Tell The Wind And Fire

“Sarah Rees Brennan writes with fine control and wit, and I suspect that word of this magical thriller will pass through the populace with the energy of wind, of fire.” —Gregory Maguire, author of *Wicked and Egg* and *Spoon* In a city divided between opulent luxury in the Light and fierce privations in the Dark, a determined young woman survives by guarding her secrets. Lucie Manette was born in the Dark half of the city, but careful manipulations won her a home in the Light, celebrity status, and a rich, loving boyfriend. Now she just wants to keep her head down, but her boyfriend has a dark secret of his own—one involving an apparent stranger who is destitute and despised. Lucie alone knows the young men's deadly connection, and even as the knowledge leads her to make a grave mistake, she can trust no one with the truth. Blood and secrets alike spill out when revolution erupts. With both halves of the city burning, and mercy nowhere to be found, can Lucie save either boy—or herself? Celebrated author Sarah Rees Brennan weaves a magical tale of romance and revolution, love and loss.

Tell the Wind and Fire

From New York Times bestseller Sarah Rees Brennan comes a magic-infused tale of romance and revolution, love and loss.

Firesong

The final part of the Wind on Fire trilogy, read by the author.

My Life with Earth, Wind & Fire

Foreword by Steve Harvey and afterword by David Foster The Grammy-winning founder of the legendary pop/R&B/soul/funk/disco group tells his story and charts the rise of his legendary band in this sincere memoir that captures the heart and soul of an artist whose groundbreaking sound continues to influence music today. With its dynamic horns, contrasting vocals, and vivid stage shows, Earth, Wind & Fire was one of the most popular acts of the late twentieth century—the band “that changed the sound of black pop” (Rolling Stone)—and its music continues to inspire modern artists including Usher, Jay-Z, Cee-Lo Green, and Outkast. At last, the band's founder, Maurice White, shares the story of his success. Now in his seventies, White reflects on the great blessings music has brought to his life and the struggles he's endured: his mother leaving him behind in Memphis when he was four; learning to play the drums with Booker T. Jones; moving to Chicago at eighteen and later Los Angeles after

leaving the Ramsey Lewis Trio; forming EWF, only to have the original group fall apart; working with Barbra Streisand and Neil Diamond; his diagnosis of Parkinson's; and his final public performance with the group at the 2006 Grammy Awards. Through it all, White credits his faith for his amazing success and guidance in overcoming his many challenges. *Keep Your Head to the Sky* is an intimate, moving, and beautiful memoir from a man whose creativity and determination carried him to great success, and whose faith enabled him to savor every moment.

The Wind Singer

The first book in William Nicholson's award-winning fantasy adventure series, perfect for fans of Philip Pullman, *Mortal Engines* and *Star Wars*. In the walled city state of Aramanth, rules are everything. When Kestrel Hath dares to rebel, the Chief Examiner humiliates her father and sentences the whole family to the harshest punishment. Desperate to save them, Kestrel learns the secret of the wind singer, and she and her twin brother, Bowman, set out on a terrifying journey to the true source of evil that grips Aramanth...

Earth, Wind & Fire

Alex Connor and Greg Farris are investigative journalists on holiday in Jamaica for a romantic break. Their tranquility is shattered by the discovery of a skeleton in a wreck of a light aircraft. From then on, this confident and raunchy thriller never lets off, combining car chases, drug smuggling, hurricanes and plenty of sex.

Ice, Wind and Fire

Sequel to the Smarties Award-winning title, *The Wind Singer*, read by the author.

Slaves of the Mastery

If ceramics, glass, and metals are inextricably linked to earth and fire, textiles are arguably linked with wind and water. In truth, craft practices are all deeply connected to the elements and to nature. Seven distinguished writers and thinkers living in the Nordic region endeavor to flesh out concepts such as material interaction and material agency, Posthumanism, site-responsiveness, and symbiotic thinking in the field of crafts. How do artists explore the potential of materials and the four natural elements? What does a human-material interaction look like, and how might one approach a material, not from the position of a master but from that of master but from that of a collaborator?

Earth, Wind, Fire, Water

The author wrote a series of stories that tell about the good times, fun times, bad times and sad times that happened during the 1920's through the mid 1940's to a family living on a farm in Arkansas. It tells how Wind, Fire, and other events caused a major change in their way of life and how they survived. The author also included some stories that could have happened, but are products of his creative mind.

Wind and Fire

In the year 2036, much farmland has been lost due to higher temperatures; coastal flooding has uprooted thousands of families, creating 'the displaced'; environmental movements have become radicalized; and climate change has become the central topic in the presidential election. There are many issues, and the US is crying out for a leader who will give them hope. Dana Stein has created an exciting story line that weaves its way through the lives of a displaced farmer, a National Security Council staffer, and a college professor. Will these three individuals be able to come up with a plan to reverse the severe damage to the globe? Is it too late to squelch the Fire in the Wind?

Fire in the Wind

Today's world demands an integrated attitude and vision toward all of life--an approach embraced and enhanced by the contributors to *Earth, Wind, and Fire*. In this scholarly and passionate work members of the Feminist Hermeneutics Task Force of the Catholic Biblical Association orchestrate an approach to understanding a feminist model of creation that is faithful to biblical tradition and celebrates the rich diversity of all creation. Inviting conversation between Bible and theology, feminist scholars and theologians, the contributing writers explore themes such as the significance of embodiment, the

integrity of creation, the interconnectedness of humanity with other creatures, the evolutionary nature of creation, and integral connections between creation and salvation, ecojustice and human liberation. Both detailed and holistic, *Earth, Wind, and Fire* is a compelling, insightful, and reader-friendly approach to the creative artistry of God. Chapters and contributors are: *Creation, Evolution, Revelation, and Redemption: Connections and Intersections* by Carol J. Dempsey, O.P.; *The Priestly Creation Narrative: Goodness and Interdependence* by Alice L. Laffey; *Everyone Called By My Name: Second Isaiah's Use of the Creation Theme* by Joan E. Cook, SC; *Wild, Raging Creativity: Job in the Whirlwind* by Kathleen M. Connor; *Soundings in the New Testament Understandings of Creation* by Barbara E. Bowe, RSCJ; *Sabbath: the Crown of Creation* by Barbara E. McGinn; *Of New Songs and An Open Window*; by Mary Ann Donovan, SC; *Being a New Creation (2 Corinthians 5:17) is Being the Body of Christ: Paul and Feminist Scholars in Dialogue* by Mary Margaret Pazdan, OP; *Creation in the Image of God and Wisdom Christology* by Mary Catherine Hilkert, OP; Also includes a Prologue and Epilogue by Carol J. Dempsey, OP, and Mary Margaret Pazdan, OP, a Bibliography, and Indexes.

Earth, Wind, and Fire

Earth, Wind & Fire has sold some ninety million records and won eight Grammy awards. But while its charismatic founder, Maurice White, and Philip Bailey, one of popular music's greatest voices, are remarkable musical talents, their relentless work ethic exhausted and emotionally gutted the group. Now, Bailey shares the inside story of his professional and spiritual journey, from his origins to the band's meteoric rise to stardom, and from its breakup to its triumphant reinvention. *Shining Star* will mesmerize the supergroup's millions of fans and anyone who loves an inspiring story about what happens when real life exceeds your dreams.

Living Out the Book of Acts

In china, there was an old man who had three grown-up sons. They all lived in the same farmhouse because that was the Chinese way. The old man's wife had died and he wanted his sons to get married. so the two oldest married women from the next village. The new wives wanted to visit their families in the other village but as a condition of leaving one wife must bring back fire wrapped in paper and the other wife must bring back wind wrapped in paper or else they cannot go back and visit their families again. How will they bring back something so impossible?

