Entrepreneurship That Makes Cents

The focus of Entrepreneurship That Makes Cents is to guide readers to continue to grow their business and their personal finances. Mike's goal is to impact and improve the lives of the people he works with, while helping them become financially independent. Mike Raber works with professionals and entrepreneurs from all different walks of life to help them become better versions of themselves, both in business and in life. Mike's passion is empowering people to live purpose-driven lives. He helps them create balance in the different areas of their lives.

If It Don't Make Money, It Don't Make Cents Entrepreneur Notebook

This matte-cover notebook with 200 pages of college-ruled lined paper makes a great and perfect gift for the entrepreneur, boss, or self-employed business owner. Use this as a holding place for all of your great ideas. Multiple income streams is what it's all about. Recording your ideas in this entrepreneur notebook can be motivating and help you to keep on the right track. It encourages hard work and success and is an awesome every day inspiration for the hustle and grind.

Making Cents: Real Conversations about Personal Finance

Like so many of us, Waceke learned some of her most valuable lessons through mistakes she made and the failures she survived. Making Cents is based on these lessons coupled with stories from other real people's experiences, failures, lessons learned, and their eventual success with personal finances.

Writing That Makes Sense, 2nd Edition

The second edition of Writing That Makes Sense takes students through the fundamentals of the writing process and explores the basic steps of critical thinking. Drawing upon over twenty years of experience teaching college composition and professional writing, David S. Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking to provide students with step-by-step guides for successful academic writing in a variety of rhetorical modes. New in the second edition: -Expanded discussion of how to write effective thesis statements for informative, persuasive, evaluative, and synthesis essays, including helpful thesis statement templates. -Extensive templates introducing students to conventions of academic discourse, including integrating outside sources, interacting with other writers' ideas, and dialoguing with multiple perspectives. -Examples of academic writing from different disciplines illustrating essay titles, abstracts, thesis statements, introductions, conclusions, and voice. -Expanded discussion of voice in academic writing, including an exploration of active and passive voice constructions in different disciplines and tips on how to edit for clarity. -A new chapter on writing in the disciplines. -Updated sample student papers. -New readings with examples of opposing views and multiple perspectives.

Entrepreneurship Programs and the Modern University

At IUs Kelley School of Business, we believe in the power of entrepreneurial thinking, with a relentless pursuit of excellence in the research and teaching of entrepreneurship and innovation across our

entire campus. This book on academic entrepreneurship offers one of the most comprehensive approaches to understanding the framework and strategies for building effective entrepreneurship programs within universities today. I truly believe all universities, regardless of their current stage of development of their entrepreneurship programs, will materially benefit from the ideas in this book. Daniel C. Smith, former Dean, Kelley School of Business, Indiana University and current CEO, Indiana University Foundation, US I am a believer in the concept of the entrepreneurial university, and think our institutions of higher learning must learn to think and act in more entrepreneurial ways. The kind of entrepreneurial culture which this book champions can transform student lives, invigorate university campuses, and make a fundamental difference in our communities. Burns Hargis, President, Oklahoma State University, US After more than 30 years of impressive growth, what have we learned about building world-class entrepreneurship programs within universities? After tracing the evolution of entrepreneurship within institutions of higher learning, the authors explore the key elements that constitute a comprehensive entrepreneurship program. Best practices at leading universities and differing kinds of academic environments are highlighted. They examine multiple aspects of program management and infrastructure, including curriculum and degree program development, where entrepreneurship is administratively housed, how it is organized, and approaches to staffing and resource acquisition. The perspectives shared in the book enable university presidents, entrepreneurship students, provosts, deans, entrepreneurship program directors, faculty members, and others to better capitalize upon the empowering and transformative potential of entrepreneurship.

How to Make a Million Before Lunch

Fed up with working for someone else? Want to start your own business but don't want to wait years to reap the rewards? Take every shortcut you can ... and get there fast. As Enterprise Editor of The Sunday Times, Rachel Bridge has met hundreds of the world's most successful entrepreneurs. Now she shares their expertise to show you the top 20 shortcuts to creating a booming business - and the energy-sapping, time-wasting traps to avoid along the way - so you too can make a million - asap.

UNSCRIPTED

What if Life Wasn't About 50 Years of Wage-Slavery, Paying Bills and then Dying? Tired of sleepwalking through a mediocre life bribed by mindless video-gaming, redemptive weekends, and a scant paycheck from a soul-suffocating job? Welcome to the SCRIPTED club— where membership is neither perceived or consented. The fact is, ever since you've been old enough to sit obediently in a classroom, you have been culturally engineered for servitude, unwittingly enslaved into a Machiavellian system where illusionary rules go unchallenged, sanctified traditions go unquestioned, and lifelong dreams go unfulfilled. As a result, your life is hijacked and marginalised into debt, despair, and dependence. Life's death sentence becomes the daily curse of the trivial and mundane. Fun fades. Dreams die. Don't let life's consolation prize become a car and a weekend. Recapture what is yours and make a revolutionary repossession of life-and-liberty through the pursuit of entrepreneurship. A paradigm shift isn't needed—the damn paradigm needs to be thrown-out altogether. The truth is, if you blindly follow conventional wisdom pushed by conventional people living conventional lives, can you expect to be anything but conventional? Rewrite life's script: ditch the job, give Wall Street the bird, and escape the insanity of trading your life away for a paycheck and an elderly promise called retirement. UNSCRIPT today and start leading life— instead of life leading you.

Handbook of Geriatric Care Management

A comprehensive guide for Geriatric Care Managers (GCMs) to help define duties and procedures while providing guidelines for setting up a geriatric care practice. --from publisher description.

