The WPPSI is often required by private schools and gifted and talented programs as part of the application process.

Because an IQ test is so different from a skills or achievement test, it is harder to study for.

During the test, students can have up to 14 different types of questions.

Children ages 2 - 3 will have receptive vocabulary, block design, information, object assembly and picture naming questions.

Children ages 4-7 will also have vocabulary, picture concepts, symbol search, word reasoning, coding, comprehension, picture completion, similarities and matrix reasoning questions.
