Philip's Navigator Trucker's Britain

Philip's Navigator Road Atlases - the UK's best-selling Road Atlases. The No.1 Choice of Road Atlas for the serious motorist. No other road atlas of Britain offers this level of detail and clarity. 'A map that beats all others' The Daily Telegraph 'Scale, accuracy and clarity are without parallel' Driving Magazine 'No.1 in the UK for clear maps' Independent research survey Over 6,000 bridge heights, nearly 1,500 weight-restricted bridges and over 250 width-restricted bridges. Britain's best road mapping in a great spiral format. Every street in Britain marked on the maps. Over 3000 roads named. Fixed speed-camera locations, with speed limits. 100 indexed town-centre maps plus approaches maps to 12 major urban areas. Super-detailed 6-page route-planning section. Up-to-date mapping at 1.5 miles to 1 inch. Exceptional road detail, from motorways to country lanes, with every junction, roundabout and slip-road shown. Thousands of individually named farms, houses and hamlets. Philip's Navigator Trucker's Britain is the must-have atlas for every professional driver - a special feature of this atlas is the inclusion of over 6000 low bridges, and their height restrictions, which are clearly marked on the maps. The maps also show fixed speed-camera locations, with their speed limits, and provide over 3000 road names as well as numbers. The atlas also includes a massive selection of 100 indexed town-centre maps, detailed approach maps to 12 major urban areas, plus route-planning maps, a distance table, and a fully comprehensive 43,000-name index. The main road maps are at 1.5 miles to 1 inch (Northern Scotland at 3 miles to 1 inch) and are extra clear and detailed, showing even the smallest roads and lanes that are omitted from other atlases. Every roundabout, junction and slip-road is shown in detail on main roads and motorways. The alpha-numeric grid is based on the National Grid, so that the atlas can be used with GPS systems. In addition, every street in Britain is located on the maps. Philip's Navigator is widely used by professional drivers and the emergency services, including national police training, and is recommended in the motoring press and national newspapers.

Philip's Navigator are Britain's bestselling road atlases - exceptional for their scale and clarity. 'A map that beats all others' The Daily Telegraph 'Scale, accuracy and clarity are without parallel' Driving Magazine 'No.1 in the UK for clear maps' Independent research survey - Scale: 1.5 miles to 1 inch = 1:100,000 (Northern Scotland: 3 miles to 1 inch = 1:200,000) - Super-detailed 6-page route-planning section. - Every street in Britain is marked on the maps. - Over 3000 roads clearly named. - 100 indexed town-centre maps plus approaches maps to 12 major urban areas. - Exceptional road detail, from motorways to country lanes, with every junction, roundabout and slip-road shown. - Thousands of individually named farms, houses and hamlets. - The No.1 Choice of Road Atlas for the serious motorist. Available in an easy-to-manage spiral paperback binding, Philip's Navigator Britain is widely used by professional drivers and the emergency services, including national police training, and is recommended in the motoring press and national newspapers. No other road atlas of Britain offers this level of detail and clarity.

Philip's Navigator Trucker's Britain 2011

Aimed at professional drivers, this atlas contains a huge selection of 100 indexed town-centre maps and detailed approach maps to 12 major urban areas. Over 4000 low bridges, and their height restrictions, are clearly marked on the maps, together with bridge weight and width limits.

Philip's Navigator Trucker's Britain 2013

Philip's Navigator Trucker's Britain 2013 is the must-have atlas for every professional driver - a special feature of this atlas is the inclusion of over 4000 low bridges, and their height restrictions, which are clearly marked on the maps. The maps also show speed-camera locations, with their speed limits, and provide over 3000 road names as well as numbers. The atlas also includes a massive selection of 100 indexed town-centre maps, detailed approach maps to 12 major urban areas, plus route-planning maps, a distance table, and a fully comprehensive 43,000-name index. The main road maps are at 1.5 miles to 1 inch (Northern Scotland at 3 miles to 1 inch) and are extra clear and detailed, showing even the smallest roads and lanes that are omitted from other atlases. Every roundabout, junction and slip-road is shown in detail on main roads and motorways. The alpha-numeric grid is based on the National Grid, so that the atlas can be used with GPS systems. For the first time in a Navigator atlas, every street in Britain has been located on the maps. Philip's Navigator is widely used by professional drivers and the emergency services, including national police training, and is recommended in the motoring press and national newspapers.

