## Working with Rural Communities

'a host of eminently sensible practical suggestions...the strength of this book is both that it explores with some rigour the meaning of 'rural', of 'community' and of 'development' and that it has clearly in view the practical needs of the lone, inexperienced field worker...' Community Development Journal Vol. 28 No. 2, 1993P '...deserves to become an essential reference book for all those with an interest in rural community work' Adage Pural communities are facing increasing and contrasting problems, with high levels of unemployment or conflict arising from suburbanisation and the arrival of newcomers.

This book provides a strategic framework for dealing with these issues, with an innovatory model for planning and practising rural community work. It is relevant to work in all types of areas and for a wide range of agencies, identifying key management and evaluating tasks. Important connections are made between existing knowledge and worker's own experiences. Concluding with a review of policies this is an invaluable guide for rural community work students and professionals.

#### Effective Working with Rural Communities

Governments around the globe are promoting co-production and community social enterprise as policy strategies to address the need for local, 21st century service provision but can small communities engage spontaneously in social enterprise and what is the true potential for citizens to produce services? This book addresses a clutch of contemporary societal challenges including: aging demography and the consequent need for extended care in communities; public service provision in an era of retrenching welfare and global financial crises; service provision to rural communities that are increasingly 'hollowed out' through lack of working age people; and, how best to engender the development of community social enterprise organizations capable of providing high quality, accessible services. It is packed with information and evidence garnered from research into the environment for developing community social enterprise and co-producing services; how communities react to being asked to co-produce; what to expect in terms of the social enterprises they can produce; and, how to make them happen. This book is an antidote to the rhetoric of optimistic governments that pronounce co-production as a panacea to the challenges of providing local services and by drawing on the evidence from a 'real-life' international study will make policymakers more savvy about their aspirations for co-production, give service professionals practical strategies for working with communities, fill a gap in the academic evidence about community, as opposed to individual, social enterprise and reassure community members that they can deliver services through community social enterprise if the right partnerships and strategies are in place. Community CoProduction will appeal to students and scholars over a broad range of disciplines including development, entrepreneurship, public and social policy, economics and regional studies.

#### Effective Working with Rural Communities

This book addresses itself to mobilisation and involvement of rural people in development projects. It describes an imperfect but, nonetheless, exciting and thought-provoking exercise that drew social science researchers and students from four public universities in Kenya into an experiment in participatory research, community education and development in two locations. The experiment was grounded on the assumptions that the people of Kenya are a primary resource and that given proper roles and contribution of planners, researchers and programme implementers, self-sustainable development can become a reality. The contributors of this book have focused on the potential of the university to facilitate participation of the people in development. They have given specific suggestions on how this might be accomplished.

#### Social Work in Rural Communities

A thoughtful text integrating strengths, assets, and capacity-building themes with contemporary issues in rural social work practice Now in its second edition, Rural Social Work is a collection of contributed readings from social work scholars, students, and practitioners presenting a framework for resource building based on the strengths, assets, and capacities of people, a tool essential for working with rural communities. This guide considers methods for social workers to participate in the work of sustaining rural communities. Each chapter features a reading integrating the themes of capacity-building and rural social work; discussion questions that facilitate critical thinking around the chapter; and suggested activities and assignments. Rural Social Work, Second Edition explores: Important practice issues in rural communities, including the challenges of working with stigmatized populations such as gay, lesbian, bisexual, and transgendered people, the homeless, and people living with HIV/AIDS Practice models that hold special promise for rural social workers, including evidence-based practice and community partnership models Newer research tools such as asset mapping, social network analysis, concept mapping, and Geographic Information Systems (GIS) Exploring how social workers can integrate the tremendous resources that exist in rural communities into their practice, Rural Social Work, Second Edition provides a solid introduction to the complex, challenging, and rewarding work of building and sustaining rural communities.

