Preventive Engagement

The United States faces an increasingly turbulent world. The risk of violent conflict and other threats to international order presents a vexing dilemma: should the United States remain the principal guarantor of global peace and security with all its considerable commitments and potential pitfalls—not least new and costly military entanglements—that over time diminish its capacity and commitment to play this vital role or, alternatively, should it pull back from the world in the interests of conserving U.S. power, but at the possible cost of even greater threats emerging in the future? Paul B. Stares proposes an innovative and timely strategy—“preventive engagement”—to resolve America’s predicament. This approach entails pursuing three complementary courses of action: promoting policies known to lessen the risk of violent conflict over the long term; anticipating and averting those crises likely to lead to costly military commitments in the medium term; and managing ongoing conflicts in the short term before they escalate further and exert pressure on the United States to intervene. In each of these efforts, forging “preventive partnerships” with a variety of international actors, including the United Nations, regional organizations, nongovernmental organizations, and the business community, is essential. The need to think and act ahead that lies at the heart of a preventive engagement strategy requires the United States to become less shortsighted and reactive. Drawing on successful strategies in other areas, Preventive Engagement provides a detailed and comprehensive blueprint for the United States to shape the future and reduce the potential dangers ahead.

Enhancing U.S. Preventive Action

At head of title: Council on Foreign Relations, Center for Preventive Action.

Enhancing U.S. Preventive Action

Andes 2020

"Diplomacy in pursuit of peace and security faces severe challenges not seen in decades. Obstacles to diplomacy are coming from the re-emergence of strong states, discord in the UN Security Council, destabilizing transnational non-state actors, closing space for civil society within states, and the weakening of the international liberal order. *Diplomacy and the Future of World Order* develops three visions of the future in which states and other key actors in the international system respond by deciding to go it alone, return to a liberal order, or collaborate on a case-by-case basis to address common threats and problems. The central focus of this book is peace and conflict diplomacy, defined as the effort to manage others' conflicts, cope with great power competition, or deal with threats to the state system itself. The distinguished international group of experts writing in this volume analyze the different scenarios' impact on peace and conflict diplomacy from the perspective of key actors and regions. It also explores the prospects for discord or collaboration around four major security issues-peacekeeping, nuclear nonproliferation, cyber competition, and terrorism. Chester A. Crocker, Fen Osler Hampson, and Pamela Aall conclude by identifying emerging types of diplomacy that can provide the foundation for global peacemaking and conflict management in an uncertain future"--

The Crisis in Macedonia and U.S. Engagement in the Balkans

Nearly 69 percent of U.S. adults and 32 percent of children are either overweight or obese, creating an annual medical cost burden that may reach \$147 billion. Researchers and policy makers are eager to identify improved measures of environmental and policy factors that contribute to obesity prevention. The IOM formed the Committee on Accelerating Progress in Obesity Prevention to review the IOM's past obesity-related recommendations, identify a set of recommendations for future action, and recommend indicators of progress in implementing these actions. The committee held a workshop in March 2011 about how to improve measurement of progress in obesity prevention.

Diplomacy and the Future of World Order

This volume explores the preventive war option in American foreign policy, from the early Cold War strategic problems created by the growth of Soviet and Chinese power, to the post-Cold War fears of a nuclear-armed North Korea, Iraq and Iran. For several decades after the Second World War, American politicians and citizens shared the belief that a war launched in the absence of a truly imminent threat or in response to another's attack was raw aggression. Preventive war was seen as contrary to the American character and its traditions, a violation of deeply held normative beliefs about the conditions that justify the use of military force. This 'anti-preventive war norm' had a decisive restraining effect on how the US faced the shifting threat in this period. But by the early 1990s the Clinton administration considered the preventive war option against North Korea and the Bush administration launched a preventive war against Iraq without a trace of the anti-preventive war norm that was central to the security ethos of an earlier era. While avoiding the sharp partisan and ideological tone of much of the recent discussion of preventive war, *Preventive War and American Democracy* explains this change in beliefs and explores its implications for the future of American foreign policy.

Measuring Progress in Obesity Prevention

The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Plan Colombia

This book examines the hard legal core, if any, of the "Responsibility to Protect (R2P)" concept with regard to the commitment to take collective action through the UN Security Council. It addresses the question of whether public international law establishes a duty on the part of the individual Security Council members to collectively take the necessary action to prevent atrocities (genocide, crimes against humanity, war crimes and ethnic cleansing). To this end, it offers an interpretation of provisions in multilateral conventions, such as the undertaking to prevent genocide in Article 1 of the Genocide Convention and the undertaking to ensure respect for the Geneva Conventions in common Article 1

of the 1949 Geneva Conventions, analyses the UN Charter framework for Security Council action, and explores whether the recognition of the international responsibility to protect has prompted the emergence of a new norm for general international law.

Preventive War and American Democracy

With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and institutional, administrative and budgetary matters, the Yearbook of the United Nations stands as the most authoritative reference work on the activities and concerns of the Organization. Fully indexed, the Yearbook includes the texts of all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, putting all of these in a narrative context of United Nations consideration, decision and action.

Prevent strategy

A definitive global survey of the interaction of race, ethnicity, nationalism and politics, this handbook blends theoretically grounded, rigorous analysis with empirical illustrations, to provide a state-of-the-art overview of the contemporary debates on one of the most pervasive international security challenges today. The contributors to this volume offer a 360-degree perspective on ethnic conflict: from the theoretical foundations of nationalism and ethnicity, to the causes and consequences of ethnic conflict, and to the various strategies adopted in response to it. Without privileging any specific explanation of why ethnic conflict happens at a specific place and time or why attempts at preventing or settling it might fail or succeed, the Routledge Handbook of Ethnic Conflict enables readers to gain better insights into such defining moments in post-Cold War international history as the disintegrations of the Soviet Union and Yugoslavia and their respective consequences and the genocide in Rwanda, as well as the relative success of conflict settlement efforts in Northern Ireland, Macedonia, and Aceh. By contributing to understanding the varied and multiple causes of ethnic conflicts and to learning from the successes and failures of its prevention and settlement, the Handbook makes a powerful case that ethnic conflicts are neither unavoidable nor unresolvable, but rather that they require careful analysis and thoughtful and measured responses.

