Bletchley Park and the Pigeon Spies

Over 15,000 pigeons were dropped into occupied Europe during WW2. Some were used by secret agents to send messages back to headquarters. Others were dropped by parachute into France, Belgium, Holland and Denmark in the hope that people would complete the attached questionnaire and provided military, political, economic or other intelligence of value for the Allies. Photographic negatives could be sent. Bletchley Park had its own loft for its pigeon spies. This book investigates the work of MI14, known as the Colomba Service, and for the first time sheds light on conditions in Occupied Europe described by extremely brave men and women who risked execution if found in possession of a pigeon. MI14 staff, decoded or translated messages and forwarded copies to SOE, SIS, MI19, RAF, RN, Ministry of Economic Warfare, BBC, Churchill, de Gaulle and President Benes of Czechoslovakia.

Bletchley Park and the Belgian Pigeon Service

During the Second World War, the British Royal Air Force's Special Duties Squadrons parachuted thousands of pigeons into Belgium. Bletchley Park, the nerve centre of the British Intelligence Service, had its own pigeon loft from where birds were sent on intelligence gathering missions. A secret organisation, MI14(d), was created to organise a pigeon service to occupied Europe. Those who found the pigeons were expected to supply military, economic and political intelligence for the Allies. This book includes the messages sent back from Belgium. In particular, it investigates the roles played by Josef Raskin and Jean Ceysens, the British Intelligence Services, the RAF and the brave individuals who, despite the possibility of imprisonment, sent messages to Britain in the hope it would help liberate their country.

I, Spy

A thrilling mystery adventure set in Bletchley Park at the start of World War II, based on true historical events. Twelve-year-old Robyn has grown up in Bletchley Park, where her father works as a driver.

When she's not at school, there's nothing she likes more than helping her dad in the garages. Then the war begins and everything at Bletchley changes. Robyn is assigned to help with the carrier pigeons that take messages to the Allies. But first, she must sign the Official Secrets Act and is ordered not to leave the grounds of the park. While Bletchley is buzzing with people recruited for the war effort and all eyes are on the skies, Robyn becomes convinced that there's something sinister going on within Bletchley Park itself. Together with her friends Mary and Ned, Robyn resolves to uncover the enemy in their midst . . . A gripping wartime story, perfect for fans of Phil Earle, Robin Stevens, Lesley Parr and Hilary McKay.

Sabotage in Greece

Following the Italian invasion of Albania, the British government was worried that Greece would be next. Their Intelligence Service in Athens prepared to sabotage their plans, stored explosives and trained saboteurs. When Germany came to Italy's aid, they took control of Greece, despite attempts to sabotage the road and rail links. This book investigates the success and failures of British, American and Greek sabotage missions, the attacks on the Gorgopotamos and Asopos viaducts, on roads, railways, shipping and mining operations. Using contemporary documents from the CIA and National Archives, biographies and autobiographies, it provides first-hand accounts from those involved, those who masterminded the operations and the reports of the agents infiltrated by boat, submarine or plane. It has also used historians' accounts found on websites to provide a detailed history of sabotage in Greece between 1940 and liberation in 1944.

Sabotage in Norway

Norwegians trained in industrial sabotage at Brickendonbury Manor, near Hertford, U.K. were infiltrated by the 'Shetland Bus', fishing boats, motorboats, submarines or parachuted in by planes to attack targets across Norway. They included Karl Aarsaether, Jan Allen, Johannes S. Andersen, Gunnar Berg, Torfinn Bjørnås, Svein Blindheim, Peter Deinboll, Andreas Fasting, Kasper Fjell, Gunnar Fougner, Arne Gjestland, Per Getz, Gregers Gram, Sverre Granlund, Torleif Grong, Arne Haegstad, Knut Haukelid, Claus Helberg, Thor Helliessen, Willy Houlder, Kasper Idland, Fredrik Kayser, Arne Kjelstrup, Frithjof Pedersen Kviljo, Ruben Langmo, Alf Lindeberg, Martin Linge, Max Manus, Odd Nilsen, Nils Nordland, Martin Olsen, Erik Gjems-Onstad, Arthur Pevik, Johnny Pevik, Jens Anton Poulsson, Joachim Rønneberg, Einar Skinnarland, Paal Skjærpe, Gunnar Sønsteby Odd Starheim, Hans Storhaug, Birger Strømsheim, Harald Svindseth, Edvard Tallasken, Gunvald Tomstad, Ragnar Ulstein, Karl Vilnes, Leif Well and Aasmund Wisløff. .

