Joh. Karl Leßbeck, Kayserl. Königlichen Forstbeamten, kluger und vorsichtiger Forster, oder nützlicher Unterricht von dem was ein guter Forstbedienter wissen und verstehen soll

Drawing from post-war reports commissioned by U.S. Army intelligence, World War II historian Steven H. Newton has translated, compiled, and edited the battle accounts of one of Germany's finest panzer commanders and a skilled tactician of tank warfare. Throughout most of the war, Erhard Raus was a highly respected field commander in the German-Soviet war on the eastern front, and after the war he wrote an insightful analysis of German strategy in that campaign. The Raus memoir covers the Russian campaign from the first day of the war to his relief from command at Hitler's order in the spring of 1945. It includes a detailed examination of the 6th Panzer Division's drive to Leningrad, Raus's own experiences

in the Soviet winter counteroffensive around Moscow, the unsuccessful attempt to relieve Stalingrad, and the final desperate battles inside Germany at the end of the war. His battlefield experience and keen tactical eye make his memoir especially valuable for scholars, and his narrative is as readable as Heinz Guderian's celebrated *Panzer Leader*.

Technologisches Wörterbuch, oder alphabetische Erklärung aller nützlichen mechanischen Künste, Manufakturen, Fabriken und Handwerker ...

Challenging previous accounts, Megargee shatters the myth that German generals would have prevailed in World War II if only Hitler had not meddled in their affairs. Instead, he observes that the military's strategic ideas were no better than Hitler's and often were worse. 20 photos.

Detailed reports by German commanders: "Powerful testimony to the Germans' lack of preparation for the harsh climatic conditions of the Russian winter." —Military Machines International When their troops invaded the Soviet Union in 1941, the initial success convinced the German high command that the Red Army could be destroyed west of the Dnepr River and that there would be no need for conducting operations in cold, snow, and mud. They were wrong. In fact, the German war in Russia was so brutal in its extremes that all past experience paled beside it. Everything in Russia—the land, the climate, the distances, and above all the people—were harder, harsher, more unforgiving, and deadlier than anything the German soldier had ever faced before. One panzer-grenadier who fought in the West and in Russia summed it up: In the West war was the same honorable old game; nobody went out of his way to be vicious, and fighting stopped often by five in the afternoon. But in the East, the Russians were trying to kill you—all the time. The four detailed reports of campaigning in Russia included in this invaluable book (Russian Combat Methods in WWII, Effects of Climate on Combat in European Russia, Combat in Russian Forests and Swamps and Warfare in the Far North) were written in the late 1940s and early 1950s as part of the US Army program to record the German strategies and tactics of World War II directly from the commanders. The authors were all veterans of the fighting they described, and frankly admitted that the soldiers sent to Russia were neither trained nor equipped to withstand the full fury of the elements. *Fighting in Hell* shows what happened on the ground, through firsthand accounts of the commanders who were there.

Neue theologisch-praktische Monatschrift zunächst für Seelsorger

Authorized translation from the German. Contains 100 maps. Includes various battles which the author analyzes along with military theories. Convinced that Germany, surrounded by powerful enemies, would have to fight outnumbered and win, Schlieffen believed the key to victory could be discovered in an account of the Battle of Cannae, written by the German military historian Hans Delbruck. Therefore, Schlieffen ordered the historical section of the General Staff to produce a set of "Cannae Studies" that would demonstrate that the principle of double envelopment practiced by Hannibal at Cannae was the master key to victory in battle.