## Living Working Countryside

Does a program work? What is the value? How do we know? These are questions that keep evaluators up at night. Continued rural community funding, employment, health, and justice depend on our answers to these questions. For evaluators working in rural communities, the task is great, but the return is even greater. Now more than ever before, evaluators have an opportunity to impact social change in rural America. Beginning with an introduction of rural community evaluation, *Evaluation in Rural Communities* highlights the differences in approaches to evaluation in rural areas, supported by case studies that illustrate key themes and objectives. It explores a number of issues, including • sustainability • policy • cost–benefit analysis • rural community evaluation as a platform to support social change. In particular, readers will also learn how to overcome rural community challenges, such as limited resources, the digital divide, limited funding, lower employment and educational attainment, limited opportunities for social interactions, and the distrust of outsiders. Blending aspects of community-based participatory research, empowerment evaluation, and program evaluation methods, this book is an accessible yet nuanced guide that integrates critical thinking, problem solving, social and political contexts, and outcomes related to evidence-based evaluation.

## Community Co-production

Following an introduction by the co-editors, this collection of 27 contributed readings from academics, students and practitioners is presented in 5 parts, introduced by 'Lead Teachers.' This book presents a framework for asset building based on the strengths, assets, and capacities of people, all of which are critical for working with rural communities.

## Working with Rural Communities Participatory Action Research in Kenya

In much of the West the concerns of rural people are marginalised and rural issues neglected. This stimulating book draws upon a rich variety of material to show why rural social work is such a challenging field of practice. It incorporates research from different disciplines and places to provide an accessible and comprehensive introduction to rural practice. The first part of the book focuses upon the experience of rurality. The second part of the book turns to the development of rural practice, reviewing different ways of working from casework through to community development. This book is relevant to planners, managers and practitioners not only in social work but also in other welfare services such as health and youth work, who are likely to face similar challenges.

## Rural Social Work

Revised edition of the author's *Rural social work in the 21st century*, [2015]

## Evaluation in Rural Communities

Rural counties make up about 80 percent of the land area of the United States, but they contain less than 20 percent of the U.S. population. The relative sparseness of the population in rural areas is one of many factors that influence the health and well-being of rural Americans. Rural areas have histories, economies, and cultures that differ from those of cities and from one rural area to another. Understanding these differences is critical to taking steps to improve health and well-being in rural areas and to reduce health disparities among rural populations. To explore the impacts of economic, demographic, and social issues in rural communities and to learn about asset-based approaches to addressing the associated challenges, the National Academies of Sciences, Engineering, and Medicine held a workshop on June 13, 2017. This publication summarizes the presentations and discussions from the workshop.

## Working with Rural Communities

This book provides an overview of interdisciplinary approaches that have applied social science to research focused on issues around food, agriculture and natural resource management. The book demonstrates that those who work in rural sociology either as researchers or practitioners apply community development and participatory techniques to socio-environmental interaction. The book discusses how the evolving concept of interconnected social and ecological systems (SES) emerged, recognizing the inherent complexity, adaptive nature, and resilience of such systems. This book engages with contemporary theory, as well as new cutting-edge transdisciplinary research evidenced in case studies from three continents.

## Rural Social Work

"Partnerships in Communities" provides a fresh perspective on sustainable rural community development, offering community-based and community-driven responses to the challenges facing rural America. Author Jean Richardson draws on her many years of experience working in rural areas both at home and abroad to offer an integrated and practical approach to rural community development. Some of the findings presented are derived from a comprehensive project known as Environmental Partnerships in Communities (EPIC), which Richardson has directed for the past seven years in Vermont. From this experience and those of others from across America, Richardson provides a wealth of insight regarding what works, what doesn't, and how financial and human resources can be most effectively focused in rural communities. Following an introductory chapter that describes what is happening in rural America today and examines the institutions and natural resource base upon which rural communities depend, the book: addresses the need for self-directed community development sets forth a comprehensive approach based on the EPIC experience describes efforts to revitalize working rural landscapes, including organization building, pasture management, historic preservation, and more uses case studies and personal stories of rural people to portray the critical role of leadership in community stewardship and conservation. At the end of each chapter, the author synthesizes the transferable lessons learned, and the book concludes with a chapter that draws together those lessons to suggest a dynamic new approach to rural development. Numerous photographs enliven the text, and an extensive bibliography and a rich set of appendixes provide resources for additional information. "Partnerships in Communities" will serve as an invaluable source of inspiration and ideas for rural community leaders, citizen groups, public officials, planners, students of rural planning and community development, and nonprofit organizations involved with rural development.

