Glosario Del Banco Mundial

This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

The Radiological Accident in Goiânia

The Government and authorities in Brazil were faced with a tragic accident in Goiânia resulting from the misuse of a strongly radioactive medical teletherapy source not under radiation protection surveillance. The present report is divided into four parts: a chronology of destruction of the source, discovery of the accident and initial response; a description of the human consequences and the dosimetry and treatment of seriously exposed and contaminated persons; an account of the assessment of the environmental contamination and the remedial actions taken; and observations and recommendations. Appendices and annexes give an assessment of the effectiveness of international co-operation in the emergency response, and provide further information on: public communications; radiological survey equipment; guidelines for the discharge of patients; radiological protection; chemical decontamination; and the lessons learned.

Education for Sustainable Development Goals

Composed of a series of essays, this book deals with the broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials. It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them. The book is organized into three sections; 'Time' looks at how the materials used

in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design. 'Materials' covers all five material families; metals, polymers, ceramics, composites and natural materials giving in depth information on their properties, behavior, origins and uses in design. It also introduces a review of the cutting edge research for each family. 'Systems' outlines the technical design-orientated research that uncovers how new architectural assemblies can be designed and engineered. All of this practical advice is given along with many real case examples illustrating how this knowledge and information has been, and can be, used in architectural design.

Material Architecture

The author presents a new philosophy of science in the grand tradition that has recently been deemed impossible. Scerri believes that science develops as a holistic entity, which is fundamentally unified even though the individuals making up the body scientific are frequently in competition among each other. He draws inspiration from a conviction that the world is essentially unified in the way that has been described by both Western and Eastern philosophers. --

A Tale of Seven Scientists and a New Philosophy of Science

In the disciplines of applied linguistics and second language acquisition (SLA), the study of pragmatic competence has been driven by several fundamental questions: What does it mean to become pragmatically competent in a second language (L2)? How can we examine pragmatic competence to make inference of its development among L2 learners? In what ways do research findings inform teaching and assessment of pragmatic competence? This book explores these key issues in Japanese as a second/foreign language. The book has three sections. The first section offers a general overview and historical sketch of the study of Japanese pragmatics and its influence on Japanese pedagogy and curriculum. The overview chapter is followed by eight empirical findings, each dealing with phenomena that are significant in Japanese pragmatics. They target selected features of Japanese pragmatics and investigate the learners' use of them as an indicator of their pragmatic competence. The target pragmatic features are wide-ranging, among them honorifics, speech style, sentence final particles, speech acts of various types, and indirect expressions. Each study explicitly prompts the connection between pragmalinguistics (linguistic forms available to perform language functions) and sociopragmatics (norms that determine appropriate use of the forms) in Japanese. By documenting the understanding and use of them among learners of Japanese spanning multiple levels and time durations, this book offers insight about the nature and development of pragmatic competence, as well as implications for the learning and teaching of Japanese pragmatics. The last section presents a critical reflection on the eight empirical papers and prompts a discussion of the practice of Japanese pragmatics research.

Pragmatic Competence

The State of Food and Agriculture 2000 reports on current developments and issues of importance for world agriculture, analysing global agricultural trends as well as the broader economic environments surrounding the agricultural sector in a comprehensive world review ... An important feature of this year's issue is the special chapter, World food and agriculture: lessons from the past 50 years, which gives an overview of developments that have taken place in world agriculture and food security over the past half-century ... -- from Back Cover.

The State of Food and Agriculture 2000

The authors of this volume claim that mathematics can be usefully re-conceptualized as a special form of communication. As a result, the familiar discussion of mental schemes, misconceptions, and cognitive conflict is transformed into a consideration of activity, patterns of interaction, and communication failure. By equating thinking with communicating, the discursive approach also deconstructs the problematic dichotomy between "individual" and "social" research perspectives.

