

Research Quests Of Young Intellectuals

[#young intellectuals research](#) [#youth academic quests](#) [#intellectual exploration](#) [#student research initiatives](#)
[#academic pursuits for youth](#)

Discover the vibrant world of research quests undertaken by young intellectuals. This segment highlights their innovative academic exploration, critical thinking, and the diverse scholarly endeavors that define the intellectual pursuits for young minds, contributing fresh perspectives to various fields of knowledge.

We collect syllabi from reputable academic institutions for educational reference.

Thank you for accessing our website.

We have prepared the document Youth Academic Exploration just for you.

You are welcome to download it for free anytime.

The authenticity of this document is guaranteed.

We only present original content that can be trusted.

This is part of our commitment to our visitors.

We hope you find this document truly valuable.

Please come back for more resources in the future.

Once again, thank you for your visit.

This document is one of the most sought-after resources in digital libraries across the internet.

You are fortunate to have found it here.

We provide you with the full version of Youth Academic Exploration completely free of charge.

Research Quests of Young Intellectuals

This edition contains research works on a wide variety of topics by New Jersey high-school and middle-school students.

Decentering European Intellectual Space

Decentering European Intellectual Space reconsiders the nature of cultural Europe by challenging intellectual historians to pay closer attention to the asymmetries and encounters between Europe's fluctuating cores and peripheries.

Intellectual Origins of Islamic Resurgence in the Modern Arab World

A systematic treatment of the religious, intellectual, cultural, and social foundations of the Islamic resurgence in the modern Arab world that is grounded in the larger context of Arab and Islamic intellectual history.

Research Anthology on Physical and Intellectual Disabilities in an Inclusive Society

Discussions surrounding inclusivity have grown exponentially in recent years. In today's world where diversity, equity, and inclusion are the hot topics in all aspects of society, it is more important than ever to define what it means to be an inclusive society, as well as challenges and potential growth. Those with physical and intellectual disabilities, including vision and hearing impairment, Down syndrome, locomotor disability, and more continue to face challenges of accessibility in their daily lives, especially when facing an increasingly digitalized society. It is crucial that research is brought up to date on the latest assistive technologies, educational practices, work assistance, and online support that can be provided to those classified with a disability. The Research Anthology on Physical and Intellectual

Disabilities in an Inclusive Society provides a comprehensive guide of a range of topics relating to myriad aspects, difficulties, and opportunities of becoming a more inclusive society toward those with physical or intellectual disabilities. Covering everything from disabilities in education, sports, marriages, and more, it is essential for psychologists, psychiatrists, pediatricians, psychiatric nurses, clinicians, special education teachers, social workers, hospital administrators, mental health specialists, managers, academicians, rehabilitation centers, researchers, and students who wish to learn more about what it means to be an inclusive society and best practices in order to get there.

Leaders in Educational Research

In this volume fourteen fellows of the International Academy of Education, whose research work is known internationally, reflect upon the ways in which their careers have been shaped by early family influences, by random events and surprise opportunities, and by nascent intellectual interests and academic mentoring. The authors come from many different countries (Australia, Belgium, Cyprus, Germany, Greece, Israel, Mexico, South Africa, and the USA), and from a number of disciplinary or intellectual orientations including curriculum development, economics, educational measurement and statistical analysis, history, philosophy, policy analysis, program evaluation, psychology, and sociology. They come from diverse social and cultural backgrounds; and in many cases rose above the travails presented by wars, social unrest, and social injustice to attain an education that launched them eventually into a research career. On this path, many were unexpectedly assisted by established researchers who served as mentors or “enablers.” Their personal stories, then, are of broad interest – and may even be a source of comfort and inspiration to younger colleagues who are commencing their careers in the international educational research community.

Education of Students with an Intellectual Disability

This book is designed as a college-level textbook introducing readers to all aspects of intellectual disability in children, from birth to the end of schooling, with an educational focus. The book will be of interest to persons training as special education teachers or who are training as regular teachers with a focus on special education. It will also be relevant reading for parents of children with intellectual disability, for practicing teachers, and for other professionals working with such children (psychologists, social workers, nurses, therapists). The field of special education and intellectual disability practice has been strongly influenced by legislation in the United States. The United States is also the source of most research in the disability field. For this reason, there is an emphasis in this book on research and practice in the United States. However, there is also coverage of research and practice in Australia (where the author is located); the UK, where there are several leading research groups; and other parts of the world. Instructors may wish to use the book as the basis of a one-semester unit on the education of students with intellectual disability. Each chapter could be treated over 1 or 2 weeks, depending on the focus of the group and the particular interest of the instructor. A group with an early childhood focus would spend more time on early intervention. A secondary-focused group might spend more time on postschool options. Each major chapter section has questions for discussion or reflection, and there are also discussion questions about the case studies provided in each chapter. This book provides readers with up-to-date information on the latest research on the identification and definition of intellectual disability, assessment of intellectual disability and adaptive behavior, causes of intellectual disability, educational options and alternatives, early intervention for young children with intellectual disability, and practical approaches to teaching and intervention. In the final chapter, the author reviews options for students at the end of their formal schooling.

