The Busy Girls' Guide to Looking Great

The Ultimate Lazy Man/Women's Guide to Losing Weight To lose weight you have to do one of three things: eat less, move around more, or preferably both. If you do any of these, you will lose weight. How? It all boils down to achieving a net negative calorie state. When you eat less but maintain your normal activity levels, you have fewer calories coming into your system and your body will try to make up for those lost calories by burning up stored energy. Animals, which include human beings, store energy in the form of fat and muscle. When you eat fewer calories, your body misses these calories. To be able to afford all its other energy expenditures it's going to compensate for these missing calories. It's going to start burning up fat and muscle. Make no mistake about it, you're always burning calories. By simply reading this book, you're burning calories. When you walk around and breathe, you're burning

calories. In fact, even if you're lying down on your bed, you're still burning calories because your body is pumping blood and breaking down the food that you ate earlier. Do you see how this all works out? Consider your body as a factory. If you're going to do anything with this factory by making any of its machinery work, you need energy. Your body requires energy in the form of calories. If you do any of the three things I mentioned above, you will achieve a net negative calorie state which would force your body to burn up calories. The more fat your body burns up, the lighter you weigh. Similarly, your body would also burn muscle for these calories. It has to get those calories. The other approach, which is the more common way to lose weight is to simply move around more. You're eating the same amount of food but you're moving around more. Normally, people exercise to achieve this state. The same logic applies. When you move around more, your body's calorie requirements go up. It has to look for those calories somewhere. Since you're not eating more to compensate for your increased activities, your body is going to have to burn fat and/or muscle to compensate for the calories you lost due to your increased activities.

Weight Loss: How to Lose Weight Without Moving

Vibrant, vivacious and gorgeous, Wendy Shanker is a fat girl who has simply had enough - enough of family, friends, co-workers, women's magazines, even strangers on the street all trying (and failing) to make her thin. With her mandate to change the world - and the humour and energy to do it - Wendy shows how media madness, corporate greed and even the most well-intentioned loved ones can chip away at a woman's confidence. She invites people of all sizes, shapes and dissatisfactions to trade self-loathing for self-tolerance, celebrity worship for reality reverence, and a carb-free life for a guilt-free Krispy Kreme. Wendy explores dieting debacles, full-figured fashions and feminist philosophy while guiding you through exercise clubs, doctors' offices, shopping malls and the bedroom. In the process, she will convince you that you can be fit and fat, even as the weight loss industry conspires to make you think otherwise. The Fat Girl's Guide to Life invites you to step off the scales and weigh the issues for yourself.

The Skinny Girl diet tries to balance and promote weight loss and healthy eating with the desire to live a "normal life" free of a bunch of food rules. Because there are no drastic alterations in the diet plan, it is a safe plan to try for most people. A lot of diets today do seem to have one thing to condemn and that is the eating of certain types of foods. What the Healthy Skinny Girl Diet does is to not do this. It does recognize the fact that the human body does indeed need all of the food groups as essentials and this is why the diet does call for the intake of carbohydrates and fats that other diets would ordinarily cut out or eliminate all together. It is a diet that is based on balance and you promote the balance. You can stick to this diet best by doing one thing and that is to not go over the carbohydrate and fat intake by controlling your portions. The Healthy Skinny Girl Diet is a diet that is based solely on balance. However, the diet does make one demand, and this demand is for the dieter to not eat any processed foods. Natural produces are always the best way to go to lose weight effectively.
