A safe haven is

Answer D: The term 'safe haven' refers to a place, created by local authorities, where you can safely leave your truck unattended when you are carrying explosive material. This solves a trucking dilemma that has often left drivers to make somewhat dangerous decisions, such as driving through the night so that they can stay with their load.

What is the main difference between a portable tank and a cargo tank?

A placarded vehicle must carry what type of fire extinguisher?

Answer C: All placarded vehicles are required to have a fire extinguisher certified by the Underwriters Laboratory (often written as UL) to put out a minimum 10 square feet of a Class B fire, which includes almost all flammable liquids, and is non- conductive due to its C rating.

The two other places where the hazardous identification number must appear are

Which of the following hazard classes utilizes a transport index in order to determine how much of it can be loaded on a single vehicle for transport?

Which hazard classes must you NEVER smoke, or perform any activity involving fire, within 25 feet of?

Answer B: While you should not add the risk of smoking in extremely close proximity of any class of hazardous material, these additional rules also apply: no smoking within 25 feet of classes 3 and 2.1 (flammable liquids and flammable gases) and no smoking or holding a lighted smoking object, such as a cigar or pipe, within 25 feet of classes 1, 3, 4, or 4.2 explosives

Do you need to stop before a railroad crossing if you are hauling 100 pounds of Division 4.3 materials?

Cargo tanks are

If you are carrying Division 1.2 or 1.3 materials, how far away must you park from the traveled portion of the roadway?

In what location must you keep your shipping papers which describe any hazardous materials?

Answer C: Your shipping papers for hazardous materials must be visible and accessible to emergency personnel at all times, which includes when you are out of the vehicle. This is why, when you are away from your truck, they must be placed on your driver's seat in easy reach for emergencies.

Which of the following is NOT something you need to know in order to determine if you need to use placards?

Your engine runs a pump when you are delivering compressed gas. Should you turn off your engine before or after you unhook the hoses after finishing the delivery?

Which of the following materials would be an acceptable floor liner for moving Division 1.1 or 1.2 materials?

What are shippers trying to accomplish when they package the material?

Answer B: The regulations for hazardous materials are designed so that shippers make packages easy for drivers, destination personnel, and emergency personnel to identify the contents quickly and easily

Which of the following is NOT an acceptable type of marking for hazardous materials?

Answer D: A hazardous material's proper shipping name should be displayed strictly in Roman print, which means there should be no italics. Acceptable markings would include the appropriate descriptive name from the subchapter in your manual, as well as UN marks, instructions, weight, ID number, specification, cautions, or some combination of the above.

What action should you take if there is no phone available and you discover your hazardous materials

shipment leaking at a rest stop?

If you are already carrying 100 pounds of silver cyanide, what precautions must you take if you are given papers at a dock to carry 100 cartons of battery acid?

Answer B: Silver cyanide and battery acid are on the list of products that cannot travel together for safety reasons (check the 'Do Not Load Table in your manual). Division 6.1 materials, like silver cyanide, cannot be loaded with acids or corrosive materials which could combine to make hydrocyanic acid.

What is a technical name?

Which of the following three hazard classes should NOT be placed into a temperature-controlled trailer (one with a heater/air conditioner unit)?

Which of the following is a necessary qualification for non-bulk packaging?

Answer D: Non-bulk packaging has specific qualifications if it is being used as a receptacle for solids, liquids, or gases. For each, there is a maximum net mass for it to qualify as non-bulk: 450 L or less for liquids, 400 kg or less for solids, and 454 kg or less for gases.

How far away are you allowed to park from a bridge, tunnel, or building if you are carrying Division 1.2 or 1.3 materials?

What is the purpose of a driver placarding his or her vehicle?

The Emergency Response Guidebook (ERG)

Answer D: The Emergency Response Guidebook, or ERG, was created by the US Department of Transportation and is used by emergency personnel such as firefighters and paramedics to respond to trucking emergencies. The guidebook is indexed by hazardous material identification number, which is why it is very important that shipping papers are labeled correctly.

Where are the two main places that the hazardous material identification number appears?

Answer B: The two main places where you must keep the hazardous material identification numbers are on your shipping papers and on the packages themselves, as these are the places that emergency personnel has been trained to check immediately