## Rural social work

Learn the skills you need to work with geriatric populations in rural areas! Gerontological Social Work in Rural Towns and Communities provides a range of intervention and community skills aimed precisely at the needs of rural elders. This book fills a gap in the literature by focusing on the specific practice concerns for social workers assisting older adults in rural areas, including the aging experience, social worker skills, professional functions, working with special populations, and health and long-term care concerns. This valuable resource will benefit social workers, gerontologists, allied health professionals in rural areas, health and human services administrators and managers. Gerontological Social Work in Rural Towns and Communities explores the challenges social workers need to overcome when working with the elder community in rural areas. This book's significance to social workers will only increase as more adults choose to live and grow old away from the cities. Experts in the field suggest strategies to overcome barriers in planning and providing services such as: a longer distance for the elderly to travel to use social service centers a narrower range of available services in the local area increased poverty levels for the elderly a stronger dependency by elderly on family rather than public assistance This book is divided into five sections: Rurality and Aging—introduces the concept of rurality and examines the demographics of aging from a rural perspective Practice Dimensions of Social Work with Rural Elders—includes clinical practice models, intervention and advocacy techniques, program planning, and marketing approaches Special Populations—gives attention to four special population groups: indigenous elders, African-American older adults, elderly Latinos, and disabled elders Special Issues Pertaining to Rural Elders—covers five essential issues for rural gerontological social workers: health promotion, older workers and retirement preparation, aging in place, specialized housing, and ethical practice Training and Policy Recommendations—future training and education recommendations for social workers are explored, as well as service capacity building, the aging network, and the future of long-term care While a variety of theoretical perspectives are explored in Gerontological Social Work

in Rural Towns and Communities, the book's empowerment orientation and strengths-based approach will enhance your abilities to improve quality of life for elderly individuals in rural communities. Each chapter contains a comprehensive review of the literature on the subject it addresses, and several chapters include tables and graphs to further establish their revealing empirical findings. An appendix provides additional sources to turn to for more information.

#### Rural Social and Community Work in the U.S. and Britain

This collection brings together a range of experiences of community workers and others who have supported the actions of rural communities.

#### Rural Social Work in the 21st Century

Building on the innovative Institute of Medicine reports *To Err Is Human* and *Crossing the Quality Chasm*, *Quality Through Collaboration: The Future of Rural Health* offers a strategy to address the quality challenges in rural communities. Rural America is a vital, diverse component of the American community, representing nearly 20% of the population of the United States. Rural communities are heterogeneous and differ in population density, remoteness from urban areas, and the cultural norms of the regions of which they are a part. As a result, rural communities range in their demographics and environmental, economic, and social characteristics. These differences influence the magnitude and types of health problems these communities face. *Quality Through Collaboration: The Future of Rural Health* assesses the quality of health care in rural areas and provides a framework for core set of services and essential infrastructure to deliver those services to rural communities. The book recommends: Adopting an integrated approach to addressing both personal and population health needs Establishing a stronger health care quality improvement support structure to assist rural health systems and professionals Enhancing the human resource capacity of health care professionals in rural communities and expanding the preparedness of rural residents to actively engage in improving their health and health care Assuring that rural health care systems are financially stable Investing in an information and communications technology infrastructure It is critical that existing and new resources be deployed strategically, recognizing the need to improve both the quality of individual-level care and the health of rural communities and populations.

#### Achieving Rural Health Equity and Well-Being

Describes the jobs and activities within a rural community, including working on a farm, caring for farm animals, and running a local store.

#### Rural Development for Sustainable Social-ecological Systems

Putting Smart Growth to Work in Rural Communities

#### The Rural Community and Social Case Work

Featuring contributions from practitioners, researchers, and academics, this volume synthesizes and analyzes current trends in rural social work practice and considers the most effective ways to serve rural communities. Contributors consider the history and development of rural social work from its beginnings to the present day, addressing the value of the Internet and other new information technologies in helping clients. They also examine the effects of nonprofit organizations and welfare reform on poor rural areas. Coverage of specific client populations and fields of practice includes services for rural mental healthcare; the chronically mentally ill; healthcare for minorities; and the challenges faced by the elderly in rural areas. The contributors also consider issues affecting gays and lesbians living in rural communities and the role of religiosity and social support in the well-being of HIV/AIDS clients. The book concludes with a consideration of the unique issues associated with educating social workers for rural practice.

