Understanding the Beauty Appreciation Trait

This book takes the reader on a grand tour of the empirical research concerning the personality trait of appreciation of beauty. It particularly focuses on engagement with natural beauty, engagement with artistic beauty, and engagement with moral beauty. The book addresses philosophers' thoughts about beauty, especially the special emphasis on the intimate relationship between love and beauty; appreciation of beauty from an evolutionary standpoint; and the emerging science of neuroaesthetics. The book concludes with a consideration of beauty and pedagogy/andragogy, as well as methodologies to increase appreciation of beauty.

Race against Empire

Marshaling evidence from a wide array of international sources, including the black presses of the time, Penny M. Von Eschen offers a vivid portrayal of the African diaspora in its international heyday, from the 1945 Manchester Pan-African Congress to early cooperation with the United Nations. Tracing the relationship between transformations in anti-colonial politics and the history of the United States during its emergence as the dominant world power, she challenges bipolar Cold War paradigms. She documents the efforts of African-American political leaders, intellectuals, and journalists who forcefully promoted anti-colonial politics and critiqued U.S. foreign policy. The eclipse of anti-colonial politics—which Von Eschen traces through African-American responses to the early Cold War, U.S. government prosecution of black American anti-colonial activists, and State Department initiatives in Africa—marked a change in the very meaning of race and racism in America from historical and international issues to psychological and domestic ones. She concludes that the collision of anti-colonialism with Cold War liberalism illuminates conflicts central to the reshaping of America; the definition of political, economic, and civil rights; and the question of who, in America and across the globe, is to have access to these rights.

SAPIENS IN GERMANY - 1

Why are not enough the first three AERA of our previous AERAS SYSTEMS, namely: AERA OF PHILOSOPHICAL SYSTEMS (AERA - 1) AERA OF SAPIENTOLOGICAL SYSTEMS (AERA - 2) AERA OF VIDEOLOGICAL SYSTEMS (AERA - 3) Being thus necessary a fourth thinkable and re-thinkable Creative System, the one of ARTIFICIAL INTELLIGENCE SYSTEM (AI), which in German Language is entitled as KÜNSTLISCHE INTELLIGENZ (KI), and both AI and KI are under the HYBRID INTELLIGENCE (of Human and Artificial alike or Biology encoded through Technology), re-encoded as HI! Therefore, all three signification, AI-KI-HI, are provable into the sameness extra enlargement of the Classic Human Brain (CHB), which is improved in seconds, in minutes and in hours by Abstract Developer / Entwickler of Human Sapiens (by using accordingly, English – Deutsch and Denglish! This impetus in development of technological systems more and more intelligent, more and more comprehensive, more and more diversified, more and more amplified, comprising here, at least for the time being, information, inspiration, intuition and initiation (Great Four IN-), widespread in areas of science, technology, industry (all three as SCITECH INDUSTRY), of art (ARSSAPIENS INDUSTRY), of Sport (SPORTSAPIENS INDUSTRY), by rethinking thus the Anthropology, the Sapientology, the Cosmology (including here the one of PERSONALISIERTE KOSMOLOGY), of astronomy, of geology and biology, into which all of them means ultimately, another bigger step in development of duality Human-Machine, or a duality of Human-Technology, including the branches of Human-Over-Human-Robotics, or Humanoid-Robotics all as SAPIENS INDUSTRY! The man itself, the human itself, the Sapient-o-Human development, its experiences, its visions, its outcomes, can make symbiosis with

