Educational Psychology

Educational Psychology: Developing Learners is known for its exceptionally clear and engaging writing, its in-depth focus on learning, and its extensive concrete applications. Its unique approach helps students understand concepts by examining their own learning and then showing them how to apply these concepts as teachers. More than any other educational psychology text, this text moves seamlessly between theory and applications, features the most extensive and integrated coverage of diversity, contexts of learning, neuropsychology and brain development, and classroom applications of technology. It includes innumerable concrete examples to help readers connect educational psychology to real children and classrooms. From reviews of the book: Rather than simply presenting the necessary content, the author makes you feel like she is talking directly to you...I love that diversity that has been woven throughout the fabric of this text...Ormrod's personalized writing style will reach undergraduate students in a way that few authors can. [The book] is concise, yet thorough; comprehensive, yet unpretentious.--Angela Bloomquist, California University of Pennsylvania 'Compared to other texts, Ormrod's text is written in a more accessible way...Strengths [include] accessibility, good use of supplementary materials, [and] updated research. --David Yun Dai, University at Albany, SUNY Love how each chapter discusses diversity and special needs! ...Most students keep this text throughout their teaching careers as a resource. Of all the educational psychology textbooks that I've used, this one is the most comprehensive and interactive with vivid examples...The supplemental materials are very useful. The power point is extensive and easy to use for lecture. I use the test bank materials and find the questions to be aligned with students' licensure exams. --Cindy Ballantyne, Northern Arizona University Note: MyEducationLab does not come automatically packaged with this text. A lucid, jargon-free writing style combines with a clear emphasis on educational psychology's practical relevance for teachers and students in classrooms to give this widely popular text a state-of-the-art presentation of the field of educational psychology. Exceptionally applied and replete with examples, lesson segments, case studies, and practical ideas from experienced teachers, Educational Psychology by Anita Woolfolk looks at teaching from the student's perspective and shows how students learn and retain information. The new edition continues its emphasis on the educational implications and applications of research on child development, cognitive science, learning, motivation, teaching, and assessment. It includes expanded coverage of the brain and neuroscience, models of quality teaching, student diversity, technology and learning, and moral development, as well as an entire Cluster devoted to language development, language diversity, and immigrant education. Personalize learning with MyEducationLab® MyEducationLab is an online homework, tutorial, and assessment program designed to work with the text to engage students and improve results. Within its structured environment, students see key concepts demonstrated through real classroom video footage, practice what they learn, test their understanding, and receive feedback to guide their learning and ensure they master key learning outcomes.

Educational Psychology

Derived from Anita Woolfolk's market-leading "Educational Psychology, Tenth Edition," the most thorough, accessible, and authoritative text on the market, the Active Learning Edition breaks the material into manageable "modules." To provide customers with an alternative version to the longer chapters of the standard 10th Edition, the original 15 chapters now appear as 14 clusters and 42 brief modules, which are easy to cover in shorter academic terms and will make learning easier for students. Further, each module is a self-contained learning unit, with learning objectives and review questions ("Check Yourself") that provide immediate reinforcement of key concepts and build students' confidence in their grasp of the material. Exciting new features in this edition include: "Active Learning Connections" Each cluster is followed by a section that features information and activities directing both students and professors to new and emerging Web technologies such as blogs and wikis and social bookmarking sites that connect them to one another and to other Educational Psychology students in fun and interactive ways. "Diversity and Convergence" Each cluster is followed by a section that explores the experiences and characteristics of diverse students in relation to the chapter topics, after which the author considers some themes and principles that apply to all students. This prompts readers to understand and value differences among students, while also appreciating the great similarities among all of us in development, learning, and motivation. "Podcasts" Icons in the margins direct readers to Podcasts (audio clips) on www.anitatalks.com in which the author discusses how the material in the text directly relates to the teaching profession. Other great features of this book: "Guidelines" appear throughout each module, providing concrete applications of theories and principles discussed. "Point/Counterpoint" sections throughout the text present divergent opinions on some of the most important and controversial questions in the field, such as "What is good teaching?" or "What are the implications of brain-based education?" "Teachers' Casebook" begins and ends each cluster. It presents realistic classroom cases and asks readers to think what they would "do" if faced with such situations. Then, actual teachers from a variety of schools across the country share their opinions, given their experience, on how they would handle the same situations. Readers get to practice "thinking like a teacher" and to see real teachers tackle classroom issues. "Family and Community Partnerships" boxes offer specific guidelines for involving families-when demand for parental involvement is at an all-time high-in various aspects of children's learning. "Connect and Extend" sections appear in the margins throughout, linking text content to teaching, readers' thinking, research, and commentary about authentic classroom settings. "Handbook for Teaching and Lifelong Learning" at the end of the book provides a rich, practical resource for taking the Praxis Exam, interviewing for teaching jobs, creating a teaching portfolio, and using technology in the classroom, all things that pre-service teachers need to know in order to get started in their teaching careers.

