## Puppy Training

Tender Paws takes a deep dive into the practical benefits of applying therapeutic parenting best practices to dogs in our care. When Wendy Lyons Sunshine got her first puppy—abandoned behind a gas station, struggling with worms and anemia—she was in over her head. As puppy training guides failed to help her with the out-of-control, traumatized bundle of teeth and claws rescue pup, she turned to her work helping world-class child development experts. Could strategies for raising happy, well-adjusted kids transfer to a puppy? As it turns out, yes, they can! From the first try, parenting

wisdom transformed Sunshine's relationship with her challenging little one. Soon enough, Sunshine's view of her puppy shifted from one of adversity to one of compassion and understanding, and she was able to bring patience and therapeutic concepts to meet her dog's needs. When Sunshine reached out to experts, they affirmed that science-based principles used with at-risk children align well with best practices of holistic, positive, and progressive dog handling. Exploring parallels between human and canine research, attachment styles, history of trauma, parenting styles, and her own "inner child" proved a mindful path for pet parenting. Far from a standard dog training manual, *Tender Paws* explicitly applies parenting wisdom and best practices used with special needs kids to a cross-section of scenarios, from recognizing developmental trauma and unmet core needs, to making decisions about appropriate equipment, to responding to difficult behavior, to understanding the parenting style from which we approach our dogs. Sunshine empowers you and your dog by offering: A synthesis of the fields of child development, attachment, trauma, sensory integration, neurobiology, learning, animal behavior, and ethology. A problem-solving framework that makes dog training decisions clearer and behavior frustrations easier to resolve. Parenting wisdom to help your dog move beyond trauma and into wellness. Borrowing the principles of parenting for dogs feels obvious to some people: instinctive and ordinary and inevitable. But that's not true for everyone, especially those of us who had a less than ideal childhood and bear the scars of early harm, loss, trauma, or deprivation. *Tender Paws* provides an interdisciplinary, comprehensive, evidence-based guide for readers who want to honor the needs of—and improve outcomes for—puppies and dogs they care about.

### The Happy Adopted Dog

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice

to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

### Best Friend for Life

From two of the world’s leading authorities on dogs, an imaginative journey into a future of dogs without people What would happen to dogs if humans simply disappeared? Would dogs be able to survive on their own without us? *A Dog’s World* imagines a posthuman future for dogs, revealing how dogs would survive—and possibly even thrive—and explaining how this new and revolutionary perspective can guide how we interact with dogs now. Drawing on biology, ecology, and the latest findings on the lives and behavior of dogs and their wild relatives, Jessica Pierce and Marc Bekoff—two of today’s most innovative thinkers about dogs—explore who dogs might become without direct human intervention into breeding, arranged playdates at the dog park, regular feedings, and veterinary care. Pierce and Bekoff show how dogs are quick learners who are highly adaptable and opportunistic, and they offer compelling evidence that dogs already do survive on their own—and could do so in a world without us. Challenging the notion that dogs would be helpless without their human counterparts, *A Dog’s World* enables us to understand these independent and remarkably intelligent animals on their own terms.

### The Other End of the Leash

In dogs, "many fear-based problems can be overcome by learning how to apply desensitization and counter conditioning. Whether fear of strangers, vacuums, or objects, by identifying triggers and creating a step-by-step plan you [may] improve the quality of your dog's life--and yours"--Amazon.com.

### A Dog's World

Award-winning journalist Jennifer Senior tries to tackle the issue of the effects of children on their parents, isolating and analyzing the many ways in which children reshape their parents' lives, whether it's their marriages, their jobs, their habits, their hobbies, their friendships, or their internal senses of self. She argues that changes in the last half-century have radically altered the roles of today's mothers and fathers, making their mandates at once more complex and far less clear. Recruiting from a wide variety of sources - in history, sociology, economics, psychology, philosophy, and anthropology - she dissects both the timeless strains of parenting and the ones that are brand new, and then brings her research to life in the homes of ordinary parents around the country. The result is an unforgettable series of family portraits, starting with parents of young children and progressing to parents of teens. Through lively and accessible storytelling, Senior follows these mothers and fathers as they wrestle with some of parenthood's deepest vexations - and luxuriate in some of its finest rewards. *All Joy and No Fun* makes us reconsider some of our culture's most basic beliefs about parenthood, all while illuminating the profound ways children deepen and add purpose to our lives. *All Joy and No Fun* is original and essential reading for mothers and fathers of today - and tomorrow.

### The Cautious Canine

Dog is a cat- the only problem is that he doesn't behave like one! Instead he wags his tail, sticks out his tongue and yaps in a manner which is distinctly puppyish. Something has to be done! The pride of cats is at stake - the shame of an entire species a consequence of allowing a feline to behave in such a disgraceful canine manner.

### Stand Up For Yourself Without Getting Fired

A triumphant tale of a young woman and her difficult childhood, The Glass Castle is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.

### Ask a Manager

'I couldn't put this book down. Whip smart, hilariously funny and shocking. A must-read' Amy Chua, Yale Law Professor and author of Battle Hymn of the Tiger Mother In 2009, Lenora Chu, her husband Rob, and toddler Rainey, moved from LA to the Chinese megacity Shanghai. The US economy was spinning circles, while China seemed to be eating the planet's economic lunch. What's more, Shanghai teenagers were top in the world at maths, reading and science. China was not only muscling the rest of the world onto the sidelines, but it was also out-educating the West. So when Rainey was given the opportunity to enroll in Shanghai's most elite public kindergarten, Lenora and Rob grabbed it. Noticing her rambunctious son's rapid transformation - increasingly disciplined and obedient but more anxious and fearful - Lenora begins to question the system. What the teachers were accomplishing was indisputable, but what to make of their methods? Are Chinese children paying a price for their obedience and the promise of future academic prowess? How much discipline is too much? And is the Chinese education system really what the West should measure itself against? While Rainey was at school, Lenora embarked on a reporting mission to answer these questions in a larger context. Through a combination of the personal narratives and thoughts of teachers, parents, administrators and school children, Little Soldiers unpacks the story of education in China.

### The Glass Castle

Sometimes it feels as though everybody has an opinion on how you should bring up your child – and no two people seem to agree on how it should be done for the best! Parenting with Reason cuts through the masses of confusing and often contradictory advice about parenting by providing hard evidence to back up the tough decisions all parents face. Unlike many self-help guides to parenting which are based on the opinion of one author, this book is based on many findings from scientific research, giving you a trustworthy, 'evidence-based' guide to help see your way through parenting dilemmas. Written by a clinical psychologist, a developmental psychologist and a doctor of family medicine, the book looks at pressing questions such as: 'What should I do when my child acts up?', 'How can I get my baby to sleep through the night?' and 'How do I begin to toilet-train my child?' The authors, who are also parents themselves, debunk common myths about parenting, such as the notion that a healthy baby needs to be able to breastfeed at will throughout the night, or the idea that children who are adopted need specialized counselling. They also cover issues such as how children might be affected by seeing

violence on television, how a parent's psychological health can affect their child, what the scientific evidence is for and against circumcision, and how divorce and adoption affect a child's development. The end of each chapter gives you 'The Bottom Line', a handy summary of the key points of each issue. This book is ideal for new or prospective parents, and paediatricians, family health providers and anyone who works with children and their parents will also find the book's objective, scientific approach useful in their work.

In addition to the deaths of loved ones, such losses can also include divorce, estrangement, illness, relocation, job changes, and more. Our minds and hearts have enough trouble coping with a single loss, so when the losses pile up, the grief often seems especially chaotic and defeating.