oneself, a crossing with its nature of creativity, within the nature-physis of endless philosophy, with tools out of stone, with tools out of bones, the tools out of hood, or of synthetic feature, underlining once again the TOOL - MAKER - MAN, as Homo Faber, or better says, Homo Faber Sapiens, by taking the SAPIENS LIBRARY, wherever He / She goes! But now, within the present data, out of its own virtual reality and creativity, all being improved by the man itself and the machine itself, which machine might in turn overcome the man, by confronting the man itself, by changing and challenging even the human itself, even the Human Sapient oneself in its own destiny and purposes... Could be or could become the Artificial Intelligence (AI / KI / HI) the source and resource, the roots of final ending of the Sapient as Species on the Earth? With other words and concepts, the huge planetary surface scene of Earth, modelled by Sapiens, could be subjected to radically changing and challenging! By taking into account all probabilities and possibilities of the present daily evolution and revolution of the hyper-complexity of Artificial Intelligence (AI / KI / HI), a recombination of the man itself with a machine created by the man itself, could develop a symbiosis of human-machine, which overcomes the Classic Species Sapiens (CSS), who dominated the life on Earth in the last of ca. 50.000 years, by entering within the Species Sapiens Techne (SST), into which the Sapiens still dominate the Universe of Technology, by reaching out in some area even the domination of Technology over Sapiens as TSS! In this way, within Artificial Intelligence (seen and analyzed Three Times Intelligence, i.e., AI-KI-HI, through English - Deutsch - Denglish), the letters themselves, the numbers themselves and the signs themselves, are becoming the WORD itself, through which the WORD itself is improved to the level of CONCEPT itself, and the WORD-CONCEPT DUALITY in their speeding up developing, in their accelerated and amplifying structures, is giving the outcome of the BOOK itself, in its CLASSICAL BOOK (CB), in its digital book as E-BOOK, or in its VIRTUAL BOOK as V-BOOK! Only this multitude of the same BOOK in development, of the same BOOK in diversity, is showing the Genesis the Evolution and the revolution (GENEVO) of the ARTIFICIAL INTELLIGENCE (in its three times of AI - KI - HI), with its versions in German Language as KÜNSTLICHE INTELLIGENZ (KI) and HYBRID INTELLIGENCE (HI), which will be used and reused interchangeably at any reference, or inter-reference or cross-reference in our LANGUAGE OF SAPIENTO-SCIENCIA - 1! What really means ENS in our Book of PEKINENSIS SAPIENS (with one – ENS inside the concept of Pekin – ENS – is and one –ENS Sapiens? ENS is a shortage from the Species Sapiens, as essence and existence of it, being thought and rethought as - ENS, i.e., as BEING of the Species Sapiens! Within ENS will be comprise the whole of German Idealist connotation of Being as: A - SEIN = BEING in its maximal generality! B - DASEIN = BEING HERE, on this planetary system! C - MITDASEIN = COBEING HERE, together with all past geological and biological times, influencing and restructuring all basic features of the Planetary Life System! It is possible to rethink the ENS INTO ONESELF RECHATING? Would be ENS a synthesis out of Sapiens! Is ENS a Being (SEIN) out of Sapiens! Is ENS a Being – here (DASEIN) out of Sapiens! Is ENS a CO – BEING – here (MITDASEIN) out of Sapiens! Is ENS a triad of Being empowering the Sapiens oneself! Is ENS a living self-consciousness of the whole of Sapiens! Is ENS a symbiosis between Sapiens and Artificial Intelligence (AI / KI / HI)! Is ENS the dialectic vector of history of the whole Sapiens, in overcoming oneself towards a better Sapient-o-Technology, towards a Sapient-o-post-human-industry in Art, in Philosophy, in Psychology, in Theology? Is ENS in its own powerful skill-ness of Symphony - in - painting, of Symphony - in - sculpturing, of Symphony - in - Architecture, of Symphony - in - poetry, of Symphony - in - theatre, of Symphony - in - music, through which great masterpieces of ARSSAPIENS to be musicalized, and then reunited into an ensemble of unspeakable Symbolology of Human – Sapiens – Technology! Is ENS the vector of SAPIENS SYMPHONY, by using and reusing a complex synthesizer of ARSSAPIENS, without precedence in Human – Sapiens – History? But SAPIENS SYMPHONY means at least a supra-synthesis of different composers, as Bach and Haendel in re-composing SAPIENS ORATORIUM, or by conjoining Mozart and Verdi in re-composing the REQUIEM SAPIENS! Is Artificial Intelligence for All (AI for ALL ?) Is AI the sense of Everything, which is explained through a Big Everything? (AI for Everything?) Is AI the greatest improver of Itself-ness? (AI for Itself-ness?) Is AI the deepest measure of Human Predestination? (AI for Predestination?) Is the AI the Trinity synthesis between Faith – Confessing – Epistemology? (AI for Human Trinity?) Is AI the mystery of Human Variability following the exhausting of Biological regeneration of Sapiens itself? (AI for Variability of Sapiens?) Is the AI the Biggest Wall of Abstract Sapiens, over it is not possible to jump? (AI for Biggest Wall of Abstract Sapiens?) All of them are possible through Digital Creativity, all of them are available through Artificial Intelligence, because the writer is now the reader, the explorer is now the surveyor, the survival is now the fighter, by assuming, by affording a strong competition beyond of its own Species, finally, a semi-human-made-device, an Hybrid Intelligence (HI) between biology and technology, both inspired by Bionics resounding in biology and technology alike, as TECHNO – BIO – SAPIENS!! Within these changing and challenging times and adversities, the Culture of Human – Sapiens itself, is