Shining Star

We might think humans have control over our environment, but Mother Nature has proven us wrong again and again. *Earth, Wind, Fire, and Rain: Real Tales of Temperamental Elements* tells the story of five of America's deadliest natural disasters that were made worse by human error, ignorance, and greed. For example, in the fall of 1871, loggers and farmers chopped trees and burned brush in the vast forest around Peshtigo, Wisconsin. Fire was a tool they believed they could control. But on October 8, 1 million acres burned in the deadliest fire in American history. Later that century, meteorologists mistakenly predicted clearing skies for New York City on March 10, 1888. Then, two devilish storm fronts collided in what was called the Great White Hurricane. The blizzard brought New Yorkers to their knees and unprepared city leaders were powerless to help. Powerless too were the residents of Johnstown, Pennsylvania, on May 31, 1889. A private club of wealthy businessmen owned a dam upriver from Johnstown. The club modified the dam to improve recreation on their private lake, but these changes weakened the structure. When heavy rains fell, the dam burst, flooding Johnstown with 20 million tons of water. Residents of San Francisco had no warning when a massive earthquake struck on April 18, 1906. It toppled buildings, ruptured gas mines and ignited fires. Years of political corruption had underfunded the fire department, leaving it without the equipment or training to quench the inferno, and San Francisco burned. In the 1920s, farmers transformed the dry, windy southern Plains by digging up the buffalo grass and planting millions of acres of wheat. But nature fought back by turning this breadbasket into a Dust Bowl. On April 14, 1935, Black Sunday, a 200-mile cloud of dirt buried fields, livestock, and people. Peoples' choices did not cause these disasters, but they did give the forces of nature an extra nudge. However, tragedy sparked reforms in weather forecasting, soil and forest management, and emergency preparation. But remember—no one can control nature. So be prepared to get out of the way when disaster strikes. This is the tenth book in a series called

Mystery & Mayhem, which features true tales that whet kids' appetites for history by engaging them in genres with proven track records—mystery and adventure. History is made of near misses, unexplained disappearances, unsolved mysteries, and bizarre events that are almost too weird to be true—almost! The Mystery and Mayhem series delves into these tidbits of history to provide kids with a jumping off point into a lifelong habit of appreciating history. The five true tales told within Earth, Wind, Fire, and Rain are paired with maps, photographs, and timelines that lend authenticity and narrative texture to the stories. A glossary and resources page provide the opportunity to practice using essential academic tools. These nonfiction narratives use clear, concise language with compelling plots that both avid and reluctant readers will be drawn to.

Wind & Fire

This volume focuses on a few renewable energy sources, viz. wind energy plus energy from water movement and natural temperature differences that in principle could provide enormous energy resources. Energy from wind has been a rapidly growing source of energy as wind turbines have grown in size and especially as wind turbines have moved offshore. Hydroelectric dams have continued to be used as energy sources particularly in developing countries. Other energy sources using water, including waves and tidal sources, are also discussed in this volume. Finally, the volume discusses differences between deep and surface ocean temperatures plus the extraction of energy from the earth's extremely large energy resource of magma deep below the surface. These latter two energy resources in particular require further development and the current book describes the latest advances coupled with pointing possible paths forward.

Fire and Wind

The Holy Spirit Like You've Never Experienced Him Before Scripture tells us that the Holy Spirit dwells in every believer (Ephesians 1:13). Because of that promise, you have an Advocate in your life to guide, help, counsel, and convict you as you live and grow into deeper spiritual truths. Are you making the most of all the Holy Spirit offers to you? If you yearn to know more about who He is and the powerful ways He can work in your life, Fire and Wind will introduce you to... the different ways the Spirit ministers to you what it means to experience the presence, filling, and power of the Spirit how the Spirit guides and teaches you the spiritual gifts given to you for the benefit of others the inner joy the Spirit makes available to every believer As you welcome the Holy Spirit, He can make everything about Jesus a reality for you today and every day by His constant presence in and through you.

Earth, Wind, Fire, and Rain

Twenty-five years after its first publication, *Young Men and Fire* is read avidly by students of literary nonfiction for its blend of hard-earned research, memoir, and an old man's wisdom. It tells one of the most infamous stories in the history of wildland firefighting: On August 5, 1949, a crew of fifteen of the United States Forest Service's elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. On the ground, they were joined by a local fireguard. Two hours after the jump, all but three of the men were dead or mortally burned. For forty years, Maclean was haunted by these deaths. And for the last years of his life, he struggled to write a book that would put back together the scattered pieces of the Mann Gulch disaster and to give it the dignity of tragedy. The result is both the definitive account of what happened to the Smokejumpers on that remote Montana mountainside in 1949, and the narrative of a writer's quest for meaning in the face of elusive facts and the waning energies of old age.

Wind, Water And Fire: The Other Renewable Energy Resources

The Epic of Karolan is a grand adventure on the scale of J.R.R. Tolkien's *The Lord of the Rings* -- but with a very different style and emphasis. It has the heroism, adventure, and wonder that characterize classic fantasy, but manages without dragons, wizards, or elves. The characters and the world seem much closer to reality than is usual in fantasy. Hurt and weariness, and betrayal fall on the people of Karolan as they fall on us and there are no spells or wizards offering an easy way out. Rain, Wind, and Fire - book three in the epic several pivotal climaxes are reached. The courageous warrior-blacksmith Jonathan, who has repeatedly proved himself willing to die for his ideals of honor and justice, finds he has unwittingly broken his most sacred promise. The young King of Karolan slowly accepts his high position. He works hard to understand how best to aid his people while at the same time coming to terms with the limitations of his power. Yet just as the king, Jonathan, and the war-weary realm of

Karolan itself begin to find their feet, a new threat emerges that may destroy them all. Driven by despair over his broken promise, Jonathan accepts an almost suicidal mission yet one that must be achieved if Karolan is to have a future. Will his despair drain him of the strength and courage that have made him a hero of Karolan? Or will he do the impossible yet again and if so, at what cost? And can the breach of his promise ever be forgiven?

Fire and Wind

The story of Bobbi Gibb's personal journey - from 1964, when she first saw the Boston Marathon and fell in love with it, through 1966, when she became the first woman to run the historic course. As Bobbi trained for the marathon, she was also traveling on a spiritual and philosophical quest, seeking the answers to some of life's biggest questions. Bobbi overcame obstacles, challenged prejudice, and made a difference with tenacity, perseverance and love.

Young Men and Fire

MORE THAN ONE MILLION COPIES SOLD For anyone seeking to live at the center of God's purposes, this well-loved book points the way to new spiritual vitality in the church and in your own life. A classic must-read for readers looking for hope and transformation in the church today, *Fresh Wind, Fresh Fire* shows what the Holy Spirit can do when believers get serious about prayer and the gospel. As this compelling book reveals, God moves in life-changing ways - calling us back from spiritual dead ends, apathy, and lukewarm religion - when we set aside our own agendas, take him at his word, and listen for his voice. Pastor Jim Cymbala knows from personal experience. Back in the early 1970s his own church, the Brooklyn Tabernacle, was a struggling congregation of twenty. Then they began to pray, God began to move, and street-hardened lives by the hundreds were changed with the love of Christ. Today, they are nearly ten thousand strong. In this twentieth anniversary edition, Cymbala updates the classic stories, including that of his own daughter, Chrissy Cymbala Toledo. He talks about how the church has grown and how God helped the church move from its location on Flatbush Avenue to a larger facility that the growing church couldn't "afford" as God continues to dramatically reshape the life stories of so many people who encounter Christ and the power of the gospel. This message of hope and transformation continues. Also available in Spanish, *Fuego vivo, viento fresco*.

Wind in the Fire

On the heels of the successful Lifetime TV version of *Flowers in the Attic* comes the TV movie tie-in edition of *Petals On the Wind*, the second book in the captivating Dollanganger saga. Forbidden love comes into full bloom. For three years they were kept hidden in the eaves of Foxworth Hall, their existence all but denied by a mother who schemed to inherit a fortune. For three years their fate was in the hands of their righteous, merciless grandmother. They had to stay strong...but in their hopeless world, Cathy and her brother Christopher discovered blossoming desires that tumbled into a powerful obsession. Now, with their frail sister Carrie, they have broken free and scraped enough together for three bus tickets and a chance at a new life. The horrors of the attic are behind them...but they will carry its legacy of dark secrets forever.

Earth Water Wind and Fire

Earth, Wind and Fire follows twelve generations of one family, starting with a kidnapped girl in Shelford, Nottinghamshire in the east midlands of England and ending, twelve generations later, in Australia.

