## The Stroke of Happiness

Mary Stewarts day started like any other. Still reeling from her husbands infidelity and the subsequent end of her marriage, she answers the ringing phonenot knowing that the news she will soon receive will change the course of her entire life forever. Marys mother has just suffered a debilitating stroke. After Marys father summons her to return home to Edinburgh, Scotland, Mary swallows hard. Already in dire

financial circumstances, she ignores her misgivings. Family must come first. She pays her landlord two months rent and quickly boards an airplane, thinking she is leaving her life in Canada behind only temporarily. As Mary and her father reunite at her mother's bedside, they grow closer day-by-day while sharing and comparing their own unique challenges in life. Soon, the healing power of love transforms their fears and insecurities into comfort and inner peace. In this poignant story about faith, love, and devotion, one woman journeys full circle and soon discovers that true happiness is often realized when we least expect it.

### Healing and Happiness After Stroke

You've been working on healing your brain since day one of rehab. But when results start to slow down or you start to feel stuck, then you may have overlooked an equally important part of recovery: Happiness. By harnessing the power of positive psychology, you can boost self-esteem, overcome depression, break through plateaus, and find the motivation to achieve an amazing recovery. This inspiring self-help guide, complete with practical exercises and essential habits, provides a much needed pep-talk for every stroke survivor on their road to recovery. Based on scientific evidence, stories from stroke survivors, and years of self-help research, *Healing and Happiness after Stroke* has everything you need to get back on your feet and become a stronger version of yourself.

### Stroke of Gratitude

"Stroke of Gratitude" is the story of a journey back from the brink of death, and the transformative powers of illness, hope and love. A story for stroke patients and survivors, anyone going through a health crisis in life, as well as healthy individuals alike, book reveals the true discovery and realisation that a health crisis or undesired events happening in our lives can also set the directions for us to become who we truly wish to be. We see how the author's acceptance of life changes he had to make due to extensive sufferings and limitations from a devastating stroke that hit him in 2012, unlocked the key to reveal the next greater version of himself. Each and every stage of the healing journey emitted in Anandha the power to discover truth, love and happiness, and to achieve dreams that would also fulfil his passionate wish to give back to society in support of the needy and humanity.

### The Aftermath of Stroke

A careful and comprehensive account written for all health care professionals.

### The Pursuit of Happiness with Alzheimer's Year Three

This is my third book in a series of diary type entries about the progress of my Alzheimer's disease since December 2017 when it was first diagnosed. I have changed my opinions about doing better with nostrums and vitamins. There is no cure. One reason I changed my mind is that I have done so well during the third year. I do believe Namzaric, getting cholesterol and blood pressure low with medicine is key to preventing stroke and a sudden decline in mentation. I published my lab results which I usually get every three months. My next book will be titled: Alzheimer's is Inexorable. Year Four. Let's see if my title is premature.

### Stroke of Love

Stroke of Love is the life story of a young stroke survivor from Texas named Hether Flanigan. It is a story of resilience, determination, strength, and love. A story about the human spirit, the will to live life to the fullest, the power of the human mind, and the love that surrounds us. A story proving that we can do anything we set our minds to and that adversity is often our greatest teacher.

### In Search of Happiness

This is the story of a man who after the collapse of his business was forced to sell his house and this coupled with the death of his wife leaves him in a very desperate state. He then has a stroke of luck which should have brought him happiness but doesn't provide the stability that he yearns for and he sets out on a plan that he hopes will achieve the sort of contentment and companionship he is after.