Studies in Medieval Jewish Intellectual and Social History

Thirteen leading scholars offer a fresh look at four key topics in medieval Jewish studies: the history of Jewish communities in Western Christendom, Jewish-Christian interactions in medieval Europe, medieval Jewish Biblical exegesis and religious literature, and historical representations of medieval Jewry.

Cuba and Western Intellectuals since 1959

This timely book presents a history of the relationship between the Cuban Revolution and intellectuals and activists in France, Britain and the United States, exploring the 'complete cycle' in this relationship and using it to examine the future of Cuba's symbolic status among intellectuals and activists in the West.

Cather Studies

Volume 3 of Cather Studies demonstrates the range of topics and approaches in contemporary discussions of Willa Cather's work for the informed reader or the specialized student. In fourteen essays, critics and scholars examine Cather's Catholic Progressivism, her literary relations with William Faulkner, and her place in the multicultural canon of American literature.

Louis Althusser and the Traditions of French Marxism

Throughout the course of the twentieth century communism has enjoyed direct competition with all other governmental and economic systems. Often, communist countries produced their own special brand of party intellectual. These figures rightly occupied their place within their own national context and within the context of the International. Some communist intellectuals, through the high level of erudition exhibited in their writing, have received a wider reception, despite their direct linkage to party politics e.g. Antonio Gramsci, Georg Lukacs, and, Victor Serge are good examples. After 1956, when Khrushchev exposed Stalin's atrocities to the Twentieth Congress of the Communist Party of the Soviet Union and, as a result, to the entire world, Marxist philosophy was widely discredited. It had been assumed that Stalin's excesses were somehow encouraged or supported through Marx's thought. When, in the mid 1960s, Louis Althusser first offered his re-readings of Marx's philosophy it, and communist political practice, were in ruin. However Althusser was in a unique cultural and historical position. Thinking and writing concomitant with the structuralists and poststructuralists in France and also having access to certain theoretical tools while, simultaneously, committing himself entirely to Marxist thought-Althusser was, conceivably the last of his tradition. He was a Marxist philosopher who, unlike Sartre at the end of his life, did not abandon communism to, for instance existentialism. In *Louis Althusser and the Traditions of French Marxism* William Lewis gives readers a striking example of intellectual biography and critical theory. His approach, considering the work and life of Althusser within French Marxism and French intellectual culture, fills a void in contemporary scholarship. But, much more importantly, Lewis is able to show how Althusser's thought is the result of and a response to specific French intellectual and political traditions of reading Marx. It is through this combination of concerns that *Louis Althusser and the Traditions of French Marxism* offers us a contemporary and poignant Althusser whose ideas, under the weight of Lewis's pen, can help us better understand what resources it may hold for philosophy, political thought, and cultural thought today.

Cognitive Aging

Cognitive Aging and the Role of Strategy is the English Language edition of 'Vieillesse cognitive et variations stratégiques', originally published in French. Lemaire is a well-respected professor and text-book author of Cognitive Psychology in France and his English language edition will have updated content on theories of cognitive aging to provide a broad view of adult development and the aging process. This title will be of interest to students of specialist psychology courses at both undergraduate and postgraduate level.

Intellectual Property Needs and Expectations of Traditional Knowledge Holders

FFM to West Africa

Chinese Christianity

Viewing Chinese Christianity from a globalization perspective, this volume describes the interplay of "universal" and "particular" aspects as well as the global and local forces which shaped the characteristics of Chinese Christianity.

International Handbook of Applied Research in Intellectual Disabilities

The landmark International Handbook of Applied Research in Intellectual Disabilities presents, explains, and illustrates key methods of research and evaluation of proven relevance and value to the field of intellectual disabilities. It features sections on the concepts and theoretical models underlying research and evaluation, the methods and techniques themselves, and the key application areas where the methods are demonstrated in action. Coverage includes applications in educational, social, family, health, and employment aspects of care and provision for those with intellectual disabilities.