#### Partnerships in Communities

There is a lot of conversation happening in the United States today about the rural/urban divide, serious questions about how we experience prosperity and opportunity throughout our country's rural communities. I live in a small town, as do a number of people on our team, and we think about this a lot. The change in Rural areas is really important. How Could We Do? How are rural American communities working to build a better world? These are the stories of building a stronger rural America. These are

the stories of a resurgence in diverse talents and work in progress to improve community services, relationships, and to further collective societal values and organizations. Active community involvement engages everyone, to address social conditions and improve our collective lives. In part, this book gives voice to diverse points of view and experiences and shows the strengths and talents of rural Oregon communities. And so many things more.

### Gerontological Social Work in Small Towns and Rural Communities

*College Aspirations and Access in Working Class Rural Communities: The Mixed Signals, Challenges, and New Language First-Generation Students Encounter* explores how a working class, rural environment influences rural students' opportunities to pursue higher education and engage in the college choice process. Based on a case study with accounts from rural high school students and counselors, this book examines how these communities perceive higher education and what challenges arise for both rural students and counselors. The book addresses how college knowledge and university jargon illustrate the gap between rural cultural capital and higher education cultural capital. Insights about approaches to reduce barriers created by college knowledge and university jargon are shared and strategies for offering rural students pathways to learn academic language and navigate higher education are presented for both secondary and higher education institutions.

### Work and Family Life in Rural Communities

This book gives voice to the direct practice experience of social workers working in rural and remote contexts using Australia as the primary case-study. The authors undertake a qualitative research project, conducting in-depth interviews to examine social work theory and practice against the reality of rural and remote contexts. Practice examples provide the reader with an insight into the diverse and complex nature of social work in rural and remote Australia and the role of contemporary social work. Through placing rural and remote social work in its historical, theoretical and geographical contexts, this work explores a range of considerations. These include isolation; ethical dilemmas when working with small and closely linked communities; climate, disaster relief and the environment; community identity and culture; working with indigenous communities in remote contexts; and social work education. Based on direct practice research, this book challenges existing theories of practice and reframes those to reflect the reality of practice in rural and remote communities. As social work must continue to critically reflect on its role within an ever changing and individualistic society, lessons from rural and remote settings around engagement, sense of place and skillful, innovative practice have never been more relevant.

### Rural Action

This Handbook brings together experts from around the world to reflect critically on the relationship between tourism and rural community development. It first orients the reader in the important conceptual and epistemological foundations of the topic, before moving to consider key concepts and the most significant and salient theoretical and methodological developments in the field. Chapters written by a range of well-established, leading and emerging scholars in the field consider crucial issues facing tourism development in rural communities across different geographical settings. The Handbook represents a variety of traditional and emerging forms of scholarly writing, including theoretically driven chapters, empirical case studies and first person narratives, to offer a detailed study of the topic. With a forward-looking angle, it studies tourism development in rural areas, including working with rural communities, tourism governance and ethical considerations. Chapters also consider new directions in the field, examining food and tourism, degrowth, landscapes, animals, social impacts and women social entrepreneurs. This comprehensive and innovative Handbook offers a wealth of empirical and theoretical knowledge on tourism and rural community development, and as such will be a critical resource for tourism, development studies and human geography scholars and students.

### Quality Through Collaboration

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using

a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### Who's Who in a Rural Community

Rural people and communities continue to play important social, economic and environmental roles at a time in which societies are rapidly urbanizing, and the identities of local places are increasingly subsumed by flows of people, information and economic activity across global spaces. However, while the organization of rural life has been fundamentally transformed by institutional and social changes that have occurred since the mid-twentieth century, rural people and communities have proved resilient in the face of these transformations. This book examines the causes and consequences of major social and economic changes affecting rural communities and populations during the first decades of the twenty-first century, and explores policies developed to ameliorate problems or enhance opportunities. Primarily focused on the U.S. context, while also providing international comparative discussion, the book is organized into five sections each of which explores both socio-demographic and political economic aspects of rural transformation. It features an accessible and up-to-date blend of theory and empirical analysis, with each chapter's discussion grounded in real-life situations through the use of empirical case-study materials. *Rural People and Communities in the 21st Century* is intended for advanced undergraduate and graduate courses in rural sociology, community sociology, rural and/or population geography, community development, and population studies.

