During his playing career, a baseball player's every action on the field is documented—every at bat, every hit, every pitch. But what becomes of a player after he leaves the game? This exhaustive reference work briefly details the post-baseball lives of some 7,600 major leaguers, owners, managers, administrators, umpires, sportswriters, announcers and broadcasters who are now deceased. Each entry tells the date and place of the player's birth, the number of seasons he spent in the majors, the primary position he played, the number of seasons he spent as a manager in the majors (if applicable), his post-baseball career and activities, date and cause of his death, and his final resting place.

Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Critical Pedagogy and the Everyday Classroom

Critical Pedagogy addresses the shortcomings of mainstream educational theory and practice and promotes the humanization of teacher and student. Where Critical Pedagogy is often treated as a discourse of academics in universities, this book explores the applications of Critical Pedagogy to actual classroom situations. Written in a straight-forward, concise, and lucid form by an American high school teacher, drawing examples from literature, film, and, above all, the everyday classroom, this book is meant to provoke thought in teachers, students and education activists as we transform our classrooms into democratic sites. From grading to testing, from content area disciplines to curriculum planning and instruction, from the social construction of knowledge to embodied cognition, this book takes the theories behind Critical Pedagogy and illustrates them at work in common classroom environments.

The Wolf of Wall Street

Stock market multimillionaire at 26. Federal convict at 36. The iconic true story of greed, power and excess. THE INTERNATIONAL BESTSELLER AND MAJOR MOVIE SENSATION, DIRECTED BY MARTIN SCORSESE AND STARRING LEONARDO DICAPRIO 'What separates Jordan's story from others like it, is the brutal honesty.' - Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sunk a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids who waited for him for at home, and the fast-talking, hard-partying young stockbrokers who called him king and did his bidding, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called THE WOLF OF WALL STREET. In the 1990s Jordan Belfort became one of the most infamous names in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of the canyons of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power and excess no one could invent - and then it all came crashing down.