Learning Discourse

This report from the Council for International Organizations of Medical Sciences (CIOMS) in collaboration with WHO covers the activities and outputs of the CIOMS/WHO Working Group on Vaccine Pharmacovigilance (2005-2010). This working group brought together experts from both industrialized and emerging countries representing regulatory agencies, vaccine industry, national and international

public health bodies including WHO and CIOMS, academia and clinical care, contributing from their different perspectives. The report covers general terms and definitions for vaccine safety and discusses the application of such harmonized tools in vaccine safety surveillance and studies. As well, the report highlights case definitions for adverse events typically reported for vaccines. The report is addressed to those engaged in vaccine safety data collection and evaluation, and will also make a useful reading for others who want to familiarize themselves with vaccine safety terminology.

Definition and Application of Terms for Vaccine Pharmacovigilance

Infotech, second edition, is a comprehensive course for intermediate level learners who need to be able to understand the English of computing for study and work. Thoroughly revised by the same author it offers up to date material on this fast moving area. The course does not require a specialist knowledge of computers on either the part of the student or the teacher. The 30 units are organized into seven thematically linked sections and cover a range of subject matter, from Input/output devices for the disabled to Multimedia and Internet issues. Key features of the Teacher's Book: - exhaustive support for the teacher, with technical help where needed - a photocopiable extra activities section - answer key and tapescripts

Infotech Teacher's Book

On 21 June 1990 a fatal radiological accident occurred at an industrial irradiation facility at Soreq, Israel. An operator entered the irradiation room by circumventing safety systems and was acutely exposed, with an estimated whole body dose of 10-20 Gy. The accident, like earlier accidents at similar irradiators, was the consequence of the contravention of operating procedures. An IAEA review team investigated the causes of the accident. This report presents its findings and recommendations and describes the clinical management of the patient, particularly of the haematological phase. The medical treatment included the use of emerging therapies with haematopoietic growth factor drugs which may rescue the overexposed patient, albeit in this case only temporarily. The report is intended for regulatory authorities responsible for the regulation and inspection of irradiators, operating organizations and physicians who may need to treat overexposed patients.

Understanding Models in Earth & Space Science

A Social History of English is the first history of the English language to utilize the techniques, insights and concerns of sociolinguistics. Written in a non-technical way, it takes into account standardization, pidginization, bi- and multilingualism, the issues of language maintenance and language loyalty, and linguistic variation. This new edition has been fully revised. Additions include: * new material about 'New Englishes' across the world * a new chapter entitled 'A Critical Linguistic History of English Texts' * a discussion of problems involved in writing a history of English All terms and concepts are explained as they are introduced, and linguistic examples are chosen for their accessibility and intelligibility to the general reader. It will be of interest to students of Sociolinguistics, English Language, History and Cultural Studies.

The Radiological Accident in Soreq

Learning Qlik® Sense is for anyone seeking to understand and utilize the revolutionary new approach to business intelligence offered by Qlik Sense. Familiarity with the basics of business intelligence will be helpful when picking up this book, but not essential.

A Social History of English

This book considers primate tourism as a primate conservation tool, weighing its effects and developing informed guidelines for ongoing and future tourism ventures.

Learning Qlik® Sense: The Official Guide

The Behavioral Ecology of Callimicos and Tamarins in Northwestern Bolivia offers students a scholarly and relevant study of these rainforest dwellers.

Primate Tourism

This is the third edition of Peter Jarvis' classic textbook, *Adult and Continuing Education*, which established itself as the most widely used and respected book about education for adults today. In this new edition, the author has made extensive revisions and included substantial additional material to take account of the many changes that have occurred in the field of adult education. Additional and updated material in this much-anticipated new edition includes: a discussion on both globalisation and Europeanisation, indicating the pressures that have been exerted on the educational system to change a greater emphasis on lifelong education, lifelong learning and society an extended discussion on the theorists of distance education and introductory material on e-learning and on-line learning an updated look at changes in UK policy and European policy documents new material on the relationship between research, learning and the changing approaches to knowledge, with more emphasis placed on action learning and research.