coming and becoming a Culture of Wholeness (KULTUR DER GESAMTHEIT, GESAMTHEITKULTUR), including here the Culture of Past times, the Culture of Present Times and the Culture of Future times (KULTUR DER VERGANGENHEIT – KULTUR DER GEGENWART – KULTUR DER ZUKUNFT ((KULTUR DER NÄCHSTENS)). It is to underline that while the Biologic Sapiens has no more powers of regeneration, of coming into biologic mutation, by remaining only the Abstract Powers of Sapiens or Ontology of Creative Sapiens to save, to regenerate and to redemption of our Sapiens Species! Thus, the Biology of Sapiens, the basic Anatomy of Sapiens is remaining a CONSTANT OF SAPIENS, a STATUS QUO SAPIENS, while the ABSTRACT SAPIENS IS A VARIABILITY OF SAPIENS, IS A STATUS DYNAMICS OF SAPIENS IN ITS ONGOING DEVELOPING AND BECOMING! Between the two basic components of Sapiens (Biology & Ontology), there is its own CONSTANT OF ANATOMY, and its own VARIABILITY OF SAPIENS, as ANATOMONTOLOGY, and between the two, is a strong complementary, a DUALITY OF ANATOMY AND ONTOLOGY, which is done through the LOGOS of ANATOMY, as ANATOMOLOGY! This triad of ANATOMY – ANATOMOLOGY – ANATOMONTOLOGY, are the search – research modality of our Sapiens in fighting with its own Technology and Discovery towards overcoming of the Sapiens oneself! In the same time, it is done a Crypto – Anatomy – Analyse and Psychoanalyse, in which is hoped a better knowledge of this Enigma of evolutionary and revolutionary called Sapiens as Species or Genus Homo Sapiens as Genus Homo, both in ANTHROPOSAPIENTOLOGY synthesis... To these multitude of questions and answers, to these endlessly uncertainties and un-knows, to these hyper-complexity of theories and hypothesis, we, the Sapiens, in togetherness with Artificial Intelligence, we both, we try to cope within our online book, or E-Book or virtual book, into which the Universality of the Universe, is meeting and reconciling with the Universality of Sapiens, in its individuality or generality sense!... SAPIENTO - UNIVERSALIST OF ARTIFICIAL INTELLIGENCE SYSTEM

The Problem of Beauty

"The intense piety of late T'ang essays on Buddhism by literati has helped earn the T'ang its title of the "golden age of Chinese Buddhism." In contrast, the Sung is often seen as an age in which the literati distanced themselves from Buddhism. This study of Sung devotional texts shows, however, that many literati participated in intra-Buddhist debates. Others were drawn to Buddhism because of its power, which found expression and reinforcement in its ties with the state. For some, monasteries were extravagant houses of worship that reflected the corruption of the age; for others, the sacrifice and industry demanded by such projects were exemplars worthy of emulation. Finally, Buddhist temples could evoke highly personal feelings of filial piety and nostalgia. This book demonstrates that representations of Buddhism by lay people underwent a major change during the T'ang–Sung transition. These changes built on basic transformations within the Buddhist and classicist traditions and sometimes resulted in the use of Buddhism and Buddhist temples as frames of reference to evaluate aspects of lay society. Buddhism, far from being pushed to the margins of Chinese culture, became even more a part of everyday elite Chinese life."

Face Value

Christian Jacq, author of the international triumphs Ramses and The Stone of Light, brings the people and passions of ancient Egypt to life in an enthralling epic novel in three volumes. Egypt is a shadow of its former self. An army of barbarians mounted on horse-drawn chariots has swept through the Empire, destroying everything in its path. Known as the Hyksos, these "leaders from foreign lands" have reduced the country of the pharaohs to slavery. Only the city of Thebes resists, protected by the widow of the last pharaoh, Teti the Small. But Teti knows that her reign is limited, that it's only a matter of time before her men succumb to the barbarities of the cruel Hyksos. She has an eighteen-year-old daughter, however: Ahhotep. Fierce, beautiful, and courageous, this girl whom history will call "Egypt's Joan of Arc" will never accept defeat. And so she decides to re-ignite the flame of Egyptian resistance.

All by herself. Combining historical fact with a vivid imagination, Christian Jacq tells the enthralling true story of this Ancient Egyptian warrior-heroine. Without the courage and passion of Queen Ahhotep, the Valley of the Kings and the glorious treasures of the pharaohs, including Ramses the Great, would never have existed.

