Minski's Handbook of Psychiatry for Students and Nurses

A concise and user-friendly guide, Handbook of Mental Health Nursing helps nursing students learn the essential skills required for practice. This practical handbook is informed by an interdisciplinary understanding of mental health problems and the recovery from mental health difficulties. Features: Highlights case studies and draws on narratives of patient experience to help caregivers make educated decisions in partnership with service users Focuses on assessment, classification, models of therapeutic practice, specific mental health problems and needs, and the organization of care Use a values-based approach integrating evidence-based data with service users' perceptions Presents case studies and participant narratives throughout Includes practical exercises designed to develop skills and understanding in person-centred care This book is an essential purchase for all students and educators in mental health nursing and related health and social care fields.

A Practical Handbook of Psychiatry for Students and Nurses

The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

Handbook of Mental Health Nursing

Essentials of Psychiatry and Mental Health Nursing I & II is precisely written comprehensive textbook as per revised Indian Nursing Council (INC) syllabus for Undergraduate Nursing students. It also serves a useful reference text for general nursing and midwifery students, postgraduate nursing students and other health professionals. This book is an effort to outline common psychiatric conditions and procedures practiced in clinical situation. It can be beneficial and used as ready reference templates by nursing students to plan and write nursing care plan in clinical setting. **Updated Text:** Text book contains recent updates and trends in psychiatry, making reader to aware of current change in the field.

Mental Health Nursing E-Book

Psychiatric and Mental Health Nursing: Theory and practice was conceived as a result of three major premises which, in the view of the editors, relate to the practice of psychiatric and mental health nursing. First, that high-quality psychiatric and mental health nursing can be practised only if it is under pinned by appropriate nursing theory. Secondly, that there exists a body of theory which can and should be applied to psychiatric and mental health nursing. Thirdly, that there is a need for a text which will assist teachers, students and clinicians to apply available nursing and borrowed theory to clinical practice. The general aim of this book is to introduce nursing students to a theory based approach to caring for people with psychiatric and mental health problems. The phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis, and also to those who have mental health problems but who do not necessarily have such a diagnosis. The client group to which the material in this text applies will include those who are, or have been, hospitalized and those in the community who have not been, and may never be, hospitalized. The intended readership is all students of psychiatric and mental health nursing issues, for example basic and post-basic nurses, and their teachers.

Essentials of Psychiatry and Mental Health Nursing, First Edition

Psychiatric and Mental Health Nursing has established itself as Australia and New Zealand's foremost mental health nursing text and is an essential resource for all undergraduate nursing students. This new edition has been thoroughly revised and updated to reflect current research and changing attitudes about mental health, mental health services and mental health nursing in Australia and New Zealand. Set within a recovery and consumer-focused framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with consumers and their families. Visit evolve.elsevier.com for your additional resources:

eBook on Vital Source Resources for Students and Instructors: Student practice questions Test bank Case studies Powerful consumer story videos 3 new chapters: - Physical health care: addresses the physical health of people with mental health problems and the conditions that have an association with increased risk of mental health problems - Mental health promotion: engages with the ways in which early intervention can either prevent or alleviate the effects of mental health problems - Challenging behaviours: presents a range of risk assessments specifically focused upon challenging behaviours Now addresses emerging issues, such as: - The transitioning of mental health care to primary care - The development of peer and service user led services, accreditation and credentialing - Mental Health Nurse Incentive Program

Psychiatric and Mental Health Nursing

This textbook teaches the nursing student about the psychiatric nurse settings, where the main aim is to reduce distress of the patient, and about mental health nursing which tries to help people resolve their problems and adapt to their setting thereby pre-empting further potential mental health problems.

Psychiatric & Mental Health Nursing

Help beginning nursing students gain the basic knowledge, therapeutic communication capabilities, and patient interaction skills to confidently prepare for psychiatric nursing practice. Easy to use and backed by the latest clinical evidence, Essentials of Psychiatric Nursing, 3rd Edition, is rich with clinical examples and explanations that help clarify challenging concepts and equip students for success as entry-level nurses. Whether used in dedicated psychiatric nursing courses or for integrating psychiatric nursing principles into an existing course, this engaging text establishes the fundamental understanding students need to effectively care for individuals with emotional and mental health problems in any healthcare setting. New and Updated Features NEW! Content helps students recognize and address the effects of COVID-19 on mental health and embrace changes in the practice and delivery of mental health nursing, such as virtual therapy. UPDATED! Coverage of veteran care empowers students to confidently manage specific mental health issues affecting military veterans and their families. UPDATED! Community nursing care coverage helps students make a confident transition to practice outside of traditional hospital settings, increasing their career prospects.

