Playable Bodies investigates what happens when machines teach humans to dance. Dance video games work as engines of humor, shame, trust, and intimacy, urging players to dance like nobody's watching--while being tracked by motion-sensing interfaces in their living rooms. The chart-topping dance game franchises Just Dance and Dance Central transform players' experiences of popular music, invite experimentation with gendered and racialized movement styles, and present new possibilities for teaching, learning, and archiving choreography. Author Kiri Miller shows how these games teach players to regard their own bodies as both interfaces and avatars, and how a convergence of choreography and programming code is driving a new wave of full-body virtual-reality media experiences. Drawing on five years of ethnographic research with players, game designers, and choreographers, Playable Bodies situates dance games in a media ecology that includes the larger game industry, viral music videos, reality TV competitions, marketing campaigns, consumer reviews, social media discourse, and emerging surveillance technologies. Miller tracks the circulation of dance gameplay and related "body projects" across media platforms to reveal how dance games function as "intimate media," configuring new relationships among humans, interfaces, music and dance repertoires, and social media practices.

School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the

place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as Cartoon Cavalcade, Log On at the Library, Go in Style, Cruising the Mall, Space Shots, Teens on TV, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

The basis of three bestselling computer games Metro 2033 and Metro Last Light, and Metro: Exodus. The year is 2033. The world has been reduced to rubble. Humanity is nearly extinct. The half-destroyed cities have become uninhabitable through radiation. Beyond their boundaries, they say, lie endless burned-out deserts and the remains of splintered forests. Survivors still remember the past greatness of humankind. But the last remains of civilisation have already become a distant memory, the stuff of myth and legend. More than 20 years have passed since the last plane took off from the earth. Rusted railways lead into emptiness. The ether is void and the airwaves echo to a soulless howling where previously the frequencies were full of news from Tokyo, New York, Buenos Aires. Man has handed over stewardship of the earth to new life-forms. Mutated by radiation, they are better adapted to the new world. Man's time is over. A few score thousand survivors live on, not knowing whether they are the only ones left on earth. They live in the Moscow Metro - the biggest air-raid shelter ever built. It is humanity's last refuge. Stations have become mini-statelets, their people uniting around ideas, religions, water-filters - or the simple need to repulse an enemy incursion. It is a world without a tomorrow, with no room for dreams, plans, hopes. Feelings have given way to instinct - the most important of which is survival. Survival at any price. VDNKh is the northernmost inhabited station on its line. It was one of the Metro's best stations and still remains secure. But now a new and terrible threat has appeared. Artyom, a young man living in VDNKh, is given the task of penetrating to the heart of the Metro, to the legendary Polis, to alert everyone to the awful danger and to get help. He holds the future of his native station in his hands, the whole Metro - and maybe the whole of humanity.

Solo by Kwame Alexander and Mary Rand Hess is a New York Times bestseller! Kirkus Reviews said *Solo* is, "A contemporary hero's journey, brilliantly told." Through the story of a young Black man searching for answers about his life, *Solo* empowers, engages, and encourages teenagers to move from heartache to healing, burden to blessings, depression to deliverance, and trials to triumphs. Blade never asked for a life of the rich and famous. In fact, he'd give anything not to be the son of Rutherford Morrison, a washed-up rock star and drug addict with delusions of a comeback. Or to no longer be part of a family known most for lost potential, failure, and tragedy, including the loss of his mother. The one true light is his girlfriend, Chapel, but her parents have forbidden their relationship, assuming Blade will become just like his father. In reality, the only thing Blade and Rutherford have in common is the music that lives inside them. And songwriting is all Blade has left after Rutherford, while drunk, crashes his high school graduation speech and effectively rips Chapel away forever. But when a long-held family secret comes to light, the music disappears. In its place is a letter, one that could bring Blade the freedom and love he's been searching for, or leave him feeling even more adrift. *Solo: Is* written by New York Times bestselling author and Newbery Medal and Coretta Scott King Book Award-winner Kwame Alexander Showcases Kwame's signature intricacy, intimacy, and poetic style, by exploring what it means to finally go home An #OwnVoices novel that features a BIPOC protagonist on a search for his roots and identity Received great reviews from Publishers Weekly, School Library Journal, Booklist, and Kirkus.