Philip's Navigator Scotland

Philip's Navigator Scotland is part of a series of Navigator regional road atlases. The Navigator maps provide highly detailed coverage of the region's road network, including minor country lanes and rural tracks. In this atlas, much of the Central Lowlands and Scottish Borders are shown at 1.5 miles to 1 inch, while the rest of Scotland is shown at 3 miles to 1 inch. There is an abundance of other detail, including hundreds of individually named farms, houses and hamlets. Also shown are airports, airfields, stations, ferries, canals, marinas, and a wide range of places of interest. There are also useful details of many services that may be needed while travelling, such as tourist information centres. The atlas has a comprehensive index and includes indexed town plans of major regional centres. The front of the atlas contains a 15-page guide to regional leisure with full details of places of interest, such as castles, houses, cathedrals and museums, plus guides to nature reserves, parks and gardens, and listings of a wide variety of activities from abseiling to yachting. The atlas is designed with the leisure user particularly in mind, and is ideal for touring with its large scale and wealth of travel information. The exceptional detail also makes the atlas ideal for local business use, such as planning and delivery driving.

Philip's Navigator Britain

Navigator' Britain shows speed camera locations, with their speed limits, and provides over 3000 road names as well as numbers. It also includes a massive selection of 70 fully indexed town centre maps, plus airport maps and port maps, detailed approach maps, London main roads maps, detailed route-planning maps, a distance table and a 43,000 name index which includes places of interest. The main road maps are at 1.5 miles to 1 inch (3 miles to 1 inch in the Scottish Highlands) and are extra clear and detailed, showing even the smallest roads and lanes that are omitted from other atlases. Every roundabout, junction and slip-road is shown in detail on main roads and motorways. In country areas thousands of individual houses and farms are marked, along with footpaths and tracks. The alpha-numeric grid is based on the National Grid, so that the atlas can be used with GPS systems, and the grid squares have been made smaller for this edition, making it much easier to find locations when using the index. Thousands of tourist attractions and places of interest are shown on the maps, including national parks, nature reserves, houses and gardens, beaches, marinas, canals, county showgrounds, camping and caravan sites, shopping villages, tramways, World Heritage Sites, long distance footpaths, sporting venues, Park & Rides and ferries. Navigator1 Britain is widely used by professional drivers and the emergency services, including national police training, and it is recommended in the motoring press and national newspapers.

Philip's Moon Map (Tube)

Philip's Moon Map is a completely new large-format map of the near side of the Moon. It has been specially drawn for Philip's by Dr John Murray, a research lecturer at the UK's Open University, who is an expert on the lunar surface. The map is not only a highly accurate and clear representation of the Moon but also a practical guide for lunar observers. More than 500 physical features - craters, seas, mountain ranges, peaks, valleys and rilles (elongated depressions) - are named and indexed, and the landing sites of unmanned and manned spacecraft are also marked. The observer can readily identify objects seen through binoculars or a telescope, or pick targets for a programme of observation. The chart includes a small map of the far side of the Moon (never visible from the Earth). Next to the map is a practical guide to lunar observing. This concise and informative text describes the various types

of feature to observe, and is illustrated with drawings and photographs. Tips are given as to the best point in the lunar cycle to observe the most interesting of these features. Guidelines on drawing or photographing the Moon are also included. Colour artworks explain the Moon's orbit, and why its phase (the proportion of the Moon that is visible from Earth) changes during the course of a month. Also explained, with the help of illustrations, are the path of the Moon during the course of the year and why lunar and solar eclipses occur.