Psychiatric and Mental Health Nursing

A comprehensive, easy-to-read introductory text for nursing students. The book is organized into three sections: Introduction to Psychiatric-Mental Health Nursing, Mental Health Disorders, and Nursing Management of Special Populations. This unique text is the most comprehensive psychiatric mental health resource available.

Nursing in Child and Adolescent Mental Health

Gain the skills you need to provide safe and effective psychiatric nursing care! Keltner's Psychiatric Nursing, 9th Edition provides a solid foundation in the knowledge required to manage and care for patients with psychiatric disorders. It features a unique, three-pronged approach to psychotherapeutic management emphasizing the nurse's three primary tools: themselves and their relationship with patients, medications, and the therapeutic environment. New to this edition are Next Generation NCLEX® exam-style case studies to help you learn clinical judgment and prepare for success on the NCLEX. Known for its clear and friendly writing style, this text covers psychiatric nursing like no other book on the market. UNIQUE! Practical, three-pronged approach to psychotherapeutic management includes: 1) the therapeutic nurse-patient relationship, 2) psychopharmacology, and 3) milieu management. UNIQUE! Norm's Notes offer personal, helpful tips from Norman Keltner — an expert educator and the book's erstwhile author — in each chapter. UNIQUE! Putting It All Together summaries are provided at the end of each psychopathology chapter. DSM-5 information is integrated throughout the text, along with new ICNP content. Nursing care plans highlight the nurse's role in psychiatric care, emphasizing assessment, planning, nursing diagnoses, implementation, and evaluation for specific disorders. Case studies depict psychiatric disorders and show the development of effective nursing care strategies. Critical thinking questions help you develop clinical reasoning skills. Family Issues boxes highlight the issues that families must confront when a member suffers from mental illness. Patient and Family Education boxes highlight information that the nurse should provide to patients and families. Learning resources on the Evolve website include lecture slides, psychotropic drug monographs, and NCLEX® exam-style review questions. NEW! Next Generation NCLEX® (NGN) examination-style case studies and NGN item types are included for five of the major mental health disorders, allowing you to apply clinical judgment skills. NEW! Updated Clinical Examples discuss real-world situations relating to mental health. NEW! COVID-19 resources and research includes information relevant to psychiatric nursing care. NEW! International Classification for Nursing Practice (ICNP) nursing diagnoses, from the International Council of Nurses, include straightforward, evidence-based terminology that is easily translatable across settings and disciplines.

Psychiatric Mental Health Nursing

Fundamentals of Mental Health Nursing is an accessible evidence-based introduction to the role of the mental health nurse. This comprehensive overview explores concepts of mental health and distress, ethics and accountability, key nursing models to be aware of, and the prevalence, predisposing factors and features of the most commonly occurring mental health problems. KEY FEATURES: Places mental health conditions and interventions within a wider holistic context Situates recovery at the centre of mental health nursing practice Links key concepts to mental health across the lifespan Contains learning outcomes in each chapter and includes vignettes, activities and reflective exercises to root concepts in real life practice Information is placed in a practice context from the outset, making this an essential guide to both the theory and the practice of mental health nursing. It is ideal for students on courses relating to mental health care, as well as for registered nurses and health care practitioners looking to revise their knowledge of key concepts. www.wiley.com/go/fundamentalsofmentalhealth Interactive multiple-choice questions Links to online resources Chapter summary sheets

Psychiatric Mental Health Nursing

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each

chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Keltner's Psychiatric Nursing E-Book

In this book we have attempted to identify skills which are needed by the psychiatric nurse, and in doing so to identify a body of knowledge unique to the professional psychiatric nurse. The book has been written to demonstrate the basis of a skills approach for both the experienced and the inexperienced nurse to build upon, for we believe that psychiatric nurses, due to both their training and their particular mixture of interests, are well equipped to be in the forefront of psychiatry as a developing art and science. We hope that this book in some small way helps this development. Some of the more recent advances in psychiatric nursing have been reinforced by the publication of a training syllabus for mental nurses (English and Welsh National Boards, 1982). This document highlights the need for a change from a medical model to a social model and from a task-oriented learning experience to a skills approach. We have attempted to reflect this change in emphasis by including such aspects as personal development and self-awareness, human sexuality, the nursing process and counselling skills.

