Introduction to Critical Care Nursing E-Book

Start here to master the concepts, technology, and procedures of critical care nursing! Introduction to Critical Care Nursing, 8th Edition prepares you to provide safe, effective, patient-centered care in a variety of high-acuity, progressive, and critical care settings. Evidence-based coverage includes realistic case studies and incorporates the latest advances in critical care. Disorders are conveniently organized by body system or special situation, and nursing management chapters include quick-reference nursing care plans. This clear, concise textbook will help you develop the knowledge and clinical reasoning skills needed for success in today's highly complex critical care environments. Critical Reasoning Activities are included throughout the text, promoting development of clinical nursing judgment to help you prepare for the Next-Generation NCLEX-RN® Exam. Emphasis on QSEN competencies enables you to gain the knowledge, skills, and attitudes needed to provide safe, high-quality health care in a variety of high acuity, progressive, and critical care settings. Evidence-Based Practice boxes illustrate how research evidence is used to address problems in patient care and includes nursing implications plus AACN's new system for Levels of Evidence: A, B, C, D, E, and M. Universal Collaborative Plan of Care for the Critically Ill Patient addresses key aspects of collaborative/interprofessional care that apply to virtually all critically ill patients. Individual Plans of Care prepare you for clinical practice by describing patient problems, patient outcomes, and nursing assessments and interventions with rationales. Case studies challenge you to apply concepts to the real world, testing your clinical nursing judgment by asking questions about patient-specific cases with lab results. Clinical Alerts highlight potential problems and concerns to improve patient safety and clinical care. Laboratory Alerts emphasize the importance of laboratory test results to critical care nursing. Medication tables show the actions/usages, indications, dosages/routes, side effects, and nursing implications of medications commonly used in critical care settings. Coverage of cardiac assistive devices includes the ECMO device for extracorporeal life support, as well as other small, portable, bedside cardiac-assistive devices. Hemodynamic monitoring content now emphasizes the noninvasive methods of hemodynamic monitoring that are becoming more prominent. Coverage of infection control addresses the QSEN safety competency and helps provide patient protection against the growing threat of drug-resistant infections. Nearly 300 full-color photographs and drawings visually clarify key concepts and equipment for better understanding of today's complex critical care environment.

Critical Care Nursing: the Humanised Approach

Tait and White provide a much-needed introduction to the complex field of critical care nursing for undergraduate and postgraduate students. Covering the essential aspects of critical care nursing, students are asked to consider the biopsychosocial triggers of critical illness, and are walked through a number of different patient scenarios. Reacting to the Francis Report and other inquiries into standards of care, Tait and White's humanising approach to critical care places equal emphasis on the 2head, hand and heart2 knowledge; evidence, technical and ethical. The book's depth of clinical knowledge is built and cemented through extended case studies of critically ill patients with a variety of needs. This breadth, along with the author's unique approach prepares students for courses and assignments in critical care, as well as preparing critical care nurses for clinical decision making and practice. A must-have for anyone studying or working in critical care nursing.

Critical Care Nursing

Critical Care Nursing: Learning from Practice takes a unique approach to critical care. Based around case scenarios that have the patient as the central focus, each chapter is constructed around an example of a critically ill patient with specific care needs. The chapters then go on to critically explore the knowledge and skills required to deliver expert care. This book looks at a range of critical care scenarios, including: The patient with acute lung injury The patient with fever The patient with an acute kidney injury The patient with long term needs The patient with increased intra-abdominal pressure The Patient following cardiac surgery Each chapter develops knowledge of the related physiology/pathophysiology, appropriate nursing interventions that are research/evidence based, technical skills, data interpretation and critical appraisal skills, enabling the reader to apply fundamental knowledge to more complex patient problems. Critical Care Nursing: Learning from Practice is an essential resource for practitioners faced with complex and challenging patient cases.