Philip's Navigator Camping and Caravanning Atlas of Britain

THE ONLY ATLAS OF BRITAIN FOR CAMPING, CARAVANNING AND MOTORHOMES 'A map that beats all others' The Daily Telegraph 'Scale, accuracy and clarity are without parallel' Driving Magazine 'No. 1 in the UK for clear maps' Independent research survey The No. 1 Choice of Road Atlas for the serious motorist - Scale: 1.5 miles to 1 inch = 1:100,000 (Northern Scotland: 3 miles to 1 inch = 1:200,000) - Over 3,000 approved campsites located, plus useful advice from the Camping and Caravanning Club - Includes essential information for caravanning motorists: 6290 bridge height limits, 1477 bridge weight limits and 256 bridge width limits - No other road atlas of Britain offers this level of detail and clarity - Britain's best road mapping in a great spiral format - Every street in Britain marked on the maps - Over 3000 main roads named - 100 indexed town-centre maps plus approaches to 12 major urban areas - Super-detailed 6-page route-planning section - Exceptional road detail, from motorways to country lanes, with every junction, roundabout and slip-road shown - Thousands of individually named farms, houses and hamlets - 416 pages Philip's Navigator Camping and Caravanning Atlas of Britain includes a special feature by The Friendly Club, which is packed with essential camping and caravanning information.

Managing Supply Chain Risk

"Supply Chain Risk Management is an issue that many companies face and yet few companies know how to deal with it in a systematic and pragmatic manner. While avoiding and reducing supply chain risks are certainly preferable, developing ways to restore and stabilize supply chain operations rapidly after a major disruption is critical for managing global supply chains. Sodhi and Tang present important concepts, frameworks, strategies, and analyses that are essential for managing supply chain risks. Not only does this book suggest some practical ways to work with different partners to manage the risks that are present in a global supply chain, it creates a framework that would enable practitioners to engage researchers to work on this important area." —Thomas A. Debrowski, Executive Vice President, Worldwide Operations, Mattel, Inc. "When a firm outsources its operations to external suppliers, the firm is vulnerable to major and rare disruptions that can occur at any link in the global supply chain. Because these disruptions rarely occur, few firms take commensurable actions to identify, assess, mitigate and respond to various types of supply chain risks. By introducing frameworks and concepts along with several case studies and a review of academic literature, Sodhi and Tang treat this important subject with practical relevance and academic rigor. This book will bring practitioners and researchers to develop effective and efficient ways to manage supply chain risks." —Marshall L. Fisher, UPS Professor, Professor of Operations and Information Management and Co-Director of Fishman-Davidson Center for Service and Operations Management, The Wharton School, University of Pennsylvania "This book ties observations in practice to methodologies and research. The rich case examples motivated the approaches and methodologies used to mitigate risks, and in the course of doing so, Sodhi and Tang provided insights on existing and new research opportunities. As a result, this book is highly relevant to both practitioners and academics. Also, the book is also written with management lessons on how risks can be mitigated, and how risks can be contained once disruptions have occurred. As such, it is also a book for management to gain insights and to develop management skills." —Hau L. Lee, Thoma Professor of Operations, Information and Technology and Director of the Stanford Global Supply Chain Management Forum, Graduate School of Business, Stanford University "As companies have extended their supply chains globally and as the face increasing resource issues, they face a number of new risk challenges. While there are various case studies written about supply chain risks, this book gives a comprehensive treatment of the subject with clarity. The concepts and frameworks developed by Sodhi and Tang in this book would create awareness of this important and yet not well understood subject, and strategies described in this book would stimulate practitioners to develop a holistic approach for identifying, assessing, mitigating, and responding to different types of supply chain risks." —Nick Wildgoose, Global Supply Chain Proposition Manager, Zurich Insurance

Philip's Planisphere (Latitude 51. 5 North)