The UN Security Council Members' Responsibility to Protect

This book brings together leading and emerging scholars and practitioners to present an overview of how regional, international and transnational courts and tribunals are engaging with the environment. With the natural world under unprecedented pressure, the book highlights the challenges and opportunities presented by international dispute resolution for the protection of the environment and the further development of international environmental law. Presented in three parts, it addresses how individual courts and tribunals engage with environmental matters (Part I); how courts and tribunals are resolving key issues common to environmental litigation (Part II); and future opportunities and developments in the field (Part III). The book is an essential one-stop-shop for students, practitioners and academics alike interested in international litigation and the protection of our global environment. Edgardo Sobenes is an international lawyer and consultant in international law (ESILA), Sarah Mead is a lawyer specialising in international environmental and human rights law, and Benjamin Samson is a researcher at the Université Paris Nanterre and consultant in international law.

Yearbook of the United Nations 2013

Conflict prevention and crisis management has become a key activity for the EU since the creation of the Common Security and Defence Policy in 1999. The rapid growth of this policy area, as well as the number of missions deployed beyond the EU's border raise important questions about the nature of the EU's international role and its contribution to international security. The Contributions to EU Conflict Prevention and Crisis Management analyze European conflict prevention and crisis management in terms of the EU's evolving global role, its institutions and its policies. The volume analyzes the EU's position in relation to the US, the UN and other regional security organizations, and applies three different institutionalist perspectives – historical, rational choice and sociological institutionalism – to explain the increasing institutionalization of EU crisis management. It also critically analyzes the application of EU policies in West Africa, Afghanistan and the Caucasus. Providing a comprehensive analysis of EU crisis management, the volume explores what role EU conflict prevention and crisis management plays in a European and a global context. Offering a comprehensive

and original contribution to the literature on EU foreign and security policy, this volume will be of interest to students and scholars of European politics, international relations and security studies.

Routledge Handbook of Ethnic Conflict

This book explores the power of educators to serve as HIV and AIDS prevention agents. The definitive text represents the work of a distinguished panel of teacher educators and health scientists who identify core information and skills effective educators of HIV and AIDS prevention should learn as they are prepared to attend to the academic and human needs of students. It assigns to teachers, in the US and abroad, the novel role of prevention agents, given their extraordinary ability to access and affect young people -- to influence their behavior. Humanizing Pedagogy considers the social, economic, racial, gender and other variables that impact the prevention of HIV and AIDS. The authors collectively assert that the process of preventing HIV and AIDS, when it considers historic and social context, can compel educators to serve not only as practitioners of knowledge, but as community agents of health and well being. Attending to HIV and AIDS issues advances the capacity and ability of educators to see and attend to the complete learner. Humanizing Pedagogy is a single volume resource for educators, in the US and abroad, interested in attending to the whole needs of the learner-and saving lives.

The Environment Through the Lens of International Courts and Tribunals

The book examines the evolution of EU conflict prevention as an internal EU process and as an area of external cooperation with the UN, OSCE and NATO. Conflict prevention has emerged as a prominent EU policy in the post-Cold War era. Yet, how suited is the organisation to practice conflict prevention, and what does the record of cooperation with other key European organisations tell us about the EU's external priorities? The book critically analyses the EU's policy and outcomes to date, concluding that conflict prevention is underdeveloped by the EU, and is in danger of being marginalised in favour of shorter-term crisis management. Moreover, EU external cooperation reinforces this: the priority is cooperation in crisis management with the UN and NATO, rather than longer-term cooperation with the OSCE.

EU Conflict Prevention and Crisis Management

Managing a Multilevel Foreign Policy is a helpful resource for enhancing current understanding of the European Union as an emerging actor in the global system. It introduces and examines the latest developments in the fields of EU foreign, security, and defense policies, providing a complete overview of the ways in which the EU has grown as a global actor with a significant impact on international affairs.

Humanizing Pedagogy Through HIV and AIDS Prevention

The 1990s have witnessed several major external initiatives to reshape the domestic political arrangements of countries. Because these have been collective foreign ventures, usually with the active collaboration of the target countries, the term intervention is ill-suited. Instead, Deon Geldenhuys introduces the notion of foreign political engagement to describe international attempts at remaking countries in the image of the West. South Africa, Kenya, Somalia, Russia, Cambodia, El Salvador and Haiti serve as case-studies to demonstrate this important theoretical rethinking of international relations today.

The European Union and Conflict Prevention

The Repertoire of the Practice of the Security Council provides UN Member States, UN entities, researchers and the general public with a comprehensive, reliable, objective and readily accessible source of information concerning the evolving practice of the Security Council on constitutional, procedural and substantive matters since inception in 1946. The Repertoire covers in particular the Council's interpretation and application of the UN Charter and its own Provisional Rules of Procedure and features case studies as well as summaries of its official documents.

Managing a Multilevel Foreign Policy

The current challenges and potential future of peacekeeping in an increasingly complex world take center stage in this far-reaching collection. Contributors advance a nuanced picture of post-conflict environments across different areas of the globe while considering possible deployments of peace-keeping, traditional military and UN forces in semi-autonomous complementary roles. Longstanding

debate topics such as the need for a standing UN army and the field implementation of global right-to-protect concepts are discussed, as are emerging ideas in civilian protection, atrocity prevention and balancing triage operations with long-term peacebuilding efforts. Other dispatches chronicle key issues and concerns regarding peacekeeping operations in Brazil, China and diverse regions of Africa. Included in the coverage: Protecting strangers: reflections on a cosmopolitan peacekeeping capacity. Towards a standing UN force for peacekeeping. Challenges posed by intervention brigades and other coercive measures in support of the protection of civilians. Addressing the criminal accountability of peacekeepers. The evolution of China's role in peacekeeping and atrocity crime prevention. Businesses and investors as stakeholders in atrocity crime prevention. Multiple viewpoints, a global scope and real-world clarity make *Perspectives on Peacekeeping and Atrocity Prevention* an invaluable resource to advance the work of humanitarians, criminologists and students of and professionals in international relations. "This collection of articles effectively points to the challenges, complexities and sensitivities of preventing and halting mass atrocity crimes in part through the use of UN peacekeeping operations. The volume also inspires further efforts, including the integration of new and younger stakeholders, to mitigate massive human rights crimes and fully implement the Responsibility to Protect." Dr. György Tatár Chair, Budapest Centre for the International Prevention of Genocide and Mass Atrocities "In a refreshing and engaging manner, this edited volume represents a much-needed contribution to the debate on how best to address current security threats given the limitations and the possibilities of peacekeeping and atrocity prevention. A compelling feature of the book is its exploration of often-neglected stakeholder perspectives alongside first-hand knowledge of the UN system and astute academic observations of key peacekeeping concepts, mandates and practices. Each chapter's concluding recommendations invite scholars and policy makers to critically interrogate their own beliefs, assumptions and preferred solutions for keeping the peace and preventing mass atrocity violence." Dr. Maria Stern Professor in Peace and Development Studies, School of Global Studies University of Gothenburg