Fresh Wind, Fresh Fire

From #1 New York Times bestselling author Jennifer L. Armentrout comes a new novel in her Blood and Ash series... Is Love Stronger Than Vengeance? A Betrayal... Everything Poppy has ever believed in is a lie, including the man she was falling in love with. Thrust among those who see her as a symbol of a monstrous kingdom, she barely knows who she is without the veil of the Maiden. But what she does know is that nothing is as dangerous to her as him. The Dark One. The Prince of Atlantia. He wants her to fight him, and that's one order she's more than happy to obey. He may have taken her, but he will never have her. A Choice.... Casteel Da'Neer is known by many names and many faces. His lies are as seductive as his touch. His truths as sensual as his bite. Poppy knows better than to trust him. He needs her alive, healthy, and whole to achieve his goals. But he's the only way for her to get what she wants—to find her brother Ian and see for herself if he has become a soulless Ascended. Working with Casteel instead of against him presents its own risks. He still tempts her with every breath, offering up all she's ever wanted. Casteel has plans for her. Ones that could expose her to unimaginable pleasure and unfathomable pain. Plans that will force her to look beyond everything she thought she knew about herself—about him. Plans that could bind their lives together in unexpected ways that neither kingdom is prepared for. And she's far too reckless, too hungry, to resist the temptation. A Secret... But unrest has grown in Atlantia as they await the return of their Prince. Whispers of war have become stronger, and Poppy is at the very heart of it all. The King wants to use her to send a message. The Descenders want her dead. The wolveren are growing more unpredictable. And as her abilities to feel pain and emotion begin to grow and strengthen, the Atlantians start to fear her. Dark secrets are at play, ones steeped in the blood-drenched sins of two kingdoms that would do anything to keep the truth hidden. But when the earth begins to shake, and the skies start to bleed, it may already be too late.

The Shadow of the Wind

The scraps of information about St. Luke scattered in the New Testament forms the basis for the fictive life of the author of the Third Gospel and the book, Acts of the Apostles. Although fervid in his belief, The New Way that was later on called Christianity in the year A.D. 40, Lukes whole life was mainly sustained by his calling as a beloved physician. To the very end of his life, Luke remained an active practitioner of medicine. His training in this art, where case histories had to be recorded for each patient probably gave him that polished edge to write with great style. What little is known about Luke comes from his association with St. Paul who was also responsible for baptizing the doctor. By joining Pauls missionary journeys Luke was able to travel through the cities of Asia Minor, and the northern and southern regions of Greece. The climax of his travels with Paul was a trip to Jerusalem accompanied by other Greek disciples. Here in this sacred city Luke received from the apostles the commission to write the early history of The New Way. Of course, he also undertook writing the Third Gospel.

A Kingdom of Flesh and Fire

The Persons of the Godhead are known by familial terms: God the Father, God the Son, and God the Holy Spirit. God the Holy Spirit? What part of the family tree is that? "Father" we understand. The term is full of emotional imprint and real life imagery. "Son" is equally comprehensible. "Spirit," however, leaves us grasping the air in our attempt to relate to Him. How do you hug a spirit? In painting a picture of Himself, the Holy Spirit wasn't content to be cast in singular hues. He has far too many dimensions to His personality for monochromatic expressions to do Him justice. His infiniteness required symbolic language that on the surface appears contradictory but in actuality works to provide us a glimpse of the breadth, length, depth, and height of His Being. Thus, He is wind and cloud, water and fire, oil and lamp, dove and eagle, to name a few. It is through this language of symbol that we are enabled to begin to grapple with the Third Person of the Trinity. How do you hug a spirit? Better to ask how the Spirit hugs you. It is my earnest hope and desire that you feel His embrace as you read this work. Includes illustrations, bibliography, and Scripture index.

Earth, Wind and Fire

Soar makes her literary debut with a book of poems about emotions and love. Using multiple layers of metaphor and simple to complex language, the author renders a soulful presentation of the merging of passion with the eternal universal elements into a final expression of love. As deep forests, energetic rivers, whirling winds, and sun-drenched skies--feelings are depicted in fine detail, following the universal cycle of birth, rise, climax and fall to find rebirth in the light of hope and wisdom. The message of "soul and love" emanating from every page is what the author identifies with, in her long, crystalline "course towards the deep blue sea of eternity" until she finds within herself the gems of the values she has been seeking. A book to read. A book to feel.

The Wild Trees

Hidden away in foggy, uncharted rain forest valleys in Northern California are the largest and tallest organisms the world has ever sustained—the coast redwood trees, *Sequoia sempervirens*. Ninety-six percent of the ancient redwood forests have been destroyed by logging, but the untouched fragments that remain are among the great wonders of nature. The biggest redwoods have trunks up to thirty feet wide and can rise more than thirty-five stories above the ground, forming cathedral-like structures in the air. Until recently, redwoods were thought to be virtually impossible to ascend, and the canopy at the tops of these majestic trees was undiscovered. In *The Wild Trees*, Richard Preston unfolds the spellbinding story of Steve Sillett, Marie Antoine, and the tiny group of daring botanists and amateur naturalists that found a lost world above California, a world that is dangerous, hauntingly beautiful, and unexplored. The canopy voyagers are young—just college students when they start their quest—and they share a passion for these trees, persevering in spite of sometimes crushing personal obstacles and failings. They take big risks, they ignore common wisdom (such as the notion that there's nothing left to discover in North America), and they even make love in hammocks stretched between branches three hundred feet in the air. The deep redwood canopy is a vertical Eden filled with mosses, lichens, spotted salamanders, hanging gardens of ferns, and thickets of huckleberry bushes, all growing out of massive trunk systems that have fused and formed flying buttresses, sometimes carved into blackened chambers, hollowed out by fire, called "fire caves." Thick layers of soil sitting on limbs harbor animal and plant life that is unknown to science. Humans move through the deep canopy suspended on ropes, far out of sight of the ground, knowing that the price of a small mistake can be a plunge to one's death. Preston's account of this amazing world, by turns terrifying, moving, and fascinating, is an adventure story told in novelistic detail by a master of nonfiction narrative. The author shares his protagonists' passion for tall trees, and he mastered the techniques of tall-tree climbing to tell the story in *The Wild Trees*—the story of the fate of the world's most splendid forests and of the imperiled biosphere itself.

Wild Trees

From the #1 bestselling author of "The Hot Zone" comes an amazing account of scientific and spiritual passion for the tallest trees in the world, the startling biosystem of the canopy, and those who are committed to the preservation of this astonishing and largely unknown world.

The Wild Trees

When Steve Sillett was 19 years old, he free-climbed – with no safety equipment and no training – one of the tallest trees on earth, in the redwood forests of Prairie Creek, California. 30 storeys above the ground he glimpsed an undiscovered ecosystem, and his passion for that astonishing world would transform the rest of his life. Over the next twenty years, Sillett and a close group of friends charted this system, discovering mosses and lichen never seen before, and travelling among branches so densely interwoven they form incredible sky-high walkways. There are only twenty people on earth who have climbed the world's tallest trees and who know their location. In writing *The Wild Trees*, Richard Preston not only managed to gain access to this group, but began to climb these hidden giants himself, putting his life in danger in order to understand the powerful connection between the massive trees and the world's last great explorers.

The Wild Trees

Hidden in unseen valleys of dense rainforest on the coast of California are the world's tallest and largest things - trees up to forty stories tall and as old as the Parthenon- the coastal redwoods. Mysterious and unexplored, few people know how to find them, and fewer still have climbed them to study their upper reaches and discover the wonders there. *The Wild Trees* is the astonishing story of the handful of wild tree climbers and amateur naturalists who are now working in the redwood canopy, exploring this enchanted and terrifically dangerous new world. The canopy is a mysterious place filled with hanging gardens of ferns, mosses and lichens, a massive system of aerial trunks that have fused to form walkways, where redwoods begin to grow on other redwoods, 300 feet in the air. *The Wild Trees* is a story of high adventure of the small band of friends, colleagues and lovers committed to finding the secrets hidden in the lost world of the tallest trees on earth.

The Hot Zone

COMING TO NATIONAL GEOGRAPHIC ON 27 MAY 2019 _____ In March 2014, the Ebola outbreak in West Africa was first reported. By October 2014, it had become the largest and deadliest occurrence of the disease. Over 4,500 people have died. Almost 10,000 cases have been reported, across Liberia, Guinea, Sierra Leone, Nigeria and the United States. Impossible to ignore, *The Hot Zone* is the terrifying, true-life account of when this highly infectious virus spread from the rainforests of Africa to the suburbs of Washington, D.C in 1989. A secret SWAT team of soldiers and scientists were quickly tasked with halting the outbreak. And they did. But now, that very same virus is back. And we could be just one wrong move away from a pandemic.