Operation EBENBURG: SOE's Austrian 'Bonzos' and the rescue of looted European art

Some captured German and Austrian personnel were brought to Britain as prisoners of war. Those who were identified as anti-Nazi were 'turned' and, codenamed 'Bonzos', were trained in paramilitary and clandestine warfare to be sent back into occupied Europe on top secret missions. The British Special Operations Executive arranged the infiltration of four Austrians, Albrecht Gaiswinkler, Joseph Grafl, Karl Standhartinger and Karl Lzicar, into the Salzkammergut area of northwestern Austria. This book tells the story of Operation EBENBURG, their mission to kidnap or assassinate Joseph Goebbels, the Reich's Minister of Propaganda, to organise resistance groups before the arrival of American forces and to protect the looted works of art hidden in the Altaussee salt mine.

Blowing up the Rock: German, Italian and Spanish Sabotage attacks on Gibraltar during the Second World War

During the Second World War, Gibraltar faced the threat of invasion by Italy, Germany, and Spain. The Abwehr, the German Intelligence Service, rather than use their own saboteurs, paid young Spanish men to undertake over sixty sabotage attacks on military installations and shipping with limited success. The Italian Decima Flotilla MAS, a specialist team of underwater frogmen, launched eight attacks which were relatively successful and Spanish Falangists made several unsuccessful attempts. The British Secret Intelligence Service endeavoured to stop or at least limit such attacks. Using contemporary files from the National Archives in Kew, autobiographies, biographies, histories and newspaper articles, this documentary history investigates the successes and failures of these attacks on Gibraltar and the roles played by intelligence officers, agents, double agents in discovering and preventing such acts. The book sheds light on an unusual and largely overlooked aspect of Gibraltar's history.

THE SPIES WHO CAME BACK TO THE COLD: An Icelandic saga of secret agents, intelligence agencies, deception, political intrigue and international diplomacy during the Second World War

During the Second World War, the German Intelligence Service infiltrated specially-trained agents into Iceland to collect military, naval, aviation and meteorological intelligence to be transmitted back to Hamburg by wireless or secret writing. Some agents managed to evade capture for a few weeks but most handed themselves into the authorities shortly after landing. Sent to London for interrogation by MI5, rather than be executed as enemy spies, they revealed their life stories and provided details of their training, their instructors and how they were infiltrated. They included Olev Sætrang, Ib Riis, Sigurjon Jonsson, Jens Pálsson, Peter Thomsen aka Jens Fridriksson, Larus Thorsteinsson, Einar Sigvaldason, Magnus Gudbjornsson, Sverrir Matthiasson, Ernst Fresenius, Sigurdur Juliusson, Hjalti Bjornsson and Gudbrandur Hlidiar. Three of these spies were 'turned', used as double agents to transmit British-inspired messages to deceive the Germans about Arctic convoys and a fake Allied invasion of Norway.

Intercept

The computer was born to spy, and now computers are transforming espionage. But who are the spies and who is being spied on in today's interconnected world? This is the exhilarating secret history of the melding of technology and espionage. Gordon Corera's compelling narrative, rich with historical details and characters, takes us from the Second World War to the internet age, revealing the astonishing extent of cyberespionage carried out today. Drawing on unique access to intelligence agencies, heads of state, hackers and spies of all stripes, INTERCEPT is a ground-breaking exploration of the new space in which the worlds of espionage, geopolitics, diplomacy, international business, science and technology collide. Together, computers and spies are shaping the future. What was once the preserve of a few intelligence agencies now matters for us all.