Invaluable for both beginners and advanced observers, Philip's Planisphere (Latitude 51.5 North) is a practical hour-by-hour tracker of the stars and constellations, designed for use anywhere in Britain and Ireland, Northern Europe, Northern USA and Canada. Turn the oval panel to the required date and time to reveal the whole sky visible from your location. The map, by the well-known celestial cartographer Wil Tirion, shows stars down to magnitude 5, plus several deep-sky objects, such as the Pleiades, the Andromeda Galaxy (M31) and the Orion Nebula (M42). Because the planets move round the Sun, their positions in the sky are constantly changing and they cannot be marked permanently on the map; however, the back of the planisphere has tables giving the positions of Venus, Mars, Jupiter and Saturn for every month until 2020. The planisphere is supplied in a full-colour wallet that contains illustrated step-by-step instructions for how to use the planisphere, how to locate planets, and how to work out the time of sunrise or sunset for any day of the year. It explains all the details that can be seen on the map - the magnitudes of stars, the ecliptic and the celestial coordinates. In addition, the section 'Exploring the skies, season by season' introduces the novice astronomer to the principal celestial objects visible at different times of the year. Major constellations are used as signposts to navigate the night sky, locating hard-to-find stars and some fascinating deep-sky objects. The movement of the stars is also explained.

Philip's Compact Britain Road Atlas

Fully up-to-date in a handy flexibound format, Philip's Compact Britain Road Atlas features the super-clear digital cartography, which was voted Britain's clearest and most detailed mapping in an independent consumer survey. All of Great Britain in a super-clear set of maps specially created to fit in a glovebox, bag or backpack with resilient flexi binding to ensure you have the detail you need and never get lost. There are larger route-planning sections to help you navigate around the island easily and every part of Britain is clearly mapped. - Chunky 'glovebox' format - perfect for the car or backpack - Flexibound for robust, long-lasting use - Completely updated and revised with the latest roads and zones for 2022 - The clearest, most detailed road maps in a compact format - Complete coverage of Great Britain at 3.3 miles to 1 inch - Includes a 6-page route-planning section - Great value

Truckers Atlas Britain

This A3 format road atlas for truck drivers provides super-clear mapping at an ultra-large scale of 1.5 miles to 1 inch, providing more detail but easier to read, each page has been titled with its geographical location so you can turn to the page you need more easily. Static speed camera locations are pinpointed on the mapping in addition to a mobile speed camera listing. Essential information for truck and lorry drivers is included with a truckstop and roadside cafe directory, most "bashed" bridges identified, Channel Tunnel, and terminal maps, plus information on how to use the National Grid.

Universal Atlas of the World

Positioned at the very top of the Philip's world atlas range, and published in association with The Royal Geographical Society, Philip's Universal Atlas of the World is our most comprehensive edition, with 584 pages in total, including 290 pages of highly detailed world maps, over 100 city maps, a 54-page illustrated overview of world geography, and an index of over 120,000 place-names. The atlas includes ultra-large-scale maps of each state in the USA plus large-scale maps of Britain and Ireland; Canada; Mexico; Scandinavia; Israel, Lebanon and Jordan; Central Asia; Korea; Taiwan; Australia; New Zealand; and the islands of the Caribbean, Indian Ocean and Pacific. Also included are a set of five ocean floor maps, and maps of the Moon and the night sky. Philip's distinctive cartographic style, combining layer-coloured contours with hill-shading, gives an exceptionally vivid depiction of landforms. A unique feature is the World Cities section, providing more than 100 metropolitan maps and city-centre plans for major cities around the globe: vital information both for long-distance travellers and readers following developments in current affairs. The substantial index of 120,000 entries includes geographical features such as mountains, rivers and deserts, and historical place-names such as Troy and Persepolis; it also provides full latitude and longitude co-ordinates. With it is an informative Geographical Glossary, explaining the meanings of some of the foreign place-names on the maps. Philip's Universal Atlas of the World is the ideal gift or self-purchase world atlas for armchair travellers and globetrotters alike.