On December 18, 1999, Julia Butterfly Hill's feet touched the ground for the first time in over two years, as she descended from "Luna," a thousand-year-old redwood in Humboldt County, California. Hill had climbed 180 feet up into the tree high on a mountain on December 10, 1997, for what she thought would be a two- to three-week-long "tree-sit." The action was intended to stop Pacific Lumber, a division of the Maxxam Corporation, from the environmentally destructive process of clear-cutting the ancient redwood and the trees around it. The area immediately next to Luna had already been stripped and, because, as many believed, nothing was left to hold the soil to the mountain, a huge part of the hill had slid into the town of Stafford, wiping out many homes. Over the course of what turned into an historic civil action, Hill endured El Nino storms, helicopter harassment, a ten-day siege by company security guards, and the tremendous sorrow brought about by an old-growth forest's destruction. This story--written while she lived on a tiny platform eighteen stories off the ground--is one that only she can tell. Twenty-five-year-old Julia Butterfly Hill never planned to become what some have called her--the Rosa Parks of the environmental movement. She never expected to be honored as one of *Good Housekeeping's* "Most Admired Women of 1998" and *George* magazine's "20 Most Interesting Women in Politics," to be featured in *People* magazine's "25 Most Intriguing People of the Year" issue, or to receive hundreds of letters weekly from young people around the world. Indeed, when she first climbed into Luna, she had no way of knowing the harrowing weather conditions and the attacks on her and her cause. She had no idea of the loneliness she would face or that her feet wouldn't touch ground for more than two years. She couldn't predict the pain of being an eyewitness to the attempted destruction of one of the last ancient redwood forests in the world, nor could she anticipate the immeasurable strength she would gain or the life lessons she would learn from Luna. Although her brave vigil and indomitable spirit have made her a heroine in the eyes of many, Julia's story is a simple, heartening tale of love, conviction, and the profound courage she has summoned to fight for our earth's legacy.

Legacy of Luna

NEW YORK TIMES BESTSELLER • An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013–2014 Ebola epidemic "Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying."—Elizabeth Kolbert, Pulitzer Prize–winning author of *The Sixth Extinction* From the #1 bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end—as the virus mutated into its deadliest form, and spread farther and faster than ever before—30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the pandemic, in which we saw for the first time the specter of Ebola jumping continents, crossing the Atlantic, and infecting people in America. Rich in characters and conflict—physical, emotional, and ethical—*Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who

should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. Crisis in the Red Zone makes clear that the outbreak of 2013–2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. Crisis in the Red Zone is an exquisitely timely book, a stark warning of viral outbreaks to come.

Crisis in the Red Zone

Imagine a killer with the infectiousness of the common cold and power of the Black Death. Imagine something so deadly that it wipes out 90% of those it touches. Imagine an organism against which there is no defence. But you don't need to imagine. Such a killer exists: it is a virus and its name is Ebola. The Hot Zone tells what happens when the unthinkable becomes reality: when a deadly virus, from the rain forests of Africa, crosses continents and infects a monkey house ten miles from the White House. Ebola is that reality. It has the power to decimate the world's population. Try not to panic. It will be back. There is nothing you can do...

Forest Giants of the Pacific Coast

Evidence is mounting that redwood forests, like many other ecosystems, cannot survive as small, isolated fragments in human-altered landscapes. Such fragments lose their diversity over time and, in the case of redwoods, may even lose the ability to grow new, giant trees. The Redwood Forest, written in support of Save-the-Redwood League's master plan, provides scientific guidance for saving the redwood forest by bringing together in a single volume the latest insights from conservation biology along with new information from data-gathering techniques such as GIS and remote sensing. It presents the most current findings on the geologic and cultural history, natural history, ecology, management, and conservation of the flora and fauna of the redwood ecosystem. Leading experts -- including Todd Dawson, Bill Libby, John Sawyer, Steve Sillett, Dale Thornburgh, Hartwell Welch, and many others -- offer a comprehensive account of the redwoods ecosystem, with specific chapters examining: the history of the redwood lineage, from the Triassic Period to the present, along with the recent history of redwoods conservation life history, architecture, genetics, environmental relations, and disturbance regimes of redwoods terrestrial flora and fauna, communities, and ecosystems aquatic ecosystems landscape-scale conservation planning management alternatives relating to forestry, restoration, and recreation. The Redwood Forest offers a case study for ecosystem-level conservation and gives conservation organizations the information, technical tools, and broad perspective they need to evaluate redwood sites and landscapes for conservation. It contains the latest information from ground-breaking research on such topics as redwood canopy communities, the role of fog in sustaining redwood forests, and the function of redwood burls. It also presents sobering lessons from current research on the effects of forestry activities on the sensitive faunas of redwood forests and streams. The key to perpetuating the redwood forest is understanding how it functions; this book represents an important step in establishing such an understanding. It presents a significant body of knowledge in a single volume, and will be a vital resource for conservation scientists, land use planners, policymakers, and anyone involved with conservation of redwoods and other forests.

Panic in Level 4

In February 2003, American astronauts Donald Pettit and Kenneth Bowersox and Russian flight engineer Nikolai Budarin were on a routine fourteen-week mission maintaining the International Space Station. But then the space shuttle Columbia exploded far beneath them. With the launch program suspended indefinitely, these astronauts had suddenly lost their ride back to earth. Out of Orbit chronicles the efforts of the beleaguered mission controls in Houston and Moscow as they worked frantically against the clock, ultimately settling on a plan that felt, at best, like a long shot. Latched to the side of the space station was a Russian-built Soyuz TMA-1 capsule, the rocket equivalent of a 1976 Gremlin. Despite the inherent danger, the Soyuz became the only hope to return Bowersox, Budarin,

and Pettit home. Their harrowing journey back to earth is a powerful reminder that space travel remains an incredibly dangerous pursuit.

Is it possible to drive coast-to-coast without stopping at a single gas pump? Journalist Greg Melville is determined to try. With his college buddy Iggy riding shotgun, this green-thinking guy—who's in love with the idea of free fuel—sets out on an enlightening road trip. The quest: to be the first people to drive cross-country in a french-fry car. Will they make it from Vermont to California in a beat-up 1985 Mercedes diesel station wagon powered on vegetable oil collected from restaurant grease Dumpsters along the way? More important, can two guys survive 192 consecutive hours together? Their expedition on and off the road includes visits to the solar-powered Google headquarters; the National Ethanol Council; the wind turbines of southwestern Minnesota; the National Renewable Energy Lab; a visit to one of the first houses to receive platinum certification for leadership in Energy and Environmental Design (LEED); an "eco-friendly" Wal-Mart; and the world's largest geothermal heating system. Part adventure and part investigation of what we're doing (or not doing) to preserve the planet, Greasy Rider is upbeat, funny, and full of surprising information about sustainable measures that are within our reach.

As an investigative journalist, Monbiot found a mission in his ecological boredom, that of learning what it might take to impose a greater state of harmony between himself and nature. He was not one to romanticize undisturbed, primal landscapes, but rather in his attempts to satisfy his cravings for a richer, more authentic life, he came stumbled into the world of restoration and rewilding. When these concepts were first introduced in 2011, very recently, they focused on releasing captive animals into the wild. Soon the definition expanded to describe the reintroduction of animal and plant species to habitats from which they had been excised. Some people began using it to mean the rehabilitation not just of particular species, but of entire ecosystems: a restoration of wilderness. Rewilding recognizes that nature consists not just of a collection of species but also of their ever-shifting relationships with each other and with the physical environment. Ecologists have shown how the dynamics within communities are affected by even the seemingly minor changes in species assemblages. Predators and large herbivores have transformed entire landscapes, from the nature of the soil to the flow of rivers, the chemistry of the oceans, and the composition of the atmosphere. The complexity of earth systems is seemingly boundless."