Sabotage in Belgium

Between 1940 and 1944 forty Belgians were trained in industrial sabotage at Brickendonbury Manor, near Hertford, UK. This book tells the stories of their successes and failures when they were dropped into Belgium. They include: Emile Tromme, Robert Jourdain, Armand Campion, Octave Fabri, Jean Scohier, Jean Cassart, Henri Verhaeghen, André Wendelen, Achille Hottia, Oscar Catherine, Valère Passelecq, Willy Bernaert, Jean Deflem, Léon Kaanen, ? Piquart, Felicien Moreau, Victor Lemmens, Pierre Osterrieth, Pierre Vliex, Frederic Veldekens, Henri Frenay, Jean Woluwe and Jean van Gysegghem, Jean Schools, Leon Engelen, Adhemar Delplace, Francois Mathot, André Berten, Alphonse Mabilie, Theo Andries, André Bayet, Pierre Davreux, Léon Joye, Georges André, Maurice Bertrand, Robert Duby, Zephir Braibant, Leon Servais, Raymonde Thonon and André Guissart.

MAVIS BATEY

Late 1930s. When World War II was declared, Mavis Batey, previously studying German Romanticism, abandoned her studies to do her duty for her country. At Bletchley Park, Britain's best kept secret, she became one of the first women codebreakers, a pioneer and a star, breaking codes vital to bringing peace. Mavis Batey, a unique biography, delves into the life of one of Britain's best female codebreakers, taking the reader through the war and to the arrival of peace, when Mavis turned her attention from breaking codes to the conservation and preservation of gardens. Mavis became an important figure in conservation, becoming President of the Garden History Society, which, under her watch, became an academic society and campaigning force for the protection of landscapes, parks, and gardens of historic interest. She also lobbied Parliament, fighting threats of encroachment and misuse of land. Acts of Parliament were passed, English Heritage was established, and grants were introduced. Historic gardens became officially recognised as essential components of European culture and her National Register of Historic Gardens came to fruition. Mavis's passion was writing and she wrote many books. Mavis was finally awarded the RHS Veitch Memorial Medal and the MBE for Services to the preservation and conservation of historic landscapes. Mavis never did retire: her final project was to inspire an American Garden Trail for Bletchley Park which she signed off just a few months before her death in November 2013.

I Spy Bletchley Park

WHAT IF THE NAZIS DID DISCOVER THE SECRET OF BLETCHLEY PARK? When two young women from vastly different backgrounds make life-changing choices, it creates the setting for what could be the greatest imaginable disaster for Britain during WWII. Deeply embittered by the government's seizure of her financially ruined father's Buckinghamshire estate, Lady Margaret Pugh is recruited as a spy by Luftwaffe chief Hermann Goering during the 1936 Olympic Games. Four years later, Betty Hall, a working-class girl with a prodigious musical talent, temporarily turns her back on a glorious career opportunity in America and is simply 'doing her bit' with the RAF. But when Margaret begins to unravel the secrets of Bletchley Park, Betty finds herself thrust untrained into the world of counter-espionage. And as both women play a critical game of cat and mouse with each other, the situation becomes ever more desperate. Ultimately, the inexperienced young WAAF finds herself as the only person who might just be able to save Britain's most vital war secret from a devastating air raid.

The Crimes of the Gestapo

A unique account of the Gestapo through the eyes of British intelligence. The book also reveals that the Gestapo was not as all powerful as it is often assumed.

Code Breakers and Spies of World War I

The world's great economic powers aligned into two opposing forces in World War I. Although still in its infancy by modern standards at the onset of the conflict, intelligence gathering and espionage would ultimately tip the balance. Readers learn how new technology exploded and resulted in developments in cryptography and surveillance as both sides raced to crack the codes and win the war.

