[#textbooks war](#) [#education conflict](#) [#wartime curriculum](#) [#history education impact](#) [#propaganda schools](#)

Textbooks and war share a profound and often contentious relationship, as conflicts frequently reshape educational content, influencing how history, national identity, and societal values are presented. They can serve as tools for wartime propaganda or, conversely, play a crucial role in promoting peace education and critical thinking in post-conflict societies, underscoring the vital impact of hostilities on academic narratives and learning environments.