Greasy Rider

"Only God can make a tree," wrote Joyce Kilmer in one of the most celebrated of poems. In *Tree: A Life Story*, authors David Suzuki and Wayne Grady extend that celebration in a "biography" of this extraordinary — and extraordinarily important — organism. A story that spans a millennium and includes a cast of millions but focuses on a single tree, a Douglas fir, *Tree* describes in poetic detail the organism's modest origins that begin with a dramatic burst of millions of microscopic grains of pollen. The authors recount the amazing characteristics of the species, how they reproduce and how they receive from and offer nourishment to generations of other plants and animals. The tree's pivotal role in making life possible for the creatures around it — including human beings — is lovingly explored. The richly detailed text and Robert Bateman's original art pay tribute to this ubiquitous organism that is too often taken for granted.

Seven years before Richard Preston wrote about horrifying viruses in *The Hot Zone*, he turned his attention to the cosmos. In *First Light*, he demonstrates his gift for creating an exciting and absorbing narrative around a complex scientific subject--in this case the efforts by astronomers at the Palomar Observatory in the San Gabriel Mountains of California to peer to the farthest edges of space through

the Hale Telescope, attempting to solve the riddle of the creation of the universe. Richard Preston's name became a household word with *The Hot Zone*, which sold nearly 800,000 copies in hardcover, was on *The New York Times*'s bestseller list for 42 weeks, and was the subject of countless magazine and newspaper articles. Preston has become a sought-after commentator on popular science subjects.

"The bard of biological weapons captures the drama of the front lines."—Richard Danzig, former secretary of the navy *The first major bioterror event in the United States—the anthrax attacks in October 2001—was a clarion call for scientists who work with "hot" agents to find ways of protecting civilian populations against biological weapons. In *The Demon in the Freezer*, his first nonfiction book since *The Hot Zone*, a #1 *New York Times* bestseller, Richard Preston takes us into the heart of Usamriid, the United States Army Medical Research Institute of Infectious Diseases at Fort Detrick, Maryland, once the headquarters of the U.S. biological weapons program and now the epicenter of national biodefense. Peter Jahrling, the top scientist at Usamriid, a wry virologist who cut his teeth on Ebola, one of the world's most lethal emerging viruses, has ORCON security clearance that gives him access to top secret information on bioweapons. His most urgent priority is to develop a drug that will take on smallpox—and win. Eradicated from the planet in 1979 in one of the great triumphs of modern science, the smallpox virus now resides, officially, in only two high-security freezers—at the Centers for Disease Control in Atlanta and in Siberia, at a Russian virology institute called Vector. But the demon in the freezer has been set loose. It is almost certain that illegal stocks are in the possession of hostile states, including Iraq and North Korea. Jahrling is haunted by the thought that biologists in secret labs are using genetic engineering to create a new superpox virus, a smallpox resistant to all vaccines. Usamriid went into a state of Delta Alert on September 11 and activated its emergency response teams when the first anthrax letters were opened in New York and Washington, D.C. Preston reports, in unprecedented detail, on the government's response to the attacks and takes us into the ongoing FBI investigation. His story is based on interviews with top-level FBI agents and with Dr. Steven Hatfill. Jahrling is leading a team of scientists doing controversial experiments with live smallpox virus at CDC. Preston takes us into the lab where Jahrling is reawakening smallpox and explains, with cool and devastating precision, what may be at stake if his last bold experiment fails.*

Lab Girl is a book about work and about love, and the mountains that can be moved when those two things come together. It is told through Jahren's remarkable stories: about the discoveries she has made in her lab, as well as her struggle to get there; about her childhood playing in her father's laboratory; about how lab work became a sanctuary for both her heart and her hands; about Bill, the brilliant, wounded man who became her loyal colleague and best friend; about their field trips - sometimes authorised, sometimes very much not - that took them from the Midwest across the USA, to Norway and to Ireland, from the pale skies of North Pole to tropical Hawaii; and about her constant striving to do and be her best, and her unswerving dedication to her life's work. Visceral, intimate, gloriously candid and sometimes extremely funny, Jahren's descriptions of her work, her intense relationship with the plants, seeds and soil she studies, and her insights on nature enliven every page of this thrilling book. In Lab Girl, we see anew the complicated power of the natural world, and the power that can come from facing with bravery and conviction the challenge of discovering who you are.

The Demon in the Freezer

A naturalist and historian for the National Parks Service offers a lively history of the giant sequoias of California and the love of nature they inspired. Former park ranger William C. Tweed takes readers on a tour of some of the world's largest and oldest trees in a narrative that travels deep into the Sierra Nevada mountains, across the American West, and all the way to New Zealand. Along the way, he explores the American public's evolving relationship with sequoias, also known simply and affectionately as Big Trees. It's no surprise that the sequoia groves of Yosemite and Calaveras were early tourist destinations. The species was the embodiment of California's superlative appeal. These giant redwoods were so beloved that special protections efforts sprang up to protect them from logging interests—and so began the notion of National Parks. Later, as science evolved to consider landscapes more holistically, sequoias once again played a major role in shaping this new perspective. Featuring a fascinating cast of adventurers, researchers, politicians, and environmentalists, King Sequoia reveals how one tree species transformed Americans' connection to the natural world.

The Hidden Forest

Once there was a redwood tree—one of the world's largest and tallest trees, and one of the oldest. And once, born nearly a thousand years after the tree first took root, there was a girl named Julia, who was called Butterfly. When exploring her beloved forest, Butterfly wandered into a grove of ancient trees. One tree had broken branches and a big blue "X" on the side. It was going to be chopped down. Butterfly climbed up into the tree. A tree wouldn't be cut down if it had a person living in it. This is the story of Julia Butterfly Hill and Luna, the redwood tree she lived in for two years, never once coming down. That is, not until Luna's future was safe.

WINNER OF THE 2018 JOHN BURROUGHS MEDAL FOR OUTSTANDING NATURAL HISTORY WRITING “Both a love song to trees, an exploration of their biology, and a wonderfully philosophical analysis of their role they play in human history and in modern culture.” —Science Friday The author of *Sounds Wild and Broken* and the Pulitzer Prize finalist *The Forest Unseen* visits with nature’s most magnificent networkers — trees David Haskell has won acclaim for eloquent writing and deep engagement with the natural world. Now, he brings his powers of observation to the biological networks that surround all species, including humans. Haskell repeatedly visits a dozen trees, exploring connections with people, microbes, fungi, and other plants and animals. He takes us to trees in cities (from Manhattan to Jerusalem), forests (Amazonian, North American, and boreal) and areas on the front lines of environmental change (eroding coastlines, burned mountainsides, and war zones.) In each place he shows how human history, ecology, and well-being are intimately intertwined with the lives of trees. Scientific, lyrical, and contemplative, Haskell reveals the biological connections that underpin all life. In a world beset by barriers, he reminds us that life’s substance and beauty emerge from relationship and interdependence.

Driven by an all-consuming passion, the plant hunters traveled around the world, facing challenges at every turn: tropical illnesses, extreme terrain, and dangerous animals. They battled piranhas, tigers, and vampire bats. Even the plants themselves could be lethal! But these intrepid eighteenth- and nineteenth-century explorers were determined to find and collect new and unusual specimens, no matter what the cost. Then they tried to transport the plants—and themselves—home alive. Creating an important legacy in science, medicine, and agriculture, the plant hunters still inspire the scientific and environmental work of contemporary plant enthusiasts. Working from primary sources—journals, letters, and notes from the field—Anita Silvey introduces us to these daring adventurers and scientists. She takes readers into the heart of their expeditions to then-uncharted places such as the Amazon basin, China, and India. As she brings a colorful cast of characters to life, she shows what motivated these Indiana Jones–type heroes. In *The Plant Hunters*, science, history, and adventure have been interwoven to tell a largely forgotten—yet fascinating—story.

Panther Studios is the prize and Lucky wants it ... In her quest for power she meets adversaries and enemies, friends and betrayers. And her relationship with her husband, charismatic comedian and movie star, Lennie Golden is put to the test. Lucky's first challenge is to buy the only movie studio still not controlled by a powerful conglomerate - Panther Studios, owned by the retired, irascible, old Abe Panther. But Abe won't sell his beloved studio to Lucky until she proves she has the guts to make it in Hollywood. It's his idea that she disguise herself as a secretary and go in undercover to find out what's really going on. It's a challenge that also satisfies Lucky's passion for adventure - and her desire to take chances ... In the process, Lucky uncovers a world of financial scheming, big-time betrayal, and bizarre sex. Panther Studios and Lucky Santangelo ... a dangerous mix.