### Putting Smart Growth to Work in Rural Communities

This book fills a gap between theory and practice in the field of the rural communities' research. The book consists of fourteen chapters which analyze specific aspects and suggest possible solutions regarding rural communities in the global economy, insisting on the recent transformations of the classical rural economy paradigms in contemporary economies. The main topics of the book are centered but not limited to the following aspects: -Recent transformations of the rural communities -Rural paradigm agricultural and food models -Rural sustainable investments -Consumption models -Business investments strategies in rural areas -Transition economics and market reforms in rural economy -Market inequity and rural economy -Business models and start-ups in rural areas. This book tries to provide insights and support for policy makers, investors, researchers - all of this connecting to the rural communities in the global economy. In this context, the objective of the book is to provide relevant theoretical frameworks and the latest empirical research findings in the area of green rural communities in the global economy and their impact on sustainable development of competitive markets. The main objectives of the book are: -to create a reference for professionals, practitioners, academia and students in field of the rural economy paradigms; -to present and analyze the latest findings in the field of the recent transformations of the rural communities -the paradigms change of rural communities in the global economy; -to create a working paradigm regarding the rural economy The book, *Rural Communities in the Global Economy - Beyond The Classical Rural Economy Paradigms* will definitely impact editors' fields of research, since it is mainly related to the rural communities in the global economy and the sustainable development of the rural economy through a range of activities, including green entrepreneurship and the "working with people" model. The publication is also a continuation of editors' research of the rural communities in the global economy taking into account the structures in modern business and society. Convinced of its utility, the editors are confident that *Rural Communities in the Global Economy - Beyond the Classical Rural Economy Paradigms* will become a milestone in the field and will stir debates regarding this research topic. This book is addressed to professionals and researchers working in the field of rural communities' economy research and management.

### Rural Social Work Practice

In November 2017, the The Forum on Promoting Children's Cognitive, Affective, and Behavioral Health, in collaboration with the Roundtable on the Promotion of Health Equity, convened a workshop on promoting children's behavioral health equity. The workshop used a socio-ecological developmental model to explore health equity of children and families, including those with complex needs and chronic conditions. Particular attention was paid to challenges experienced by children and families in both rural and urban contexts, to include but not limited to poverty, individual and institutional racism, low-resourced communities, and hindered access to educational and health care services. Workshop

participants also engaged in solution-oriented discussions of initiatives, policies, and programs that aim to improve social determinants of health, opportunities for behavioral health promotion, and access to quality services that address the behavioral health of all children and families. This publication summarizes the presentations and discussion of the event.

#### Working with Rural Communities in Nepal

This collection presents creative strategies and programs designed to address needs of families in the context of rural communities. Even before the most recent worldwide economic crisis, many rural families in the United States struggled to meet basic needs. As needs in rural communities have expanded, services have shrunk. This book identifies rural families' needs, including social supports during pregnancy, identification of adolescent risk behaviours, child safety, and basic services such as food and health care, using techniques such as Geographic Information Systems and needs and asset assessments. Strategies to address those needs include program development, the use of technology, and community partnerships. The book reminds readers of the sense of independence and self-reliance found in many rural communities and the theme of diversity within rural communities runs throughout the book. The chapters are organized by identification of the needs of rural families, addressing disparities in rural areas, practice in rural communities, and human service organizations and professionals. Through research, practice, and creative works, the book contributes to a greater understanding of ways that service providers can advance their work with rural families and broaden their perspectives about realities experienced by families living in rural communities. This book was originally published as a special issue of the *Journal of Family Social Work*.

