Companion to Medieval and Renaissance Music

With contributions from a range of internationally known early music scholars and performers, Tess Knighton and David Fallows provide a lively new survey of music and culture in Europe from the beginning of the Christian era to 1600. Fifty essays comment on the social, historical, theoretical, and performance contexts of the music and musicians of the period to offer fresh perspectives on musical styles, research sources, and performance practices of the medieval and Renaissance periods.

Medieval and Renaissance Music

This is a complete revision of the second edition, designed as a guide and resource in the study of music from the earliest times through the Renaissance period. The authors have completely revised and updated the bibliographies; in general they are limited to English language sources. In order to facilitate study of this period and to use materials efficiently, references to facsimiles, monumental

editions, complete composers' works and specialized anthologies are given. The authors present this systematic organization in this volume in the hope that students, teachers, and performers may find in it a ready tool for developing a comprehensive understanding of the music of this period.

Performing Medieval and Renaissance Music

"An elegant anthology. The specialist will not miss the quiet sophistication with which the music has been selected and prepared. Some of it is printed here for the first time, and much of it has been edited anew." "Notes" This treasury of 47 vocal works edited by Noah Greenberg, founder and former director of the New York Pro Musica Antiqua will delight all lovers of medieval and Renaissance music. Containing a wealth of both religious and secular music from the 12th to the 17th centuries, the collection covers a broad range of moods, from the hearty "Blow Thy Horne Thou Jolly Hunter" by William Cornysh to the reflective and elegiac "Cease Mine Eyes" by Thomas Morley. Of the religious works, nine were written for church services, including "Sanctus" by Henry IV and "Angus Dei" from a beautiful four-part mass by Thomas Tallis. Other religious songs in the collection come from England's rich tradition of popular religious lyric poetry, and include William Byrd's "Susanna Farye," the anonymously written "Deo Gracias Anglia" (The Agincort Carol), and Thomas Ravenscroft's "O Lord, Turne Now Away Thy Face" and "Remember O Thou Man." Approximately half of the songs are secular, some from the popular tradition and others from the courtly poets and musicians surrounding such musically inclined monarchs as Henry VIII who himself is represented in this collection with two charming songs, "With Owt Dyscorde" and "O My Hart." Among the notable composers of Tudor and Elizabethan England represented here are Orlando Gibbons, John Dowland, and Thomas Weelkes. "

Medieval and Renaissance Music for Recorder - Bancalari

Forty-seven vocal works from the 12th to the 17th centuries, including songs by Henry IV and Henry VIII as well as Thomas Tallis, William Byrd, Thomas Ravenscroft, Thomas Morley, and Thomas Weelkes.

Complete Anthology of Medieval & Renaissance Music for Guitar

What were the methods and educational philosophies of music teachers in the Middle Ages and the Renaissance? What did students study? What were the motivations of teacher and student? Contributors to this volume address these topics and other -- including gender, social status, and the role of the Church -- to better understand the identities of music teachers and students from 650 to 1650 in Western Europe. This volume provides an expansive view of the beginnings of music pedagogy, and shows how the act of learning was embedded in the broader context of the early Western art music tradition.

An English Medieval and Renaissance Song Book

In spite of their widely disparate uses, Marian prayers and courtly love songs from the Middle Ages and Renaissance often show a stylistic similarity. This book examines the convergence of these two styles in polyphonic music and its broader poetic, artistic, and devotional context from c.1200-c.1500.

Studies in Medieval & Renaissance Music

This volume consists of original papers first read at King's College, Cambridge, in 1979 at an international conference on medieval and Renaissance music. The contributors are distinguished in a wide variety of musicological interests but all are concerned in one way or another with pursuing the most urgent and promising directions for research in early music history. The result, far from being merely a further collection of essays applying well-tried approaches to familiar material, constantly seeks to expand the scope of musicology itself, and many of the contributions are inter-disciplinary in method. The four main topics of the conference were carefully chosen, with some editorial control exercised for each session. This is reflected in four sections of closely related papers in the book. Two of these are concerned with the patronage of music: by the Church in fifteenth-century England, Italy and France, and in a broader context in Italy from 1450 to 1550. A group of essays on sixteenth-century instrumental music separates these, and the book concludes with five papers on theories of filiation as applied to music sources from the tenth to the sixteenth century.

Music in Medieval and Early Modern Europe

This book reveals the importance of sung refrains in the musical lives of religious communities in medieval Europe.