The Plant Hunters

WITH INTRODUCTIONS BY JEANETTE WINTERSON AND GILLIAN BEER *The Waves* is an astonishingly beautiful and poetic novel. It begins with six children playing in a garden by the sea and follows their lives as they grow up and experience friendship, love and grief at the death of their beloved friend Percival. Regarded by many as her greatest work, *The Waves* is also seen as Virginia Woolf's response to the loss of her brother Thoby, who died when he was twenty-six. The Vintage Classics Virginia Woolf series has been curated by Jeanette Winterson, and the texts used are based on the original Hogarth Press editions published by Leonard and Virginia Woolf.

An urgent and illuminating portrait of forest migration, and of the people studying the forests of the past, protecting the forests of the present, and planting the forests of the future. Forests are restless. Any time a tree dies or a new one sprouts, the forest that includes it has shifted. When new trees sprout in the same direction, the whole forest begins to migrate, sometimes at astonishing rates. Today, however, an array of obstacles—humans felling trees by the billions, invasive pests transported through global trade—threaten to overwhelm these vital movements. Worst of all, the climate is changing faster than ever before, and forests are struggling to keep up. A deft blend of science reporting and travel writing,

The Journeys of Trees explores the evolving movements of forests by focusing on five trees: giant sequoia, ash, black spruce, Florida torreya, and Monterey pine. Journalist Zach St. George visits these trees in forests across continents, finding sequoias losing their needles in California, fossil records showing the paths of ancient forests in Alaska, domesticated pines in New Zealand, and tender new sprouts of blight-resistant American chestnuts in New Hampshire. Everywhere he goes, St. George meets lively people on conservation's front lines, from an ecologist studying droughts to an evolutionary evangelist with plans to save a dying species. He treks through the woods with activists, biologists, and foresters, each with their own role to play in the fight for the uncertain future of our environment. An eye-opening investigation into forest migration past and present, The Journeys of Trees examines how we can all help our trees, and our planet, survive and thrive.

CLOUD ATLAS, David Mitchell's bestselling Man Booker Prize-shortlisted novel which was also one of Richard & Judy's 100 Books of the Decade, has now been adapted for film. In this enhanced edition you can read the original novel along with a new essay by David Mitchell about the transformation of his novel into a film, and watch four exclusive videos about the book and film. The major motion picture, directed by Lana Wachowski, Tom Tykwer, and Andy Wachowski, stars Tom Hanks, Halle Berry, Susan Sarandon, Jim Sturgess, Ben Whishaw, Jim Broadbent, Hugo Weaving, Doona Bae, James D'Arcy, Zhou Xun, Keith David and Hugh Grant. The novel features six characters in interlocking stories, each interrupting the one before it: a reluctant voyager crossing the Pacific in 1850; a disinherited composer blagging a precarious livelihood in between-the-wars Belgium; a high-minded journalist in Governor Reagan's California; a vanity publisher fleeing his gangland creditors; a genetically modified dinery server on death-row; and Zachry, a young Pacific islander witnessing the nightfall of science and civilisation. The narrators of CLOUD ATLAS hear each other's echoes down the corridor of history and their destinies are changed in ways great and small. Mitchell's other novels are GHOSTWRITTEN, NUMBER9DREAM, BLACK SWAN GREEN and A THOUSAND AUTUMNS OF JACOB DE ZOET, all published by Sceptre. www.sceptrebooks.com Facebook: Sceptre Books Twitter: SceptreBooks

The Journeys of Trees: A Story about Forests, People, and the Future

Fleeing to a backwoods town after a devastating tragedy, once-famous Irish film director Rill Pierce shares an intimate night with his best friend's sister, Katie Hughes, and embarks on a relationship with a potential to both heal and destroy him. 'Roger Deakin is the perfect companion for an invigorating armchair swim. Engaging, thoughtful and candid' Telegraph Waterlog celebrates the magic of water and the beauty and eccentricity of Britain. In 1996 Roger Deakin, the late, great nature writer, set out to swim through the British Isles. From the sea, from rock pools, from rivers and streams, tarns, lakes, lochs, ponds, lidos, swimming pools and spas, from fens, dykes, moats, aqueducts, waterfalls, flooded quarries, even canals, Deakin gains a fascinating perspective on modern Britain. Detained by water bailiffs in Winchester, intercepted in the Fowey estuary by coastguards, mistaken for a suicide on Camber sands, confronting the Corryvreckan whirlpool in the Hebrides, he discovers just how much of an outsider the native swimmer is to his landlocked, fully-dressed fellow citizens. This is a personal journey, a bold assertion of the native swimmer's right to roam, and an unforgettable celebration of the magic of water.

This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class

Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

Full-time FindingJoy.net blogger, speaker, marketer, podcaster, and single mom of seven, Rachel Marie Martin presents a rallying cry to anyone who believes the lie that she is "just a mom." Over the years, you willingly pour everything you have into your family, but in the process, you lose the essence of who you are. In her characteristic raw and visceral style, Rachel teaches you how to rewrite the pages of your story, follow your passion, and discover the beauty of who you are. Drawing on lessons from her own incredible journey--together with insight from conversations with thousands of other women--Rachel encourages moms to break cycles, take off masks, and prevent fear from taking control. She balances her "no excuses" approach with breathing room and grace for those messy moments in life and mothering. Rachel reminds you there is always a reason to hope, to move forward, and to dare the impossible. You can make changes. You can pursue dreams, find yourself, and live a life of deep happiness and boundless joy. Stop waiting for "someday." Take hold of the moment, and say yes to your dreams.

Explore a fantastical forest in this exquisite and lyrical picture book that celebrates all trees, from maple to elm to ginkgo to magnolia to redwood—written by award-winning author Tony Johnston. Part poetry, part celebration of nature, each page of this stunning book brings readers deeper into the majestic world of trees. Old trees. Trees with shiny leaves shimmering after rain. And at night, trees holding out their limbs for the stars. Debut illustrator Tiffany Bozic created her striking artwork by painting directly on tree bark and the authenticity shines through in this meditative work.

The Horses Rejoice

The second book in The Horses Know Trilogy, The Horses Rejoice is a novel for horse lovers who know there is more to horses than meets the eye.

The Horses Know

"The human race has almost destroyed itself and those who remain know that they must avoid repeating the mistakes of their ancestors. But it's extremely difficult. Without horses, it would be impossible. Amarilla is one of those chosen by a horse as a Bond-Partner. She looks forward to a lifetime of learning from her horse and of passing on the mare's wisdom to those seeking help. But then she discovers that she is the one for whom the horses have all been waiting. The one who can help them in return. In order to give the horses the help they need, Amarilla will have to achieve that which has never been attempted before. Only her beloved mare can give her the motivation, the courage and the strength to believe she can succeed. If she does, a new era will dawn for horses and humans alike..." - author's website.

From A Spark Comes A Flame: A Spin Off Novella from The Horses Know Trilogy

From A Spark Comes A Flame is a spin off novella from The Horses Rejoice (book two of The Horses Know trilogy).

Horses Forever

Horses Forever is the sequel to The Horses Know Trilogy.

Farewell to the Horse

THE SUNDAY TIMES HISTORY BOOK OF THE YEAR 2017 'A beautiful and thoughtful exploration of the role of the horse in creating our world' James Rebanks 'Scintillating, exhilarating ... you have never read a book like it ... a new way of considering history' Observer The relationship between horses and humans is an ancient, profound and complex one. For millennia horses provided the strength and speed that humans lacked. How we travelled, farmed and fought was dictated by the needs of this extraordinary animal. And then, suddenly, in the 20th century the links were broken and the millions of horses that shared our existence almost vanished, eking out a marginal existence on race-tracks and pony clubs. Farewell to the Horse is an engaging, brilliantly written and moving discussion of what horses once meant to us. Cities, farmland, entire industries were once shaped as much by the needs of horses as humans. The intervention of horses was fundamental in countless historical events. They were sculpted, painted, cherished, admired; they were thrashed, abused and exposed to terrible danger. From the Roman Empire to the Napoleonic Empire every world-conqueror needed to be shown on a horse. Tolstoy once reckoned that he had cumulatively spent some nine years of his life on horseback. Ulrich Raulff's book, a bestseller in Germany, is a superb monument to the endlessly various creature who has so often shared and shaped our fate.