Foreign Political Engagement

Genocide has been called 'a problem from hell' and despite vehement declarations of 'never again' it's a problem that continues to plague the world. From the beginning of history to the most recent massacres in Bosnia, Rwanda, and Darfur, genocide defies resolution. And given today's worldwide access to highly lethal weapons and advanced communications technology facilitating incitement to hate, we can expect to see this problem grow. It is often claimed that genocide occurs without warning, taking both local and global communities by surprise. Yet, as David Hamburg convincingly shows, we have had long-term advance knowledge of most modern genocides dating back to the early 20th century Armenian tragedy in Turkey and before. In this book, Dr. Hamburg applies a groundbreaking new perspective-the medical model of prevention-to the scourge of genocide in the world. Preventing genocide is not only possible, Dr Hamburg contends, but essential given its high cost in lives, human rights, and international security. Here he maps out numerous practical steps to recognise genocidal conflicts early and stem their tides of violence before they become acute. He also outlines several institutions in place and programs underway at the UN, EU, and NATO devoted to preventing future genocides before they erupt. He draws lessons both from missed opportunities and successful experiences and makes many constructive suggestions about strengthening international institutions, governments, and NGOs for this purpose.

Repertoire of the Practice of the Security Council: Supplement 2016-2017

An insider's account of the UN Security Council in the years immediately after the end of the Cold War.

Perspectives on Peacekeeping and Atrocity Prevention

This book focuses, for the first time ever, on the protection roles of human rights NGOs since the establishment of the United Nations and the adoption of the Universal Declaration of Human Rights. It also looks at how NGOs are responding to future challenges such as artificial Intelligence, robots in armed conflicts, digital threats, and the protection of human rights in outer space. Written by leading NGO human rights practitioners from different parts of the world, it sheds light on the multiple roles of the leading pillar of the global human rights movement, the Non-Governmental Organizations.

Preventing Genocide

Admittedly, the world and the nature of forced migration have changed a great deal over the last two decades. The relevance of data accumulated during that time period can now be called into question. The roundtable and the Program on Forced Migration at the Mailman School of Public Health of Columbia University have commissioned a series of epidemiological reviews on priority public health problems for forced migrants that will update the state of knowledge. *Malaria Control During Mass Population Movements and Natural Disasters*- the first in the series, provides a basic overview of the state of knowledge of epidemiology of malaria and public health interventions and practices for controlling the disease in situations involving forced migration and conflict.

The United Nations Security Council in the 1990s

The nature and scope of UN Security Council decisions - significantly changed in the post-Cold War era - have enormous implications for the conduct of foreign policy. The UN Security Council offers a comprehensive view of the council both internally and as a key player in world politics. Focusing on the evolution of the council's treatment of key issues, the authors discuss new concerns that must be accommodated in the decisionmaking process, the challenges of enforcement, and shifting personal and institutional factors. Case studies complement the rich thematic chapters. The book sheds much-needed light on the central events and trends of the past decade and their critical importance for the future role of the council and the UN in the sphere of international security.

The Protection Roles of Human Rights NGOs

The Global Community Yearbook is a one-stop resource for all researchers studying international law generally or international tribunals specifically. The Yearbook has established itself as an authoritative source of reference on global legal issues and international jurisprudence. It includes analysis of the most significant global trends in a way that allows readers to monitor the development of the global legal order from several perspectives. The Global Community Yearbook publishes annually in a volume of carefully chosen primary source material and corresponding expert commentary. The general editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and to choose experts from around the world to contribute essay-guides, which illuminate those cases. Although the main focus is recent case law from the major international tribunals and regional courts, the first four parts of each year's edition features expert articles by renowned scholars who address broader themes in current and future developments in international law and global policy, themes that appear throughout the case law of the many courts covered by the series as a whole. The Global Community Yearbook has thus become not just an indispensable window to recent jurisprudence: the series now also serves to prepare researchers for the issues facing emerging global law. The 2019 edition both updates readers on the important work of long-standing international tribunals and introduces readers to more novel topics in international law. The Yearbook continues to provide expert coverage of the Court of Justice of the European Union and diverse tribunals from the International Court of Justice (ICJ) to criminal tribunals such as the International Criminal Court (ICC) and the International Residual Mechanism for Criminal Tribunals (MICT), to economically based tribunals such as ICSID and the WTO Dispute Resolution panel. This edition contains original research articles on the development and analysis of the concept of global law and the views of the global law theorists such as: a judicial knowledge sharing process as a tool for courts working together in a universal constitutional structure; the role of human rights treaty monitoring bodies in the international legal order; and an examination of the consequences of the UN compact for the safe, orderly and regular migration on international law. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals and a section focusing on the thought of leading international law scholars on the subject of the globalization. This publication can also be purchased on a standing order basis.

Conflict Prevention

This edited collection brings together the social dimensions of three key aspects of recent biomedical advance in HIV research: Treatment as Prevention (TasP), new technologies such as Pre-Exposure

Prophylaxis (PrEP), and the Undetectable equals Untransmittable (U=U) movement. The growth of new forms of biomedical HIV prevention has created hope for the future, signalling the possibility of a world without AIDS. In this context, the volume discusses the profound social, political and ethical dilemmas raised by such advances, which are to do with readiness, access, equity and availability. It examines how HIV prevention has been, and is, re-framed in policy, practice and research, and asks: How best can new biomedical technologies be made available in a profoundly unequal world? What new understandings of responsibility and risk will emerge as HIV becomes a more manageable condition? What new forms of blame will emerge in a context where the technologies to prevent HIV exist, but are not always used? How best can we balance public health's concern for adherence and compliance with the rights of individuals to decide on what is best for themselves and others? Few of these questions have thus far received serious consideration in the academic literature. The editors, all leaders in the social aspects of HIV, have brought together an innovative and international collection of essays by top thinkers and practitioners in the field of HIV. This book is an important resource for academics and professionals interested in HIV research. Chapters "Anticipating Policy, Orienting Services, Celebrating Provision: Reflecting on Scotland's PrEP Journey"

Malaria Control During Mass Population Movements and Natural Disasters

Contributors in public policy, politics, international affairs, development, conflict management, and peace studies discuss the practical challenges of conflict prevention within the UN system, considering the causes and dynamics of war, tools being developed to predict the eruption of conflict, and what is being done to move from reaction to prevention of conflict. They touch on areas such as measuring the societal impact of war, a systems approach to mitigating violent conflict, and electoral assistance and democratization. Hampson teaches international affairs at Carleton University, Canada. Malone is president of the International Peace Academy. Annotation copyrighted by Book News, Inc., Portland, OR

The UN Security Council

This text explores the ways in which the European Union frames and conducts its international relations. Each chapter deals with the three key themes of the volume - the EU as a sub-system of international relations, the EU and the processes of international relations, and the EU as a power.