Introduction to Critical Care Nursing

Start here to master the concepts, technology, and procedures of critical care nursing! Introduction to Critical Care Nursing, 8th Edition prepares you to provide safe, effective, patient-centered care in a variety of high-acuity, progressive, and critical care settings. Evidence-based coverage includes realistic case studies and incorporates the latest advances in critical care. Disorders are conveniently organized by body system or special situation, and nursing management chapters include quick-reference nursing care plans. This clear, concise textbook will help you develop the knowledge and clinical reasoning skills needed for success in today's highly complex critical care environments. Critical Reasoning Activities are included throughout the text, promoting development of clinical nursing judgment to help you prepare for the Next-Generation NCLEX-RN® Exam. Emphasis on QSEN competencies enables you to gain the knowledge, skills, and attitudes needed to provide safe, high-quality health care in a variety of high acuity, progressive, and critical care settings. Evidence-Based Practice boxes illustrate how research evidence is used to address problems in patient care and includes nursing implications plus AACN's new system for Levels of Evidence: A, B, C, D, E, and M. Universal Collaborative Plan of Care for the Critically Ill Patient addresses key aspects of collaborative/interprofessional care that apply to virtually all critically ill patients. Individual Plans of Care prepare you for clinical practice by describing patient problems, patient outcomes, and nursing assessments and interventions with rationales. Case studies challenge you to apply concepts to the real world, testing your clinical nursing judgment by asking questions about patient-specific cases with lab results. Clinical Alerts highlight potential problems and concerns to improve patient safety and clinical care. Laboratory Alerts emphasize the importance of laboratory test results to critical care nursing. Medication tables show the actions/usages, indications, dosages/routes, side effects, and nursing implications of medications commonly used in critical care settings. Coverage of cardiac assistive devices includes the ECMO device for extracorporeal life support, as well as other small, portable, bedside cardiac-assistive devices. Hemodynamic monitoring content now emphasizes the noninvasive methods of hemodynamic monitoring that are becoming more prominent. Coverage of infection control addresses the QSEN safety competency and helps provide patient protection against the growing threat of drug-resistant infections. Nearly 300 full-color photographs and drawings visually clarify key concepts and equipment for better understanding of today's complex critical care environment. Coverage of palliative care supports the book's strong focus on end-of-life care. NEW! Study Break questions in NCLEX® Exam-style, multiple-choice format break up the chapters into easy-to-read content "chunks" and make it easy to check your understanding, with answers and rationales in the back of the book. NEW! Transplant Considerations boxes highlight essential considerations for patient care in preparation for organ transplantation, and REVISED Organ Donation chapter focuses on a practical evaluation of dying

patients for organ donation and preservation. UPDATED illustrations include photos of state-of-the-art equipment to familiarize you with the modern, high-tech critical care environment. NEW! Emphasis on patient problems (in lieu of NANDA diagnoses) promotes interprofessional collaborative practice by using terms that are easily understood by various members of the healthcare team. UPDATED content on drug addiction and the opioid crisis in the pain, cardiac, and trauma chapters equips you to address this growing healthcare challenge. UPDATED coverage of antibiotic resistance and antibiotic shortages addresses drug supply limitations and substitutions in drugs, equipment, and procedures. UPDATED considerations for LGBTQ+ clients include family and end-of-life issues, such as the consent to treat, who can be in the patient's room, and who has the right to withdraw treatment. NEW! Enhanced, application-level questions on the companion Evolve website emphasize prompt recognition of changing trends in patient parameters. UPDATED Lifespan Considerations: Older Adults boxes highlight gerontology and address the "graying" of our population, and UPDATED Genetics boxes feature a new Genetic Concepts box. EXPANDED coverage reflects important new trends including interprofessional collaboration, health literacy, immigrant health, and value-based healthcare and its implications.

Oxford Handbook of Critical Care Nursing

This title is appropriate for all baccalaureate-level courses in critical care and advanced adult or medical surgical nursing, as well as for hospital orientation programs for beginning critical care nurses. An introduction to critical care that helps nurses deliver safe, effective care that optimizes patients' outcome Understanding the Essentials of Critical Care Nursing provides novice critical care nurses with a firm foundation so that they are able to understand the complexities of care; deliver safe, effective care; and begin their transition to expert nurses. It identifies concepts and techniques that are unique to critical care nursing and focuses on the essentials of providing care to patients with disorders that are commonly seen in critical care settings. Evidence-based practices, safety initiatives, commonly used medications, and leading technologies for providing better care are highlighted throughout the book. The Third Edition includes current recommendations for practice as well as new NCLEX-style questions and analytical Why/Why Not features that spark critical thinking and test readers' understanding. By concentrating on the problems that the new critical care nurse is most likely to encounter, the text establishes the groundwork students need to become increasingly effective nurses capable of offering advanced care.

Critical Care Nursing

Compact, yet comprehensive, Manual of Critical Care Nursing: Interprofessional Collaborative Management, 8th Edition is the go-to reference for helping you provide safe, high-quality nursing care in critical care settings. Written in an abbreviated outline format, it presents essential information on more than 75 disorders and conditions, as well as concepts relevant to caring for critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialist Marianne Baird separates the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. Coverage of more than 75 disorders most commonly seen in progressive and critical care settings equips you with all the content needed to handle problems in critical care nursing. Consistent, easy-to-use format mirrors a practicing nurse's approach to patient care and facilitates quick reference to vital information. Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Gerontologic considerations and bariatric considerations are highlighted throughout to direct attention to patients with unique needs in critical care settings. NOC outcomes and NIC interventions apply standardized nursing taxonomies to the disorders and conditions most commonly encountered in progressive and critical care settings. Portable size makes it ideal for use on the unit or at the bedside. Safety Alert! and High Alert! boxes call attention to issues vital to patient safety.