Now with SAGE Publications, Cheryl Cisero Durwin and Marla Reese-Weber's EdPsych Modules uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct, stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies—early childhood, elementary, middle school, and secondary—and ends with “Assess” and “Reflect and Evaluate” questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.

Educational Psychology: Constructing Learning 6e sets the standard for educational psychology texts in Australia and New Zealand, with its comprehensive, authoritative and research-based coverage of the subject. This edition includes completely updated content to reflect recent advances in the discipline, including revised theory into practice features from 39 international developmental psychologists. The author has retained the constructivist approach that made previous editions so engaging and relevant to student teachers, and content has been constructed around the new Australian Profession Standards for Teachers.

Educational Psychology: Constructing Learning

This text provides an engaging and stimulating introduction to the central concepts, themes and ongoing research in educational psychology today. Education Psychology clearly and concisely presents the key ideas, but equally encourages undergraduate and postgraduate psychology students to go beyond the text to read primary sources, and to develop an awareness of the controversies, complexities, and unresolved issues in a topic area. At the heart of the text is also an emphasis on developing the skills of how to read and use journal articles and how to critically evaluate sources of information. Educational Psychology: Windows on Classrooms, Ninth Edition, will help you increase student learning and development. It is the most applied book in the field. If you're looking for a book that gives you a sound theoretical and research-based foundation and then provides specific and concrete illustrations and guidelines for applying this theory and research with your students, this is the book for you. The book uses an integrated-case approach. Each chapter begins with a case study taken from actual classroom practice. But, instead of stopping there, Eggen and Kauchak then weave the case throughout each chapter extracting specific illustrations from it, and in some instances even taking dialogue from the lesson to illustrate classroom applications of sometimes abstract and hard to understand theory and research.

Educational Psychology. Student Study Guide

A comprehensive, accessible introduction to educational research Educational Research: Competencies for Analysis and Applications uses engaging, straightforward language to introduce students to the information and skills required to successfully conduct research and to competently evaluate research. Long known for their clear and at times humorous writing, the authors are accessible and thoughtful guides for readers who are being introduced for the first time to a field that many of them might find initially intimidating. The text provides a total instructional system that lays out clear

learning targets and then supports students as they practice and develop expertise in both doing and reading research. The 12th Edition includes a new, separate chapter on ethics, expands its coverage of single-subject research, covers the latest digital strategies and tools for doing research, and introduces students to the open source statistics software R. Also available with MyLab Education MyLab is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Educational Psychology : a Learning-centered Approach to Classroom Practice

This first European adaptation of Anita Woolfolk's market-leading text Educational Psychology is unrivalled in its field and is essential reading for anyone studying or interested in education from a psychological perspective. Thoroughly rewritten in a European context, this truly comprehensive book blends cutting edge theory and the latest international research with a wealth of examples, practical applications and tips from experienced educational practitioners, working in a broad range of settings. Extensive pedagogy with features such as Discussion Points and Chapter Summaries promote ease of learning and therefore make this a must-have text for anyone studying in this field.