If Not for the Horses

A young boy and his family are uprooted from their farm in free Lithuania, forcibly resettled in another country by Adolf Hitler, and then uprooted again by the advances of Stalins Russian Army. After being shuttled back and forth between the two dictators, he and his family plan and orchestrate their escape via covered wagon while under siege. All the while the youngster, Joe Klemm, does not lose his optimism and love of life. This narrative vividly describes his story of survival and flight to the west, his life in West Germany, his immigration to America, and finally how he returned to Germany as a tank driver with the U.S. Army. The theme, life is great permeates this narrative.

Sonrise Stable

With the excitement of summer camps over, Rosie and Carrie work to get their horses in shape for the state 4-H competitive trail ride. The girls are surprised to learn that Abigail, the arrogant new boarder at Sonrise Stable, is also entered in the race. Can Scamper and Zach keep up with her flashy Arabian? How much is Rosie willing to risk in order to beat Abigail and win the competition?

An illuminating look at the story behind the success of one of the best dressage riders in the world. German Olympian Isabell Werth has six Olympic gold medals and scores of championship titles to her name—there are few her equal on paper. But an equestrian's success is wholly dependent on the relationship she has with her athletic partner her horse and Werth's astounding accomplishments would not have been possible without her unique approach to working with the animals she's loved since childhood. Even as a little girl, growing up on a farm on the Lower Rhine, it was clear that Werth possessed an extraordinary gift for empathizing with horses and foreseeing how they were likely to react in certain situations. This insight gave her a special ability as a rider and trainer. Here, Werth collaborates with accomplished sports journalist Evi Simeoni someone who has witnessed and written about her career from the very beginning to tell her life story. Readers will get the inside scoop when it comes to Werth's accomplishments and her failures, too. They'll hear her personal thoughts regarding some of the biggest controversies to rock the dressage world: Rollkur and Totilas. Perhaps most importantly, they'll learn about each of the sensitive and talented horses that has impacted Werth's life, including Gigolo, Satchmo, and Bella Rose. There is a meme that is popular in the riding community that says, "Two legs move our body, four legs move our soul." It is this sentiment that Werth feels perhaps best defines her.

Four Legs Move My Soul

Unbreakable bonds. Thrilling equine emergencies. Heartwarming triumphs. In the eagerly anticipated third installment of "The Adventures of the Horse Doctor's Husband" series, readers embark on another thrilling journey through the exceptional world of equine emergencies. This collection of captivating short stories will immerse you in a whirlwind of heartwarming triumphs and poignant moments that reflect the unbreakable bond between humans and horses. Within these pages, you'll find yourself transported to the bustling rural landscapes where the horse doctor and her devoted husband tirelessly respond to the urgent calls that summon them to the aid of injured, ailing, and distressed equines. With every story based on real-life events, the authenticity of these remarkable tales is palpable, capturing the essence of both the horse lover's passion and the indomitable spirit of these magnificent creatures. From comedic escapades involving mischievous foals to a truck full of excited kids and their horse, the series' trademark humor will leave you chuckling and shaking your head in disbelief. While most are fun, a few are intense or even sad, but each story explores the breadth and depth of the human-animal connection. Like life, this can be a complicated thing, filled with nuance and emotion. The Adventures of the Horse Doctor's Husband 3 is a testament to the enduring power of love, compassion, and the extraordinary experiences that await those who devote themselves to the welfare of animals. Whether you're a dedicated equestrian, an animal lover, or simply in search of fascinating tales inspired by real-life events, this book is sure to warm your heart and ignite your imagination.

Adventures of the Horse Doctor's Husband 3

In the spirit of Nicholas Sparks comes If Wishes Were Horses. Author Robert Barclay has crafted a deeply moving story of love, hope, and forgiveness, as two damaged souls torn apart by a common tragedy slowly find a way to heal. Destined to be a much-beloved classic on a par with Robert James Waller's The Bridges of Madison County, Barclay's If Wishes Were Horses is a story rich in emotion that will touch the heart of every reader who fervently believes in second chances at love.

If Wishes Were Horses

A Collection of True Tales of Animal Empathy and Altruism that will Inspire Us to Reflect on Our Own Human Nature What do stories about humpback whales protecting a biologist from a shark, a pride of lions rescuing a girl from kidnappers, gorillas working together to dismantle poacher snares, a parrot warding off an attacker in a park, a chimpanzee consoling a human, and an elephant trying to rescue a baby rhino tell us about animal nature? And what might they suggest about our very own human nature? Until just a few decades ago, there were only a few animals reported to behave empathetically and altruistically. More recently, the list of species who have been observed behaving in compassionate, helpful, and caring ways has grown exponentially, ranging from rats to elephants. Rescued by a Whale presents dozens of astonishing and heart-warming stories about animals, such as chickens, horses, dolphins, and wolves, who engage in acts of helpful kindness. During a time in history when studies show that human empathy is decreasing, our knowledge about animal empathy is increasing. These true tales of heroism, kindness, and compassion suggest that we have far more in common with other animals than we once believed and provocatively suggest that what's best about our human natures just might be our animal natures.

When Animals Rescue

Set in Europe in 4372 B.C., this is the story of the clash between bands of marauding nomads and the peaceful culture already in place.

The Year the Horses Came

Join Rosie as she learns about life, horses, and God from her grandmother and the horses they love. "Oh, Jet, you're the most beautiful pony in the world." Rosie put her hands on each side of Jet's head and gave the pony a kiss on her velvety muzzle. Jet nodded her head as if agreeing with Rosie. Grandma unlatched the stall door and led the pony out. "She certainly is. She's even prettier than her mother, Ebony, was. You remember Ebony was your mother's pony when she was a little older than you, Rosie. Ebony taught your mom to ride, just like Jet is teaching you. After your mom and aunt, Julie, outgrew her, many of my students learned to ride on Ebony." "Well, I'm never going to outgrow Jet. I'm going to ride her until I'm really old, like you, Grandma." "Rosie and Scamper" is a story of family, friendship, horses, and a great God who works all things in our lives for good. My love of horses began when a teenage neighbor offered me my first ride, on the back of her horse. From my 8-year-old perspective, it seemed like the biggest horse in the world. From that moment on, I was addicted. Horses were to become a very important part of my life, although I never could have imagined, at the time, how much God would teach me about Himself and my relationship to Him through these wonderful animals. www.sonrisestable.com

The Strength Of Oak

The Horses Return is the last book in The Horses Know Trilogy. It is for horse lovers who know there is more to horses than meets the eye.

The Horses of the Sahara and the Manners of the Desert

A horse of her own would be awesome. But Kate figures that might be a long way away, especially since she had to give up riding lessons and move to her late grandfather's farm. Besides, it would be a lot more fun to have a best friend to ride with. When Kate discovers a barn on their new farm that's perfect for a horse, and a dusty bridle too, she starts to think that her dream might come true. Then she meets Tori at school, who is totally the best. So when they discover a thoroughbred that appears to be all alone, could it be the answer to her prayers? Maybe. If she can convince her dad ... and figure out what's going on with that horse.

The Horses Return

From the creative team behind the bestselling, Caldecott Medal--winning *Finding Winnie* comes an extraordinary wartime adventure seen through the eyes of the world's most beloved bear. Here is a heartwarming imagining of the real journey undertaken by the extraordinary bear who inspired Winnie-the-Pooh. From her early days with her mama in the Canadian forest, to her remarkable travels with the Veterinary Corps across the country and overseas, and all the way to the London Zoo where she met Christopher Robin Milne and inspired the creation of the world's most famous bear, Winnie is on a great war adventure. This beautifully told story is a triumphant blending of deep research and magnificent imagination. Infused with Sophie Blackall's irresistible renderings of an endearing bear, the book is also woven through with entries from Captain Harry Colebourn's real wartime diaries and contains a selection of artifacts from the Colebourn Family Archives. The result is a one-of-a-kind exploration into the realities of war, the meaning of courage, and the indelible power of friendship, all told through the historic adventures of one extraordinary bear.