Looking-Glass Wars: Spies on British Screens since 1960

Looking-Glass Wars: Spies on British Screens since 1960 is a detailed historical and critical overview of espionage in British film and television in the important period since 1960. From that date, the British spy screen was transformed under the influence of the tremendous success of James Bond in the cinema (the spy thriller), and of the new-style spy writing of John le Carré and Len Deighton (the espionage story). In the 1960s, there developed a popular cycle of spy thrillers in the cinema and on television. The new study looks in detail at the cycle which in previous work has been largely neglected in favour of the James Bond films. The study also brings new attention to espionage on British television and popular secret agent series such as *Spy Trap*, *Quiller* and *The Sandbaggers*. It also gives attention to the more 'realistic' representation of spying in the film and television adaptations of le Carré and Deighton, and other dramas with a more serious intent. In addition, there is wholly original attention given to 'nostalgic' spy fictions on screen, adaptations of classic stories of espionage which were popular in the late 1970s and through the 1980s, and to 'historical' spy fiction, dramas which treated 'real' cases of espionage and their characters, most notably the notorious Cambridge Spies. Detailed attention is also given to the 'secret state' thriller, a cycle of paranoid screen dramas in the 1980s which portrayed the intelligence services in a conspiratorial light, best understood as a reaction to excessive official secrecy and anxieties about an unregulated security service. The study is brought up-to-date with an examination of screen espionage in Britain since the end of the Cold War. The approach is empirical and historical. The study examines the production and reception, literary and historical contexts of the films and dramas. It is the first detailed overview of the British spy screen in its crucial period since the 1960s and provides fresh attention to spy films, series and serials never previously considered.

The Spartan Scytale and Developments in Ancient and Modern Cryptography

This book offers a comprehensive review and reassessment of the classical sources describing the cryptographic Spartan device known as the scytale. Challenging the view promoted by modern historians of cryptography which look at the scytale as a simple and impractical 'stick', Diepenbroek argues for the scytale's deserved status as a vehicle for secret communication in the ancient world. By way of comparison, Diepenbroek demonstrates that the cryptographic principles employed in the Spartan scytale show an encryption and coding system that is no less complex than some 20th-century transposition ciphers. The result is that, contrary to the accepted point of view, scytale encryption is as

complex and secure as other known ancient ciphers. Drawing on salient comparisons with a selection of modern transposition ciphers (and their historical predecessors), the reader is provided with a detailed overview and analysis of the surviving classical sources that similarly reveal the potential of the scytale as an actual cryptographic and steganographic tool in ancient Sparta in order to illustrate the relative sophistication of the Spartan scytale as a practical device for secret communication. This helps to establish the conceptual basis that the scytale would, in theory, have offered its ancient users a secure method for secret communication over long distances.

Gevleugelde geschiedenis van Nederland

De gevleugelde geschiedenis van Nederland is voer voor iedere vogel- en geschiedenisliefhebber. Nederlandse historici schrijven over het eeuwenoude verbond tussen de Nederlanders en hun vogels. Gevleugelde geschiedenis van Nederland, fraai gebonden en met een keur aan bijzonder beeldmateriaal, is een monumentaal werk dat iedere vogel- en geschiedenisliefhebber in de kast moet hebben. Vogels spelen soms een onverwachte rol in de menselijke geschiedenis en mensen spelen vaak een bijzondere rol in de geschiedenis van vogels. In Gevleugelde geschiedenis van Nederland kijken meer dan dertig auteurs, onder wie toonaangevende historici, met andere ogen, vol verwondering, naar vogels en geschiedenis. Van de vroegste vogelfossielen die zijn teruggevonden in de Limburgse mergel, de introductie van het gebraden kippetje door de Romeinen en het met ganzenveer genoteerde hebben olla vogala tot de papegaai van Johan de Witt, het overzeese drama van de dodo, de vogelliefde van Van Gogh en vogelen als nationale covidhobby – ieder verhaal ontsluit weer een nieuwe episode in het eeuwenoude verbond tussen de Nederlanders en hun vogels. Gevleugelde geschiedenis van Nederland staat onder redactie van historicus en vogelaar Jan Luiten van Zanden – bijgestaan door Helena Cordašev en Erik de Bruin – en bevat bijdragen van Theunis Piersma, Jelle Reumer, Nicoline van der Sijs, Jaap Tielbeke, Jean-Marc van Tol en vele anderen. Met een keur aan bijzonder beeldmateriaal is Gevleugelde geschiedenis van Nederland een monumentaal werk dat iedere rechtgeaarde vogelaar in de kast moet hebben. Met een voorwoord van Nico de Haan.

