The Middle School Experience

The Middle School Experience helps prospective or current middle school teachers succeed as they work with students who have diverse learning needs, particularly students with disabilities. This helpful book shows how to integrate transition planning with age-appropriate instruction and emotional support. Such integration fosters self-determination in students with disabilities as they progress into high school and plan for adult life. The Middle School Experience presents a model of the integration process called The MidEx Model. The MidEx Model serves dual purposes: (a) to provide information and resources to current and prospective professionals and (b) to demonstrate how teachers and other professionals can present information and resources to middle school students. Each chapter incorporates information from the MidEx Model and offers strategies for classroom implementation.

Social problems affect everyone. Because so many actual and potential problems confront us, it is often difficult to decide which ones affect us most severely. Is it the threat of death or injury during a

terrorist attack? Is it the threat caused by industrial pollution that may poison us or destroy our physical environment? Or does quiet but viciously damaging gender, age, class, racial, or ethnic discrimination have the most far-reaching effect? Do the problems of cities affect us if we live in the suburbs? Do poorer nations' problems with overpopulation affect our quality of life? The Encyclopedia of Social Problems offers an interdisciplinary perspective into many social issues that are a continuing concern in our lives, whether we confront them on a personal, local, regional, national, or global level. With more than 600 entries, these two volumes cover all of the major theories, approaches, and contemporary issues in social problems and also provide insight into how social conditions get defined as social problems, and the ways different people and organizations view and try to solve them. Promoting a Successful Transition to Middle School

Inclusive education has grown as an international movement to not only support students with disabilities but also promote equitable access, participation, and success for all students. This book will transform the capacity of teachers and specialists working with students and families to effectively support an inclusive approach to education for students on the autism spectrum. This book addresses the urgent need to identify inclusive educational environments and strategies for students on the autism spectrum so that they have the best chance of social, behavioural, and academic success at school. Teachers who include students on the autism spectrum in primary and secondary classrooms require greater knowledge of how they can best support the learning, social, and behavioural needs of their students. Without such knowledge, the consequences can include unsatisfactory learning experiences for all students, and interrupted schooling for the student on the autism spectrum through reduced attendance and retention, lower academic performance, exclusion, disengagement, and pressure on parents to make alternative arrangements for their child's education. Inclusive education is socially, emotionally, and academically beneficial for all students and positively impacts on respectful attitudes to difference. This book presents innovative, evidence-based practices that will build the capacity of teachers and specialists implementing an inclusive and contextually relevant approach to education

that will support students on the autism spectrum and meet the diverse needs of all students in their classrooms.

Supporting Students on the Autism Spectrum in Inclusive Schools

Teaching English Learners and Students with Learning Difficulties in an Inclusive Classroom

Designed to assist the first-year teacher in navigating the ever-changing field of special education and to equip them for the challenges they will face, this revised edition includes updated information on specific learning disabilities, behavioural disorders and parental choice.

Building on Student Diversity

Only a full scale effort will make multicultural education a success at the middle school level. Multicultural education programs must be integrated into all levels of the school day, from curriculum and instructional materials through all the components of the middle school experience. Chapter 1 looks at the country's increasing cultural diversity and explores the obstacles culturally diverse learners face. Chapter 2 explores the concept of multicultural education and societal ills. Essential middle school concepts and program elements are explored in Chapter 3, and Chapter 4 focuses on the curriculum and an integrated approach to multicultural education. A section of Chapter 4 examines appropriate teaching strategies for linguistically diverse learners. Chapter 5 then lists organizational and published resources teachers can consult. Middle-level schools can become even more significant in the lives of young adolescents and can become models for other schools to emulate when teachers deal with cultural diversity in ways that enrich the curriculum, demonstrate respect for all people, and attack all forms of ill treatment. Many practical suggestions are given for infusing multiculturalism into the whole school day. (Contains 11 tables and 94 references.) (SLD)

The Exceptional Teacher's Handbook

Traditionally, books on parent education have focused on techniques from a certain tradition, either behavioral or humanistic, that could be applied to any problem of parenting or child behavior change. These books have used a "cook-book" approach that is frequently oblivious to environmental conditions that influence behavior or take into account the individual differences of the children or families involved. This book highlights the complexity of our society and times by exploring the problems faced by diverse types of parents, children, and parenting situations. Moreover, the sensitive issues of parenting in unique populations are handled in a caring, straight-forward way with an emphasis on research-based parent education programs along with tips and strategies for everyday use. Premier text on parent education in diverse populations Features tips, strategies, websites and support for parents Based upon "cutting edge" research in parent education Models for developing problem-specific parenting programs Step-by-step parent education programs for low-incidence problems Features violence and crisis prevention and intervention skills for families

Celebrating Diversity

Across OECD countries, almost one in every five students does not reach a basic minimum level of skills. This book presents a series of policy recommendations for education systems to help all children succeed.