### Mom Had a Stroke

Katie, a six-year-old girl, loved her life. She had everything she needed: a house in the country with pets, a devoted family, and a fun-loving mom who would do anything for her. Katie had no worries. But, unexpectedly near the end of her kindergarten school year, her mother suffered a life-altering stroke. Katie's mom transitioned from a happy-go-lucky mom to one who lost her ability to walk and talk. For the first time in her life, Katie was really scared and worried what was going to happen to her mother. Although Katie lost her old mom, she gained a new mom who turned out to be very different. Life was altered from what it once was, but it wasn't so bad because through it all, Katie was lucky to have her mom. A book for children, *Mom Had a Stroke* explores how one little girl felt as she learned to accept and adjust to a new mom with physical challenges, and how, over time, they began to experience happiness as a family again.

### The Clinical Neuropsychiatry of Stroke

This second edition, published in 2006, covers the range of neuropsychiatric syndromes associated with stroke, including cognitive, emotional and behavioural disorders such as depression, anxiety and psychosis. There is growing recognition among a wide range of clinicians and allied healthcare staff that post-stroke neuropsychiatric syndromes are common and serious. Such complications can have a negative impact on recovery and even survival; however, there is now evidence suggesting that pre-emptive therapeutic intervention in high-risk patient groups can prevent the initial onset of the conditions. This opportunity for primary prevention marks a huge advance in the management of this patient population.

### The Pursuit of Happiness with Alzheimer's Year Three

This is my third book in a series of diary type entries about the progress of my Alzheimer's disease since December 2017 when it was first diagnosed. I have changed my opinions about doing better with nostrums and vitamins. There is no cure. One reason I changed my mind is that I have done so well during the third year. I do believe Namzaric, getting cholesterol and blood pressure low with medicine is key to preventing stroke and a sudden decline in mentation. I published my lab results which I usually get every three months. My next book will be titled: Alzheimer's is Inexorable. Year Four. Let's see if my title is premature.

#### Annie Donaldson; Or, Evenings in a Happy Home. A Tale

Ruth Leon was married to Sheridan Morley – theatre critic, broadcaster and Britain's pre-eminent arts journalist. He'd suffered from bouts of depression all his life but suddenly, after a mild stroke, his usual treatments stopped working. He sat, crying, his chin pressed down into his chest, all day, every day. Ruth looked after him – sometimes gracefully and sympathetically, often angrily and tensely. Also an arts journalist, for two years she did her own freelance work as well as his. She no longer recognised her husband, but she could be him. One day, a consultant in Oxford said he thought they'd been treating the wrong kind of depression; that the stroke had damaged the emotional centre of Sheridan's brain. He knew of a procedure that might help, but it had never before been performed in the UK. It was an outlandish, fantastical idea – an implant would be put in Sheridan's brain that would allow doctors to adjust his mood with an electronic remote control. They would be tampering with the very core of what made Sheridan Sheridan. On behalf of her long-absent husband, Ruth agreed. Ruth Leon's account of this unique journey to the heart of what it is to be human is as honest and moving as it is fascinating and challenging.

#### Happier Brain, Happier You, Happier World

We as a whole need to be happy. However, we once in a while consider happiness a thing that happens to us - something we have zero power over. It's not difficult to connect the possibility of happiness with the circumstance we're in. We could tell ourselves, "If by some stroke of good luck things were unique, then, at that point, I'd be happy." Yet that is not actually the way in which happiness works. Research shows that simply a little part of happiness (just around 10%) relies upon an individual's circumstance. So where does the vast majority of our happiness come from? A piece of happiness relies upon character. Certain individuals have a normally happy nature. We as a whole know individuals who are lively and hopeful more often than not.

It is a 100% frank account with no elaboration. Those who know me will know and understand my turn of phrase anyway and hopefully this book sounds like me. The main reason for me writing this was during my recovery I was trying to get answers to my own personal questions which is very frustrating, VERY! I have written this in my own words exactly how it happened for me. so if you, the reader, can identify with a chapter, a paragraph or even a phrase, something that can lift you or take away some frustration that you will feel at some point, then this book has done its job. This is my story, events, opinions, observations and thoughts from having the stroke, through my early and ongoing recovery and finishes with my 10km run for the Stroke Association less than three years later.
