Rationalizations | Ethics Defined - Rationalizations | Ethics Defined by McCombs School of Business 35,834 views 5 years ago 1 minute, 53 seconds - Ethics Unwrapped is a free online educational program produced by the Center for Leadership and Ethics at The University of ...

Rationalizations are invented explanations that hide or deny true motivations, causes, or actions. In order to maintain our self-image as good people, we unconsciously invent rationalizations to convince ourselves that what we did was...

According to Vikas Anand and his colleagues, common rationalizations include

Generally, rationalizations are most effective when they are not recognized as rationalizations.

They are dangerous because people are very creative rationalizers and, indeed, often come to believe their own excuses.

Crisis of Production of Surplus-Value

And We Have To Actually Get Together and Start To Talk about What these Issues Might Mean and How We Might Do It I Don't Have Solutions to a Lot of these Problems I Have some General Ideas about How To Frame the Debate and Discussion and We Can Talk about that and Many People Will Have Other Ideas but this Is Something What Has Is Going To Take a Collective a Real Collective Mobilization of You Know What Marx Called the General Intellect if We'Re Going To Actually Get

Anywhere with It and this Is to Me One of the Big Missions That It Seems to Me Has To Come out of the Situation as We Currently Are Right Now There Are no Answers Being Offered to the Dilemmas Which Faces There no Answers to the Contradictions

We Are in a Situation Right Now Where Part of the Dynamics of Technological Change and I Deal with this in the Book Are Actually Rendering Many of the Labor Processes Which Going On around Us Redundant I Mean I Guess Even the Economist Has Kind Of Argued that About 50 % of the Service Jobs Is Likely To Disappear and I Think the Left Has To Be Very Careful Not To Try To Defend Jobs Which Are Going To Disappear and Then We Tried To Do that with the Manufacturing Sector and Didn't Succeed the Same Thing Is Likely To Happen to the Service Sector It Would Be Very It's It's Perfectly Feasible Right Now that You Could Do Away with the Certain Categories of Employment like Airline Pilot You Could Actually You Could Actually Send Jumbo Jets across the Atlantic or Electronically Nitrite Now if You Really Wanted to People Would Be Very Scared about It

So I Think that Again There Has To Be a Critical Engagement but It Must Be a Fiercely Critical Engagement of those People Who Are Attempting To Do Good and I Think this Extends to the to the Way in Which the Welfare State Globally Is Essentially Replaced these Days by Ngos and There Will Be no Revolution by Ngo That I Can Assure You Even though There Are some Very Good People within the Ngo Would Like To See a Revolutionary Transformation because the Ngos Are Structured in Such a Way as to Their Financing and All the Rest of It Is Set Up in Such a Way That

So if We Want To Define a New Way of Doing Politics It CanNot Be through the Ngo Industrial Complex It Has To Be through some Other Other Other Form Now What Form That Can Take It Seems to Me To Be Something That Has Is Emergent Not Not Not and I You Know I'M Not a Good Organizer Myself I Have a Hard Enough Time Organizing Myself as Opposed to Organizing Anybody Else so that I Think that that Again the Question of Trust and How To Build Trust on How To Build a Political Process Is Something That Is Very Much an Open Open Question

You Know this Is Where Where Marx Is like To Form Circular Firing Squads and and Get after each Other You Know What Their Position Is on Crisis Theory and All the Rest of It but It Is Interesting I Think that Marx in those in those Passages in Volume Three Where He's Analyzing the Actual Crises of Eighteen Forty Seven Forty Eight 1957-58 Analyzes Them in a Way in Which Financial Issues and Credit Issues and Commercial Issues Are Actually Come to the Fore and It Would Seem to Me that if You Know We Should We Should Be Prepared At Least To Contemplate the Possibility that We Should Be Doing the Same Sort of Thing in Relationship to What Happened in 2007 2008 and What Its Relationship Might Be to some of the Deeper Underlying

I Think that Illustrates that Not Kept Us Going some Wrong Way but Capital if You Want To Put It that Way Is Inherently Inhumane and if You Want To Change Something about that about those Starving People You Would Need To End the Capital as the Aim of the Whole Economy and Not Change whether Production or Realization Is More Important and Who Try and What Drives What but and the Realization of any Value and Yes Can You Bring a Question Exactly the Question M One More Hint Is Whoever Wants To Have like More Details about that Information We Handed Out a Brochure and the Question Is What Do You Think about that All Right There Was this Gentleman in the Front Here this Is a Question on Inflation over the Last since 2008

Inflation

Organizational Considerations - Organizational Considerations by GreggU 362 views 1 year ago 2 minutes, 20 seconds - Managers design formal structures to organize a company's resources, and structure influences innovative entrepreneurial ...

Intro

Organizing, the second function of management, is defined as the process of delegating and coordinating tasks and resources to achieve objectives.

STRUCTURE As the structure of the firm must align with the environment in which it operates, overall there are two major forms of organization that are more effective in different environments-stable and dynamic

MECHANISTIC Mechanistic organizations are bureaucratic, focusing on following procedures and rules through tight controls and having specialized jobs, with decisions being made by top managers.

ORGANIC Conversely, organic organizations are flexible, with minimal focus on procedures and rules, broadly defined jobs, and decisions made at lower levels. This model tends to work well in the current trend of more dynamic environments.

BETWEEN Although there are two forms, they are really on a continuum between being mechanistic and being organic. Many companies are organized somewhere between the two extremes but can be more identified overall with one form or the other.

OBJECTIVES Companies develop strategies, and thus, company organizational structure must be designed to achieve the strategic objectives. As companies change strategies to align with the external environment, they tend to change their structure.

STRUCTURES With innovative growth strategies in a dynamic environment, organic structures tend to work well, whereas with a stability strategy in a stable environment, mechanistic structures tend to work well.