Handbook of Diversity in Parent Education

Governments and education policy makers are increasingly concerned with equity and inclusion in education due to several major global trends such as demographic shifts, migration and refugee crises, rising inequalities, and climate change. These developments have contributed to increasing diversity within national populations and flagged some concerns around the ability of education systems to be equitable and inclusive of all students.

Equity and Quality in Education Supporting Disadvantaged Students and Schools

The middle years of learning are increasingly recognised as one of the most challenging yet opportune periods for growth and development. Based on the Positive Behaviour Support (PBS) framework, this book will equip educators with the appropriate knowledge, skills and strategies to support learners in maximising their educational success, managing emotional issues and making a successful transition to adulthood. Part A outlines the principles of the PBS framework, defines key characteristics of middle-years learners and provides insight from neuroscience into the nature of the adolescent brain. This section also looks at the importance of listening to the student voice, highlights issues that can arise during the transition into the middle years of schooling, and discusses the use of evidence-based PBS practices to encourage engagement and establish clear behavioural expectations with learners. Part B focuses on the practical aspects of implementing universal PBS strategies in the classroom, including developing strong and effective relationships with students, promoting school connectedness and supporting self-regulation. Part C examines more focused and intensive interventions, and provides strategies for working with students experiencing stress, anxiety and bullying. Finally, Part D discusses ways to support a range of perspectives and experiences in the middle-years, including trauma-affected students, ethnic and cultural diversity and students on the autism spectrum, as well as ways to use ICT to re-engage vulnerable students. This is an essential reference for both primary and secondary educators, revealing how PBS strategies can play a profound role in positively transforming classroom behaviour.

Equity and Inclusion in Education Finding Strength through Diversity

Appropriate for Methods of Teaching the Mild/Moderately Disabled and General Methods courses. This book examines the teaching, instruction, and curricula required to meet the needs of diverse students, who by virtue of their experiential, cultural, socioeconomic, linguistic, and physiological backgrounds, challenge traditional curriculum and instructional programs. The text provides a critical examination of the pedagogical and curricular requirements in schools over the last five years. Based on these analyses, recommendations for teaching reading, writing, mathematics, science, social studies, and also teaching language minority students are given to ensure diverse learners succeed in the classroom.

Creating Highly Motivating Classrooms for All Students

Bridging the gap between theory and practice, the authors focus on culturally responsive teaching and diverse learners, including students who are economically disadvantaged, from sexual minorities, English language learners, with special needs, and more. Using a convenient format that teachers, trainers, and administrators find appealing, the authors have surveyed and selected the best published data and research on diversity and multicultural education and synthesized it for classroom application and teaching. Each of the research-based strategies in the book includes: A concise description of the recommended strategy A brief synthesis of the research that supports use of the strategy Guidelines for applying the strategy in the classroom Precautions about avoiding pitfalls that may occur during implementation of the strategy Source citations for further research and follow-up This book will be an ideal companion title for teachers already using the authors' book on research-based strategies for working with special learners in inclusive classrooms.

Developing Positive Classroom Environments

The book presents up-to-date research on moral education teaching and teachers in China. By providing an accessible, practical, yet scholarly source of moral education, education aims and teachers' ethical roles in China, which is also an international concern, the author systematically reviews Moral Education curriculum, moral education pre-service teacher education, current policies and practices of Moral Education teaching and teachers. The book will be resourceful for researchers, practitioners and policymakers in moral education, citizenship education and teacher education.

Effective Teaching Strategies that Accommodate Diverse Learners

It includes a unique, cross-categorical model emphasizing a wide variety of transition pathways; and, offers numerous practical suggestions for how to draft IEP transition language related to this model. The authors address many of the emerging issues and content areas not fully addressed in other transition texts, those being: The role of the general education teacher in middle and secondary general education classrooms and in community-based experiences; The crucial need for better educational and employment preparation systems to support youth with disabilities; The challenge educators face in developing educational programs that serve a diverse population of learners, including those with disabilities, at-risk for school failure, former school drop-outs, those with limited English proficiency, and teen parents; Sensitivity to and conceptual understanding of how cultural orientation affects attitudes toward work and careers; The need for transition professionals to clearly link self-determination concepts, career assessment, and individual transition planning; A deep understanding of the history of transition services, and the federal and state laws that provide authority and guidance to practice.