The Global Community Yearbook of International Law and Jurisprudence 2019

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Remaking HIV Prevention in the 21st Century

Cybersecurity has become a topic of concern over the past decade as private industry, public administration, commerce, and communication have gained a greater online presence. As many individual and organizational activities continue to evolve in the digital sphere, new vulnerabilities arise. Cybersecurity Policies and Strategies for Cyberwarfare Prevention serves as an integral publication on the latest legal and defensive measures being implemented to protect individuals, as well as organizations, from cyber threats. Examining online criminal networks and threats in both the public and private spheres, this book is a necessary addition to the reference collections of IT specialists, administrators, business managers, researchers, and students interested in uncovering new ways to thwart cyber breaches and protect sensitive digital information.

From Reaction to Conflict Prevention

Responsibility to Protect: Research, bibliography, background. Supplementary volume to the Report of the International Commission on Intervention and State Sovereignty

International Relations and the European Union

Researchers examined past U.S. countering violent extremism and terrorism prevention efforts and explored options to strengthen them. They found that current capabilities are relatively limited and that future efforts must build trust to succeed.

Global Trends 2040

How does international law change? How does it adapt to meet global challenges in a volatile social and political context? The Many Paths of Change in International Law offers fresh, theoretically informed, and empirically rich answers to these questions. It traces drivers, conditions, and consequences of change across the different fields of international law and paints a complex and varied picture very much in contrast with the relatively static imagery prevalent in many accounts today. Drawing on inspirations from international law, international relations, sociology, and legal theory, this book explores how international law changes through means other than treaty-making. Highlighting the social dynamics through which different areas and institutional contexts have generated their own pathways, it presents a theoretical framework for tracing change processes and the conditions that affect their success. Based on this framework, each contribution illuminates the paths of change we observe in contemporary international law. The explorations centre on strategies, forms, forces, and social contexts and draw on primary source material and in-depth case studies. Overall, the volume offers a fascinating account of an international legal order in flux-with a dynamic not captured through traditional doctrinal lenses-and helps situate change processes and their varied implications in international law and politics. A relevant book for everyone wanting to understand change and its consequences in international law. This is an open access title. It is made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 International licence. It is available to read and download as a PDF version on the Oxford Academic platform.

Cybersecurity Policies and Strategies for Cyberwarfare Prevention

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Responsibility to Protect

This volume is comprised of over 2,300 annotations on a wide array of issues and topics germane to the subject of preventing the atrocities of genocide and managing these conflicts when they do arise. Samuel Totten brings together in one comprehensive collection the research and findings in various fields, such as political science, sociology, history, and psychology, to enable specialists in genocide studies, peace studies, and conflict resolution to benefit from the insights of a diverse range of scholars and foster an understanding of how the various components of genocide studies connect. Among the topics included are: key conventions, international treaties, and covenants genocide early warning signals and forecasting risk data bases sanctions peacekeeping missions conflict resolution the International Criminal Court realpolitik vis-à-vis the issue of genocide prevention and intervention key non-governmental agencies key governmental and UN bodies working on these important issues. In addition to the annotations, Totten frames the bibliography with a major essay that introduces the

reader to the subject of prevention and intervention of genocide, raising a host of critical issues regarding the strengths, weaknesses, and limitations of various approaches germane to issues of managing these conflicts.

Preventing Deadly Conflict

The book begins by covering the general and clinical challenges that are unique to Muslims, drawing from an internationally, ethnically, and intergenerationally diverse pool of experts. The text covers not only how psychiatrists and other clinicians can intervene successfully with patients, but how we as clinicians can have a role in addressing other societally connected mental health challenges arising from Islamophobia. The text addresses three related but distinct areas of interest: Islamophobia as a destructive force, Islam as a religion that is threatened by stigma and misinformation, and the novel intersection of these forces with the field of psychiatry. *Islamophobia and Psychiatry* is a vital resource for all clinicians and clinicians in training who may encounter patients struggling with these issues, including adult and child psychiatrists, psychologists, primary care physicians, counselors, social workers, and others.

Successes and Challenges of Emerging Economy Multinationals

Successes and Challenges of Emerging Economy Multinationals investigates a broad variety of cases presenting clear evidence of fast successful internationalization of emerging economy multinationals. This in-depth analysis leads to the indication of numerous novel directions for further theoretical expansion and new empirical research.

Operating in Emerging Markets

Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a “developed world” mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, Operating in Emerging Markets , authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. Mack Robinson College of Business, Georgia State University

The Challenge of BRIC Multinationals

This PIBR volume examines a number of idiosyncratic elements in the internationalization strategies of BRIC MNEs and, in particular, in their relationship with home country policies.

Multinational Enterprises and Emerging Economies

Guided by the overarching question “how and why does the emerging economy context matter for business?”, this collection brings together key contributions of Klaus Meyer on multinational enterprises (MNEs) competing in, and originating from, emerging economies. The book also explores how outward investment strategies contribute to building internationally competitive MNEs.

Emerging Economies and Multinational Enterprises

Volume 28 of the Advances in International Management focuses on the opportunities and challenges for multinational enterprises that consider emerging economies and their destinations. It provides a forum for thought-provoking idea and empirical research, and is ideal for researchers and doctoral students whose work touches emerging markets.

Emerging Market Multinationals

Emerging market multinationals are becoming leaders in their industries, able to compete on equal terms with firms from advanced economies, but their paths toward global leadership are not always

smooth. This book examines the specific challenges faced by emerging market multinationals as they seek to develop their international operations and proposes actionable solutions for them. The authors seamlessly combine academic analyses with a rich selection of real-world cases to provide a clear framework for understanding some of the barriers that prevent firms from emerging economies from succeeding abroad and show readers what actions can be taken to achieve sustained international growth. With clear, concise arguments and examples that bring the discussion to life, this insightful book will appeal to managers and students alike.

