A woman desperate to turn a new page heads to the Scottish coast and finds herself locked in a battle of wills with an infuriatingly aloof bookseller in this utterly heartwarming debut, perfect for readers of *Evvie Drake Starts Over*. "Humor and charm abound. . . . [This] love story hits the spot."—Publishers Weekly Thea Mottram is having a bad month. She's been let go from her office job with no notice—and to make matters even worse, her husband of nearly twenty years has decided to leave her for one of her friends. Bewildered and completely lost, Thea doesn't know what to do. But when she learns that a distant great uncle in Scotland has passed away, leaving her his home and a hefty antique book collection, she decides to leave Sussex for a few weeks. Escaping to a small coastal town where no one knows her seems to be exactly what she needs. Almost instantly, Thea becomes enamored with the quaint cottage, comforted by its cozy rooms and lovely but neglected garden. The locals in nearby Baldochie are just as warm, quirky, and inviting. The only person she can't seem to win over is bookshop owner Edward Maltravers, to whom she hopes to sell her uncle's book collection. His gruff attitude—fueled by an infamous, long-standing feud with his brother, a local lord—tests Thea's patience. But bickering with Edward proves oddly refreshing and exciting, leading Thea to develop feelings she hasn't experienced in a long time. As she follows a thrilling yet terrifying impulse to stay in Scotland indefinitely, Thea realizes that her new life may quickly become just as complicated as the one she was running from.

This book tells you a lot about speed reading and photography. You are in the privileged position from which you can continue to increase your reading speed while maintaining the same rate of comprehension of the text. The course is complex, but you can choose exactly those techniques that suit you best. All of these techniques can be reduced to two or three main techniques that you have seen work for you and those you can keep exploring and, why not, improving. Speed reading can be condensed into a single sentence, but that doesn't change the facts of the matter. If I want to go to the gym because I want to have a worked body and the trainer shows me the exercises I need to do in a session, that doesn't automatically mean I'll look good. It's one thing to learn technique in a few minutes and another to exercise every day. You need willpower, discipline and determination to repeat the basic exercises daily. Without constant effort you cannot achieve results. If you go to the gym three times a week then you start to form a habit, and this habit helps you to live in the culture of sport. Being connected to the information in that sport and being able to generate so much enthusiasm that it counteracts your desire to give up the fight and return to your comfort zone. That's why I wrote about speed reading, to start living in the culture of this wonderful field. You have speed reading on your side.

With it, you can get to break the 1000 words per minute barrier. That means you'll be able to read four times faster than the average person with the same or even better comprehension of the text.

Safe Haven

There are many books, programs and speed reading trainings that offer information, but few that offer value. There are more and more people who want to teach you about speed reading, which is basically great. It's just that there, from the information about this extraordinary field, you have to be able to extract the essence and be able to pass it on. I've been studying speed reading for the last 15 years. I have done it with passion and dedication; I have made speed reading an important goal and I have lived in the culture of speed reading. I have spent thousands of hours thinking about what is important in this area and I think I have come to understand the importance of speed reading for the mind and body. What I present in my books is information that you can put to use immediately, getting good and great results. What you start building today will become the cornerstone of your personal and professional success tomorrow. The more you decide to invest in valuable knowledge, the more it will transform you

and make you a person capable of climbing step by step to the place where you can reap the full fruits of your labour. It's a long road to get there and I'd be lying to you if I said it was an easy road. You need a lot of willpower and discipline to be able to take those exams that life offers you as a chance to find out who you really are and what are the things that limit you inside. All those inner limitations will stop you in your tracks, block you or turn you back even when you may have very little left to finish. What you learn from speed reading will help you make choices, and not just any choices, but choices that will bring real change to your life. Think of yourself as living in a consumer world, and if you look back you will see that you have bought many products and services that you have not used. You've bought a subscription you didn't use or a fitness machine you used a few times and then forgot about it. When you bought it you promised yourself that you would use it every day and yet you didn't. It happened because you didn't live or don't live long enough in the culture of that thing. You don't realize how important it is and how much you need to exercise, otherwise you would find the time and energy to exercise regularly, maybe even daily.

Diary of a Wimpy Kid 10. Old School

Renita Schmidt and P.L. Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders. While the intent of that mission is basically sound in theory—we instill the idea that teachers at all levels are professionals, always learning and growing in knowledge—that theory, that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching. In our unique program, students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching; the program is heavily field-based, and it depends on the effectiveness of mentoring throughout the methods coursework

and the first semester of full-time teaching. Students tell us this guidance and support is invaluable, and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings. Students hear “best practice” information from us in methods classes and they receive ample exposure to the research supporting our field, but have a hard time implementing research-based practices in their classroom settings and an even harder time finding it in the classrooms around them.

Fans of Jason Reynolds and Sharon M. Draper will love this oh-so-honest middle grade novel from writer and educator Maurice Broaddus. Thelonius Mitchell is tired of being labeled. He's in special ed, separated from the “normal” kids at school who don't have any “issues.” That's enough to make all the teachers and students look at him and his friends with a constant side-eye. (Although his disruptive antics and pranks have given him a rep too.) When a gun is found at a neighborhood hangout, Thelonius and his pals become instant suspects. Thelonius may be guilty of pulling crazy stunts at school, but a criminal? It isn't about to let that label stick.
