hour duration, accompanied by a unifying soundtrack. The researchers provided a short text for each dance style presented in their found videos. These 1000 edited texts combined with screenshots taken from the videos introduce the origin, background and meaning of the dance styles. Et voilà! this 'dancyclopedia' through the jungle of the Internet was born! This book shows how dance can be a way of knowing about the world. It is by no means exclusive, final, or academic. It is a statement. Organized in alphabetical order by the first letter of each dance style, it confirms the horizontality of 'Universal Tongue', by erasing typical categories of the world order, such as country, continent, or culture. Instead, it points us towards a more inclusive world with a limitless exchange - a world where simply everyone is a dancer.

Chamonix - Rockfax

It was a year of seismic social and political change. With the wildfire of uprisings and revolutions that shook governments and halted economies in 1968, the world would never be the same again. Restless students, workers, women, and national liberation movements arose as a fierce global community with radically democratic instincts that challenged war, capitalism, colonialism, and patriarchy with unprecedented audacity. Fast forward fifty years and 1968 has become a powerful myth that lingers in our memory. Released for the fiftieth anniversary of that momentous year, this second edition of Philipp Gassert's and Martin Klimke's seminal 1968 presents an extremely wide ranging survey across the

world. Short chapters, written by local eye-witnesses and historical experts, cover the tectonic events in thirty-nine countries across the Americas, Europe, Asia, Australia, Africa, and the Middle East to give a truly global view. Included are forty photographs throughout the book that illustrate the drama of events described in each chapter. This edition also has the transcript of a panel discussion organized for the fortieth anniversary of 1968 with eyewitnesses Norman Birnbaum, Patty Lee Parmalee, and Tom Hayden and moderated by the book's editors. Visually engaging and comprehensive, this new edition is an extremely accessible introduction to a vital moment of global activism in humanity's history, perfect for a high school or early university textbook, a resource for the general reader, or a starting point for researchers.
