Modern Novel Writing, Or, The Elegant Enthusiast

First published in 1796 under the pseudonym Lady Harriet Marlow, Modern Novel Writing ridicules the sentimental and sensational novels of the day, and especially the productions of William Lane's Minerva Press; however, it is also a political satire, attacking the Tory party and its leader, William Pitt the Younger, for the war with France, repressive legislation and neglect of the poor. This is the first scholarly edition to be published and includes a comprehensive introduction and notes.

Azemias is a satirical attack on what William Beckford perceived as characteristically feminine novel-writing. First published in 1797, under the pseudonym *Jacquetta Agneta Mariana Jenks*, it joined its companion volume *Modern Novel Writing, or, The Elegant Enthusiast* (1796) in ridiculing the sentimental and sensational novels of the day, and especially the productions of William Lane's *Minerva Press*. However, it is also a biting political satire, attacking the Tory party and its leader, William Pitt the Younger, for the war with France, repressive legislation, and neglect of the poor. This is the first-ever scholarly edition of the novel and includes a new introduction by Robert J. Gemmett, as well as thorough annotations, a bibliography, and contemporary illustrations. William Beckford (1760-1844) was a novelist, travel writer, art critic, and collector. One of the most controversial figures of his time, as well reputedly the richest man in England, he is probably best remembered as the author of the Gothic novel *Vathek* (1786) and the creator of *Fonthill Abbey*. Robert J. Gemmett, Professor of English at the State University of New York, Brockport, is an acknowledged expert on William Beckford and is the author of numerous books and articles on his life and works. He is also editor of the first scholarly edition of *Modern Novel Writing*, published in 2008.

Modern Novel Writing Or The Elegant Enthusiast And Interesting Emotions Of Arabella Bloomville A Rhapsodical Romance

Exploring how readers received and responded to literary works in the long eighteenth century, M-C. Newbould focuses on the role played by Laurence Sterne's fiction and its adaptations. Literary adaptation flourished throughout the eighteenth century, encouraging an interactive relationship between writers, readers, and artists when well-known works were transformed into new forms across a variety of media. Laurence Sterne offers a particularly dynamic subject: the immense interest provoked by *The Life and Opinions of Tristram Shandy, Gentleman* and *A Sentimental Journey through France and Italy* inspired an unrivalled number and range of adaptations from their initial publication onwards. In placing her examination of *Sterneana* within the context of its production, Newbould demonstrates how literary adaptation operates across generic and formal boundaries. She breaks new ground by bringing together several potentially disparate aspects of *Sterneana* belonging to areas of literary studies that include drama, music, travel writing, sentimental fiction and the visual. Her study is a vital resource for Sterne scholars and for readers generally interested in cultural productivity in this period.

Modern Novel Writing Or the Elegant Enthusiast and Interesting Emotions of Arabella Bloomville a Rhapsodical Romance

Mary Wollstonecraft wrote these two novellas at the beginning and end of her years of writing and political activism. Though written at different times, they explore some of the same issues: ideals of femininity as celebrated by the cult of sensibility, the unequal education of women, and domestic subjugation. Mary counters the contemporary trend of weak, emotional heroines with the story of an

intelligent and creative young woman who educates herself through her close friendships with men and women. Darker and more overtly feminist, *The Wrongs of Woman* is set in an insane asylum, where a young woman has been wrongly imprisoned by her husband. By presenting the novellas in light of such texts as Wollstonecraft's letters, her polemical and educational prose, similar works by other feminists and political reformists, the literature of sentiment, and contemporary medical texts, this edition encourages an appreciation of the complexity and sophistication of Wollstonecraft's writing goals as a radical feminist in the 1790s.

Mary, A Fiction and *The Wrongs of Woman*, or Maria

The *Anthology and the Rise of the Novel*, first published in 2000, brings together two traditionally antagonistic fields, book history and narrative theory, to challenge established theories of 'the rise of the novel'. Leah Price shows that far from leveling class or gender distinctions, as has long been claimed, the novel has consistently located them within its own audience. Shedding new light on Richardson and Radcliffe, Scott and George Eliot, this book asks why the epistolary novel disappeared, how the book review emerged, why eighteenth-century abridgers designed their books for women while Victorian publishers marketed them to men, and how editors' reproduction of old texts has shaped authors' production of new ones. This innovative study will change the way we think not just about the history of reading, but about the genealogy of the canon wars, the future of intellectual property, and the role that anthologies play in our own classrooms.