Research Handbook on Intellectual Property and Technology Transfer

Written by leading experts from across the world, this Handbook expertly places intellectual property issues in technology transfer into their historical and political context whilst also exploring and framing the development of these intersecting domains for innovative universities in the present and the future.

Higher Education and Intellectual Retrogression

This monograph critically analyses the historical evolution of ideas, perceptions and principles on higher education and unravels a few of its interlinked aspects – content, quality, standard, massification, privatization and commercialization. It presents both original and penetrative critique of neoliberal ideas and policies reigning higher education since World War II. The volume argues that with the proliferation of 'academic capitalism' the academic quality of higher education has been inevitably compromised and it has thereby heralded a comprehensive 'intellectual retrogression'. The book offers a meticulous evaluation of global research reflecting on impeccable evidence of decline in academic learning – in its effort, quality, standards and overall intellectual level and rigour. Finally, it illuminates why it is dangerous to continue clinging ideationally to neoliberal reign in education and thereby evading or effacing some of the lasting and universal wisdoms and precepts of the educational reign preceding neoliberal marketoriented predominancy. The book will be of interest to students, teachers and researchers of education, higher education, sociology of education, economics and politics of education. It will also be useful for academicians, higher education administration, policymakers, schoolteachers and those interested in debates and issues around higher education.

People with Intellectual Disability Experiencing University Life

This book will introduce the reader to international perspectives associated with post-secondary school education for students with intellectual disability attending university settings.

Chinese Education

By providing case studies of Christian organizations and networks which have recently undergone succession, and drawing upon perspectives from leadership theory, psychology, organizational development, and theology, this work shows multiple overlapping aspects of succession. These facets include plans, processes, gender implications, theologies of leadership, successor origins, relationship between outgoing and incoming leaders, selection methods, and organizational beliefs manifested in succession ceremonies. An analysis of the various successions studied reveals the need for the organization or network to reflect on its own understandings and theologies of leadership; without so doing, organizational succession could be impaired. While exploring the complexities of leadership succession, particularly founder succession, this book provides clear lessons and guidance for those navigating such transitions in leadership.

Succeeding at Succession

Widely acclaimed for its comprehensive and sensitive picture of one of America's most renowned writers, *The Unfinished Quest* of Richard Wright received the Anisfield-Wolf Award on Race Relations when it was first published. This first paperback edition contains a new preface and bibliographic essay, updating changes in the author's approach to his subject and discussing works published on Wright since 1973.

The Unfinished Quest of Richard Wright

On the contribution of Matthias Christian Sprengel, 1746-1803, Friedrich von Schlegel, 1772-1829, and Friedrich Max Müller, 1823-1900, German Indologists, to Indological studies.

The German Intellectual Quest for India

This book explores how Chinese films constructed an image of China in the 1980s through analyzing the characters, composition of space, and conflict patterns of the films. It also examines the relationship between the representations in Chinese cinema and the realities of Chinese society. The study analyzes the imagery, metaphors, and cultural values of Chinese films in the 1980s to discover the common creative focus of Chinese film directors at the time. It also examines the specific creative elements and cultural significance of Chinese cinema in the 1980s. This book is neither a "period history" of Chinese cinema in the 80s, nor a thematic study of the "fifth generation". Rather, it is an analysis of films as narrative texts that reflected on history. It uses the perspectives revealed by characters, narrative patterns, and conflicts in films of the 1980s to examine how the era was perceived at that time as well as how China's national future and individuals' personal futures were being conceptualized. This title will be a valuable resource for scholars and students of Chinese Studies, Contemporary China Studies, Film Studies, and those who are interested in Chinese culture and society in general.

Imagined China

Addresses the many problems in defining the relationship of intellectuals to the society in which they live. The contributors come from a wide variety of disciplines, and are drawn from both America and Eastern and Western Europe.

The Political Responsibility of Intellectuals

K. Warner Schaie analyses his comprehensive study of aging's effects on intelligence

Intellectual Development in Adulthood

This multi-contributor work integrates research on adolescent and adult development, which are typically treated separately.

