Vedic Humanism

This book takes the reader along with the author into cosmic odyssey to make them feel as inseparable part of the universe. Her voice proclaims - Universe as our home and temple, humanism our existence. The author believes that the ultimate essence and purpose of all religions is - Universal love, brotherhood and Global family - as the way of life. The author regrets for people constructing bee-hive like compartments in their hearts, minds with dividing walls. She pleads the people to realise the truth that the noble cause of their presence in this Universe is for spreading, love, peace among the people of the world..She calls to abandon brutality and promote universal love, brotherhood, humanism the true religion. She pleads all to introspect more by heightening ones inner spirit. She believes that the discourses of all treasured religious scriptures and preachings of all preceptors is to accord guidance to human civilization for peaceful co-existence. She foresee the inhuman perversions in future generations

and desires the need to mould the children with humane traits and inculcate the culture of peace to guard them from vicious cultures, and the author calls for every person to march as Harbinger of Peace.

Humanism - Path to Universal Peace

This book is one of the classic book of all time.

The Sacred Path of Peace

Classic Book of All Time

Indian Books in Print

India, That Is Bharat, the first book of a comprehensive trilogy, explores the influence of European 'colonial consciousness' (or 'coloniality'), in particular its religious and racial roots, on Bharat as the successor state to the Indic civilisation and the origins of the Indian Constitution. It lays the foundation for its sequels by covering the period between the Age of Discovery, marked by Christopher Columbus' expedition in 1492, and the reshaping of Bharat through a British-made constitution-the Government of India Act of 1919. This includes international developments leading to the founding of the League of Nations by Western powers that tangibly impacted this journey. Further, this work also traces the origins of seemingly universal constructs such as 'toleration', 'secularism' and 'humanism' to Christian political theology. Their subsequent role in subverting the indigenous Indic consciousness through a secularised and universalised Reformation, that is, constitutionalism, is examined. It also puts forth the concept of Middle Eastern coloniality, which preceded its European variant and allies with it in the context of Bharat to advance their shared antipathy towards the Indic worldview. In order to liberate Bharat's distinctive indigeneity, 'decoloniality' is presented as a civilisational imperative in the spheres of nature, religion, culture, history, education, language and, crucially, in the realm of constitutionalism.

The Way of Peace

This book offers an original contribution towards a new theory of intersubjectivity which places ethics of breath, hospitality and non-violence in the forefront. Emphasizing Indian philosophy and religion (Vedas and Upanishads) and related cross-cultural interpretations, it provides new intercultural interpretations of key Western concepts which traditionally were developed and followed in the vein of re-conceptualizations or revitalizations of Greek thought, as in Nietzsche and Heidegger, for example. The significance of the book lies in its establishment of a new platform for thinking philosophically about intersubjectivity, so as to nudge contemporary philosophy towards a more sensitive approach, which is needed in our times. Its originality lies in its innovative approach, which searches for the origin of ethical gestures (represented in respecting the breath/breathing) through the newly introduced concept of "mesocosm" as a space of a ritual, or a new ethical space of intersubjective encounters. The book also introduces the possibility of an original ethics based on breath. Intended for philosophers, feminists and others concerned with intercultural philosophy and comparative religion, the book will appeal to readers interested in contemporary ethical and political theories of peaceful conflict resolution and concepts of hospitality. A Breath of Hospitality will benefit all who seek a more sensitive approach in philosophy, including philosophy of religion, and often-neglected practical and educational layers of our everyday intersubjective relations.

The Way of Peace

VEDIC MYTHOLOGY presents the earliest stage in the evolution of beliefs which constitute the source of religious concepts of the majority of Indian people. Documented with Sanskrit and General Index, this work constitutes a valuable contribution in the field of Vedic Mythology.

India, that is Bharat

This book consists of global scholars' views on mankind's wishes for the future, the Belt and Road Initiative, bilateral cooperation, inter-civilization exchanges, and mutual learning among Asian civilizations, which represent a critical way to boost the construction of an Asian community with a shared future and a community with a shared future for mankind. It also gives some insight into the future development of Asian civilizations. The book aims to present a diverse and balanced overview on the prospect of Asian development.

Breath of Proximity: Intersubjectivity, Ethics and Peace

This book is concerned with the rationality and plausibility of the Muslim faith and the Qur'an, and in particular how they can be interrogated and understood through Western analytical philosophy. It also explores how Islam can successfully engage with the challenges posed by secular thinking. The Quran and the Secular Mind will be of interest to students and scholars of Islamic philosophy, philosophy of religion, Middle East studies, and political Islam.

Vedic Mythology

The Rigveda is the oldest Sanskrit text, consisting of over one thousand hymns dedicated to various divinities of the Vedic tradition. Orally composed and orally transmitted for several millennia, the hymns display remarkable poetic complexity and religious sophistication. As the culmination of the long tradition of Indo-Iranian oral-formulaic praise poetry and the first monument of specifically Indian religiosity and literature, the Rigveda is crucial to the understanding both of Indo-European and Indo-Iranian cultural prehistory and of later Indian religious history and high literature. This new translation represents the first complete scholarly translation into English in over a century and utilizes the results of the intense research of the last century on the language and the ritual system of the text. The focus of this translation is on the poetic techniques and structures utilized by the bards and on the ways that the poetry intersects with and dynamically expresses the ritual underpinnings of the text.

