David was always meant to explore the back roads of the American southwest. For him, the more remote, the better; and the more beautiful, the more intellectually enticing. He always wanted to see for himself what those empty places on the map actually looked like. As a teenager, he hiked across Yosemite, harvested crops up the coast, and climbed major peaks in three states. As a Navajo speaker, he spent many years on the Indian Reservation, as a missionary and as a trader. Back in Utah, he began studying the geology of the Colorado Plateau. He has worked many jobs, including small business owner, miner, prospector, and assayer. But the job of geologist/tour guide for the local university was meant for him. A visitor on one of his tours described him as "...an inspiring example of a person following his interests until he found his calling." True, David feels that sharing the southwest is his destiny. If he could live anywhere he wanted, he would choose southern Utah.

In 1905 Einstein found from relativity that there is an absolute light barrier. He reiterated his finding in 1916, writing, "We conclude that in the theory of relativity the velocity c plays the part of limiting velocity, which can neither be reached nor exceeded by any real body." Poincaré and Lorentz did not share Einstein's view of relativity in that regard. Nor, later, did Fermi and Teller it seems. There were others who hesitated to come forward. Then in a 1921 lecture and a 1922 look, "sidelights on Relativity," Einstein wrote (pp. 35-6), "Poincaré is right. The idea of the measuring-rod and the idea of the clock co-ordinated with it in the theory of relativity do not find their exact correspondence in the real world." Thus the light barrier was questioned by the same man who erected it, and the last theoretical obstacle to practical star travel was mortally wounded but few noticed. There is still a conditional light barrier, but no longer one that is impenetrable. It became clear that the second postulate of special relativity does not equate to an absolute light barrier as many continue to believe even to this day; some highly-regarded scientists continue to subscribe to this faulty logic: "I believe that special relativity is correct and consequently exceeding the speed of light [by] (just accelerating more and more) is impossible," Don Lincoln, Fermilab, email dated 3 Feb. 2005. Such statements reflect a misunderstanding of the second postulate. The key is that the second postulate applies to photons but not to rocketships; rocketships are not macrophotons as Sachs pointed out. In the September 1971 issue of the journal "Physics Today" Mendel Sachs wrote about Einstein's 1921-22 "change of mind" as he referred to it, again in 1985, 1993 and at other times; but Sachs' writings were scorned by other scientists. It was as if others wanted there to be a truly impenetrable light barrier perhaps because it seemed to hold open the exciting promise of time travel. The first author became aware of Sachs' writings in 2004 and the two exchanged views for a time as reported here. This book presents a hard-science case for practical star travel. The first six chapters lay it all out in a logical and factual manner consistent with the theory of relativity. Chapters 7 & 8 outline a "Grand Experiment" designed to probe the light barrier. Chapters 7-9 give future-fiction accounts of possible scenarios of Humanity's first hesitant steps to the stars. Chapter 10 presents a separate argument questioning the idea of an absolute light barrier.

The Adventures of Tom Sawyer is a novel by Mark Twain published in 1876 Plot Summary : Tom Sawyer lives with his Aunt Polly and his half-brother Sid. He skips school to swim and is made to whitewash the fence the next day as punishment. He cleverly persuades his friends to trade him small treasures for the privilege of doing his work. Tom falls in love with Becky Thatcher, a new girl in town, and persuades her to get "engaged" by kissing him. But their romance collapses when she learns Tom has been "engaged" previously to Amy Lawrence. Shortly after Becky shuns him, he accompanies Huckleberry Finn to the graveyard at night, where they witness a trio of body snatchers, Dr. Robinson, Muff Potter, and Injun Joe, getting into a fight. Tom and Huck run away to an island. While enjoying their new-found freedom, they become aware that the community is sounding the river for their bodies. Tom sneaks back home one night to observe the commotion. After a brief moment of remorse at his loved ones' suffering, he is struck by the idea of appearing at his own funeral. Back in school, Tom gets himself back in Becky's favor after he nobly accepts the blame for a book she has ripped. Summer arrives, and Tom and Huck go hunting for buried treasure in a haunted house. After venturing upstairs they hear a noise below. Peering through holes in the floor, they see Injun Joe disguised as a deaf-mute Spaniard; Injun Joe and his companion plan to bury some stolen treasure of their own. From their hiding spot, Tom and Huck wriggle with delight at the prospect of digging it up. Huck follows and overhears their plans to attack the Widow Douglas. By running to fetch help, Huck prevents the crime and becomes an anonymous hero. **Extrait :** The old lady pulled her spectacles down and looked over them about the room; then she put them up and looked out under them. She seldom or never looked THROUGH them for so small a thing as a boy; they were her state pair, the pride of her heart, and were built for 'style,' not service -- she could have seen through a pair of stove-lids just as well. She looked perplexed for a moment, and then said, not fiercely, but still loud enough for the furniture to hear: "Well, I lay if I get hold of you I'll --" She did not finish, for by this time she was bending down and punching under the bed with the broom, and so she needed breath to punctuate the punches with. She resurrected nothing but the cat. "I never did see the beat of that boy!" She went to the open door and stood in it and looked out among the tomato vines and 'jimpson' weeds that constituted the garden. No Tom. So she lifted up her voice at an angle calculated for distance and shouted: "Y-o-u-u TOM!" There was a slight noise behind her and she turned just in time to seize a small boy by the slack of his roundabout and arrest his flight. **Biography :** Mark Twain (1835-1910) was an American writer, humorist, entrepreneur, publisher, and lecturer. Among his novels are The Adventures of Tom Sawyer (1876) and its sequel, the Adventures of Huckleberry Finn (1885), [2] the latter often called "The Great American Novel". Twain was raised in Hannibal, Missouri, which later provided the setting for Tom Sawyer and Huckleberry Finn. He served an apprenticeship with a printer and then worked as a typesetter, contributing articles to the newspaper of his older brother Orion Clemens. He later became a riverboat pilot on the Mississippi River before heading west to join Orion in Nevada. He referred humorously to his lack of success at mining, turning to journalism for the Virginia City Territorial Enterprise. His humorous story, "The Celebrated Jumping Frog of Calaveras County"

Gardener's-eye account of 50 years on a Pennsylvania farm Vivid and complete description of the nurturing of a unique legacy Rare, original, full of sharp insight and hard-earned wisdom Lacking inherited wealth, Edwin and Mimi Peebles invested their energy in an abandoned farmhouse and its

fields and woods to create a different kind of wealth: mature plantings of box and yew, magnificent specimen trees, unusual ornamentals. There were natural treasures on their grounds, too, so they husbanded the wildflowers and fragrant herbs, the native berries and volunteer fruits, the precious hardwood and aromatic trees. "The fortunate thing about a farm," Peeples writes, "is that whatever wild plant you have at all, you generally have by the acre." Now surrounded by subdivisions, the landscape is at risk, but Peeples will not sell out. What could any man buy worth more than a bequest of beauty?