Music and Instruments of the Middle Ages

This book collects twelve of the papers given at a conference held at the Library of Congress, Washington D.C., on 1-3 April 1993, in conjunction with the exhibition 'Rome Reborn: The Vatican Library and Renaissance Culture'. A group of distinguished scholars considered music in medieval and Renaissance Rome. The volume presents a series of wide-ranging and original treatments of music written for and performed in the papal court from the fourteenth to the sixteenth century. New discoveries are offered which force a radical reevaluation of the Italian papal court as a musical centre during the Great Schism. A series of motets for various popes are subject to close analysis. New interpretations and information are offered concerning the repertory of the papal chapel in the fifteenth and sixteenth centuries, the institutional life of the papal singers, and the individual biographies of singers and composers. Thought-provoking, even controversial, evaluations of the music of composers connected with, or thought to be connected with, Rome and the papal court, such as Ninot le Petit, Josquin, and Palestrina round out the volume.

Renaissance Polyphony

This great anthology of music literature makes available to all music lovers a wonderful storehouse of hitherto inaccessible treasure. The volume includes the development of Oriental, Medieval, and Renaissance music from the beginning to 1600. Its more than 200 representative examples are individually complete compositions, each of sufficient length to illustrate clearly a form or style. The authors provide an explanatory commentary with bibliography, English translations of foreign texts, and an index. The Library Journal says of it, "in short, Volume 1 of the music historian's classic dreams...No competitors on the market. Highly recommended."

Medieval and Renaissance Music Manuscripts, January and February 1953

A challenging book which questions how much is really known about the way medieval music sounded.

Manuscripts and Medieval Song

At the time of publication, this book was the first to address the problem of how to perform medieval and Renaissance music. It is intended for both the amateur performing musician and the serious student.

Devotional Refrains in Medieval Latin Song

This is a collection of twenty-nine of the most influential articles and papers about medieval musical instruments and their repertory. The authors discuss the construction of the instruments, their playing technique, the occasions for which they performed and their repertory. Taken as a whole, they paint a very broad, as well as detailed, picture of instrumental performance during the medieval period.

Papal Music and Musicians in Late Medieval and Renaissance Rome

From the emergence of plainsong to the end of the fourteenth century, this Companion covers all the key aspects of medieval music. Divided into three main sections, the book first of all discusses repertory, styles and techniques - the key areas of traditional music histories; next taking a topographical view of the subject - from Italy, German-speaking lands, and the Iberian Peninsula; and concludes with chapters on such issues as liturgy, vernacular poetry and reception. Rather than presenting merely a chronological view of the history of medieval music, the volume instead focuses on technical and cultural aspects of the subject. Over nineteen informative chapters, fifteen world-leading scholars give a perspective on the music of the Middle Ages that will serve as a point of orientation for the

informed listener and reader, and is a must-have guide for anyone with an interest in listening to and understanding medieval music.

Historical Anthology of Music, Volume I: Oriental, Medieval, and Renaissance Music

Ruth I. DeFord offers new insights on Renaissance theories of rhythm and their application to the analysis and performance of music.

The Modern Invention of Medieval Music

We know what, say, a Josquin mass looks like?but what did it sound like? This is a much more complex and difficult question than it may seem. Kenneth Kreitner has assembled twenty articles, published between 1946 and 2009, by scholars exploring the performance of music from the fifteenth and sixteenth centuries. The collection includes works by David Fallows, Howard Mayer Brown, Christopher Page, Margaret Bent, and others covering the voices-and-instruments debate of the 1980s, the performance of sixteenth-century sacred and secular music, the role of instrumental ensembles, and problems of pitch standards and musica ficta. Together the papers form not just a comprehensive introduction to the issues of renaissance performance practice, but a compendium of clear thinking and elegant writing about a perpetually intriguing period of music history.

Medieval and Renaissance Music

Contains compositions for the dance during the Medieval (14th cent.) & Renaissance (16th cent.) eras. The selections chosen have a fast, distinctive rhythmic nature, the one exception being Byrd's Pavan the Earl of Salisbury, Ó which captures the spirit of Elizabethan England. Very few dance compositions have survived 600 years despite the great popularity dancing surely had in all the classes. This book includes dance tunes from all parts of Europe. Most of the Renaissance music is from the lute repertoire. Also included are tunes for the Renaissance four-course guitar, vihuela, & the virginal. No editing changes have taken place. A CD with 27 tunes accompanies the text.

Instruments and their Music in the Middle Ages

Examines musical culture in the towns and cities of Renaissance Europe and the New World.

The World of Medieval and Renaissance Musical Instruments

A Performer's Guide to Medieval Music is an essential compilation of essays on all aspects of medieval music performance, with 40 essays by experts on everything from repertoire, voices, and instruments to basic theory. This concise, readable guide has proven indispensable to performers and scholars of medieval music.