The Sentimental Novel in the Eighteenth Century

Writing the Lives of Painters explores the development of artists' biographies in eighteenth- and early nineteenth-century Britain. During this period artists gradually distanced themselves from artisans and began to be recognised for their imaginative and intellectual skills. The development of the art market and the burgeoning of an exhibition culture, as well as the foundation of the Royal Academy of Arts in 1768, all contributed to redefining the rank of artists in society. This social redefinition of the status of artists in Britain was shaped by a thriving print culture. Contemporary artists were discussed in a wide range of literary forms, including exhibition reviews, art-critical pamphlets, and journalistic gossip-columns. Biographical accounts of modern artists emerged in a dialogue with these other types of writing. This book is an account of a new literary genre, tracing its emergence in the cultural context

of the late eighteenth and early nineteenth centuries. It considers artistic biography as a malleable generic framework for investigation. Indeed, while the lives of painters in Britain did not completely abandon traditional tropes, the genre significantly widened its scope and created new individual and social narratives that reflected and accommodated the needs and desires of new reading audiences. Writing the Lives of Painters also argues that the proliferation of a myriad biographical forms mirrored the privileging of artistic originality and difference within an art world that had yet to generate a coherent 'British School' of painting. Finally, by focusing on the emergence of individual biographies of British artists, the book examines how and why the art historiographic model established by Georgio Vasari was gradually dismantled in the hands of British biographers during the Romantic period.

The handbook offers a comprehensive introduction to the British novel in the long eighteenth century, when this genre emerged to develop into the period's most versatile and popular literary form. Part I features six systematic chapters that discuss literary, intellectual, socio-economic, and political contexts, providing innovative approaches to issues such as sense and sentiment, gender considerations, formal characteristics, economic history, enlightened and radical concepts of citizenship and human rights, ecological ramifications, and Britain's growing global involvement. Part II presents twenty-five analytical chapters that attend to individual novels, some canonical and others recently recovered. These analyses engage the debates outlined in the systematic chapters, undertaking in-depth readings that both contextualize the works and draw on relevant criticism, literary theory, and cultural perspectives. The handbook's breadth and depth, clear presentation, and lucid language make it attractive and accessible to scholar and student alike.

A Dictionary of the Anonymous and Pseudonymous Literature of Great Britain

James Watt's historically grounded account of Gothic fiction, first published in 1999, takes issue with received accounts of the genre as a stable and continuous tradition. Charting its vicissitudes from Walpole to Scott, Watt shows the Gothic to have been a heterogeneous body of fiction, characterized at times by antagonistic relations between various writers or works. Central to his argument about these works' writing and reception is a nuanced understanding of their political import: Walpole's attempt to forge an aristocratic identity, the loyalist affiliations of many neglected works of the 1790s, a reconsideration of the subversive reputation of *The Monk*, and the ways in which Radcliffean romance proved congenial to conservative critics. Watt concludes by looking ahead to the fluctuating critical status of Scott and the Gothic, and examines the process by which the Gothic came to be defined as a monolithic tradition, in a way that continues to exert a powerful hold.

Women Writing about Money

The years between the publication of Mary Wollstonecraft's *Vindication of the Rights of Woman* (1792) and of John Stuart Mill's essay *On the Subjection of Women* (1869) – a crucial phase in the emancipation movement – also saw the emergence of England's greatest women writers, whose response to the flux of new ideas as revealed in many outstanding works of fiction Dr Mews here examines. The central chapters of the book take the form of a perceptive and humane analysis of the way in which the greater women novelists conceived the role of women, on the one hand as young girls, wives and mothers, on the other as individuals standing alone in spinsterhood, as teachers or artists. The writers examined in detail are Fanny Burney, Maria Edgeworth, Jane Austen, the Brontë sisters, Elizabeth Gaskell, and George Eliot. Such a comprehensive study has not been attempted before. It throws light not only on the novel and the novelist in society but also on the transmutation of deeply felt experience into creative work.

A Gothic Bibliography (Unabridged)

This book investigates the critical importance of women to the eighteenth-century debate on property as conducted in the fiction of the period. April London argues that contemporary novels advanced several, often conflicting, interpretations of the relation of women to property, ranging from straightforward assertions of equivalence between women and things to subtle explorations of the self-possession open to those denied a full civic identity. Two contemporary models for the defining of selfhood through reference to property structure the book, one historical (classical republicanism and bourgeois individualism), and the other literary (pastoral and georgic). These paradigms offer a cultural context for the analysis of both canonical and less well-known writers, from Samuel Richardson and Henry Mackenzie to Clara Reeve and Jane West. While this study focuses on fiction from 1740–1800, it also draws on the historiography, literary criticism and philosophy of the period, and on recent feminist and cultural studies.

Jane Austen and the Morality of Conversation

The Grand Tour has become a subject of major interest to scholars and general readers interested in exploring the historic connections between nations and their intellectual and artistic production. Although traditionally associated with the eighteenth century, when wealthy Englishmen would complete their education on the continent, the Grand Tour is here investigated in a wider context, from the decline of the Roman Empire to recent times. Authors from Chaucer to Erasmus came to mock the custom but even the Reformation did not stop the urge to travel. From the mid-sixteenth century, northern Europeans justified travel to the south in terms of education. The English had previously travelled to Italy to study the classics; now they travelled to learn Italian and study medicine, diplomacy, dancing, riding, fencing, and, eventually, art and architecture. Famous men, and an increasing proportion of women, all contributed to establishing a convention which eventually came to dominate European culture. Documenting the lives and travels of these personalities, Professor Chaney's remarkable book provides a complete picture of one of the most fascinating phenomena in the history of western civilisation.