Emerging Economies and the Transformation of International Business

The economic power of Brazil, Russia, India and China (BRICs) is rapidly increasing, changing the landscape of global economics and politics. Top scholars of international business address in this vital volume the markets, strategy implications, challenges and possibilities of this new economic reality. As these four nations acquire greater economic clout, the opportunities for other countries increase. The contributors describe the favorable circumstances these evolving economies could provide for the US and other countries, such as expanded markets and services, higher returns on investments, and new partners in building a more peaceful and prosperous world. In contrast, they also discuss risks to traditional industries and possible challenges to positions on human rights and intellectual property protections, environmental standards, free markets and democratic governments. The volume emphasizes the need for companies to adopt strategies to stay ahead in the changing business environment. Governments must also design and implement new policies geared toward mutually beneficial relationships with BRICs. This enlightening study will be of great interest to students and scholars of international business. Executives of large companies will find it of great practical use when planning their organization's future strategies.

The Emerging Markets Century

In this vital book, visionary international investment manager Antoine van Agtmael -- the pioneer who coined the term "emerging markets" -- pulls back the curtain on the new powerhouses of the world economy. Picking up where Thomas Friedman's *The World Is Flat* left off, he persuasively demonstrates that the world's center of gravity is already tipping decisively in favor of the emerging economies. With this seismic shift, competitive challenges and investment risks are also being dramatically transformed, while new opportunities are arising for those who are alert to them. A new breed of world-leading companies are catching their Western competitors off guard. Household names of today -- IBM, Ford, Sony, and Shell -- are in danger of becoming has-beens as these more innovative new superstars in the emerging markets claim dominance. Understanding how they have become world-class market leaders, and where they are taking the world economy, is crucial to understanding not only the future of globalization, but the future of Western competitiveness. Each year we are buying more planes from Brazil's Embraer, refrigerators from China's Haier appliance maker, smart cell phones from Taiwan's HTC, and gas from Russia's Gazprom. How have these relative unknowns come so far in the world markets so fast? What are they doing right that their Western competitors are doing wrong, and how can Western companies face the intensifying challenges and survive? With in-depth, inside knowledge of these emerging powerhouses that's based on his thirty years of working, traveling, and investing in emerging markets and his extraordinary access to the leading companies, van Agtmael trains his experienced analyst's eye on twenty-five of the top emerging giants, taking readers into the executive suites and labs where they are outmaneuvering their Western rivals. Profiling these major players, such as Korea's Samsung Electronics, China's computer maker Lenovo, Brazil's iron ore giant CVRD, and India's Infosys, van Agtmael divulges their strategies for growth, and analyzes how their rise to dominance will change our lives. His unique insights point the way to how we in the West can capitalize on the opportunities these companies represent while also mobilizing a powerful response to the challenges they present. *The Emerging Markets Century* is a compelling and necessary read for anyone who wants to understand the true magnitude of change under way in the global economy today.

Contemporary Issues in International Business

The ACADEMY OF INTERNATIONAL BUSINESS (UK and Ireland Chapter) Published in association with the UK and Ireland Chapter of the Academy of International Business. This brand new edited collection addresses the growing uncertainty and socio-economic challenges of globalisation and its profound implications for the strategies and operations of multinational enterprises (MNEs). Responding to the new balance in international business, the authors offer valuable insights into

the co-evolutionary processes involved in headquarters-subsidary relationships, the need for novel strategies by MNEs to retain competitive advantage, improve performance and contribute to the global economy.

Emerging Market Multinationals in Europe

This book makes a timely and highly stimulating contribution to the discourse on emerging-market multinationals, (EMNCs), as Foreign Direct Investment (FDI) in Europe from emerging countries (especially from the BRICs - Brazil, Russia, India, China) continues to grow in significance. Unsurprisingly, the emergence of EMNCs from emerging economies raises a wide range of challenges and opportunities for scholars, business professionals, and policymakers alike. While explaining the sudden rise of these companies has become a major concern among scholars, we have very limited knowledge on drivers, motivations, strategies, and impact of these EMNCs in Europe and their policy implications. This volume provides fresh insights into EMNCs activities and their impact in Europe. The contributors argue that EMNCs combine various country specific advantages, existing firm-specific advantages (exploitation), and/or new FSAs (exploration) in their FDI, and that there is considerable heterogeneity across EMNCs, even those from the same southern economy. Highlighting the importance of considering this divergent behaviour when implementing future European FDI policies, this book will be of interest to students and scholars of European Politics, International Political Economy, International Business and European Integration.

Strategies of Multinational corporations in the emerging markets China and India

Inhaltsangabe:Abstract: In recent years, China and India have become two of the most important markets in terms of sales, low-cost manufacturing and R&D operations. The future progress will increase the competitive advantage for both countries and attract MNC s from all over the world to invest. Nevertheless, success is not guaranteed, even with the large business opportunities that China and India provide. A MNC has to be aware of various challenges that both countries pose, such as government interventions, underdeveloped infrastructures or copyright violations. Hence, MNC s need efficient strategies in order to compete and improve their position in these markets. Particularly the implementation of an efficient innovation and knowledge strategy has become a crucial aspect. Effectiveness in local product adjustments, globalizing R&D, tailoring talent management, mastering the complexity of global value chains, and managing risks are success factors that have to be considered. This, however, is not an easy task. Multiple failures of MNC s in China and India demonstrate that it is important to adapt a company s strategy to the local customer needs and to obtain a competitive advantage in the field of innovation. The purpose of this master thesis is to discuss all these aspects and present crucial factors for the implementation of an efficient strategy for the two markets China and India, with a focus on innovation and knowledge. Obviously, there are limits to the scope of this dissertation. Some aspects as for example the cultural background of both countries, governmental restrictions, the role of outsourcing or the availability of financial resources have either not been considered or are only discussed briefly. Moreover, this dissertation will only provide a general overview as the business environment of MNC s in each market will differ. Introduction: In the last 10 to 20 years the term emerging market has become very important in the international business context because countries such as China or India grew heavily and created new, enormous market segments. Companies from all over the world are seeking to do business in economically developing countries because of their great potential. Gross domestic product (GDP) per capita figures exceeding 10 per cent a year, a business environment of over five billion people (approximately 80 per cent of the global population), a growing domestic customer group of wealthy people, excellently educated [...]

