Instructional Texts Pre-Calculus Worksheets

Engineers looking for an accessible approach to calculus will appreciate Young's introduction. The book offers a clear writing style that helps reduce any math anxiety they may have while developing their problem-solving skills. It incorporates Parallel Words and Math boxes that provide detailed annotations which follow a multi-modal approach. Your Turn exercises reinforce concepts by allowing them to see the connection between the exercises and examples. A five-step problem solving method is also used to help engineers gain a stronger understanding of word problems.

The Integrated Review Worksheets guide students through the Integrated Review in MyMathLab by objective, and offer additional Integrated Review practice exercises with ample space for students to show their work. They are three-hole punched so that students can insert them into their course binders, adding additional notes, solutions to homework exercises, and additional practice work as needed. The worksheets are also available for download in the MyMathLab course.

Integrated Review Worksheets for Precalculus with Integrated Review

Complex numbers are written in $a+bi$ form, where a and b are real numbers, and i is the imaginary unit, which is defined as the square root of negative one. The Calculations with Complex Numbers Workbook is a resource for Algebra 2 and Precalculus students to practice doing calculations in order to simplify complex number expressions and to write the answer in $a+bi$ form. This workbook does not contain any word problems. There are seven sections in this workbook. Example problems with step-by-step solutions precede each type of problem for sections one through six. Students should study these examples before starting the problems. Section seven contains the step-by-step solutions for all problems that students should use to check their work and correct any mistakes that were made. This workbook contains a total of 108 problems. This does not include the example problems. Section 1 begins with problems for students to practice simplifying powers of i then use this skill to simplify expressions with various powers of i and write the expression in $a+bi$ form. In Section 2 students do problems where they have to add, subtract, and multiply complex numbers and write the answer in $a+bi$ form. Section 3 includes problems where students have to write the conjugate of a complex number. Then students determine if a given complex number is a solution of a quadratic equation with real number coefficients. If it is a solution, students are then asked to write the other solution of the equation, which is the conjugate of the given complex number. In Section 4 students divide complex numbers and write the expression in $a+bi$ form. In order to do these problems, students multiply the denominator by its conjugate. In Section 5 students simplify problems that combine any of the four operations with complex numbers: addition, subtraction, multiplication, and division and write the answer in $a+bi$ form. Section 6 contains problems where students solve quadratic equations and write the answer in $a+bi$ form. Finally, Section 7 contains the step-by-step solutions for the 108 problems in this workbook.

ABOUT THE AUTHOR Teaching Experience Norman is currently in his 27th year as a high school math teacher. During his teaching career, he has taught Algebra 1, Algebra 2, Geometry, and Pre-Calculus. Education Norman earned a M.Ed. from Chaminade University of Honolulu and a B.A. in Mathematics from the University of Hawaii at Manoa. Personal Norman is a Navy Veteran. He enlisted in the United States Navy upon his high school graduation. He worked as an F-14 Tomcat plane captain (not a pilot) for the VF-41 Black Aces while they were out at sea on the aircraft carrier U.S.S. Nimitz. He is proud to have served his country while traveling the world and developed life-long friendships through unforgettable experiences. Norman enjoys his free time reading biographies, listening to music, playing the guitar, watching finance and investing videos, and hanging out with family and friends. NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. For Books a la Carte editions that include MyLab(TM) or Mastering(TM), several versions may exist for each title -- including customized versions for individual schools -- and registrations are not transferable. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. For courses in Precalculus This package includes MyLab Math. Providing the rigor of solid mathematics with an engaging and friendly approach As teachers, Ratti and McWaters saw firsthand where their Precalculus and Calculus students struggled, where they needed help making connections, and what material they needed to be successful in calculus. They decided to partner and write this text with the primary goal of preparing students to be successful in calculus and future STEM courses. Their experience in the classroom shows in each chapter. The focus on conceptual development, real-life applications, and extensive exercises, encourages a deeper understanding of the mathematics. Precalculus: A Unit Circle Approach, Books a la Carte Edition, 3rd Edition, includes thorough coverage of topics as preparation for calculus, including; trig identities, difference quotient, functional composition, decomposition and emphasizes graphing techniques/transformations. Personalize learning with MyLab Math MyLab(TM) Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts. At University of South Florida, the author's school, student results improved when using this book with MyLab Math. Published results are available at Pearsonmylabandmastering.com on the Results page. For the new edition, MyLab Math continues to expand the comprehensive auto-graded exercise options. The pre-existing exercises were carefully reviewed, vetted, and improved using aggregated student usage and performance data over time. In addition, MyLab Math includes new options to support conceptual learning, visualization, and student preparedness. 0134764560 / 9780134764566 Precalculus: A Unit Circle Approach, Books a la Carte Edition plus MyLab Math with Pearson eText -- Access Card Package Package consists of: 0134433203 / 9780134433202 Precalculus: A Unit Circle Approach, Books a la Carte Edition 013475316X / 9780134753164 MyLab Math with Pearson eText - Standalone Access Card - for Precalculus: A Unit Circle Approach
