[#functional neurological disorder](#) [#autonomic neuropathy symptoms](#) [#nerve dysfunction causes](#) [#neuropathic pain management](#) [#nervous system functional issues](#)

Functional Nerve Diseases refer to conditions where the nervous system's function is impaired without clear structural damage, often falling under the umbrella of functional neurological disorders (FND). These can manifest as a wide array of symptoms, from autonomic neuropathy affecting involuntary bodily functions to persistent neuropathic pain, significantly impacting quality of life and requiring specialized diagnostic and management approaches.