#### The Voice From Rural Communities

The image of rural America portrayed in this illuminating study is one that is vibrant, regionally varied, and sometimes heroic. *Communities of Work* focuses on the ways in which rural people and places are affected by political, social, and economic forces far outside their control and how they sustain themselves and their communities in response. Bringing together the two fundamental concepts of community--where the relationships and practices of daily life occur--and work, in which an elementary exchange occurs, *Communities of Work* bridges several fields of study. Presented here is the contextual and embedded nature of social relations and the complexity involved in understanding them. Through the use of multiple case studies, the authors apply diverse theories and methods in seeking an integrated outcome, one captured by "communities of work." Beginning with a description of the broad changes in work and economic activities across the United States, ranging from the Ohio River Valley to a western boomtown, the book shifts its focus to the interplay of work, family, and local networks in time and place. Activities range from fishing in the Mississippi Delta to farming and family life in the Midwest. The authors then highlight how rural people and places respond to extra-local, increasingly global forces in settings as diverse as rural South Carolina and Wisconsin. A certain communitarian theme runs through *Communities of Work*. It is about people and communities not merely reacting, but instead responding in ways that reflect their local culture, while being cognizant of the larger world within which they live.

#### Resources in Education

*Free City! The Fight for San Francisco's City College and Education for All* tells the story of the five years of organizing that turned a seemingly hopeless defensive fight into a victory for the most progressive free college measure in the US. In 2012, the accreditor sanctioned City College of San Francisco, one of the biggest and best community colleges in the country, and a year later proposed terminating its accreditation, leading to a state takeover. *Free City!* follows the multipronged strategies of the campaign and the diverse characters that carried them out. Teachers, students, labor unions, community groups, public officials, and concerned individuals saved a treasured public institution as

San Francisco's working-class communities of color battled the gentrification that was forcing them out of the city. And they pushed back against the national "reform" agenda of corporate workforce training that drives students towards debt and sidelines lifelong learning and community service programs. Combining analysis with narrative, *Free City!* offers a case study in the power of positive vision and solution-oriented organizing and a reflection on what education can and should be.

### Free City!

Committed to Excellence in the Landmark Tenth Edition. This edition continues the evolution of Raven & Johnson's *Biology*. The author team is committed to continually improving the text, keeping the student and learning foremost. We have integrated new pedagogical features to expand the students' learning process and enhance their experience in the ebook. This latest edition of the text maintains the clear, accessible, and engaging writing style of past editions with the solid framework of pedagogy that highlights an emphasis on evolution and scientific inquiry that have made this a leading textbook for students majoring in biology and have been enhanced in this landmark Tenth edition. This emphasis on the organizing power of evolution is combined with an integration of the importance of cellular, molecular biology and genomics to offer our readers a text that is student friendly and current. Our author team is committed to producing the best possible text for both student and faculty. The lead author, Kenneth Mason, University of Iowa, has taught majors biology at three different major public universities for more than fifteen years. Jonathan Losos, Harvard University, is at the cutting edge of evolutionary biology research, and Susan Singer, Carleton College, has been involved in science education policy issues on a national level. All three authors bring varied instructional and content expertise to the tenth edition of *Biology*.

### Talking Back

With an annual student population of more than 100,000, City College of San Francisco has educated one in seven city residents and has alumni in every state. A Depression-era dream of Archibald Cloud, the college opened in 1935 with 1,483 students and no central campus. Today the college not only has a main campus at Ocean and Phelan Avenues, but also has 10 others spread throughout San Francisco. Science Hall, designed by Timothy Pflueger, proudly stands on the hill, a visible landmark beckoning students to walk through its portals. Pflueger's dream also included the incorporation of art into his buildings. His organization of the Art in Action program at the 1939-1940 Golden Gate International Exposition on Treasure Island resulted in the acquisition of Mexican muralist Diego Rivera's *Pan American Unity*, as well as mosaics and sculptures by other artists that adorn Science Hall.

The authors describe the creation and evolution of the New Leader Scholarship Program that seeks committed scholars from marginalized groups who attend Bay Area public universities. These future leaders come from a wide range of disenfranchised groups and are individuals seeking social justice who are strong, risk tolerant, resilient yet need help.