Mountain Path

The health of business is inextricably linked with the health of humanity and nature. But our current approaches to leadership treat business as entirely separate—and the result has been recurring economic, environmental, and human crises. In this extraordinary book, Ram Nidumolu uses evocative parables and stories from the ancient Indian wisdom texts, the Upanishads, to introduce Being-centered leadership. This new kind of leadership is anchored in the concept of Being, the fundamental reality that underlies all phenomena. Being-centered leaders are guided by an innate sense of interconnection—the good of the whole becomes an integral part of their decisions and actions. Using the experiences of over twenty trailblazing CEOs, as well as those from his own life, Nidumolu describes a four-stage road map every aspiring leader can use to reconnect business to the wider world—to the benefit of all.

The Veda And Human Destiny

This major new Handbook provides a cutting-edge and transdisciplinary overview of the main issues, debates, state-of-the-art methods, and key concepts in peace and conflict studies today. The fields of peace and conflict studies have grown exponentially since being initiated by Professor Johan Galtung half a century ago. They have forged a transdisciplinary and professional identity distinct from security studies, political science, and international relations. The volume is divided into four sections: understanding and transforming conflict creating peace supporting peace across the disciplines. Each section features new essays by distinguished international scholars and professionals working in peace studies and conflict resolution and transformation. Drawing from a wide range of theoretical, methodological, and political positions, the editors and contributors offer topical and enduring approaches to peace and conflict studies. The Handbook of Peace and Conflict Studies will be essential reading for students of peace studies, conflict studies and conflict resolution. It will also be of interest and use to practitioners in conflict resolution and NGOs, as well as policy makers and diplomats.

Kevala-Bodhi: Buddhist and jaina History of the Deccan is a collection of papers with a special focus on two religions that left an inedible mark on the history of the Deccan and, in turn marked a visible change

in the way both these religions developed over the early historic and early medieval times. Though each of these has been dealt with separately in monographs and research papers in the past, this is the first time that these religions have been discussed together in terms of the trajectory of their spread to and entrenchment in the Deccan. The path chosen by each in this regard was undoubtedly different and this is precisely what makes their discussion together valuable and interesting. This spatial and chronological focus of the papers in this volume is wide. In terms of region it also includes discussion on areas contiguous to the Deccan so as to bring in the inter-regional contact and dissemination of ideas that was dynamic rather than closeted in compartments of space and time.

The Quran and the Secular Mind

Like Charles Seife's *Zero* and Dava Sobel's *Longitude*, this passionate intellectual history is the story of the intersection of science and the human, in this case the rivals who discovered oxygen in the late 1700s. That breakthrough changed the world as radically as those of Newton and Darwin but was at first eclipsed by revolution and reaction. In chronicling the triumph and ruin of the English freethinker Joseph Priestley and the French nobleman Antoine Lavoisier—the former exiled, the latter executed on the guillotine—*A World on Fire* illustrates the perilous place of science in an age of unreason.

What Buddhists Believe

Orientalism and Religion offers us a timely discussion of the implications of contemporary post-colonial theory for the study of religion. Richard King examines the way in which notions such as mysticism, religion, Hinduism and Buddhism are taken for granted. He shows us how religion needs to be reinterpreted along the lines of cultural studies. Drawing on a variety of post-structuralist and post-colonial thinkers, such as Foucault, Gadamer, Said, and Spivak, King provides us with a challenging series of reflections on the nature of Religious Studies and Indology.

In the few years since the attack on the World Trade Center on September 11, 2001, evil has become a central theme in the media and human consciousness: the evil of terrorism, the evil of secular culture, concern for poverty, and climate change... Yet different cultures and religious traditions have different ideas of what evil is and what its root causes are. Although there is no massive clash of cultures, many disagreements and also conflicts in the world arise from the deep differences in views of evil. This volume explores religious views of evil. Scholars from different religions and from various parts of the world describe how people probe the depths of evil—and by necessity that of good—from their own background in various worldviews. In their explorations, almost all address the need to go beyond morality, and beyond legalistic definitions of evil and of good. They point to the radical depths of evil in

the world and in human society and reinforce our intuition that there is no easy solution. But if we can gain a better understanding of what people from other worldview traditions and cultures consider evil, we are that much closer to a more peaceful world.

Two Birds in a Tree

Human civilisation is passing through one of the most difficult times in the history of mankind. The world is in stress. The situation worsens by the day. Sanatan Dharma: Vaidik Gateway to the Next Century attempts to offer a solution to all our problems. Hinduism is a way of life-with nature, in nature, by nature. Author Manoj Singh elaborates on the practical aspects of one of the oldest cultural civilisations, analysing how it's more relevant in today's troubled age. He narrates the evolution of Vaidik civilisation, elaborating on the basics of Vaidik Sanatan dharma. He discusses life in Hinduism, its culture, festivals, rituals, customs, yoga, Vedas and mantras, outlining a broad perspective of why and how these are significant. This comprehensive work touches upon all aspects of Sanatan life philosophy for spiritual enlightenment. A heritable past, which has been otherwise forgotten, is revealed here, hoping to make human journey viable in the present dynamic complexity. This is for anyone who desires to understand the real meaning of living rather than just existing.