The Behavioral Ecology of Callimicos and Tamarins in Northwestern Bolivia

What can be done to ensure universities are well positioned to meet the challenges of the fast moving world of the 21st century? This is the central question addressed by Burton R. Clark in this significant new volume which greatly extends the case studies and concepts presented in his 1998 book, *Creating Entrepreneurial Universities*. The new volume draws on case studies of fourteen proactive institutions in the UK, Europe, Australia, Latin America, Africa, and the United States that extend analysis into the early years of the twenty-first century. The cumulative international coverage underpins a more fully developed conceptual framework offering insight into ways of initiating and sustaining change in universities. This new conceptual framework shifts attention from transformation to sustainability rooted in a constructed steady state of change and a collegial approach to entrepreneurialism. It contains key elements necessary for universities to adapt successfully to the modern world. Lessons for reform can be drawn directly from both the individual case studies and the general framework. Overall the book offers a new form of university organization that is more self-reliant and manages to combine change with continuity, traditional academic values with new managerial values. Essential reading for university administrators, faculty members, students and researchers analysing higher education, and educational policymakers worldwide, this book advocates a highly proactive approach to university change and specifies a new basis for university self-reliance. Burton R. Clark is Allan M. Cartter Professor Emeritus of Higher Education and Sociology at the University of California, Los Angeles. During his career, he has taught at five leading US universities: Stanford, Harvard, Berkeley, Yale and UCLA. He has published widely on the nature of university organization and the realistic possibilities of reform, linking research for understanding with research for use.

Adult Education and Lifelong Learning

"Written in an academic yet accessible style suitable for college and graduate studies, *Ocean Globe* provides the tools you will need to join marine explorers in their realm of seafloor information." --Book Jacket.

EBOOK: Sustaining Change in Universities

Professional English in Use Medicine contains 60 units covering a wide variety of medical vocabulary. Topics include diseases and symptoms, investigations, treatment, examining and prevention. The book also introduces general medical vocabulary related to parts and functions of the body, medical and para-medical personnel, education and training, research, and presentations. *Professional English in Use Medicine* has been carefully researched using the Institute for Applied Language Studies medical corpus and is a must for teachers of medical English and for medical practitioners who need to use English at work, either in their own country or abroad."--Publisher's website.

Agriculture/2000

In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management.

The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual learning environments/platforms.

Ocean Globe

This book presents the practice and vision of classrooms that operate as learning communities.

Professional English in Use: Medicine

ITIL is a widely adopted body of knowledge and best practices for successful IT Service Management that links with training and certification. ITIL 4 has evolved from the current version by re-shaping much of the established ITSM practices in the wider context of customer experience; value streams and digital transformation; as well as embracing new ways of working, such as Lean, Agile, and DevOps. ITIL 4 provides the guidance organizations need to address new service management challenges and utilize the potential of modern technology. It is designed to ensure a flexible, coordinated and integrated system for the effective governance and management of IT-enabled services. "ITIL Foundation" is the first ITIL 4 publication and the latest evolution of the most widely-adopted guidance for ITSM. Its audience ranges from IT and business students taking their first steps in service management to seasoned professionals familiar with earlier versions of ITIL and other sources of industry best practice. The guidance provided in this publication can be adopted and adapted for all types of organizations and services. To show how the concepts of ITIL can be practically applied to an organization's activities, ITIL Foundation follows the exploits of a fictional company on its ITIL journey.

E-Learning

Dr. William S. Haubrich's curiosity knows no bounds, nor does that of his readers. The overwhelming demand for more histories of yet more words is satisfied in the eagerly awaited second edition of *Medical Meanings: A Glossary of Word Origins*. Here the reader will find not just etymology and explanations of medical terminology but lessons in history and popular culture. They will learn what really ailed John Merrick, a.k.a., the Elephant Man; what odd deformity plagued the House of Hapsburg, rulers of Spain from 1493 to 1780; and what the connection is between fetal alcohol syndrome and Little Orphan Annie. Charming, witty, and a rollicking learning experience, the second edition of *Medical Meanings* is fully updated and revised to include over thirty percent more of the definitions, histories, and amusing anecdotes readers of the first edition so treasured.

