The Temporality of Determinacy

Metaphysics has often held that laws of nature, if legitimate, must be time-independent. Yet mounting evidence from the foundations of science suggests that this constraint may be obsolete. This book provides arguments against this atemporality conjecture, which it locates both in metaphysics and in the philosophy of science, drawing on developments in a range of fields, from the foundations of physics to the philosophy of finance. It then seeks to excavate an alternative philosophical lineage which reconciles time-dependent laws with determinism, converging in the thought of Immanuel Kant.

De Fato

"Book V of The City of God is of particular importance for Augustine's philosophy of history. In accounting for the prodigious growth and continuance of the Roman Empire, he dismisses secular theories of chance and fate in favour of the universal sway of divine Providence. In achieving this end, God has exploited the Roman virtues, and Christians are urged to emulate them. Both pagan and Christian leaders have contributed to Roman greatness. The book concludes with eulogies of the Christian leaders Constantine and Theodosius." --Book Jacket.

De Natura Deorum Libri Tres

The Encyclopedia of Rhetoric is a comprehensive survey of the latest research--as well as the foundational teachings--in this broad field. Featuring 150 original, signed articles by leading scholars from many different fields of study it brings together knowledge from classics, philosophy, literature, literary theory, cultural studies, speech and communications. The Encyclopedia surveys basic concepts (speaker, style and audience); elements; genres; terms (fallacies, figures of speech); and the rhetoric of non-Western cultures and cultural movements. It covers rhetoric as the art of proof and persuasion; as the language of public speech and communication; and as a theoretical approach and critical tool used in the study of literature, art, and culture at large, including new forms of communication such as the internet. The Encyclopedia is the most wide ranging reference work of its kind, combining theory, history, and practice, with a special emphasis on public speaking, performance and communication.

Cross-references, bibliographies after each article, and synoptic and topical indexes further enhance the work. Written for students, teachers, scholars and writers the Encyclopedia of Rhetoric is the definitive reference work on this powerful discipline.

Encyclopaedia Metropolitana : Or Universal Dictionary of Knowledge ... V. 10

According to Ben McCorkle, the rhetorical canon of delivery—traditionally seen as the aspect of oratory pertaining to vocal tone, inflection, and physical gesture—has undergone a period of renewal within the last few decades to include the array of typefaces, color palettes, graphics, and other design elements used to convey a message to a chosen audience. McCorkle posits that this redefinition, while a noteworthy moment of modern rhetorical theory, is just the latest instance in a historical pattern of interaction between rhetoric and technology. In *Rhetorical Delivery as Technological Discourse: A Cross-Historical Study*, McCorkle explores the symbiotic relationship between delivery and technologies of writing and communication. Aiming to enhance historical understanding by demonstrating how changes in writing technology have altered our conception of delivery, McCorkle reveals the ways in which oratory and the tools of written expression have directly affected one another throughout the ages. To make his argument, the author examines case studies from significant historical moments in the Western rhetorical tradition. Beginning with the ancient Greeks, McCorkle illustrates how the increasingly literate Greeks developed rhetorical theories intended for oratory that incorporated “writerly” tendencies, diminishing delivery’s once-prime status in the process. Also explored is the near-eradication of rhetorical delivery in the mid-fifteenth century—the period of transition from late manuscript to early print culture—and the implications of the burgeoning print culture during the nineteenth century. McCorkle then investigates the declining interest in delivery as technology designed to replace the human voice and gesture became prominent at the beginning of the 1900s. Situating scholarship on delivery within a broader postmodern structure, he moves on to a discussion of the characteristics of contemporary hypertextual and digital communication and its role in reviving the canon, while also anticipating the future of communication technologies, the likely shifts in attitude toward delivery, and the implications of both on the future of teaching rhetoric. *Rhetorical Delivery as Technological Discourse* traces a long-view perspective of rhetorical history to present readers a productive reading of the volatile treatment of delivery alongside the parallel history of writing and communication technologies. This rereading will expand knowledge of the canon by not only offering the most thorough treatment of the history of rhetorical delivery available but also inviting conversation about the reciprocal impacts of rhetorical theory and written communication on each other throughout this history.

Providing new ways of reading Boccaccio's masterpiece, *Decameron*, Ferme analyzes the dynamics between the women who rule the first half of the story. Peeling back the many narrative layers within and outside of the framework, this book unearths the complications and trickery surrounding gender and death in Boccaccio's world and culture.

Cicero in Twenty-eight Volumes: Letters to his friends (4 v.)

This edited volume features 20 essays written by leading scholars that provide a detailed examination of *L'Homme* by René Descartes. It explores the way in which this work developed themes not just on questions such as the circulation of the blood, but also on central questions of perception and our knowledge of the world. Coverage first offers a critical discussion on the different versions of *L'Homme*, including the Latin, French, and English translations and the 1664 editions. Next, the authors examine the early reception of the work, from the connection of *L'Homme* to early-modern Dutch Cartesianism to Nicolas Steno's criticism of the work and how Descartes' clock analogy is used to defend two different conceptions of the articulation between anatomical observations and functional hypotheses. The book then goes on to explore *L'Homme* and early-modern anthropology as well as the how the work has been understood and incorporated into the works of scientists, physicians, and philosophers over the last 150 years. Overall, readers will discover how the trend over the last few decades to understand human cognition in neuro-physiological terms can be seen to be not something unprecedented, but rather a revival of a way of dealing with these fundamental questions that was pioneered by Descartes.

Augustine: *de Civitate Dei* the City of God Book V

The final volume to be published in the acclaimed Routledge History of Philosophy series provides an authoritative and comprehensive survey and analysis of the key areas of late Greek and early Christian Philosophy.