Business Basics

Business Basics provides would-be entrepreneurs who are planning to start up a first business, experienced entrepreneurs who are preparing to start another business, and leaders of existing businesses with wisdom and directions to accomplish 8,000 times more. The book's 52 lessons are based on the most extensive investigations ever conducted into making business breakthroughs with existing resources, and the lessons show how to:

- prepare for leading an extraordinarily successful enterprise
- expand a market's size by twenty times and profitably gain market share while doing so
- cut a company's costs (and those of its stakeholders) for providing and using an offering by 96 percent
- decrease the investments needed to provide and use an offering by 96 percent

As a result,

revenues grow by much more than twenty times. Profits expand by more than 400 times as revenues soar, while unit costs plunge. Free cash flow is much more than 8,000 times larger because growth requires little or no new investment. The value of a business also expands by more than 8,000 times. Other stakeholders receive exponential benefit gains as well. In contrast to its title, *Business Basics* is also an advanced book that assumes knowledge of and facility in several of the books developed by the 400 Year Project (founded in 1995 to demonstrate how to accomplish improvements in less than one year that normally take at least twenty years to achieve: see at www.fastforward400.com) including *The 2,000 Percent Solution*, *The 2,000 Percent Solution Workbook*, *The Irresistible Growth Enterprise*, *The Ultimate Competitive Advantage*, *The 2,000 Percent Squared Solution*, and *2,000 Percent Living*. Your time and attention in reading and applying those books will be well repaid by upgrading your knowledge, skills, and resources for breakthroughs you want to accomplish. *Business Basics* is designed to be read and applied over at least a year. The book's messages are captured in fifty-two lessons presented in the four parts that correspond to the four breakthrough questions listed earlier. Each lesson contains assignments for you. Some of the assignments can be done in a few hours. Completing other assignments may well extend over several months. Think of *Business Basics* as a book that combines theory, advanced practices, and directions for applied work. Each lesson has been tested by members of The Billionaire Entrepreneurs' Master Mind, a group of entrepreneurs around the world that was founded in 2006. I serve as the research coordinator for the group, and I authored all of the lessons developed so far (exceeding 290 and growing). The fifty-two lessons you find in the book are the ones that were most valuable to the study group's members in recent years for answering the four breakthrough questions. Many people incorrectly doubt that businesses can make such exponential gains. I invite such skeptics to read and apply the book with a critical eye to see if what is shared makes sense. *Business Basics* is also intended to help business leaders who either copy or just slightly improve on the new business models that are created by the book's readers. As a result of such efforts, my goal is to encourage and to assist a million entrepreneurs to succeed in establishing 2,000 percent cubed businesses for the first time. From the resulting business models, I estimate that over a hundred million vastly improved businesses will eventually emerge. The offerings and benefits for stakeholders from such new business models will improve global prosperity in an unprecedented way, one of the goals of the 400 Year Project (to help everyone on Earth improve twenty times faster than normal from 2015 through 2035). I thank you for helping humanity by reading the book and applying its lessons. You will probably never know all of the good that you are doing.

How I Made It

Every year thousands of hopeful entrepreneurs decide to take the plunge. Many fail, but many go on to achieve great success and huge profits. In *How I Made It* 40 successful entrepreneurs explain how they managed to defy the odds and turn their dreams into reality. Find out how they decided what to do, how they got started and how they found the money they needed. But they also reveal how they had doubts, made stupid mistakes, and encountered overwhelming frustrations along the way. This second edition updates their stories to reveal what happened next and how, in most cases, they finally sold their businesses and made millions. Gutsy, inspiring, and life affirming - if you have ever dreamt of starting up your own business *How I Made It* is for you.

Never Get a Real Job

Young serial entrepreneur Scott Gerber is not the product of a wealthy family or storied entrepreneurial heritage. Nor is he the outcome of a traditional business school education or a corporate executive turned entrepreneur. Rather, he is a hard-working, self-taught 26-year-old hustler, rainmaker, and bootstrapper who has survived and thrived despite never having held the proverbial "real" job. In *Never Get a "Real" Job: How to Dump Your Boss, Build a Business, and Not Go Broke*, Gerber challenges the social conventions behind the "real" job and empowers young people to take control of their lives and dump their nine-to-fives—or their quest to attain them. Drawing upon case studies, experiences, and observations, Scott dissects failures, shares hard-learned lessons, and presents practical, affordable, and systematic action steps to building, managing, and marketing a successful business on a shoestring budget. The proven, no-b.s. methodology presented in *Never Get a "Real" Job* teaches unemployed and underemployed Gen-Yers, aspiring small business owners, students, and recent college graduates how to quit 9-to-5s, become their own bosses, and achieve financial independence.

The Art And Science Of Entrepreneurship

The Art and Science of Entrepreneurship benefits from the author's many years of experience as a serial entrepreneur. By mapping his entrepreneurial journey and relating practice to theory, the author draws useful lessons for aspiring entrepreneurs, especially in making sense of how traits and thinking preferences of entrepreneurs make them successful. Everyone can think like an entrepreneur, no matter what you do in life. The author hopes that his experience will inspire, guide and give confidence to aspiring entrepreneurs who wish to embark on their own entrepreneurship journey to develop a successful start-up. High-tech Entrepreneurship in Asia

This volume examines the relationships between high-tech entrepreneurship and innovation in an important new technology - mobile payments - in Korea and China, the countries that led the world in the development and diffusion of this technology.