Tracing Your Secret Service Ancestors

Did you have a spy in the family, an ancestor who was involved in espionage at home or abroad? If you have ever had any suspicions about the secret activities of your relatives, or are curious about the long hidden history of Britain's secret services and those who served in them, this is the book for you. Phil Tomaselli's fascinating guide to over 200 years of British spies and spying takes the reader on a journey through the twilight world of the secret intelligence organizations Britain has run since the time of the French Revolution to the modern day, and it shows where their records can be found.

Double Cross

The number one bestselling author of *Agent Zigzag* and *Operation Mincemeat* exposes the true story of the D Day Spies.

The Secret Listeners

Behind the celebrated code-breaking at Bletchley Park lies another secret... The men and women of the 'Y' (for Wireless) Service were sent out across the world to run listening stations from Gibraltar to Cairo, intercepting the German military's encrypted messages for decoding back at the now-famous Bletchley Park mansion. Such wartime postings were life-changing adventures – travel out by flying boat or Indian railways, snakes in filing cabinets and heat so intense the perspiration ran into your shoes - but many of the secret listeners found lifelong romance in their far-flung corner of the world. Now, drawing on dozens of interviews with surviving veterans, Sinclair McKay tells their remarkable story at last.

The Last Cambridge Spy

John Cairncross was among the most damaging spies of the twentieth century. A member of the infamous Cambridge Ring of Five, he leaked highly sensitive documents from Bletchley Park, MI6 and the Treasury to the Soviet Union – including the first atomic secrets and raw decrypts from Enigma and Tunny that influenced the outcome of the Battle of Kursk. In 2014, Cairncross appeared as a secondary, though key, character in the biopic of Alan Turing's life, *The Imitation Game*. While the other members of the Cambridge Ring of Five have been the subject of extensive biographical study, Cairncross has

largely been overlooked by both academic and popular writers. Despite clear interest, he has remained a mystery – until now. *The Last Cambridge Spy* is the first ever biography of John Cairncross, using newly released material to tell the story of his life and espionage.

The Guardian Index

In 1939, several hundred people - students, professors, international chess players, officers, actresses and debutantes - reported to a Victorian mansion in Buckinghamshire: Bletchley Park, known as 'Station X', where enemy codes were deciphered. This title details their remarkable achievements.

Station X

Weaving wartime intrigue, rural village life, and little-known historical facts about the role of carrier pigeons in WWII, Stephanie Graves continues the adventures of Olive Bright, a young pigeoneer who, along with her racing birds, has been conscripted to aid the fight against the Nazis. It's not the daring role she'd envisioned for herself, but her quiet little English village is not nearly as sheltered as she imagined... Returning to Pimpley following her FANY (First Aid Nursing Yeomanry) training, Olive is eager to step up her involvement in the war effort. Her pigeons are being conscripted to aid the Belgian resistance, and it's up to Olive to choose the best birds for the mission. To protect the secrecy of their work, she must also continue the ruse of being romantically involved with her superior, Captain Jameson Aldridge, a task made more challenging by the fact that she really does have feelings for the gruff Irish intelligence officer. But perhaps the greatest challenge of all comes when an instructor at Station XVII, the top-secret training school housed at Brickendonbury Manor, is found dead in Balls Wood by a troop of Girl Guides. The police quickly rule Lieutenant Jeremy Beckett's death an accident, but based on clues she finds at the scene, Olive begins to suspect he might have been a spy. Involving the reluctant Jamie, she is determined to solve the murder and possibly stop a threat to their intelligence efforts which could put the Belgians—not to mention her pigeons—in grave danger.