Classrooms as Learning Communities

En esta nueva edición de Medicina de urgencias emergencias se llevará a cabo una revisión exhaustiva del contenido, sobre todo en aquellos aspectos relacionados con el diagnóstico y el tratamiento, siempre recogiendo la evidencia más actual. En esta 6a edición vuelve a primar el enfoque práctico ofreciendo a los lectores soluciones a la diversidad de situaciones a las que tienen que hacer frente día tras día los profesionales de urgencias. Sus directores, los doctores Luis Jiménez Murillo y F. Javier Montero Pérez, han contado con la colaboración de especialistas de diversas áreas del Hospital Universitario Reina Sofía de Córdoba, así como con facultativos de urgencias de otros hospitales españoles. Los autores llevan a cabo un enorme esfuerzo de síntesis en esta nueva edición aunque incluyendo todos aquellos aspectos novedosos y fundamentales que convierten a esta obra en una herramienta fundamental para todos los especialistas que trabajan en este área. Entre las novedades de esta nueva edición cabe destacar la inclusión de 6 nuevos capítulos y 5 nuevos casos clínicos, así como el acceso a imágenes a color en la sección de Dermatología. Medicina de urgencias y emergencias se dirige al especialista en Medicina de urgencias y emergencias, tanto de nivel hospitalario como extrahospitalario, así como a los médicos residentes de cualquier especialidad que recalcan en los servicios de urgencias.

Calculators and Computers

This book introduces the concept of a hypothetical type of knowledge construction -- referred to as structural knowledge -- that goes beyond traditional forms of information recall to provide the bases for knowledge application. Assuming that the validity of the concept is accepted, the volume functions as a handbook for supporting the assessment and use of structural knowledge in learning and instructional settings. It's descriptions are direct and short, and its structure is consistent. Almost all of the chapters

describe a technique for representing and assessing structural knowledge acquisition, conveying knowledge structures through direct instruction, or providing learners with strategies that they may use to acquire structural knowledge. These chapters include the following sections in the same sequence:

- * description of the technique and its theoretical or conceptual rationale
- * examples and applications
- * procedures for development and use
- * effectiveness -- learner interactions and differences, and advantages and disadvantages
- * references to the literature.

The chapters are structured to facilitate access to information as well as to illuminate comparisons and contrasts among the techniques.

ITIL Foundation, ITIL

This Safety Requirements publication establishes requirements that support Principle 3 of the Fundamental Safety Principles in relation to establishing, sustaining and continuously improving leadership and management for safety and an integrated management system. It emphasizes that leadership for safety, management for safety, an effective management system and a systemic approach (i.e. an approach in which interactions between technical, human and organizational factors are duly considered) are all essential to the specification and application of adequate safety measures and to the fostering of a strong safety culture. Leadership and an effective management system will integrate safety, health, environmental, security, quality, human-and-organizational factor, societal and economic elements. The management system will ensure the fostering of a strong safety culture, regular assessment of performance and the application of lessons from experience. The publication is intended for use by regulatory bodies, operating organizations (registrants and licensees) and other organizations concerned with facilities and activities that give rise to radiation risks.

Medical Meanings

Introducing the 10th Edition of this standard text covering all aspects of meat hygiene, from the production of clean and healthy animals, to the hygienic processing of meat and meat products, and the avoidance of food-borne hazards. This edition has been fully updated and revised to reflect a more integrated "farm to table" approach, and a more international perspective. Includes new material on BSE, a new section on operational hygiene, and more complete treatment of husbandry and ante-mortem issues.