Trust and Entrepreneurship

In this innovative book, international scholars investigate trust and its role in relation to the entrepreneurial behaviour of small firms across a variety of institutional and cultural settings.

Advanced Methodologies and Technologies in Digital Marketing and Entrepreneurship

As businesses aim to compete internationally, they must be apprised of new methods and technologies to improve their digital marketing strategy in order to remain ahead of their competition. Trends in entrepreneurship that drive consumer engagement and business initiatives, such as social media marketing, yields customer retention and positive feedback. Advanced Methodologies and Technologies in Digital Marketing and Entrepreneurship provides information on emerging trends in business innovation, entrepreneurship, and marketing strategies. While highlighting challenges such as successful social media interactions and consumer engagement, this book explores valuable information within various business environments and industries such as e-commerce, small and medium enterprises, hospitality and tourism management, and customer relationship management. This book is an ideal source for students, marketers, social media marketers, business managers, public relations professionals, promotional coordinators, economists, hospitality industry professionals, entrepreneurs, and researchers looking for relevant information on new methods in digital marketing and entrepreneurship.

The Millionaire Fastlane

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting

distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Community-based Entrepreneurship and Rural Development

How can municipalities in Central Europe create favourable conditions for local business? What and how can municipalities learn from each other? How can each individuals in the local area contribute? And what requirements have to be met before know how can successfully be transferred on a communal level? To answer all these questions, the authors of this book comprehensively discuss the manifold opportunities, restrictions and prerequisites of establishing favourable conditions for small and medium enterprises in rural.

Entrepreneurial Decision-making

This fascinating book aims to provide a deeper understanding of the decision-making processes of entrepreneurs. This is achieved via a comparison of entrepreneurial individuals with different levels of expertise in contexts with varying degrees of potential for entrepreneurial success. This multidisciplinary study is based on entrepreneurship theory and empirical research as well as cognitive psychology. The cognitive perspective provides a link between the entrepreneur and new business creation by focusing on an individual's cognitive behaviour rather than on their personality traits. The essential issues of gathering and application of knowledge and expertise are also addressed: one of the most important implications of the study is that successful entrepreneurial decision-making behaviour can actually be taught and learned. The book concludes, however, that the provision of optimal teaching methods of this decision-making behaviour is a stiff challenge faced by entrepreneurship education. Presenting a novel combination of cognitive psychology and entrepreneurship theory with important practical implications, this book will strongly appeal to those involved in the study of entrepreneurship and cognitive psychology, and business and management. Entrepreneurs themselves will also find much to interest them in this book.

Making Cents

Explores the concept of money and illustrates several ways to earn money.

Corporate Social Responsibility

This Edited Volume Corporate Social Responsibility is a collection of reviewed and relevant research chapters, offering a comprehensive overview of recent developments in corporate behavior. The book comprises single chapters authored by various researchers and edited by an expert in the field. All chapters are complete in themselves but united under a common research study topic. This publication aims at providing a thorough overview of the latest research efforts by international authors and opening new possible research paths for further novel developments.

Startup Metrics

Secure venture capital? Easy. Getting a business up and running or pushing a brilliant product to the marketplace requires capital. For many entrepreneurs, a lack of start-up capital can be the single biggest roadblock to their dreams of success and fortune. Venture Capital For Dummies takes entrepreneurs step by step through the process of finding and securing venture capital for their own projects. Find and secure venture capital for your business Get your business up and running Push a product to the marketplace If you're an entrepreneur looking for hands-on guidance on how to secure capital for your business, the information in Venture Capital For Dummies gives you the edge you need to succeed.

Venture Capital For Dummies

This book presents the seven entrepreneurial activities (SEA) model of new organizational constitution, a prescriptive extension of the four flows model tradition of communicative constitution of organizations (CCO) theory. Organizational Constitution in Entrepreneurship explains the SEA model in detail, illustrating it with autobiographical accounts from Deanna Bisel's years of experience as an entrepreneur. The volume explores how entrepreneurial efforts to create and maintain organizations involve interrelated activities. In doing so, it offers a vision of new organizational creation and maintenance as

(a) communicative and material, (b) initiated by value propositions, (c) difficult to achieve, (d) having periods of partiality, (e) being the result of constitutive leadership distributed among members, and (f) dependent upon constitutive momentum generated in organizational learning. This unique volume will be a key reference for students and scholars of organizational communication, management, business studies, entrepreneurship, and communication studies.

First Business Start-up

Entrepreneurship and Local Economic Development delves into the current thinking on local entrepreneurship development programs and evaluates ways in which practitioners can implement successful entrepreneurship practices. Examining the role and potential for entrepreneurship programs in local economic development strategies, contributors to this edited collection have many years of experience working with entrepreneurship initiatives in state and local governments. Focused on theory and case study, Entrepreneurship and Local Economic Development examines conceptual issues involved in creating entrepreneurship programs as well as practical examples of programs organized by state, regional, and local agencies.

Organizational Constitution in Entrepreneurship

Enterprising individuals often feel that they need to acquire new skills and brush up on existing ones in order to achieve targets, make money, and avoid making elementary mistakes. This work offers expert guidance on such key skills as selling, presenting, and negotiating.