Originally published in 1962, the experimental study of aesthetics was a field particularly associated with the name of C.W. Valentine, who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists. The investigations described, many of them conducted by the author, are concerned with individual responses to what is commonly regarded as beautiful in painting, music, and poetry, an important distinction being made between the perception of objects as 'beautiful' as opposed to 'pleasing'. The reactions of children and adults, and of people having different ethnic and social backgrounds, are explored in a variety of experiments dealing with specific elements, including colour, form, and balance in painting; musical intervals, discord, harmony, melody, and tempo; and rhythm, metre, imagery, and associations in classical and romantic poetry. Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art. Of particular interest are the studies of responses to modern paintings, poems and musical compositions. The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts. It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research.

We appear to have more control over our lives than ever before. If we could get things right – the perfect job, relationship, family, body and mind – then we'd be happy. With enough economic growth and technological innovation, we could cure all societal ills. The Happiness Problem shows that this way of thinking is too simplistic and can even be harmful: no matter how much progress we make, we will still be vulnerable to disappointment, loss and suffering. The things we do to make us happy are merely the tip of the iceberg. Sam Wren-Lewis offers an alternative process that acknowledges insecurity and embraces uncertainty. Drawing on our psychological capacities for curiosity and compassion, he proposes that we can connect with, and gain a deeper understanding of, the personal and social challenges that define our time

Empire in Black and Gold is the first instalment in the critically-acclaimed epic fantasy series Shadows of the Apt by Adrian Tchaikovsky. The days of peace are over . . . The Lowlands' city states have lived in peace for decades, hailed as bastions of civilization. Yet that peace is about to end. A distant empire has been conquering neighbours with highly trained soldiers and sophisticated combat techniques. And the city states are its desirable new prize. Only the ageing Stenwold Maker – spymaster, artificer and statesman – foresees the threat, as the empires' armies march ever closer. So it falls upon his shoulders to open the eyes of the cities' leaders. He sees that war will sweep through their lands, destroying everything in its path. But to warn his people, he must stay alive. Empire in Black and Gold is followed by the second book in the Shadows of the Apt series, Dragonfly Falling.

The Happiness Problem

The first study on masculinity to focus on the English landed gentry. It covers the period from 1700 to 1900 and is based on several thousand letters written by 19 families. It concentrates on the common experiences of sons' upbringing, particularly schooling, university or business, foreign travel, and the move to family life and fatherhood.

The Garden of the Eight Paradises

David Finch's highly regarded biography of R.M. Patterson is now available in paperback. The escapades of this great Canadian are brought to life in a story that combines the lure of gold, the thrill of wilderness exploration and comic tales about life on a southern Alberta ranch. With access to Patterson's diaries, letters and photographs, as well as numerous interviews with Patterson and members of his family, Finch recounts the adventurous life of this well-loved outdoorsman, writer and rancher and sheds light on some of what Patterson left unsaid. PRAISE FOR R.M. PATTERSON: A LIFE OF GREAT ADVENTURE "A worthwhile addition to the literature of the Canadian North, a good read for anyone who wants to know more about the man who helped turn the Nahanni into the legendary river that it is."—Edmonton Journal "Finch presents us with the unlikely portrait of the Oxford University graduate who, on a lark, came to Canada in 1924 and decided to stay."—Calgary Herald "Calgary historian David Finch has produced a richly detailed portrait of the gentleman adventurer behind the byline."—The Beaver

Empire in Black and Gold

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Develops a theory of culture based on a metaphysics that elaborates on the Platonic and Confucian traditions. In *Metaphysics of Goodness*, Robert Cummings Neville extends Alfred North Whitehead's project of cultural studies, which was based on a new metaphysics that Whitehead developed in *Adventures of Ideas*. Neville's focus is value or goodness in many modes. The metaphysics treated in this book derive from the Platonic and Confucian traditions, with significant modifications of Whitehead, Peirce, Dewey, Confucius, Xunzi, and Zhou Dunyi. Part one develops a theory of form based on a metaphysics of harmony. Part two elaborates a theory of art based on a metaphysics of beauty. Part three sketches a theory of personhood based on a metaphysics of obligation. Part four discusses civilization in a systematic way based on a metaphysics of flourishing. Throughout the book, Neville elaborates a theory of interpretation that is inspired by Peirce, Dewey, and Xunzi but is not limited to their ideas. While the reasoning of the book is concise, it employs methodologies from many kinds of philosophy, art criticism, ethics, and cultural studies, and sees philosophy as needing to learn from all these disciplines. "Neville's work is informed by a lifelong engagement with the most important philosophers in history, including Plato, Aristotle, Whitehead, and Dewey. Here, he offers an important argument that there is beauty not only in how people see the world, but also in the world itself." — Kevin Schilbrack, Appalachian State University