Intellectuals Today

Carlos Fuentes once observed that to be a Spanish American intellectual was to fulfill the roles, by default, of "a tribune, a member of parliament, a labor leader, a journalist, a redeemer of his society." Such statements reflect the view that the region's intellectuals have often acted as substitutes for the structures of a civil society. An alternative view casts Spanish American intellectuals in a far more reactionary role. Here, it is suggested that the elaboration of inert popular stereotypes such as the stoic Indian and the heroic gaucho has resulted in an infinite postponement of authentic cultural identity, and a perpetuation, aided by intellectuals, of a social order in which popular demands were either ignored or repressed. In the context of this debate, this book explores the roles played by intellectuals in the creation of popular national identities in twentieth-century Spanish America, and seeks to identify the factors which lie behind two such contrasting evaluations of their contribution. Ranging across the intellectual centers of Argentina, Chile, Cuba, Mexico and Peru, it illustrates vividly the diversity and evolution of intellectual life in the region. Particular attention is paid to the idea of peripheral modernity and its influence on intellectual activity, as well as to the contributions made by intellectuals to the three major strands in debates on popular national identity: bi-culturalism, anti-imperialism and history.

Intellectual Development

Nineteenth-century Russian religious intellectuals devoted a great deal of attention to the concept of agape, or Divine Love, arguing that the Christian church is a reflection of the triune, self-sacrificing God and his love for all of creation. On account of their deliberations, these intellectuals played a key role in mediating between the Orthodox Church and modern society. In *God as Love* Johannes Oravec presents a comprehensive summation of twenty-five prominent Russian thinkers and their thought on the concept of agape, showing in detail how they broke new ground in their various affirmations of the truth that God is love. No other book in any language treats this topic with such breadth and depth.

In the Shadow of the State

This publication aims to promote the development of empirical research on the economics of intellectual property in the Republic of Korea, and endeavors to provide policy makers with research based conclusions in different areas of intellectual property.

God as Love

Right now is the time for new opinions and new ideas to be generated and be presented as a solution. With the ever changing economic status of society, prosperity depends on the ability to run and maintain an active equilibrium between society and individuals. Therefore, it is essential for both parties to promote innovation and creativity in order to enable a proper and valuable lifestyle. Digital Economy Innovations and Impacts on Society provides theoretical and practical approaches about digital economy, increasing people's awareness on what the digital economy is and exactly what competitive advantages exist to provide information technology and innovation as its main resources. This publication focuses on rethinking the classical economic theory in the context of new technology, information, and innovation, making it a publication that brings the best research to the forefront for economics and social researchers, academicians, professionals and practitioners.

The Economics of Intellectual Property in the Republic of Korea

In *Intellectual Origins of the Republic*, [Zavc1](#) investigates the histories of liberalism and nationalism in the late Russian and Ottoman Empires and early Republican Turkey through the prism of the life, ideas and times of the revolutionary writer Ahmet A ao lu.

Digital Economy Innovations and Impacts on Society

Of all the Cambridge Platonists, Henry More has attracted the most scholarly interest in recent years, as the nature and significance of his contribution to the history of thought has come to be better understood. This revival of interest is in marked contrast to the neglect of More's writings lamented even by his first biographer, Richard Ward, a regret echoed two centuries after his death. Since then such attention as there has been to More has not always served him well. He has been dismissed as credulous on account of his belief in witchcraft while his reputation as the most mystical of the Cambridge 2 school has undermined his reputation as a philosopher. Much of the interest in More in the present century has tended to focus on one particular aspect of his writing. There has been considerable interest in his poems. And he has come to the attention of philosophers thanks to his having corresponded with Descartes. Latterly, however, interest in More has been rekindled by renewed interest in the intellectual history of the seventeenth century and Renaissance. And More has been studied in the context of seventeenth-century science and the wider context of seventeenth-century philosophy. Since More is a figure who belongs to the Renaissance tradition of unified sapientia he is not easily compartmentalised in the categories of modern disciplines. Inevitably discussion of anyone aspect of his thought involves other aspects.

Intellectual Origins of the Republic: Ahmet A ao lu and the Genealogy of Liberalism in Turkey

This book highlights the pioneering roles of African women as leaders and role models in Kenya, providing examples taken from across education, health, business, and a range of other sectors. Drawing on authentic first-hand accounts and narratives from key women in leadership positions, and those who have lived with them, the book presents the life stories of women leaders over the last fifty years, aiming to preserve their contributions for posterity and to inspire young people with moral, ethical, and progressive role models. The book uses African knowledge production strategies that look at the human being holistically, in the prism of Ubuntu, in order to define leadership in Africa from an African perspective, one that celebrates the role of the mother figure and places women at the centre of African values and societal dynamics. This book will be of interest to researchers and students of African studies, gender studies, and Kenyan education and socio-political history.