Entrepreneurship and Local Economic Development

Making Sense of Business

Au Revois! The name's Trotter, Derek Trotter, and the world of business is my speciality. When it comes to the art of closing deals I've been around the track more times than a lurcher. Not only have I been there, done it and bought the t-shirt, I've gone back round to do it again, printed my own t-shirts, knocked 'em out at ridiculously low prices and cut the competition out of the market. But the commodities game ain't all champagne and skittles. It's a rocky road full of potholes, speed cameras, people who don't indicate, mouthy cyclists, and all sorts of obstacles designed to get on your tits. You Know It Makes Sense is the definitive business guide, designed specifically to help steer you in the right direction. Packed full of insider knowledge, tips and warnings, think of it as your personal sat-nav on the corporate highway. And whether you're a Director, middle management, a junior staff hotshot, or the one that fetches the sandwiches, it will help you get to where you're going.

Public Papers of the Presidents of the United States

It is important to be passionate and like your business. Do not pick something you hate just because it is the current trend. You will have to remember, this is your business. Most businesses are profitable and it is more important that it is legal, ethical and it is something you can be proud of. Don't chase the money. Doing thing that is not right just to make more money does not help you sleep at night. When your business is successful, you can then through proper investments, create your financial freedom and passive income. Do not worry about the money. A good business and well executed business plan is profitable. If you believe in your business, and you want to be for the long run, think of ways that you could give back to the community that supported you. Call it corporate social responsibility. It goes a long way. This book is a journey that show you the traits of successful businessmen and how to have the right mindset to start your own business.

You Know it Makes Sense

If you're starting a new business or planning your business's future, there are plenty of things you should take into account. Strategic Planning For Dummies covers everything you need to know to develop a plan for building and maintaining a competitive advantage — no matter what business you're in. Written by Erica Olsen, founder and President of a business development firm that helps entrepreneurial-minded businesses plan for a successful future, this handy guide covers all the basics, including: How a strategic plan is different than a business plan Establishing a step-based planning process Planning for and encouraging growth Taking a long-view of your organization Evaluating past

performance Defining and refining your mission, values, and vision Sizing up your current situation Examining your industry landscape Setting your strategic priorities Planning for unknown contingencies If you're in business, you have to plan for everything — especially if you intend your business to grow. Whether you're planning for a small business, large conglomerate, nonprofit, or even a government agency, this book has the planning specifics you need for your organization. Step-by-step, you'll learn how to lay the foundations for a plan, understand how your plan will affect your business, form planning teams, discover what your strengths are, see where you are, and, finally, plan where you're going. And there's much more: Learn to analyze business trends that will determine your business's future Set measurable, realistic goals that you can plan for and achieve Make strategic planning a habitual part of the organization Prioritize multiple strategies that you can implement simultaneously Set a defining vision for the organization that guides all your planning and strategy This friendly, simple guide puts the power of strategic planning in the palm of your hand. For small businesses that can't afford to hire strategic planning consultants, it's even more imperative. Careful, constant planning is the only way to handle an uncertain business future. With this book, you'll have all the step-by-step guidance you need to ensure you're ready for anything that comes.

Entrepreneurship Mindsets

So you're thinking of opening a small business ... Mom Hugs for Entrepreneurs will help you reflect on why you want to start your own small business and will lead you step by step through the "must know" issues of getting started on your own entrepreneurial journey. In this book packed with wisdom and practical knowledge, Raquel Gladieux puts her years of experience to work for you by revealing some of the business management secrets that could save you headaches, heartaches, and money.

_____ "Raquel is the kind of leader that you'd follow anywhere. She creates an environment that others want to not only be a part of but also to help grow. Her belief in those around her gives them the encouragement they need to step up to become successful leaders themselves. She's truly a leader of leaders." – Rathna Kong, CEO, Oh Graze Away, LLC "Raquel defines confidence and strength as a leader. Through a combination of communication to and empathy for her team, she identifies what lies within them to become great decision makers, which leads them to success." – Tess Rollins, CEO, Simply Enhance, LLC

Bertha's Budget Makes Cents

How to develop an entrepreneurial mindset, begin a successful venture, and change the world for the better We are living in a world of incredible challenge and changes, and for both the entrepreneur and potential entrepreneur alike, this also means it is a world of ample opportunities. From the fall of the Berlin Wall to the rise of e-commerce and social media, there are now, today, more markets, tools, and opportunities for entrepreneurs than ever before. Even better: we are now also living in a world more predisposed to entrepreneurial solutions than ever, and we need those solutions—not just to create the Next Big Thing, but to solve the Next Big Problem. Every issue that individuals, communities, and nations face offers the entrepreneur the chance to make a difference. For anyone ready to embark on a mission to solve problems, create communities, build businesses, tap technology, and think entrepreneurially, this new world is teeming with opportunities for success. Uses real-life examples to explain the full extent of today's global entrepreneurial revolution and its vital importance for our future Explains where the emerging markets are and how to tap into them to achieve success Offers insights on the global entrepreneurial revolution, the future of financing, the rise of the self-employed army, the transformation of innovation, and the view from the "bottom of the pyramid" Learn how the worlds' best entrepreneurs are starting profitable businesses, innovating, or creating organizations to alleviate social needs across the globe. Planet Entrepreneur teaches how anyone can develop an

entrepreneurial mindset, begin a successful venture, and change the world for the better. This is the Era of the Entrepreneur.

Mom Hugs for Entrepreneurs

The Balanced Entrepreneur: A Guide to Creating a Purposeful Life and Living it Unapologetically is an inspirational manual for entrepreneurs, from beginners to seasoned business owners, on how to live their best lives without qualification. *The Balanced Entrepreneur* establishes a new paradigm for implementing balance in the lives of those who try to do it all: work, family, and the pursuit of wellness in the midst of life's hiccups. Readers will learn practical tips, including everything from business application to the art of effective self-care. *The Balanced Entrepreneur* covers themes from spirituality to wealth management and everything in between. It is an essential guide for prospering as an entrepreneur in business and in life today.