A Valiant Deceit

The instant New York Times bestseller from the author of the Newbery Medal winner *When You Reach Me*: a story about spies, games, and friendship. The first day Georges (the S is silent) moves into a new Brooklyn apartment, he sees a sign taped to a door in the basement: SPY CLUB MEETING—TODAY! That's how he meets his twelve-year-old neighbor Safer. He and Georges quickly become allies—and fellow spies. Their assignment? Tracking the mysterious Mr. X, who lives in the apartment upstairs. But as Safer's requests become more and more demanding, Georges starts to wonder: how far is too far to go for your only friend? Winner of the St Ermin's Intelligence Book of the Year Award. 'One of the great biographies of 2015.' The Times Fully updated edition including recently released information. A Guardian Book of the Year. The Times Best Biography of the Year. Mail on Sunday Biography of the Year. Daily Mail Biography of Year. Spectator Book of the Year. BBC History Book of the Year. 'A remarkable and definitive portrait' Frederick Forsyth 'Andrew Lownie's biography of Guy Burgess, Stalin's Englishman ... shrewd, thorough, revelatory.' William Boyd 'In the sad and funny Stalin's Englishman, [Lownie] manages to convey the charm as well as the turpitude.' Craig Brown Guy Burgess was the most important, complex and fascinating of 'The Cambridge Spies' - Maclean, Philby, Blunt - all brilliant young men recruited in the 1930s to betray their country to the Soviet Union. An engaging and charming companion to many, an unappealing, utterly ruthless manipulator to others, Burgess rose through academia, the BBC, the Foreign Office, MI5 and MI6, gaining access to thousands of highly sensitive secret documents which he passed to his Russian handlers. In this first full biography, Andrew Lownie shows us how even Burgess's chaotic personal life of drunken philandering did nothing to stop his penetration and betrayal of the British Intelligence Service. Even when he was under suspicion, the fabled charm which had enabled many close personal relationships with influential Establishment figures (including Winston Churchill) prevented his exposure as a spy for many years. Through interviews with more than a hundred people who knew Burgess personally, many of whom have never spoken about him before, and the discovery of hitherto secret files, Stalin's Englishman brilliantly unravels the many lives of Guy Burgess in all their intriguing, chilling, colourful, tragi-comic wonder.

The World Book Encyclopedia

"A marvelous read." —Tasha Alexander, New York Times bestselling author Set in a charming British village during World War II, Stephanie Graves' debut mystery introduces Olive Bright, a spirited young pigeon fancier who finds herself at the heart of a baffling murder . . . Though war rages across mainland Europe and London is strafed by German aircraft, the little village of Pibley in Hertfordshire bustles along much as it always has. Adrift since her best friend, George, joined the Royal Air Force, twenty-two-year-old Olive Bright fills her days by helping at her father's veterinary practice and tending to her beloved racing pigeons. Desperate to do her bit, Olive hopes that the National Pigeon Service will enlist Bright Lofts' expertise, and use their highly trained birds to deliver critical, coded messages for His Majesty's Forces. The strangers who arrive in Pibley are not from the NPS. Instead, Jameson Aldridge and his associate are tied to a covert British intelligence organization known as Baker Street. If Olive wants her pigeons to help the war effort, she must do so in complete secrecy. Olive readily agrees, but in the midst of her subterfuge, local busybody Miss Husselbee is found dead outside Olive's pigeon loft. Is the murder tied to Olive's new assignment? Or did Miss Husselbee ferret out a secret shameful enough to kill for? With the gruff, handsome Jameson as an unlikely ally, Olive intends to find out—but homing in on a murderer can be a deadly business . . . "A delightful classic village mystery studded with little-known World War II facts: a promising series debut." —Kirkus Reviews "[An] enjoyable series launch . . . Graves smoothly integrates the little-known story of the wartime pigeon service into the intriguing plot. Readers will look forward to seeing more of smart, energetic, and witty Olive." —Publishers Weekly

In the Enemy's House

When the United States declared war on Germany in April 1917, it was woefully unprepared to wage a modern war. Whereas their European counterparts already had three years of experience in using code and cipher systems in the war, American cryptologists had to help in the building of a military intelligence unit from scratch. This book relates the personal experiences of one such character, providing a uniquely American perspective on the Great War. It is a story of spies, coded letters, plots to blow up ships and munitions plants, secret inks, arms smuggling, treason, and desperate battlefield messages. Yet it all begins with a college English professor and Chaucer scholar named John Mathews

Manly. In 1927, John Manly wrote a series of articles on his service in the Code and Cipher Section (MI-8) of the U.S. Army's Military Intelligence Division (MID) during World War I. Published here for the first time, enhanced with references and annotations for additional context, these articles form the basis of an exciting exploration of American military intelligence and counter-espionage in 1917-1918. Illustrating the thoughts of prisoners of war, draftees, German spies, and ordinary Americans with secrets to hide, the messages deciphered by Manly provide a fascinating insight into the state of mind of a nation at war.

