

Failure Of American Public Education Still Waiting For The Harvest My 48 Years In Urban Schools Sow

[#american public education failure](#) [#urban school challenges](#) [#education reform now](#) [#public education crisis](#) [#48 years in schools](#)

This article critically examines the persistent failure of American public education, drawing on 48 years of dedicated experience within urban schools. It highlights the ongoing struggle to see positive outcomes, metaphorically 'waiting for the harvest' despite years of 'sowing,' underscoring the deep-seated issues that continue to plague the system and the urgent need for meaningful reform.

Failure of American Public Education: Still Waiting for the Harvest

Despite all of the positive things that we have done in American education, we have failed miserably! When it comes to academic rigor in America's large urban schools, other nations such as China, India, and Singapore are passing us at alarming rates. In a speech on education on March 10, 2009, President Obama said that other countries are ahead of the United States in creating internationally competitive educational standards. He argued that a far-reaching overhaul of the nation's educational system is an economic imperative that can not wait. "The relative decline of American education is untenable for our economy, unsustainable for our democracy, and unacceptable to our children. We can not afford to let it continue. What is at stake here is nothing less than the American dream". The Brown decision represented the most hopeful thread of the American narrative; "the doctrine of 'separate but equal' has no place," and the opportunity to learn "is a right which must be made available to all on equal terms." In practice, integrated schools today remain as much of a dream now as they were 50 years ago. The wealthier schools are filled with passionate, experienced educators, while the poorer urban schools are flooded with passionate, inexperienced rookies who are so overwhelmed that they leave the profession in defeat. Three out of every 10 students in the U.S. public schools still fail to finish high school with a diploma. That amounts to 1.3 million students lost from the graduation pipeline each year, or almost 7,200 students lost every day. Those who do graduate are woefully lacking in literacy. Most do not master standard English and are an embarrassment when they speak in settings that require standard English. Where did we go wrong?

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will

be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn’t cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you’re left wondering if God has abandoned you. You just want a way out. But there’s hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn’t look like what you expect.