Medicina de urgencias y emergencias

This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty-first-century, and how those nations have fashioned educational policies and curricula meant to promote those skills. The book examines six countries—Chile, China, India, Mexico, Singapore, and the United States—exploring how each one defines, supports, and cultivates those competencies that students will need in order to succeed in the current century. Teaching and Learning for the Twenty-First Century appears at a time of heightened attention to comparative studies of national education systems, and to international student assessments such as those that have come out of PISA (the Program for International Student Assessment), led by the Organisation for Economic Co-operation and Development. This book's crucial contribution to the burgeoning field of international education arises out of its special attention to first principles—and thus to first questions: As Reimers and Chung explain, "much can be gained by an explicit investigation of the intended purposes of education, in what they attempt to teach students, and in the related questions of why those purposes and how they are achieved." These questions are crucial to education practice and reform at a time when educators (and the students they serve) face unique, pressing challenges. The book's detailed attention to such questions signals its indispensable value for policy makers, scholars, and education leaders today.

Structural Knowledge

Every historical epoch has had its educators whose practical activity and theoretical views exerted a strong influence on the educational philosophy and teaching methods of the time. Many of the pedagogical principles maintained by Jan Komenski and John Locke (17th century), Jean Jacques Rousseau (18th century), Johann Pestalozzi (end 18th - beginning 19th century), Johann Herbart, Friedrich Deisterweg and K. Ushinsky (19th century), are invaluable contributions to the treasure house of world pedagogical thought. The views of these outstanding educators and thinkers determined in considerable measure the development of the theory and practice of education over the course of decades and even centuries. In the middle of the twentieth century the same role is played by the

pedagogical heritage of Anton Makarenko, the Soviet practising educator, theoretician and writer. The name of this remarkable man, who has greatly furthered the development of Soviet pedagogy and practice of communist education, is well known not only in the Soviet Union but also far beyond its boundaries. Makarenko's educational novels *The Road to Life* and *Learning to Live* are read with absorbing interest in different parts of the world. Makarenko's *Problems of Soviet School Education* which is a generalisation of his vast pedagogical experience and which contains profound theoretical conclusions, has long been the bible of Soviet teachers. It is a series of lectures read by Makarenko for the staff of the People's Commissariat of Education, R.S.F.S.R., in January 1938.

Leadership and Management for Safety

A Guide to the Project Management Body of Knowledge (PMBOK[®] Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK[®] Guide. This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK[®] Guide Knowledge Areas, as well as guidance in these additional areas not found in the PMBOK[®] Guide: * All project resources, rather than just human resources * Project health, safety, security, and environmental management * Project financial management, in addition to cost * Management of claims in construction This edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the "what" and "why" of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.

Introduction to Comparative Law

Going into its eighth edition, this book is a classic in the field of educational measurement. It was written from the point of view of the classroom teacher to answer the question, "What does a teacher need to know about the development and evaluation of educational measures and assessments?" This book fosters an understanding of how assessment and instruction are interrelated. It also cultivates learning the techniques and skills needed to develop tests and other evaluation procedures (e.g. portfolios), as well as teaches students to understand how to evaluate the validity and reliability of tests. Unlike many books in educational measurement, this book also gives readers what they need to know to properly interpret the results from standardized achievement and scholastic aptitude tests. Topics include: test reliability and validity; meaning and application of the norms; extraneous factors that influence performance of cognitive tests; the development of educational measures; and more. Teachers, principals, and counselors.

The Spectrum of Teaching Styles

Knowledge society suggests the possibility of institutions and organizations that enable people and information to develop without limits, and that open opportunities for all kinds of knowledge to be mass-produced and mass-utilized throughout the society as a whole. The report notes the understanding of knowledge society often remains erroneous or shallow. At the same time deep transformative currents related to knowledge and its production and dissemination in society promise to change the world as we know it. Understanding this pattern of change will impact on our policy choices with long term consequences. Responsible policy choices are needed for a future where knowledge is secured to support high levels of quality and safety of life for all people everywhere. The report proposes an index of knowledge societies and makes recommendations for governments, political and economic elites, business, civil society, news media and academic communities

Meat Hygiene

Teaching and Learning for the Twenty-First Century
