A Treatise on the Geometrical Representation of the Square Roots of Negative Quantities - Scholar's Choice Edition

The dominant powers in world energy geopolitics have radically changed in last couple of decades due to the increased demand for natural energy resources (i.e., coal and oil). Because of these power shifts, the economics of energy has become much more entangled in international relations. Economic Dynamics of Global Energy Geopolitics provides emerging research exploring the theoretical and practical aspects of the geo-economics of energy resources and how this affects countries' economies. It also explores the implementation of energy supply and demand in world markets. Featuring coverage on a broad range of topics such as socio-economics, supply/demand fluctuations, and foreign direct investment, this book is ideally designed for engineers, economists, academicians, researchers, policymakers, and graduate-level students seeking current research on the role of economics and policy in energy geopolitics.

The Absentee - Scholar's Choice Edition

In this innovative study of Ralph Waldo Emerson's conception of the scholar, Merton Sealts sheds new light on Emerson's attainment of his influential position in nineteenth-century intellectual, cultural, and literary history. Sealts is the first author to go beyond Henry Nash Smith's statement, "The Scholar is the hero of Emerson's unwritten Prelude"--the protagonist of his spiritual autobiography--by systematically examining the development and testing of the scholar as Emerson's idealized self-image. During the 1830s, after Emerson had resigned his Boston pulpit and was seeking a new vocation, he began to conceive of the scholar as someone who could think for and speak to all mankind. From that time on, Emerson adopted the scholar's "angle of vision" as his own and began to measure his private and professional life against his often-invoked conception of "the true scholar". Part I of Emerson on the Scholar shows how Emerson came to think of the ideal scholar as the "intellectual man\

Directory of American Scholars: English speech and drama

Almost nowhere are politics and history so intimately bound up as in Ireland. Over the course of several hundred years rival political and religious camps have shaped their identities according to particular interpretations of their shared history. As such, any re-examination and revision of Irish history has the potential to have a very real impact upon wider society. Defining revisionism in historiography as a reaction to contemporary conflict in Ireland, this book looks at how intellectuals, scholars and those who were politically involved, have reacted to a crisis of violence. It explores how they believed that revisionism in historiography was necessary - that a deconstruction, re-evaluation, and revision of ideology and therefore history was crucial in such a crisis of violence. This at times provocative approach seeks to better understand, clarify and de-mystify the ongoing revisionist debate in Ireland, through a critique and exposition of the theory of change and the process and product of change. Perry argues that revisionism should not be seen as solely a neutral form of academic or intellectual discourse, but one that is fundamentally linked to politics at the widest possible level; that revisionist assumptions underpin the validity and legitimacy of partition and the Northern Ireland state; that revisionism is widely judged to be anti-nationalist and pro-unionist; and that it is myopic with regard to the shortcomings of loyalism and unionism and has therefore a related ideological effect, if not intended purpose.

Pedagogy of the Oppressed

These lucid essays, though varied in subject, have the commonality of an emphasis on teaching. The first essay, entitled "Emerson as Teacher," demonstrates how Emerson "provoked and inspired and educated his students - and his students' students."

Written in a detailed and fascinating manner, this book is ideal for general readers interested in the English language.

A Companion to Greek Rhetoric

Here is the first biography of Mario Savio, the brilliant leader of Berkeley's Free Speech Movement, the largest and most disruptive student rebellion in American history. Savio risked his life to register black voters in Mississippi in the Freedom Summer of 1964 and did more than anyone to bring daring forms of non-violent protest from the civil rights movement to the struggle for free speech and academic freedom on American campuses. Drawing upon previously unavailable Savio papers, as well as oral histories from friends and fellow movement leaders, *Freedom's Orator* illuminates Mario's egalitarian leadership style, his remarkable eloquence, and the many ways he embodied the youthful idealism of the 1960s. The book also narrates, for the first time, his second phase of activism against "Reaganite Imperialism" in Central America and the corporatization of higher education. Including a generous selection of Savio's speeches, *Freedom's Orator* speaks with special relevance to a new generation of activists and to all who cherish the '60s and democratic ideals for which Savio fought so selflessly.