Maritime Terrorism

Policymakers have become increasingly concerned in recent years about the possibility of future maritime terrorist attacks. Though the historical occurrence of such attacks has been limited, recognition

that maritime vessels and facilities may be particularly vulnerable to terrorism has galvanized concerns. In addition, some plausible maritime attacks could have very significant consequences, in the form of mass casualties, severe property damage, and attendant disruption of commerce. Understanding the nature of maritime terrorism risk requires an investigation of threats, vulnerabilities, and consequences associated with potential attacks, as grounded both by relevant historical data and by intelligence on the capabilities and intentions of known terrorist groups. These risks also provide the context for understanding government institutions that will respond to future attacks, and particularly so with regard to the US civil justice system. In principle, civil liability operates to redistribute the harms associated with legally redressable claims, so that related costs are borne by the parties responsible for having caused them. In connection with maritime terrorism, civil liability creates that prospect that independent commercial defendants will be held responsible for damages caused by terrorist attacks. This book explores risks and U.S. civil liability rules as they may apply in the context of these types of attacks.

2023 Philip's Big Road Atlas Europe

PHILIP'S: THE BEST-SELLING EUROPE ATLAS RANGE IN THE UK 'The clearest and most detailed maps of Europe' David Williams MBE, former CEO Gem Motoring Assist 'The best of its kind with quick, easy-to-use information' Fleet Week Philip's 2023 Big Road Atlas of Europe contains: - More mapping to the page in easy-to-use large A3 format with spiral binding - Clear coverage of every country in Europe - Multiscale mapping - extra pages with scales from 1:200,000 to 1:3M - more detail where you need it - Super-clear main scale at 1:750,000 (12 miles to 1 inch) - Large 16-page route planning map section - 50 town and city plans for easy navigation in busy spaces - Over 30 urban area maps to help driving in denser areas - All the spectacular scenic routes clearly highlighted - Driving regulations country-by-country on European roads and local roads - Handy Distance Chart included In fact, everything you need for your trip to Europe.

Philip's RGS Complete World Atlas

Published in association with the Royal Geographical Society, the authoritative Philip's Complete World Atlas presents the world in cartography of exceptional quality. The large section of physical and political maps - fully revised and updated - have been selected to provide balanced coverage of the continents, while giving prominence to densely populated and economically or strategically important areas. Projections and scales have been chosen to maximize legibility and minimize distortion over the largest regions. Acclaimed by geographers everywhere, Philip's physical maps combine relief shading with layer-coloured contours to give a stunning visual impression of the Earth's surface, while charting physical features, settlements and communications with meticulous accuracy. Included also is a superb 26-page 'Images of Earth' section, showing 25 of the world's most important cities and regions in Europe, Asia, Africa, Australasia and the Americas in breath-taking satellite imagery. In addition, the atlas features a series of fascinating maps depicting our ocean seafloors in stunning detail. Completing the atlas, and with full latitude and longitude co-ordinates along with letter-figure grid references, the extensive index of over 64,000 names includes geographical features such as mountains, rivers, lakes and deserts, as well as provinces, towns and cities.

Philip's Astronomy Starter Pack

"No.1 in the UK for clear maps." - Ordnance Survey Philip's road maps have been voted Britain's clearest and most detailed mapping in an independent consumer survey, and now show speed camera locations and their limits! The 287 pages of main road maps in Philip's Compact Atlas Britain 2014 are at the large scale of 3.3 miles to 1 inch (Scottish Islands at 6.7 miles to 1 inch), and include speed-camera locations. The maps clearly mark service areas, roundabouts and multi-level junctions, and in rural

areas distinguish between roads above and below 4 metres wide - a boon for drivers of wide vehicles. For leisure users, scenic routes are highlighted, and the maps show upland and highland areas as well as National and Forest Parks, and Areas of Outstanding Natural Beauty. Long-distance footpaths, viewpoints, beaches, golf courses, campsites and caravan sites are clearly shown. Mapping specialists since 1834, Philip's celebrates over 165 years of global excellence in cartographic reference publishing. The latest mapping technology ensures the World Atlases, best sellers for 100 years remain the most up-to-date on the market. The detailed Road Atlases, including those produced with national mapping agency, Ordnance Survey, are the first choice for Fire, Police and Ambulance Services throughout the UK. Complete coverage of Great Britain at 3.3 miles to 1 inch. 287 pages of clear, detailed road maps, including speed-camera locations. Includes a 6-page route-planning section.