Henry More (1614–1687) Tercentenary Studies

This book offers a fresh report and interpretation of what is happening at the intersection of two great contemporary movements: the rapid growth of higher education worldwide and the rise of world Christianity. It features on-site, evaluative studies by scholars from Africa, Asia, North America, and South America. *Christian Higher Education: A Global Reconnaissance* visits some of the hotspots of Christian university development, such as South Korea, Kenya, and Nigeria, and compares what is happening there to places in Canada, the United States, and Europe, where Christian higher education has a longer history. Very little research until now has examined the scope and direction of Christian higher education throughout the world, so this volume fills a real gap.

African Women and Intellectual Leadership

The Information Behavior of a New Generation: Children and Teens in the 21st Century attempts to describe the significant changes in the information behavior of children and youth over the last two decades. Thirteen researchers from a variety of disciplines discuss the changes that can be attributed to mobile technology, social networks, and digital media.

Christian Higher Education

Recent years have witnessed a marked increase both in the number of children diagnosed with autism spectrum disorders (ASDs) and those placed alongside their typically developing peers in general education classrooms. These events bring with them a plethora of challenges, particularly in the areas of program design and educational practices. *Developing and Evaluating Educational Programs for Students with Autism* offers systematic, evidence-based guidelines—as well as tools, checklists, and other resources—for creating effective learning environments for students across the autism spectrum and the grade span. Planning, development, implementation, and continuous evaluation are examined in detail in this practical volume, which features: An overview of the ASDs, with an emphasis on effective educational practice. In-depth discussion of the ASD Program Development and Evaluation Protocol. A staff training model for personnel working with students with ASD. A detailed framework for student support teams and family-school collaboration. Specific guidelines for conducting needs assessments and student evaluations. • Case examples of applications of the protocol on the program, school, and regional levels. *Developing and Evaluating Educational Programs for Students with Autism* is a uniquely rigorous and thorough reference benefiting school psychologists and special education professionals as well as those in allied educational and mental health fields, including clinical child, school, and developmental psychologists, psychiatrists, and other professionals working with children with autism.

The Information Behavior of a New Generation

The essays in this volume seek to confront some of the charged meeting points of European—especially German—and Jewish history. All, in one way or another, explore the entanglements, the intertwined moments of empathy and enmity, belonging and estrangement, creativity and destructiveness that occurred at these junctions. These encounters typically unfolded within an uneasy continuum of conflict and co-operation, conformity and resistance, refashioning or maintaining personal and collective dimensions of identity. Clearly, they never allowed for the luxury of indifference. Yet it would be wrong to present meetings of this kind as exclusively confrontational, as stark either-or choices. Life at the junctions may be vulnerable and insecure but it can also yield fresh angles of perception and new opportunities. If these boundary situations generated a modicum of friction, confusion and anxiety, and at times even murderousness, they also produced new alliances and friendships, creative projects and novel fusions and formations of identity. In exploring these dramatic moments in history, Steven Aschheim provides valuable new insights into the history of Europe, Israel, and global Judaism.

Developing and Evaluating Educational Programs for Students with Autism

Editor: Melanie E. L. Bush - Foreword: Robin D. G. Kelley Co-editors: Rose M. Brewer, Daniel Douglas, Loretta Chin, Robert Newby Series Editor: Mohammad H. Tamdgidi Roderick Douglas Bush (1945–2013) was a scholar, educator, mentor, activist and a loving human being. In reflecting on his life well-lived, the contributors in *Rod Bush: Lessons from a Radical Black Scholar on Liberation, Love, and Justice* share insightful lessons from his life and works on how to effect liberation and radical social transformation in the everyday practices of scholarship, teaching, activism, and personal interaction through a loving spirit dedicated to social justice. Rod Bush was deeply convinced that “Pan-European racism is the Achilles’ heel of the modern world-system, and the demographic situation of the United States, with its large, strategically located populations of color, is a key locus of struggle for a more just, democratic, and egalitarian world order.” This book shows by the example of Rod Bush how one can “be the change”—through a commitment to everyday practices and personal transformations that embody, enable, embrace, and engage global social change. This anthology provides deep reflections on the question of how one can live radical principles in contemporary times. What does it mean to be human? How does one embed love and justice in one’s worldview and daily practice? Rod Bush, partner, colleague, teacher, mentor, comrade, and friend, was well known as an activist scholar who incorporated his values into his teaching, mentorship and everyday interactions. Therefore, his theoretical interests and practical involvements in movements are intimately linked and simultaneous. In his foreword, Robin D. G. Kelley shares his intimate views of Rod Bush’s life and works. In his view, Rod’s