Educational Psychology, eBook, Global Edition

From renowned educational psychologist, Robert Slavin, the Tenth Edition of this popular text translates theory into practices that teachers can use in their classrooms with deeper inquiry into the concept of intentionality and a thorough integration of standards. This new edition highlights the most current issues and emerging trends in the field of educational psychology, while continuing to have in-depth, practical coverage with a focus on the intentional teacher. An "intentional teacher," according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become "intentional teachers," the author offers a set of questions to guide them and models best practices through classroom examples.

Psychology for Psychologists

Educational Psychology and Transformational Classrooms uniquely positions teachers' transformational experiences as central to understanding and implementing educational psychology research. Across

three well-developed case studies using narrative inquiry methods, this volume explores moments of significant change, learning, and evolution in teaching and learning. Each case is followed by analyses from educational psychologists focusing on the three central actors in the learning experience--students, teacher, and context--and is then concluded with case authors' responses to the analyses provided. Showcasing the holistic experience of teaching before unpacking it with theory and research, this book centers classroom life and posits educational psychology as an ideal and accessible lens for its examination.

Educational Psychology

"Teachers' bread-and-butter testing activities associated with classroom assessment--the activities not influenced by federal statutory shifts--remain relatively constant. And those main-line assessment decisions are the ones addressed in much of this oft-revised classroom assessment textbook--the one you'll soon read. A thorough review of the previous edition of the book has taken place for purposes of updating. For example, since the publication of the eighth edition of Classroom Assessment, we have seen a substantial increase in the use of computer-adaptive testing. This topic, its advantages, and its drawbacks are considered in the new edition. Similar updating has been applied throughout" --

Educational Research Mylab Education Access Code Includes Pearson Etext

The Third Edition of this popular text continues its in-depth, practical coverage with a focus on learning and instruction that presents the latest psychological and educational models and research to the students of today's learning society. Psychology of Learning for Instruction, Third Edition, focuses on the applications and implications of the learning theories. Using excellent examples ranging from primary school instruction to corporate training, this text combines the latest thinking and research to give students the opportunity to explore the individual theories as viewed by the experts. Students are encouraged to apply "reflective practice," which is designed to foster a critical and reflective mode of thinking when considering any particular approach to learning and instruction.

Educational Psychology and Transformational Classrooms

This work provides a comprehensive introduction to the psychology of instruction in schools and colleges. It develops models of instruction in the form of flow charts, reports research (including quantitative studies) and includes material explaining techniques and concepts.

Classroom Assessment

The Eighth Edition of this popular text from renowned educational psychologist Robert Slavin translates theory into practices that teachers can use in their classrooms with a further inquiry into the concept of intentionality and a thorough integration of standards. This edition maintains its in-depth, practical coverage with a focus on the intentional teacher by presenting up-to-the-minute research that a reflective, intentional teacher can apply. An intentional teacher, according to Slavin, is one who constantly reflects on his or her practice and makes instructional decisions based on a clear conception of how these practices affect students. To help readers become intentional teachers, the author offers a set of questions to guide them and models best practices through classroom examples. Firmly rooted in research, up-to-date theory, and classroom-tested applications, Educational Psychology prepares teachers as no other text does. It teaches them to think about how students develop and learn, to make decisions before and during instruction, and to consider what constitutes evidence that their students are learning and succeeding. This edition includes a new focus on reflection, new cases, sections on brain research, programs for language minority students, technology, No Child Left Behind, and after school and summer school programs. It contains new critiques of assessment and accountability strategies and a substantially updated treatment of programming for students with special needs.

Styles of Learning and Teaching

First Published in 1985. This is Volume 1 on Relating Instruction to Research borne from a conference that took place at the Learning Research and Development Center (LRDC) of the University of Pittsburgh, one of the major research and development centers. The chapters are structured into sections on cognitive skills into three groups: intelligence and reasoning, knowledge acquisition, and problem solving. Each chapter in these volumes was especially requested to fulfill a particular function.