Time Management for the Entrepreneur

The tradition of European scholars on entrepreneurship has been consolidated during the last three decades and an increasingly distinct European school of thought has emerged as a consequence. This development provides a solid base for the future development of the field where Europe and its entrepreneurship scholars will play an increasingly prominent role in the development of the field. The distinct focus of the book is key European features – ‘contexts matter’ – to promote and stimulate what ‘European’ might mean in any given context. The book valorizes different contexts and key strengths of the European perspective.

But Are You Making Any Money

The challenge faced by family businesses and their stakeholders, is to recognise the issues that they face, understand how to develop strategies to address them and more importantly, to create narratives, or family stories that explain the emotional dimension of the issues to the family. The most intractable family business issues are not the business problems the organisation faces, but the emotional issues that compound them. Applying psychodynamic concepts will help to explain behaviour and will enable the family to prepare for life cycle transitions and other issues that may arise. Here is a new understanding and a broader perspective on the human dynamics of family firms with two complementary frameworks, psychodynamic and family systematic, to help make sense of family-run organisations. Although this book includes a conceptual section, it is first and foremost a practical book about the real world issues faced by business families. The book begins by demonstrating that many years of achievement through generations can be destroyed by the next, if the family fails to address the psychological issues they face. By exploring cases from famous and less well known family businesses across the world, the authors discuss entrepreneurs, the entrepreneurial family and the lifecycles of the individual and the organisation. They go on to show how companies going through change and transition can avoid the pitfalls that endanger both family and company. The authors then apply tools that will help family businesses in transition and offer their analyses and conclusions. Readers should draw their own conclusions from careful examination of the cases, identifying the problems or dilemmas faced and the options for improved business performance and family relationships. They should ask what they might have done in the given situation and what new insight into individual or family behaviour each case offers. The goal is to avoid a bitter ending.

Planet Entrepreneur

New security regulations have drastically changed the travel industry, making this popular guide critical to success. The experts at Entrepreneur cover the new security measures and how to handle them, what to do in case of an emergency, and how to minimize risks when travelling abroad.

The Balanced Entrepreneur

European Entrepreneurship Research and Practice

Bulletin of the Atomic Scientists

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Epistemologies of the South

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. *Epistemologies of the South* outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Architectural Research Methods

A practical guide to research for architects and designers—now updated and expanded! From searching for the best glass to prevent glare to determining how clients might react to the color choice for restaurant walls, research is a crucial tool that architects must master in order to effectively address the technical, aesthetic, and behavioral issues that arise in their work. This book's unique coverage of research methods is specifically targeted to help professional designers and researchers better conduct and understand research. Part I explores basic research issues and concepts, and includes chapters on relating theory to method and design to research. Part II gives a comprehensive treatment of specific strategies for investigating built forms. In all, the book covers seven types of research, including historical, qualitative, correlational, experimental, simulation, logical argumentation, and case studies and mixed methods. Features new to this edition include: Strategies for investigation, practical examples, and resources for additional information A look at current trends and innovations in research Coverage of design studio–based research that shows how strategies described in the book can be employed in real life A discussion of digital media and online research New and updated examples of research studies A new chapter on the relationship between design and research *Architectural Research Methods* is an essential reference for architecture students and researchers as well as architects, interior designers, landscape architects, and building product manufacturers.

Pursuits of Wisdom

This is a major reinterpretation of ancient philosophy that recovers the long Greek and Roman tradition of philosophy as a complete way of life--and not simply an intellectual discipline. Distinguished philosopher John Cooper traces how, for many ancient thinkers, philosophy was not just to be studied or even used to solve particular practical problems. Rather, philosophy--not just ethics but even logic and physical theory--was literally to be lived. Yet there was great disagreement about how to live philosophically: philosophy was not one but many, mutually opposed, ways of life. Examining this tradition from its establishment by Socrates in the fifth century BCE through Plotinus in the third century CE and the eclipse of pagan philosophy by Christianity, *Pursuits of Wisdom* examines six central philosophies of living--Socratic, Aristotelian, Stoic, Epicurean, Skeptic, and the Platonist life of late antiquity. The book describes the shared assumptions that allowed these thinkers to conceive of their philosophies as ways of life, as well as the distinctive ideas that led them to widely different conclusions about the best human life. Clearing up many common misperceptions and simplifications, Cooper explains in detail the Socratic devotion to philosophical discussion about human nature, human life, and human good; the Aristotelian focus on the true place of humans within the total system of the natural world; the Stoic commitment to dutifully accepting Zeus's plans; the Epicurean pursuit of pleasure through tranquil activities that exercise perception, thought, and feeling; the Skeptical eschewal of all critical reasoning in forming their beliefs; and, finally, the late Platonist emphasis on spiritual concerns and the eternal realm of Being. *Pursuits of Wisdom* is essential reading for anyone interested in understanding what the great philosophers of antiquity thought was the true purpose of philosophy--and of life.

Loneliness as a Way of Life

"What does it mean to be lonely?" Dumm asks. His inquiry takes us beyond social circumstances into the deeper forces that shape our very existence as modern individuals. The modern individual, Dumm

suggests, is fundamentally a lonely self. This book challenges us, not to overcome our loneliness, but to learn how to re-inhabit it in a better way.

Constitutionalism and the Separation of Powers

Vile traces the history of the doctrine from its rise during the English Civil War, through its development in the eighteenth century -- through subsequent political thought and constitution-making in Britain, France, and the United States.