### Congressional Record

Home to 33,000 Filipino American residents, Daly City, California, located just outside of San Francisco, has been dubbed "the Pinoy Capital of the United States." In this fascinating ethnographic study of the lives of Daly City residents, Benito Vergara shows how Daly City has become a magnet for the growing Filipino American community. Vergara challenges rooted notions of colonialism here, addressing the immigrants' identities, connections and loyalties. Using the lens of transnationalism, he looks at the "double lives" of both recent and established Filipino Americans. Vergara explores how first-generation Pinoys experience homesickness precisely because Daly City is filled with reminders of their homeland's culture, like newspapers, shops and festivals. Vergara probes into the complicated, ambivalent feelings these immigrants have—toward the Philippines and the United States—and the conflicting obligations they have presented by belonging to a thriving community and yet possessing nostalgia for the homeland and people they left behind.

Examination of the War on Poverty: San Francisco, Calif. Wednesday, May 10, 1967; Stockton

The 1960 California Master Plan for Higher Education remains to this day the largest and most ambitious attempt to provide free, universal college education in the United States. Yet the Master Plan, the product of committed Cold War liberals, unfortunately served to reinforce the very class-based exclusions and de facto racism that plagued K–12 education in the nation's largest and most diverse state. In doing so, it inspired a wave of student and faculty organizing that not only forced administrators and politicians to live up to the original promise of the Master Plan—quality higher education for all—but changed the face of California itself. *Higher Education for All* is the first and only comprehensive account of the California Master Plan. Through deep archival work and sharp attention to a fascinating cast of historical characters, Andrew Stone Higgins has excavated the forgotten history of the Master Plan: from its origins in the 1957 Sputnik Crisis, through Governor Ronald Reagan's financial starvation and his failed quest to introduce tuition, to the student struggle to institute affirmative action in university admissions.

City College of San Francisco

Although it is one of the least-known social movements of the 1960s and 1970s, the Asian American movement drew upon some of the most powerful currents of the era, and had a wide-ranging impact on the political landscape of Asian America, and more generally, the United States. Using the racial discourse of the black power and other movements, as well as antiwar activist and the global decolonization movements, the Asian American movement succeeded in creating a multi-ethnic alliance of Asians in the United States and gave them a voice in their own destinies. *Rethinking the Asian American Movement* provides a short, accessible overview of this important social and political movement, highlighting key events and key figures, the movement's strengths and weaknesses, how it intersected with other social and political movements of the time, and its lasting effect on the country. It is perfect for anyone wanting to obtain an introduction to the Asian American movement of the twentieth century.

The Communications Act of 1979: Titles IV and VI

Founded in 1943, *Negro Digest* (later “*Black World*”) was the publication that launched Johnson Publishing. During the most turbulent years of the civil rights movement, *Negro Digest/Black World* served as a critical vehicle for political thought for supporters of the movement.

The Communications Act of 1979

*Managerial Accounting* provides students with a clear introduction to fundamental managerial accounting concepts. One of the major goals of this product is to orient students to the application of accounting principles and techniques in practice. By providing students with numerous opportunities for practice with a focus on real-world companies, students are better prepared as decision makers in the contemporary business world.

## The Journal of the Assembly During the ... Session of the Legislature of the State of California

She was arrested in the Berkeley Free Speech Movement. She was at the Be-In when Timothy Leary told us to drop out. She was in the battle of People's Park when James Rector was killed. She was tear-gassed on campus at UC Berkeley. She was at Altamont when a Hell's Angel murdered a concertgoer. Now she has written her autobiography, describing her unusual trajectory through an unusual era. In the spirit of Howard Zinn, Jentri Anders presents her life as an activist and anthropologist. A Southerner with deep roots in Georgia and Arkansas, she went to high school in Groveland, Florida, one of the most notorious locations in black history. Expelled from both a Georgia Bible college and Florida State University for political reasons, she moved to California, participated in the antiwar movement there, then was sexually and politically harrassed out of UC Berkeley. She dropped out of mainstream culture to become a back-to-the-land hippie in what is now called the Emerald Triangle in Humboldt County, California, then dropped back in, wrote the definitive ethnography of back-to-the-land hippies, and was featured in the Academy Award-nominated documentary film, Berkeley in the Sixties. A fascinating writer, Anders is also a scholar. Drag Me Out Like a Lady is thoroughly researched, indexed, referenced, and documented, including historical material from her personal files. Cultural historians, anthropologists, activists, feminists, literate hippies, as well as people who just like weird stories, will all love this book
