Factory Glue (Bond) Used To Hold Components In Place During The Manufacturing Process

Leaky Capacitors typically have bulging tops and/or caustic / acidic goop leaking from them

Factory Board Polarity Markings Are Not Always Correct Engineers Make mistakes Too

Mark Your Capacitors Just As How They Are In circuit, Don't Rely On Board Markings (I Put a Magic Marker Tick on All Capacitors Facing The Front of the Unit)

The Real Answer Is It Depends

Again, It Depends. Always ask for date of manufacture on eBay components. They maybe as old as what's in your piece of equipment...

There are fake capacitors on eBay I stick to ordering from my local country And well-known sellers Recap one section at a time and test the unit. shot gunning the entire unit will make it hard to troubleshoot if it doesn't work properly.