The Making of the English Working Class

A book that revolutionised our understanding of English social history. E. P. Thompson shows how the English working class emerged through the degradations of the industrial revolution to create a culture and political consciousness of enormous vitality.

The new Woman Revised

In the years between the world wars, Manhattan's Fourteenth Street-Union Square district became a center for commercial, cultural, and political activities, and hence a sensitive barometer of the dramatic social changes of the period. It was here that four urban realist painters--Kenneth Hayes Miller, Reginald Marsh, Raphael Soyer, and Isabel Bishop--placed their images of modern "new women." Bargain stores, cheap movie theaters, pinball arcades, and radical political organizations were the backdrop for the women shoppers, office and store workers, and consumers of mass culture portrayed by these artists. Ellen Wiley Todd deftly interprets the painters' complex images as they were refracted through the gender ideology of the period. This is a work of skillful interdisciplinary scholarship, combining recent insights from feminist art history, gender studies, and social and cultural theory. Drawing on a range of visual and verbal representations as well as biographical and critical texts, Todd balances the historical context surrounding the painters with nuanced analyses of how each artist's image of womanhood contributed to the continual redefining of the "new woman's" relationships to men, family, work, feminism, and sexuality.

The Production of Space

Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Netherspace

Contact with an alien race, the Gliese, has been made, but communication is impossible. There is trade, but on seemingly inexplicable terms; anti-gravity technology was traded for a bicycle tyre. As we begin to colonize the stars, we're still dependant on the mysterious aliens who we still do not understand. It falls upon the unlikely team of a conceptual artist, Marc, and assassin, Kara, to embark on a mission that will unearth the mystery of the Gliese.

From Mobilization to Revolution

People spend a fortune on their bodies, their faces, their hair, their clothes. Cosmetics, plastic surgery, diets, gym membership - everyone's trying to be more attractive. But there's an easier way to become a beautiful person. It doesn't have to be physical. No matter how you look, if you have a mind that's fascinating, creative, exciting - if you're a good thinker - you can be beautiful. And being attractive

doesn't necessarily come from being intelligent or highly-educated. It isn't about having a great personality. It's about using your imagination and expanding your creativity. And it's when talking with people that we make the greatest impact. A person may be physically beautiful, but when speaking to others a dull or ugly or uncreative mind will definitely turn them off. In clear, practical language, de Bono shows how by applying lateral and parallel thinking skills to your conversation you can improve your mind. By learning how to listen, make a point, and manoeuvre a discussion, you can become creative and more appealing - more beautiful.

The Next Digital Decade

Ernesto Laclau is best known for co-authoring *Hegemony and Socialist Strategy*, with Chantal Mouffe. Politically active in the social and student movements of the 1960s, and a member of PSIN (Socialist Party of the National Left), Laclau's oeuvre links the working class and new social movements. Rejecting Marxist economic determinism and the notion of class struggle, Laclau instead urged for a radical democracy where antagonisms could be expressed. Frequently described as post-Marxist, Laclau's writings have focused on political movements. *Politics and Ideology in Marxist Theory* was Laclau's first published work, where readers can trace the early formation of ideas that shaped the twentieth century.

How To Have A Beautiful Mind

The Merchant of Venice is a 16th-century play written by William Shakespeare. A trader in Venice known as Antonio fails to pay off a large loan provided by a Jewish moneylender, Shylock. How will Antonio make amends?

Politics and Ideology in Marxist Theory

THE TOP 10 SUNDAY TIMES BESTSELLER Shortlisted for the FT Business Book of the Year Award 2019 'Easily the most important book to be published this century. I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas.' - Zadie Smith, *The Guardian* The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control us. The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in, and what we decide now will shape the rest of the century. Our choices: allow technology to enrich the few and impoverish the many, or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply-reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves.

The Merchant of Venice

Drawing on rich empirical material, this revealing book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value. When branding lifestyles or value complexes onto their products, companies assume that consumers desire products for their ability to give meaning to their lives. Yet, brands also have a key function within managerial strategy. Examining the history of audience and market research, marketing thought and advertising strategy; the first part of this book traces the historical development of branding, whilst the second part evaluates new media, contemporary management and overall media economics to present the first systematic theory of brands: the brand as a key institution in information capitalism. It includes chapters on: consumption marketing brand management online branding the brand as informational capital. Richly illustrated with case studies from market research, advertising, shop displays, mobile phones, the internet and virtual companies, this outstanding book is essential reading for students and researchers of the sociology of media, cultural studies, advertising and consumer studies and marketing.

The Age of Surveillance Capitalism

Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Brands

Author of *How to Win Friends and Influence People* offers practical advice on successful speech-making in personal and professional situations. Carnegie explains how to overcome self-consciousness and speak in an easy-to-understand, high-impact manner.

Artificial Hells

Saugestad examines the relationship between the government of Botswana and its indigenous minority, variously known as Bushmen, San, Basarwa, or more recently Noakwe.

The Art of Public Speaking

Examining the ways in which media sport has insinuated itself into contemporary everyday life, this book traces the rise of the sports media and the economic and political influences on and implications of the media sports cultural complex.

The Inconvenient Indigenous

Presents the OECD Guidelines on Corporate Governance of State-Owned Enterprises as well as a comparative overview of main practices and issues related to corporate governance of state-owned enterprises in the OECD area.

Sport, Culture & Media

This highly topical book presents a new theory on the characteristics of entrepreneurial knowledge. It explores the recent shift among professional economists and scholars in their evaluation of the debate

of socialism. *Socialism, Economic Calculation and Entrepreneurship* presents an application of Israel M. Kirzner's theory of entrepreneurship to the theory of the impossibility of socialism. It discusses the influence of the fall of socialism, with particular reference to the evolution of economic thought.

