Cryptocurrencies Simply Explained - By Tenx Co-Founder Dr. Julian Hosp

The easiest way into the world of blockchain, cryptocurrency, decentralization, bitcoin, icos, and co: Have you ever asked yourself what a cryptocurrency, a blockchain, or Bitcoin is? How about the word "decentralization?" You might have heard that "these things are coming" and "will take over the world." No matter if you have or haven't, "they" are right-these things are coming. And "these things" will play just as important a role as the internet has for the past 20 years. You know who "won" with the internet? The people who started preparing for it at the beginning, using it personally or for their business before others did. With this new technology called blockchain, a similar window of opportunity has started to open. If you have no clue what a blockchain, a cryptocurrency, or Bitcoin is, don't worry-most of the population doesn't. One of the main challenges for anyone trying to get familiar with these topics is the question of "Where should I start?" This is exactly what prompted me to write this book. In the simplest way possible, I will explain all the aforementioned points so even a 10-year-old could understand them. At the same time, I will reference the details on a technical level to give you both the large scale and the detailed picture. Explaining something to a 10-year-old is in no way a commentary on anyone's intelligence. I'm just following Albert Einstein's advice: "If you can't explain it simply, you don't understand it well enough." My ultimate goal is to make people all around the world #CRYPTOFIT. I.E fit for this new wave of decentralization and blockchain. 10 things you will learn in this book that will blow your mind: What does "backed by gold" actually mean? Will cryptocurrencies replace fiat currencies? Can an internet outage destroy cryptocurrencies? Does mining really create cryptocurrencies? (Hint: It doesn't) Is a maximum amount of Bitcoin really good for a currency? How do I get a cryptocurrency account if no one is in charge? Are cryptocurrencies better than fiat currencies? Is blockchain the only solution for decentralization? Which technology will win? (Hint: Not the best one!) Can you lose a coin? (Hint: You can NOT) Enjoy the read - Yours, Dr. Julian Hosp

Is it just a passing fad that will go down in history books as the biggest and longest lasting "tulip" festival in history? A major Ponzi scheme perhaps? No one wants to be the last holder of the bag, to be certain. And to it, they mean no one wants to hold something that is worth nothing. If that is the case, there is a lot that needs to be reconciled when the first pizza sold for 10,000 Bitcoin which was just enough to pay for it back then but when converted to today's terms, that would mean more than US\$450m as of 1 March 2021. To top it off, if it is worth nothing, will criminals of the underworld use it for transacting illegal goods like drugs and weapons? Bitcoin, being the progenitor of this new global currency space, has captured the attention of the world with its rise to prominence, especially during the COVID-19 pandemic, when its price soared more than 500%. Ethereum and other altcoins followed and some even gained greater momentum than Bitcoin during the first four months of 2021. Backed by extensive academic research as well as practitioners' insights into the world of cryptocurrencies, this book is will be a gem in in helping you navigate through the complexities of this brave new world. The Cryptoverse

Since its introduction in 2009, Bitcoin has been widely promoted as a digital currency that will revolutionize everything from online commerce to the nation-state. Yet supporters of Bitcoin and its blockchain technology subscribe to a form of cyberlibertarianism that depends to a surprising extent on far-right political thought. *The Politics of Bitcoin* exposes how much of the economic and political thought on which this cryptocurrency is based emerges from ideas that travel the gamut, from Milton Friedman, F.A. Hayek, and Ludwig von Mises to Federal Reserve conspiracy theorists. *Forerunners: Ideas First* is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, *Forerunners* draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

Introduction to Blockchain: With Case Studies

What makes someone leave home at the age of 16 to move to another country all by himself? What drives a person to pursue a professional kitesurfing career even though there is no sea where he is from? Why would someone study 6 years of medicine, just to not work as a medical doctor after graduation? How did the same person go from complete bankruptcy to financial independence in just a few years by moving to Asia? Julian, the author of the book, was asked these and many more questions throughout his entire life. Many of the answers did not make any sense at the time when he took the decision but make absolute sense looking backwards. The beautiful part of these stories he has around his answers is that anyone can not only relate to them, but moreover draw important conclusions for his or her own life. Julian's thought processes are NOT rocket science. At the end, there are no good or bad decisions in life - only decisions that you make or don't make. Sometimes someone (you?) just need a little bit of reassurance that you are on the right track. Need the extra motivation to step out of your comfort zone and have personal growth (maybe you want to move abroad or start a professional sports career, or change jobs?) You are ahead of a big change and need guidance (move abroad, change jobs, personal shifts) Feel stuck at where you are and need help and support to see new ways. Are at college or graduated from college and want to know through real life lessons if you are on the right track? Want to have highly productive days and get done twice as much as usual successfully? Want to get well-tested tips on personal finance, learn how to network professionally and have fun doing business. Are doing awesome already, but want to be inspired to have even more personal growth or try something new? ...then this book is for you! Julian's 25 easy-to-relate real-life stories are packed with true value bombs and over 75 life lessons and -hacks ready for you to use. Instead of the quick-tips or cookie-cutter-problem-solution approach these 25 real life stories will give you a practical blueprint. Most people never hear about the background stories of & against the odds or against the mainstream thinking; decisions, and what happened after taking them. So when they face a moment of adversity in their own life, they lack the self-motivation to overcome that obstacle. Julian wanted to make sure, that his Younger Self has a blueprint to be well prepared for such challenges and so he collected the most inspiring stories to give not only to his Younger Self but also share with you. Julian's 25 stories will make you laugh, scream, relate, and dream - but most important: They will inspire you to take those decisions in life, that you know you want and need to make, but have been too scared of so far.

This book covers Bitcoin's blocksize war, which was waged from August 2015 to November 2017. On the surface the battle was about the amount of data allowed in each Bitcoin block, however it exposed much deeper issues, such as who controls Bitcoin's protocol rules. It is not possible to cover every twist and turn in the labyrinthine conflict or all the arguments, but I have provided a chronology of the most significant events. This book explores some of the major characters in the conflict and includes

coverage, from both the front lines and behind the scenes, during some of the most acute phases of the struggle. The account in this book includes discussions with the key players from both sides during the war, exploring their motivations, strategy and thought processes as the exhausting campaign progressed and developed.
