growing your roses in a container or urn

excavate the soil to about 18 inches in depth

using mycorrhizal fungi
put them in a frost free place for up to a week
dig a large enough hole to accommodate
add some grit to this excavated soil
start to backfill the hole with soil firming around the roots
lift the plant out of the pot
start back filling with the excavated soil or a compost blend
playing a generous layer of mulch
cut back one or two of the older shoots
prune it back harder to about half of a shoots length