“commitment to study and struggle in the service of human liberation knew no boundaries. His vision was planetary. He wrote critically and brilliantly about Black radical movements—here and abroad—and about the destructive power of racism, colonialism, capitalism (the modern world-system), all with the goal of transforming a society based on exploitation, subjugation, and war into a society rooted in mutual benefit, life, and love.” At a historical moment when the political landscape is fraught with volatility, and the Movement for Black Lives and other struggles for dignity and justice gain increasing momentum, Rod’s life serves as an example, providing many lessons that we can draw from and practice ourselves. Rod consistently asserted that it is critical to recognize the historical leadership of those involved in struggles for Black Liberation and justice writ large. For, a vision for Black Lives is indeed a vision that benefits all humanity. The anthology is edited by Melanie E. L. Bush and co-edited by Rose M. Brewer, Daniel Douglas, Loretta Chin, and Robert Newby. Contributors include: Robin D. G. Kelley (Foreword), Angelo Taiwo Bush, Chriss Sneed, Daniel Douglas, Godfrey Vincent, Matthew Birkhold, Loretta Chin, Latoya A. Lee, Tatiana Chichester, A. Kia Sinclair, Mojúbàolú Olufúnké Okome, Natalie P. Byfield, Komozi Woodard, Bob Barber, Rodney D. Coates, Charles “Cappy” Pinderhughes, Jr., James V. Fenelon, Walda Katz-Fishman, Jerome Scott, Rose M. Brewer, Robert Newby, Roderick D. Bush, and Melanie E. L. Bush. The anthology is a volume (XII, 2019) in the Edited Collection Series of Human Architecture: Journal of the Sociology of Self-Knowledge, edited by Mohammad H. Tamdgidi. Endorsements “One look at the list of contributors to this compendium with its diverse assembly of scholars, and I knew that Rod Bush’s lessons would be fully absorbed and explicated. I only wish I could have spent more time with him and been a beneficiary of his immense insights on love, liberation and justice. Rod would be proud of the commentaries and the thoughtful devotion of the editors.” — Herb Boyd, writer, activist, and academic, most recently author of *Black Detroit — A People’s History of Self-Determination* and the forthcoming *Black Panther Film: Paradigm Shift or Not? An Anthology* co-edited with Haki Madhubuti “Though—sadly—not a household name, when the history of his era is written, undoubtedly the immense intellectual and political contributions of Rod Bush will not only be acknowledged but also celebrated. The volume at hand gives an indication of why this is so.” — Gerald Horne, author, *The Apocalypse of Settler Colonialism: The Roots of Slavery, White Supremacy and Capitalism in 17th Century North America and the Caribbean* “This is a brilliant collection of essays by notable engaged scholars celebrating the life and work of Rod Bush, as a whole forming a textual critique of Bush’s essential research, theory, and writing. It elucidates the most important decolonial movements of our time, including race, class and gender, Black internationalism, Black nationalism and Native American struggles, social justice, and more. Other essays reveal the beauty and ethical stance of the man himself. The book is a treasure that social science and humanities instructors will find invaluable as a teaching text.” — Roxanne Dunbar-Ortiz, professor-emerita, author of *An Indigenous Peoples History of the United States*, and *Loaded: A Disarming History of the Second Amendment* “Rod Bush was a most remarkable person. He started out as my student, and became my friend and collaborator. Rod mixed first-class scholarship with first-class activism. He became a model for all of us. We shall miss him dearly. The way to honor him is to emulate him. We can all learn from him.” — Immanuel Wallerstein, Senior Research Scholar, Yale University, author of *The Modern World-System I-IV*, and *The World-System and Africa* “This volume is not only a welcome tribute to a deep thinker, talented organizer, outstanding teacher, and a caring, compassionate human being. It is also a rich tapestry of insights, stories and images that inspires us to keep pushing until everyone — everyone — lives in a world of peace, justice and freedom.” — Max Elbaum, author of *Revolution in the Air: Sixties Radicals Turn to Lenin, Mao and Che*

Asian and African Studies

This volume supplements the acclaimed three volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988. There are more than 6,000 descriptive entries in a wide range of categories: anthropology and folklore, art and architecture, history, literature, music, political science, popular culture, psychology, religion, science and technology, and sociology.

At the Edges of Liberalism

Rod Bush: Lessons from a Radical Black Scholar on Liberation, Love, and Justice