Corporate Governance of State-Owned Enterprises A Survey of OECD Countries

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Socialism, Economic Calculation and Entrepreneurship

Thoroughly revised, this new edition of *Critical Theory of Technology* rethinks the relationships between technology, rationality, and democracy, arguing that the degradation of labor--as well as of many environmental, educational, and political systems--is rooted in the social values that preside over technological development. It contains materials on political theory, but the emphasis has shifted to reflect a growing interest in the fields of technology and cultural studies.

Drawing Futures

Friedrich Hölderlin's only novel, *Hyperion* (1797-99), is a fictional epistolary autobiography that juxtaposes narration with critical reflection. Returning to Greece after German exile, following his part in the abortive uprising against the occupying Turks (1770), and his failure as both a lover and a revolutionary, *Hyperion* assumes a hermitic existence, during which he writes his letters. Confronting and commenting on his own past, with all its joy and grief, the narrator undergoes a transformation that culminates in the realisation of his true vocation. Though Hölderlin is now established as a great lyric poet, recognition of his novel as a supreme achievement of European Romanticism has been belated in the Anglophone world. Incorporating the aesthetic evangelism that is a characteristic feature of the age, *Hyperion* preaches a message of redemption through beauty. The resolution of the contradictions and antinomies raised in the novel is found in the act of articulation itself. To a degree remarkable in a prose work of any length, what it means is inseparable from how it means. In this skilful translation, Gaskill conveys the beautiful music and rhythms of Hölderlin's language to an English-speaking reader.

Transforming Technology

Solomon and Higgins's engaging text covers philosophy's central ideas in an accessible, approachable manner. You'll explore timeless "big questions" about the self, God, justice, and other meaningful topics, gaining the context you need for an understanding of the foundational issues, as well as the confidence to establish your own informed positions on these "big questions."

Hyperion, Or the Hermit in Greece

This book bridges a scholarly divide between empirical and normative theorizing about procedural justice in the context of relations of power between citizens and the state. Empirical research establishes that people's understanding of procedural justice is shaped by relational factors. A central premise of this volume is that this research is significant but needs to be complemented by normative theorizing that draws on relational theories of ethics and justice to explain the moral significance of procedures and make normative sense of people's concerns about relational factors. The chapters in Part 1 provide comprehensive reviews of empirical studies of procedural justice in policing, courts and prisons. Part 2 explores empirical and normative perspectives on procedural justice and legitimacy.

Part 3 examines philosophical approaches to procedural justice. Part 4 considers the implications of a relational perspective for the design of procedures in a range of legal contexts. This collection will be of interest to a wide academic readership in philosophy, law, psychology and criminology.

The Big Questions

Michel Foucault has become famous for a series of books that have permanently altered our understanding of many institutions of Western society. He analyzed mental institutions in the remarkable *Madness and Civilization*; hospitals in *The Birth of the Clinic*; prisons in *Discipline and Punish*; and schools and families in *The History of Sexuality*. But the general reader as well as the specialist is apt to miss the consistent purposes that lay behind these difficult individual studies, thus losing sight of the broad social vision and political aims that unified them. Now, in this superb set of essays and interviews, Foucault has provided a much-needed guide to Foucault. These pieces, ranging over the entire spectrum of his concerns, enabled Foucault, in his most intimate and accessible voice, to interpret the conclusions of his research in each area and to demonstrate the contribution of each to the magnificent -- and terrifying -- portrait of society that he was patiently compiling. For, as Foucault shows, what he was always describing was the nature of power in society; not the conventional treatment of power that concentrates on powerful individuals and repressive institutions, but the much more pervasive and insidious mechanisms by which power "reaches into the very grain of individuals, touches their bodies and inserts itself into their actions and attitudes, their discourses, learning processes and everyday lives" Foucault's investigations of prisons, schools, barracks, hospitals, factories, cities, lodgings, families, and other organized forms of social life are each a segment of one of the most astonishing intellectual enterprises of all time -- and, as this book proves, one which possesses profound implications for understanding the social control of our bodies and our minds.

Procedural Justice and Relational Theory

An international joint study by the Food and Agriculture Organization of the United Nations (FAO) and UNESCO's International Institute for Educational Planning (IIEP) was conducted on education and rural development to review the status of the topic from the standpoint of public policies and the conceptual frameworks on which they are based and also to shed light on what may be called "good practice." The findings of the study are meant to serve not as models, but rather as points of reference for all those who are seeking ways of developing education in rural areas and contributing more effectively to rural development. Chapter I, "Education and Rural Development: Setting the Framework" (David Atchoarena and Charlotte Sedel), provides a contextual and theoretical introduction to the new rural development and poverty reduction thinking, as well as a discussion on the contribution of education to rural development. In Chapter II, "Basic Education in Rural Areas: Status, Issues and Prospects" (Michael Lakin with Lavinia Gasperini), the book reviews in depth the provision of basic education in rural areas and offers some policy directions for improvement. Further exploring a particular dimension of basic education, Chapter III, "Making Learning Relevant: Principles and Evidence from Recent Experiences" (Peter Taylor, Daniel Desmond, James Grieshop and Aarti Subramaniam), devotes specific attention to strategies linking the formal school teaching with students' life environment, including agriculture, and to garden-based learning. The intention is to provide updated information and new insights on much-debated aspects which are often associated with rural areas although their application is much broader. Chapter IV, "Strategies and Institutions for Promoting Skills for Rural Development" (David Atchoarena, Ian Wallace, Kate Green, and Candido Alberto Gomes), shifts the analysis from education to work and discusses the implications of the transformation of rural labor markets for skill development. A particular concern is the rise in rural non-farm employment and the need to enlarge the policy focus from agricultural education and training to technical and vocational education for rural development. This debate is taken further in Chapter V, "Higher Education and Rural Development: A New Perspective" (Charles Maguire and David Atchoarena), which considers higher level skills and the contribution of the tertiary education sector to rural development. Special attention is given to the reform of higher agricultural institutions and lessons based on case studies are provided to document good practice in institutional reform. Finally, Chapter VI, "Main Findings and Implications for Policy and Donor Support" (David Atchoarena with Lavinia Gasperini, Michael Lakin and Charles Maguire), concentrates on the main findings of the study and discusses policy implications and possible responses for donors and countries. (Contains 28 tables, 14 figures, and 64 boxes.)