Emerging Markets

Business opportunities in China, Russia, East Asia and Eastern Europe, including Turkey, offer increasing rewards if you get it right - and disaster if you get it wrong. Using the real experiences of companies wherever possible to illustrate the points it makes, this extensively updated and revised second edition of this book is aimed at both managers who are involved in entering emerging markets for the first time and managers who are already operating in them. It will serve as a guide on how to avoid mistakes other companies have made and how to detect weaknesses in current emerging market strategies. It looks at: . Why successful companies often fail in emerging markets. The need to manage expectations and for thoroughness. Assessing political risk and the economic environment. Getting the corporate structure right. Issues concerning acquisitions and joint ventures. Making the most of tax

and other incentives. Market research challenges and marketing dilemmas. Reaching the local market. Human resources - myths and realities. Ethical issues and corporate social responsibility

New Policy Challenges For European Multinationals

Brings together a variety of scholarly contributions from a European perspective. This book covers dimensions of MNE corporate strategy in the face of complex policy environments: corporate strategic responses to national policy institutions; pro-active institution-oriented strategies; and, dynamics of international business-government relations.

Multinational Enterprises in Emerging Markets

"Multinational Enterprises in Emerging Markets aims at providing international managers with a series of lessons on how to reap maximum returns while mitigating related hazards arising from economic, regulatory and socio-cultural environments in emerging markets. Unlike other books, which tend to be very general in offering these lessons, Yadong Luo explicates the issues concretely, comparatively, and thoroughly."

The Rise of Multinationals from Emerging Economies

The 41st Annual Conference of the Academy of International Business UK and Ireland Chapter was held at The University of York in April 2014. This book contains records of keynote speeches and special session on key topics, as well as selection of some of the best papers presented at the conference.

The Competitive Challenge of Emerging Markets

The most disruptive change to the world economy over the past half century has been the rise of so-called emerging economies, particularly the large developing markets of China and India. While initially appealing to Western business as lower cost production locations, these economies are now amongst the world's leading markets for the sale of goods and services, as well as a growing competitive challenge to established businesses. This book examines the competitive challenge presented by China and India as they increasingly influence international business activities. It considers their rise, distinctive characteristics, and role in the contemporary world economy. The attractions and challenges of doing business in emerging economies are fully discussed and the future position of the large emerging economies critically evaluated here. A key feature of the book is a discussion of the competitive threat presented by the rapid growth of emerging market multinationals as they aspire to catch-up with, and even surpass, developed market multinationals. Theory and practice are combined in this text with insightful illustrations and examples from a range of industries and firms, as well as current debates including the utility of the BRIC concept, the growing power of Asia, the future of globalisation, and trade wars. As such, the book offers an insightful perspective for students of international business, international economics, development studies and globalisation.

Multinationals and Development

Aiming to offer a fresh perspective on the role of multinational enterprises (MNEs) in development, Rugman and Doh challenge traditional assumptions about economic development and address the controversies that surround MNEs, for example, how they affect overall economic growth in emerging economies.

International Business and Emerging Economy Firms

How do firms from emerging economies strive for the internationalization of their business? This comprehensive two-volume collection tackles this question by taking a closer look at underexplored issues, including bottom of the pyramid (BoP) business models, value creation and co-creation, employee commitment and the 'born global' concept. Taking both a geographic and thematic approach to the topic, the first volume addresses universal challenges such as inclusive innovation, the ethics of corporate leadership, and knowledge management, and also places a special emphasis on China. Providing an overview of the strategies and operations involved in internationalizing Chinese firms, this book is an essential read for those researching emerging markets and globalization in general, as well as Asian Business more specifically.

Strategies in Emerging Markets

This book presents seven case studies of large Danish investment companies in India and China. The case studies provide intriguing perspectives on the strategic and managerial challenges and opportunities facing Western multinational corporations operating in these two Asian giants. The case studies encourage readers to adopt a decision maker's perspective, targeting students and managers interested in multinational corporation strategy in emerging markets.

Building Strategic Capabilities in Emerging Markets

Firms in emerging markets are becoming leading global players despite operating in challenging home country environments, but little is known about how they build their capabilities. By analyzing multiple companies operating across over a dozen emerging markets in Asia, Latin America, Africa and Europe, the authors identify the specific challenges faced by emerging market firms to become internationally competitive. Furthermore, they provide actionable solutions to upgrading capabilities, sustaining competitive advantage, and achieving multinational status, all whilst operating in emerging economies. Featuring contributions from eminent business scholars from across the globe, this timely volume provides a valuable tool for academics and practitioners, managers and consultants, especially those involved with emerging market firms working to grow and succeed globally.

Multinational Corporations and Local Firms in Emerging Economies

In order for foreign direct investment to have deep and lasting positive effects on host countries, it is essential that multinational corporations have close direct and indirect interaction with local firms. A valuable addition to the emerging literature on multinational-local firm interfaces, this book provides

a number of case studies from emerging economies that examine such mutually beneficial business relationships and the policy measures necessary to support them.

Emerging Markets from a Multidisciplinary Perspective

This book examines prominent issues in the Emerging Markets (EM) from a variety of disciplines in order to make useful societal contributions through knowledge exchange. EMs offer enormous opportunities, but realizing them is both challenging and risky due to inherent uncertainties of such markets. EM's also have unique characteristics that makes them different from developed countries. This causes implications for both theory and practice. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. This book investigates problems specific to emerging markets, and identifies new theoretical constructs, hypotheses (re)development, and emphasizes institutional contexts. The chapters in this book establish new conceptual and theoretical paradigms from multidisciplinary perspectives concentrated in the areas of information systems, electronic government, and digital and social media matters. The book focuses on topics in these areas such as digital enterprises, sustainability, telemedicine, and Information Communication Technology (ICT) and surveys the potential challenges and opportunities that may arise. These concepts and topics covered in this book are vital for making the global economy more equitable and sustainable.