A Horse for Kate

Is the internet really transforming children and young people's lives? Is the so-called 'digital generation' genuinely benefiting from exciting new opportunities? And, worryingly, facing new risks? This major new book by a leading researcher addresses these pressing questions. It deliberately avoids a techno-celebratory approach and, instead, interprets children's everyday practices of internet use in relation to the complex and changing historical and cultural conditions of childhood in late modernity. Uniquely, *Children and the Internet* reveals the complex dynamic between online opportunities and online risks, exploring this in relation to much debated issues such as: Digital in/exclusion Learning and literacy Peer networking and privacy Civic participation Risk and harm Drawing on current theories of identity, development, education and participation, this book includes a refreshingly critical account of the challenging realities undermining the great expectations held out for the internet - from governments, teachers, parents and children themselves. It concludes with a forward-looking framework for policy and regulation designed to advance children's rights to expression, connection and play online as well as offline.

Winnie's Great War

The Book of Thel is a poem by William Blake, dated 1789 and probably composed in the period 1788 to 1790. It is illustrated by his own plates, and is relatively short and easy to understand, compared to his later prophetic books. The metre is a fourteen-syllable line. It was preceded by *Tiriel*, which Blake left in manuscript. A few lines from *Tiriel* were incorporated into *The Book of Thel*. Most of the poem is in unrhymed verse. This book consists of eight plates executed in illuminated printing. Sixteen copies of the original print of 1789-1793 are known. Three copies bearing a watermark of 1815 are more elaborately colored than the others. William Blake (1757 – 1827) was a British poet, painter, visionary mystic, and engraver, who illustrated and printed his own books. Blake proclaimed the supremacy of the imagination over the rationalism and materialism of the 18th-century. Largely unrecognised during his lifetime, Blake is now considered a seminal figure in the history of both the poetry and visual arts of the Romantic Age.

Children and the Internet

"Ellie believes that she will live in her little village on the coast of Nova Scotia for always. But when her father gets a job on Sable Island, she must say farewell to her beloved home and her mother's final resting place. Not even the idea of seeing the wild horses that roam the island can ease her pain of leaving. And after arriving on the sandy, windswept crescent of land, Ellie feels adrift and alone ... until

one afternoon when she awakens on a dune to find herself looking into the curious eyes of a wild stallion. Little by little, as the days pass, Ellie gets closer to the beautiful chocolate-colored horse. Yet she soon discovers something that could take him away from his home, his herd, and her. Ellie has lost too much already. Will she lose her island horse, too?"--P. [2] of cover.

A Reason To Be Noble: A Prequel to The Horses Know Trilogy

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

Wild Horses

Untamable. Damaged. Angry. Once full of promise and life, now a fiery knot of resentment and detachment. This is the story of Dream of Night, an injured and abused racehorse. It's also the story of Shiloh, a sarcastic eleven-year-old foster child. By chance, Dream of Night and Shiloh both find themselves under the care of Jessalyn DiLima. Just in time—it's a last chance for them both. Jess fosters animals and kids like Dream of Night and Shiloh for a reason—she's a little broken, too. And as the three of them become an unlikely family, they recognize their similarities in order to heal their pasts—but not before one last tragedy threatens to take everything away.

As Charles Darwin suggested more than a century ago, the differences between animals and humans are "of degree and not of kind." Not long ago, ethologists denied that animals had emotions or true intelligence. Now, we know that rats laugh when tickled, magpies mourn as they cover the departed with greenery, female whales travel thousands of miles for annual reunions with their gal pals, seals navigate by the stars, bears hum when happy, and crows slide down snowy rooftops for fun. In engaging text, photographs, and infographics, *Inside Animal Hearts and Minds* showcases fascinating and heart-warming examples of animal emotion and cognition that will foster wonder and empathy. Learn about an orangutan who does "macramé," monkeys that understand the concept of money, and rats that choose friendship over food. Even language, math, and logic are no longer exclusive to humans. Prairie dogs have their own complex vocabularies to describe human intruders, parrots name their chicks, sea lions appear capable of deductive thinking akin to a ten-year-old child's, and bears, lemurs, parrots, and other animals demonstrate numerical cognition. In a world where a growing body of scientific research is closing the gap between the human and non-human, *Inside Animal Hearts and Minds* invites us to change the way we view animals, the world, and our place in it.

The Origin of Consciousness in the Breakdown of the Bicameral Mind

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Inside Animal Hearts and Minds

Seventeen-year-old Rema lives in a brutal kingdom where travel between regions is forbidden, people are starving, and looking at someone the wrong way can mean death. Nineteen-year-old Darmik is the king's son and Commander of the King's Army. He spends his days roaming the island, doing his father's bidding and trying to maintain control over the people. When a chance encounter throws Rema and Darmik together, they share an instantaneous connection, but any sort of relationship between them is strictly forbidden. Darmik's brother, the Crown Prince, notices Darmik's interest in Rema and, in a calculated, political move, blackmails her. Faced with an impossible choice, Rema is forced to sacrifice her heart in order to save her family. As Rema is taken to the palace with the Crown Prince, Darmik confronts the growing rumor that a legitimate blood heir to the throne exists and is trying to overthrow Darmik's family. In Darmik's quest to hunt down and kill the threat, he discovers that nothing is as it seems. Locked in the king's castle, Rema finds herself a key player in a massive power struggle. When Darmik shows up, she's not sure if she can trust him. The line between friends, enemies, and loyalty becomes blurred. As truths are unlocked, Rema understands that she just might be the key to finding the rightful heir and restoring peace to the kingdom . . . if she can manage to stay alive long enough.

Revelation

From an award-winning historian, the outlandish story of the man who gave rights to animals. In Gilded Age America, people and animals lived cheek-by-jowl in environments that were dirty and dangerous to man and beast alike. The industrial city brought suffering, but it also inspired a compassion for animals that fueled a controversial anti-cruelty movement. From the center of these debates, Henry Bergh launched a shocking campaign to grant rights to animals. A Traitor to His Species is revelatory social history, awash with colorful characters. Cheered on by thousands of men and women who joined his cause, Bergh fought with robber barons, Five Points gangs, and legendary impresario P.T. Barnum, as they pushed for new laws to protect trolley horses, livestock, stray dogs, and other animals. Raucous and entertaining, A Traitor to His Species tells the story of a remarkable man who gave voice to the voiceless and shaped our modern relationship with animals.

One Lonely Seahorse

Mick Herron, "the le Carré of the future" (BBC), expands his world of bad spies with an even shadier cast of characters: the politicians, lobbyists, and misinformation agents pulling the levers of government policy. "Confirms Mick Herron as the best spy novelist now working."—NPR's Fresh Air Now an Apple TV+ series starring Gary Oldman and Kristin Scott Thomas. In London's MI5 headquarters a scandal is brewing that could disgrace the entire intelligence community. The Downing Street superforecaster—a specialist who advises the Prime Minister's office on how policy is likely to be received by the electorate—has disappeared without a trace. Claude Whelan, who was once head of MI5, has been tasked with tracking her down. But the trail leads him straight back to Regent's Park itself, with First Desk Diana Taverner as chief suspect. Has Taverner overplayed her hand at last? Meanwhile, her Russian counterpart, Moscow intelligence's First Desk, has cheekily showed up in London and shaken off his escort. Are the two unfortunate events connected? Over at Slough House, where Jackson Lamb presides over some of MI5's most embittered demoted agents, the slow horses are doing what they do best, and adding a little bit of chaos to an already unstable situation . . . There are bad actors everywhere, and they usually get their comeuppance before the credits roll. But politics is a dirty business, and in a world where lying, cheating and backstabbing are the norm, sometimes the good guys can find themselves outgunned.

The Key

"In a gloomy, smoke-filled world where the sun has vanished, all light and warmth comes from the firestones mined underground by the Quelled – a people branded by the race known as Chosen. On her sixteenth birthday, the rebellious Quelled girl Elsha is selected as handmaid to the Firelord – the most powerful of the Chosen. Suddenly Elsha is swept into a world of privilege, but also of prejudice and hatred and inequality. And her pursuit of her vision of a world of warmth, as sung about in the ancient myths, leads her on a dangerous path..."
