HERE ARE OVER SEVENTY GAMES TO HELP YOUR CHILD LEARN TO READ--AND LOVE IT. Peggy Kaye's Games for Reading helps children read by doing just what kids like best: playing games. There is a "bingo" game that helps children learn vocabulary. There is a rhyming game that helps them hear letter sounds more accurately. There are mazes and puzzles, games that train the eye to see patterns of letters, games that train the ear so a child can sound out words, games that awaken a child's imagination and creativity, and games that provide the right spark to fire a child's enthusiasm for reading. There are games in which your child has to act silly and games--sure to be any child's favorite--in which you do. Easy to follow and easy to play, these games are ideal for busy, working parents. You can read a game in a few minutes and start to play right away. You can play on car trips, while doing the laundry, or while cooking. These games are so much fun for the whole family that you may forget their serious purpose. But they will help all beginning readers--those who have reading problems and those who do not--learn to read and want to read. Games for Reading also includes a list of easy-to-read books and books for reading aloud, and a "Note to Teachers" on how to play these games in their classrooms.

Analyzing Discourse is an introduction to discourse analysis for linguistic field workers. It is practical, addressing issues commonly confronted by field linguists. Rather than applying a rigid theory or surveying a variety of approaches, it provides a methodology that has been refined over years of use. The material follows a functional and cognitive approach that seems to be a good approximation of how discourse is actually produced and understood. Since the aim of the manual is introductory

rather than comprehensive, most chapters are relatively short, and the whole can be covered in fifteen classroom hours. References are provided for further reading on the topics discussed. The manual can be used individually or in group sessions, such as in a formal course or a linguistic seminar. In a group setting, concepts can be illustrated by examining further texts than those provided in the manual. Robert A. Dooley has a Ph.D. from Oklahoma State University. He has been involved in translation and the literacy team in the Brazilian Mbyá Guaraní language project. He also has served as Brazil SIL Linguistic Consultant and as Director of the Summer Institute of Linguistics, University of North Dakota Session, from 1988 to 1993.
