Teaching Civics Today: The iCivics Approach to Classroom Innovation and Student Engagement

As former elementary school teachers, the authors focus on what is possible in schools rather than a romantic vision of what schools could be. Based on a 5-year study of an elementary school, this book shows how civic engagement can be purposive and critical—a way to encourage young people to examine their environment, to notice and question injustices, and to take action to make a difference in their communities and school. Focusing on the intersection of student voice and critical inquiry, the book describes how to embed civic engagement into curriculum, school decision-making processes, and whole-school activities. Chapters provide an overview of what research has demonstrated about civic engagement at the classroom, school, and community levels, including detailed descriptions of activities and lessons for practice. Classroom teachers, school principals, community members, and teacher educators can use this resource to foster a deeper, richer understanding of what is entailed in civic life. Book Features: A vivid portrait of a “typical” public school that wants to do more than teach to the test. An examination of the conditions that enable young people to participate in democratic practices, including identifying and questioning injustices. Concrete examples of student voice and critical inquiry in classroom contexts. Practices and activities that encourage children to get along with others, exchange perspectives, and work across differences. “Offers a suggestive range of evidence

that high-quality civic engagement initiatives can enhance students' academic, social, and emotional engagement. . . . It reveals the nitty-gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem-solving, peer collaboration, literacy and social studies learning, and development of empathy and mutual trust." —From the Foreword by Meira Levinson "Mitra and Serriere show us not only that elementary-aged children are capable of civic engagement, but how such engagement can be nurtured in the classroom. Children can be active civic participants; this book demonstrates both the power of this idea and how we might accomplish this essential task." —Beth C. Rubin, Rutgers University

In this brilliantly evocative ethnography, Francio Guadeloupe probes the ethos and attitude created by radio disc jockeys on the binational Caribbean island of Saint Martin/Sint Maarten. Examining the intersection of Christianity, calypso, and capitalism, Guadeloupe shows how a multiethnic and multireligious island nation, where livelihoods depend on tourism, has managed to encourage all social classes to transcend their ethnic and religious differences. In his pathbreaking analysis, Guadeloupe credits the island DJs, whose formulations of Christian faith, musical creativity, and capitalist survival express ordinary people's hopes and fears and promote tolerance.

Now available in a new and enlarged edition is the popular fourth-grade textbook, Missouri Then and Now. Closely correlated with Missouri's Official Course Content Standards and profusely illustrated, with color pictures and maps distributed throughout the book, this state-of-the-art text promises to meet the instructional needs of twenty-first-century classrooms. Teachers will welcome the many special features designed to facilitate the mastery of the basic competencies measured by the Missouri Assessment Program. Missouri Then and Now incorporates geography, civics, economics, anthropology, and sociology with history to give students an opportunity to learn about their world on several levels: the community (the origin and subsequent growth of towns), the region (the occupation and settlement of the Mississippi River Valley), the nation (the struggle for statehood, the westward movement, the Civil War, and the depression of the 1930s) and the world (exploration, world wars, the global economy, and the worldwide communications network). This edition also adds valuable new insights concerning the importance of scientific and technological innovations. Young Missourians will be introduced to a host of remarkable women, men, and children with stories that will help bring history to life. Individuals who have made special contributions to the state are featured in the "Famous Missourians" sections placed throughout the book, and the routines of daily life and ordinary people are also accorded significant coverage. An important new feature in this edition, "In Their Own Words," gives students the opportunity to read excerpts from actual source documents. These brief passages from letters, diaries, reports,

and other historical documents, which have been edited and made accessible to fourth graders, are ideally suited for active learning. In addition to its many new features, Missouri Then and Now retains the attributes that made earlier editions practical for teaching history. Each chapter begins with guiding questions intended to help students formulate their own ideas and initiate individual and group research activities. A listing of recent books, videos, and web sites located at the end of each chapter will lead students to varied information sources specifically related to Missouri topics. The new words identified for each chapter and the glossary placed in the appendix remain useful tools for vocabulary building exercises. A separate Teacher's Guide includes suggested student research topics for each chapter along with guiding questions. An accompanying matrix helps teachers identify the applicable knowledge and process standards and includes sample learning activities appropriate to the specific topic. These and a host of other attractive features will make Missouri Then and Now a popular choice in Missouri's fourth-grade classrooms.