Handbook of Business Practices and Growth in Emerging Markets

The Handbook of Business Practices and Growth in Emerging Markets consists of a collection of specially commissioned chapters that describe the current business environment, organizational culture, consumer behavior, financial investment climate, and examples of best prevailing practices in emerging markets. It covers all the major functional areas of business OCo marketing, strategy, operations and finance OCo in all continents. The focus of each chapter is on the identification of different business issues in different emerging markets (including Asia, Africa and South America) and on the implementation of a proposed set of recommendations, using both qualitative and quantitative techniques to assist in decision-making and in improving organizational efficiency and effectiveness. Readers will also appreciate the multidimensional view of financial and non-financial performance measurement of businesses. Specifically, the goal of this research-based handbook is to provide a comprehensive guide for business students and managers by discussing a range of issues from the diverse emerging markets and enabling them to develop a strategic mindset for a market-oriented culture. Given the changing business dynamics, government policies and demands in industries, this handbook is both timely and topical. Sample Chapter(s). Foreword (28 KB). Chapter 1: Introduction (69 KB). Contents: Introduction (S Singh); China: New Product Development in Emerging Markets (N Grigoriou); Competing with Multinationals: Entry and Evolution of Latecomer Firms in China's Handset Industry (W Xie & S White); Current Business Practices of Top Fortune Global Emerging Multinationals (C-H Liu & K-K Wei); Between Information System Integration and Performance, What are the Missing Links? (R P Lee & Q-M Chen); Legal Cases and Auditing in China (G Chong); Commonwealth of Independent States: CSR in the Emerging Market of Russia: Finding the Nexus Between Business Accountability, Legitimacy, Growth and Societal Reconciliation (O Kuznetsova); The Russian System of Corporate Governance: Promises and Realities (O Kuznetsova); Brand Management in Emerging Markets: Private Labels in Croatian Grocery Retailing and the Case of Dona Trgovina D O O (M Martinovic & J Branch); Baltic Tiger or Wounded Lion OCo Retail Trade and Shopping Behavior in Estonia, Latvia, and Lithuania (B McKenzie); Latin America: Data Mining as a Decision Tool for Materials Procurement in a Multinational Company Headquartered in Brazil (D C C Barbosa et al.); The Importance of Natural Resources-Based Industry Clusters in Latin America: The Case of Chile (C Felzensztein); Inserting Small Holders into Sustainable Value Chains (M F Neves & L T e Castro); Franchise as an Efficient Mode of Entry in Emerging Markets: A Discussion from the Legitimacy Point of View (C Gauzente & R Dumoulin); Africa: Public Procurement Reform in Emerging Economies: A Case Study of Kenya (P M Lewa & S K Lewa); Rural Tourism in South Africa: The Case of Damdoryn and Bufflespoort (K P Quan-Baffour); An Institutional Network Approach of Partnership Mode of Interest-Free Microfinance and Islamic Banking: A Case Study (M N Alam & M M Hussain); Challenges of Internet Adoption of Banks in Ghana (N O Madichie et al.); Middle East: Does the Religious Nature of Organizations Affect Performance Measurement? A Case of GCC Banks (E K A Mohamed & M M Hussain); Challenges and Opportunities for International Marketers in Kuwait (C P Rao); Glimpses at Society and Management in Iran (H Yeganeh); Internet Consumer Behavior in Cyprus (A Thrassou et al.); Asia: Corporate Social Performance of Indonesian State-Owned and Private Companies (H Fauzi et al.); Does Individual Stock Futures Affect Stock Market: Volatility in India? (N Tripathy et al.);

Philippines in the 21st Century: Business Opportunities and Strategic Marketing Implications (E P Garrovillas); Papua New Guinea OCo An Emerging Economy in the South Pacific: Challenges and Prospects (R Rena); Conclusion (S Singh). Readership: Students of business administration courses which focus on organizational culture, managers and management consultants dealing with issues related to emerging markets."

Multinational Companies from Emerging Economies

This comprehensive study of the rise of multinational corporations from emerging economies explores the basis of their success. Andrea Goldstein argues that the history of multinational business offers valuable lessons for the present and shows how emerging multinationals are embedded in dense political, social and ethnic networks.

Business Practices, Growth And Economic Policy In Emerging Markets

Globalization has forced international firms to be competitive, innovative, and most importantly, adaptive to the changing economic conditions and consumer behavior, and emerging threats from local firms based in developing countries and emerging markets. These markets also have one of the fastest growth rates in the world given the advancement in technology, the rise in global investments, and the change in culture. As such, the knowledge translation and transfer from advanced countries to emerging markets and vice-versa is of essence; the advanced countries need access to the markets, and the emerging markets need the technology and investments, among others, from advanced countries. It is a win-win strategy to develop competitive advantage for international firms. In this context, the authors, who have significant international business knowledge in developing countries and emerging markets, carefully present a selection of peer-reviewed edited chapters that are research-based, theoretical sound, and managerially relevant. The book serves as an essential tool to study, apply, and analyze the contemporary dynamics in developing and emerging markets as the chapters cover recent and relevant business topics such as talent management, ICT technologies, innovation, artificial intelligence and cybersecurity, business incubation home market, and entry strategies.

Talent Management in Emerging Market Firms

Investigating talent management in firms from emerging economies, this book discusses strategies and practices of managing talented employees in the context of BRIC countries. Talent Management in Emerging Market Firms illustrates how emerging multinationals use their talent management to create and extend competitive advantage in global markets, and how they support their competition with talent as their main asset. Extending the talent management perspective, the book compares companies from Brazil, Russia, India and China to provide the link between talent management practices, a firm's performance and organizational competitiveness within the context of emerging economies.

Global Firms and Emerging Markets in an Age of Anxiety

Developing countries that have attained the status of emerging markets offer considerable opportunities for first world businesses. However, there are challenges to successful operations in this field of enterprise.

Multinationals and Emerging Economies

The global economy is changing rapidly and multinational corporations (MNCs) are at the forefront of this transformation. The book provides novel and profound analyses of how MNCs and emerging economies are related, and how this relationship affects the dynamics of the global economy. In particular, the authors deal with the nexus between multinationals, emerging economies and innovation from a variety of different perspectives. Innovation is regarded as a core driving force in the global economy but the authors show how it can impede as well as encourage sustainability. Multinationals and Emerging Economies brings together insights from business studies and economics, and combines concise theoretical discussion with empirical analyses of unique data. Researchers and graduate students in the fields of international business, international economics, international relations, innovation studies and strategy will find much of interest to them throughout the book. It will also be an invaluable tool for policy-makers in economics and commerce.

The Economist Guide to Emerging Markets

The growth that companies can achieve from their operations in home and developed world markets has for many years been modest. Real opportunities to take a business to a higher level exist in identifying and cultivating emerging markets. For many years, The Economist Corporate Network has been a leading authority in advising firms on how to make the most of the opportunities that emerging markets present, and how to avoid the mistakes so many companies make with disastrous results. In this book, the Corporate Network team shares their expertise with readers. They examine new approaches to business in emerging markets, identifying what you need to think about, the various risks, and how to get your approach right. They also review various markets, from the BRIC countries (Brazil, Russia, India, and China) to the emerging economies of Eastern Europe, Asia and Africa. Based on the unrivalled expertise of The Economist Corporate Network team and their experiences working with hundreds of companies, there is no more useful guide than The Economist: Emerging Markets to explore the opportunities these markets offer and how to take advantage of them.