Power/Knowledge

Peoplewatching is the culmination of a career of watching people - their behaviour and habits, their personalities and their quirks. Desmond Morris shows us how people, consciously and unconsciously, signal their attitudes, desires and innermost feelings with their bodies and actions, often more powerfully than with their words.

Education for Rural Development

This Elibron Classics title is a reprint of the original edition.

Peoplewatching

An essential tool for our post-truth world: a witty primer on logic—and the dangers of illogical thinking—by a renowned Notre Dame professor Logic is synonymous with reason, judgment, sense, wisdom, and sanity. Being logical is the ability to create concise and reasoned arguments—arguments that build from given premises, using evidence, to a genuine conclusion. But mastering logical thinking also requires studying and understanding illogical thinking, both to sharpen one's own skills and to protect against incoherent, or deliberately misleading, reasoning. Elegant, pithy, and precise, *Being Logical* breaks logic down to its essentials through clear analysis, accessible examples, and focused insights. D. Q. McInerney covers the sources of illogical thinking, from naïve optimism to narrow-mindedness, before dissecting the various tactics—red herrings, diversions, and simplistic reasoning—the illogical use in place of effective reasoning. An indispensable guide to using logic to advantage in everyday life, this is a concise, crisply readable book. Written explicitly for the layperson, McInerney's *Being Logical* promises to take its place beside Strunk and White's *The Elements of Style* as a classic of lucid, invaluable advice. Praise for *Being Logical* "Highly readable . . . D. Q. McInerney offers an introduction to symbolic logic in plain English, so you can finally be clear on what is deductive reasoning and what is inductive. And you'll see how deductive arguments are constructed."—*Detroit Free Press* "McInerney's explanatory outline of sound thinking will be eminently beneficial to expository writers, debaters, and public speakers."—*Booklist* "Given the shortage of logical thinking, And the fact that mankind is adrift, if not sinking, It is vital that all of us learn to think straight. And this small book by D.Q. McInerney is great. It follows therefore since we so badly need it, Everybody should not only but it, but read it." —Charles Osgood

Sense and Sensibility

In 'The Brain and the Voice in Speech and Song', F. W. Mott presents an exploration of the intricate mechanics behind human communication. Delivered as a series of enlightening lectures, this book delves into the theories surrounding the origin of speech and the fascinating vocal instrument. With a clear and accessible approach, Mott uncovers the three qualities of musical sounds and unveils the remarkable parts of the vocal instrument, including the bellows, reed, and resonator. Discover the profound connection between speech and the brain, as Mott reveals the cerebral mechanisms that govern speech and song.

Being Logical

How do definitions of literacy in the academy, and the pedagogies that reinforce such definitions, influence and shape our identities as teachers, scholars, and students? The contributors gathered here reflect on those moments when the dominant cultural and institutional definitions of our identities conflict with our other identities, shaped by class, race, gender, sexual orientation, location, or other cultural factors. These writers explore the struggle, identify the sources of conflict, and discuss how they respond personally to such tensions in their scholarship, teaching, and administration. They also illustrate how writing helps them and their students compose alternative identities that may allow the connection of professional identities with internal desires and senses of self. They emphasize how identity comes into play in education and literacy and how institutional and cultural power is reinforced in the pedagogies and values of the writing classroom and writing profession.

The Brain and the Voice in Speech and Song

A rethinking of popular political movements, this book looks at new, emerging, mass visions and analyses their impact and potential in new ways.

Memories of Class

In a long overdue contribution to geography and social theory, Katherine McKittrick offers a new and powerful interpretation of black women's geographic thought. In Canada, the Caribbean, and the United States, black women inhabit diasporic locations marked by the legacy of violence and slavery. Analyzing diverse literatures and material geographies, McKittrick reveals how human geographies are a result of racialized connections, and how spaces that are fraught with limitation are underacknowledged but meaningful sites of political opposition. *Demonic Grounds* moves between past and present, archives and fiction, theory and everyday, to focus on places negotiated by black women during and after the transatlantic slave trade. Specifically, the author addresses the geographic implications of slave auction blocks, Harriet Jacobs's attic, black Canada and New France, as well as the conceptual spaces of feminism and Sylvia Wynter's philosophies. Central to McKittrick's argument are the ways in which black women are not passive recipients of their surroundings and how a sense of place relates to the struggle against domination. Ultimately, McKittrick argues, these complex black geographies are alterable and may provide the opportunity for social and cultural change. Katherine McKittrick is assistant professor of women's studies at Queen's University.

From Knowledge to Wisdom

Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity.