Codes, Ciphers and Spies

The secret history of MI6 - from the Cold War to the present day. The British Secret Service has been cloaked in secrecy and shrouded in myth since it was created a hundred years ago. Our understanding of what it is to be a spy has been largely defined by the fictional worlds of James Bond and John le Carre. *THE ART OF BETRAYAL* provides a unique and unprecedented insight into this secret world and the reality that lies behind the fiction. It tells the story of how the secret service has changed since the end of World War II and by focusing on the people and the relationships that lie at the heart of espionage, revealing the danger, the drama, the intrigue, the moral ambiguities and the occasional comedy that comes with working for British intelligence. From the defining period of the early Cold War through to the modern day, MI6 has undergone a dramatic transformation from a gung-ho, amateurish organisation to its modern, no less controversial, incarnation. Gordon Corera reveals the triumphs and disasters along the way. The grand dramas of the Cold War and after - the rise and fall of the Berlin Wall, the Cuban Missile Crisis, the 11 September 2001 attacks and the Iraq war - are the backdrop for the human stories of the individual spies whose stories form the centrepiece of the narrative. But some of the individuals featured here, in turn, helped shape the course of those events. Corera draws on the first-hand accounts of those who have spied, lied and in some cases nearly died in service of the state. They range from the spymasters to the agents they ran to their sworn enemies. Many of these accounts are based on exclusive interviews and access. From Afghanistan to the Congo, from Moscow to the back streets of London, these are the voices of those who have worked on the front line of Britain's secret wars. And the truth is often more remarkable than the fiction.

The Art of Betrayal

Analogies help us think, learn, and communicate. The fourteen case studies in this volume help readers make sense of contemporary cyber conflict through historical analogies to past military-technological problems. The chapters are divided into three groups. The first--What Are Cyber Weapons Like?--examines the characteristics of cyber capabilities and how their use for intelligence gathering, signaling, and precision strike compares with earlier technologies for such missions. The second section--What Might Cyber Wars Be Like?--explores how lessons from several wars since the early 19th century, including the World Wars, could apply or not apply to cyber conflict in the 21st century. The final section--What Is Preventing and/or Managing Cyber Conflict Like?--offers lessons from 19th and 20th century cases of managing threatening actors and technologies.

Codebreakers

Chapman Pincher called Sonya the most successful agent-runner of all time, but this daring, courageous woman has remained an enigma, hunted and maligned by the spy-writers of the West. In this book, she tells her own story.

Understanding Cyber Conflict

Guy Liddell, MI5's Director of Counter-Espionage, kept a daily diary of events throughout the Second World War, which provide a unique insight into the work of the Security Service.

Sonya's Report

The first complete account of the fiercely guarded secrets of London's clandestine interrogation center, operated by the British Secret Service from 1940 to 1948. Behind the locked doors of three mansions in London's exclusive Kensington Palace Gardens neighborhood, the British Secret Service established a highly secret prison in 1940: the London Cage. Here recalcitrant German prisoners of war were subjected to "special intelligence treatment." The stakes were high: the war's outcome could hinge on obtaining information German prisoners were determined to withhold. After the war, high-ranking Nazi war criminals were housed in the Cage, revamped as an important center for investigating German war crimes. This riveting book reveals the full details of operations at the London Cage and subsequent efforts to hide them. Helen Fry's extraordinary original research uncovers the grim picture of prisoners' daily lives and of systemic Soviet-style mistreatment. The author also provides sensational evidence to counter official denials concerning the use of "truth drugs" and "enhanced interrogation" techniques. Bringing dark secrets to light, this groundbreaking book at last provides an objective and complete history of the London Cage.