The Competitive Advantage of Emerging Market Multinationals

A rigorous analysis of how the innovative practices of emerging multinationals from the BRIC countries are transforming global competition.

Understanding Multinationals from Emerging Markets

"Why have relatively poor and underdeveloped countries been able to spawn so many global firms in the last two decades? Are emerging market multinationals (EMNCs) really different from successful multinationals from developed economies? This book tackles these and other fundamental theoretical questions about EMNCs. A distinguished group of researchers assesses the unique strategies and behavior of successful EMNCs, from the Chinese telecommunications firm Huawei to the Indian conglomerate Tata, to the South African beverages firm SABMiller. They address a range of topics, such as the drivers of internationalization by EMNCs; their distinctive process capabilities; how they catch up with established rivals on technology; how state ownership or business-group affiliation affects their behavior; and why they sometimes relocate their headquarters to advanced economies. This book will appeal to scholars and graduate students in global strategy and international business, as well as consultants of multinational companies, looking for state-of-the-art analysis of EMNCs"--

Transcending Cultural Frontiers

This book focuses on the cultural challenges often faced by international managers and global business operations. In the last few decades, the world has witnessed unprecedented economic turmoil, volatility, and uncertainty which has altered the political dynamics and sociocultural landscape around the globe and directly or indirectly affected international business activities. Further, new markets have opened up in every corner of the world. Brazil, Russia, India, and China, collectively known as BRIC, are strong emerging economic powers similar to the once captivated 'Asian Tigers' such as Hong Kong, Singapore, South Korea and Taiwan which rose decades ago. The emergence of these markets has heightened both the opportunities and challenges for national and international businesses. Multinational firms are gradually expanding in the emerging markets and are expected to become giants in the foreseeable future. As they expand, they also need to assume increasing social responsibilities in a global context, and it is important that the ways business is conducted are developed accordingly. As such, understanding the practices, challenges, and strategies that companies have developed is critical to global firm's success. Against this background, the book highlights the importance of understanding cultural elements when managing multicultural human behaviors in the workplace. Based on conceptual and empirical work, it pushes the frontiers of knowledge of this emerging field in international business setup and management, and explores how globalization is changing the way in which multinational firms formulate their business strategies. "The editors of this text bring a wealth of expertise in this area, as is evidenced by their choice of topics, and the strength of the experts they have invited to contribute to the book. The combined chapters provide both strategic guidance as well as a focus on operational concerns that may arise in international business including expatriation and human resource mobility. The authors not only correctly identify the oncoming challenges, but also present evidence regarding the likely solutions such as culture and innovation and global change management. Overall, this book will be a tremendous resource for scholars in the international business field, but I believe the audience will be much wider. The international team of editors and authors bring a wide range of perspective as well as real-world contextual knowledge that will be useful for scholars and practitioners who seek to leverage culture and human capital to advance international business and drive the global economy.

I applaud the editors for their vision and leadership in guiding us through one of the most challenging contemporary research areas and through one of the most pressing challenges of our day.” -Dr. Richard L. Griffith, Executive Director, Institute for Cross Cultural Management, Florida Institute of Technology, Melbourne, FL, USA

International Business

This stimulating text provides a truly international perspective, with a wealth of real life examples from developed and emerging countries to help students envisage how organizations across the globe practise business. Thoroughly updated and revised to give students a deeper understanding of the key international business theories, this new edition features: - Considerably revised structure to reflect student's knowledge as they progress through an international business module - Increased coverage of the core international business theories to enable in-depth understanding of the issues and challenges of international business - New chapters on emerging markets and the environmental challenges facing businesses - End of part long cases to promote a holistic understanding of international business

Online Resource Centre For registered adopters of the text: - Multimedia library - Instructor's manual - Suggested assignment questions - Additional case studies - Test bank of questions - Indicative answers for case study questions and assignment and examination questions

For students: - Extension material - Interactive Map - Assignment and examination questions - Self-test multiple-choice questions - Key websites - Revision tips - Additional case studies - Case study questions and answers

Global Business Strategy

This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

Understanding Multinationals from Emerging Markets

This book offers the latest analytical thinking on emerging market multinationals (EMNCs) and identifies key issues for research by scholars and consultants.

Emerging Asian Economies and MNCs Strategies

Analysing the role of multinational investors in emerging Asian economies and the implications for regional economic integration, this astute study examines the increasing role being played by Asian countries in the global economy. Encompassing a large number of diverse manufacturing and service sectors, this book highlights the cultural and strategic challenges faced by multinational investors in the region in which they invest. It shows that despite high rates of economic growth in Asian countries presenting multinational traders and investors with unparalleled market opportunities, there have been only tentative moves towards regional economic integration. Areas such as trade facilitation, uniform customs clearance, removal of non-tariff barriers and labour deployment issues are yet to be adequately addressed.

Doing Business in Emerging Markets

Fully updated to include coverage on the recent COVID-19 pandemic as well as other recent macro drivers, this third edition provides a comprehensive and authoritative examination of emerging markets across the globe.

Investment Strategies in Emerging Markets

"The book investigates foreign direct investment (FDI) strategies in four important emerging economies: Egypt, India, South Africa and Vietnam. These countries liberalized their economies in the 1990s with the intention of attracting greater FDI inflows. This book assesses whether they have been successful in achieving this goal. The authors adopt a comparative perspective and use a large enterprise survey

plus three individual case studies in each country. They investigate the strategies of foreign direct investors focusing on the relationship between the investment climate, the mode of entry (acquisition, greenfield or joint venture), company performance, and spillovers to the host economy. The book outlines how the interactions between international businesses and the local policy environment influence the entry strategies of firms. Academics and researchers with an interest in international business, emerging markets, economic development and strategic management will find this book informative and insightful."--BOOK JACKET.

Emerging Market Multinationals and Europe

Recently, there have been public concerns about the impact of emerging market multinationals. The expansion of China's multinationals to Europe and the Belt and Road Initiative is a prominent example that has kindled hope but also started to increase awareness of the long-term implications. Based on a systematic analysis of internationalization theories, the role of foreign direct investment and multinational companies combined with in-depth empirical research using case studies in Turkey, Russia, Latin America, Asia and Europe, this timely edited volume addresses opportunities and concerns related to this new trend. It also provides new insights that are highly relevant for scholars, policy makers, regional business agencies and students, as well as the public at large. By focusing on the (potential) impact of the expansion of emerging market multinationals on Europe and by including a long-term perspective, the book offers a fresh perspective on a highly controversial issue.