Crossword Lists

This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be "collaboration." Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

Philip's Compact Atlas Britain

Navigator' Britain shows speed camera locations, with their speed limits, and provides over 3000 road names as well as numbers. It also includes a massive selection of 70 fully indexed towzi centre maps, plus airport maps and port maps, detailed approach maps, London main roads maps, detailed route-planning maps, a distance table and a 43,000 name index which includes places of interest. The main road maps are at 1.5 miles to 1 inch (3 miles to 1 inch in the Scottish Highlands) and are extra clear and detailed, showing even the smallest roads and lanes that are omitted from other atlases. Every roundabout, junction and slip-road is shown in detail on main roads and motorways. In country areas thousands of individual houses and farms are marked, along with footpaths and tracks. The alpha-numeric grid is based on the National Grid, so that the atlas can be used with GPS systems, and the grid squares have been made smaller for this edition, making it much easier to find locations when using the index. Thousands of tourist attractions and places of interest are shown on the maps, including national parks, nature reserves, houses and gardens, beaches, marinas, canals, county showgrounds, camping and caravan sites, shopping villages, tramways, World Heritage Sites, long distance footpaths, sporting venues, Park & Rides and ferries. Navigator1 Britain is widely used by professional drivers and the emergency services, including national police training, and it is recommended in the motoring press and national newspapers.

Mobile Unleashed

Full color, spiral bound road atlas at A4 size has been fully revised and updated. It contains 170 pages of clear detailed road mapping at a mainland map scale of 3.5 miles to 1 inch. A portable sized publication with a spiral binding; a popular choice for those wanting superb map clarity. Ideal choice to fit in any vehicle glovebox.

Philip's Navigator'Britain

Electronics is an ever-changing field with an entrepreneurial spirit and a rich history, populated by some of the world's most famous companies and personalities. The Business of Electronics details the field's complex ecosystem in all its trials and tribulations. It looks at companies such as Apple, IBM, Samsung, and Nokia, as well as now-extinct companies such as Honeywell Bull (France) and Sinclair Computers (UK) that contributed to technology and business. Sethi shows us how a handful of US companies led the charge in designing equipment that could make millions of small, reliable components; how Nokia started in the timber business; the history of inventors like J.C. Bose, a pioneer in radio communication (who inadvertently made Guglielmo Marconi famous); and why there are numerous companies and creators that never made it or that we have never heard of. This all-encompassing book not only explores the vibrant history of electronics, it uses case studies to examine the companies and people that made history and explain how we ended up where we are today.

Great Britain A-Z Road Atlas 2022 (A4 Spiral)

Perfect for professional drivers to easily use while on the road and when planning routes, this large format A3 road atlas has a clear 3 miles to 1 inch scale. Fully updated for 2020, the atlas includes truck and freight ferry routes and port plans, route planner map, quick reference distance chart, and an explanatory list of restricted motorway junctions. Additionally there is a 12-page section of London street mapping with height, width, and weight restrictions clearly marked, as well as large scale district maps of London, Birmingham, Glasgow, Manchester, and Tyne & Wear. Information of particular importance to truck drivers is emphasized on the mapping which includes over 3,600 bridge heights, with the most frequently struck rail bridges highlighted. Roads less than 4 meters wide are distinguished, as well as road tunnels, toll roads, service areas, steep gradients, level crossings and low emission zones. A special feature, in conjunction with Network Rail's campaign, provides useful information on prevention of bridge strikes--an essential read for all truck drivers and other professionals in the haulage industry.