Fundamentals of Mental Health Nursing

This text aims to be useful and relevant for student nurses from all backgrounds with a range of professional aspirations. It demonstrates the importance of psychology in both the nursing role and in health care in general.

Psychiatric Nursing Care Plans - E-Book

Psychiatric Mental Health Nursing: An Introduction to Theory and Practice, Second Edition is a comprehensive, easy-to-read introductory text for nursing students. Navigate eFolio: Psychiatric Mental Health Nursing builds on this authoritative content by offering nearly 200 online learning activities and assessments to develop student understanding of the material. Furthermore, online reporting tools help you track student progress and save you time by keeping student reports all in one place!

Psychiatric Nursing Skills

"This book is a 'must' for degree level nursing and other health care students ... provides an excellent introduction to psychology for anyone working in social care, but is detailed enough for psychology graduates who left the subject behind some years ago ... could make a real difference to people's lives who are on the delivery or receiving end of health care ...". Community Care "I would highly recommend this text to any student studying psychology as part of the CFP or later years and to qualified nurses with an interest in psychology and its relationship to holistic practice. It is a must for every student nurse out there, a book dedicated to the nursing profession's most important aspect; understanding our patients' needs." S. A. Hough, First Year Nursing Student This bestselling book introduces students and practitioners to psychological knowledge and understanding, and helps them to apply sound psychological principles in clinical contexts. The text has been comprehensively updated to include new theoretical concepts and contemporary research. It provides clear and concise descriptions of psychological theories, research-based evidence, and practical examples of applications across the lifespan in different health and social care settings. New to this edition are: A new chapter on emotions A new chapter on pain Additional exercises to assist the learning process An even wider range of case studies covering all age groups Psychology for Nurses and the Caring Professions is essential reading for students undertaking pre- and post-qualifying diploma or degree level courses in nursing and health

care, including nurses, midwives, occupational therapists, physiotherapists and radiographers. It is also a useful introduction to the application of psychology for professionals working in social care.

Psychology for Nurses

Psychology and Psychological Medicine for Nurses provides a survey of psychology and psychological medicine specifically tailored for the use of nurses who will take the examinations for the Certificate of General Nursing of the General Nursing Council for England and Wales. The text covers topics on the development of human behavior or how the upbringing of children can influence their behavior when they become adults; care of mentally ill patients; and the bearing of childhood experience on the behavior of adults when they are ill. Nursing students will find the book a very good source of information and insight.

Navigate Efolio: Psychiatric Mental Health Nursing

Based on: Principles and practice of psychiatric nursing. 8th ed. c2005.

Psychology for Nurses and the Caring Professions

Using the latest clinical research and diagnoses, Principles and Practice of Psychiatric Nursing, 10th Edition provides a holistic, biopsychosocial approach to psychiatric nursing care. It follows the popular Stuart stress-adaptation framework and includes comprehensive coverage to simplify important nursing and medical concepts, promote quality and safety in care, and address psychobiology and psychopharmacology topics integral to today's psychiatry. New to this edition is a chapter on psychiatric care of military personnel, plus the latest on health care reform, prescription abuse, and obesity issues. Written by psychiatric nursing expert Gail W. Stuart, this market-leading text makes it easy to apply classroom theory to clinical practice. An easy-to-follow writing style makes it easy to understand both simple and complex topics. A well-rounded, collaborative approach provides coverage of all major psychiatric disorders from nursing and medical perspectives. The Stuart Stress Adaptation Model of health and wellness provides a consistent nursing-oriented framework, with clear explanations of biological, psychological, sociocultural, environmental, and legal-ethical components. An evidence-based practice approach bridges the gap between clinical research and everyday practice. Learning from a Clinical Case boxes begin disorders chapters with thought-provoking questions and end chapters with answers and feedback. Summarizing the Evidence boxes in the disorders chapters examine the research and findings that support psychiatric nursing care. A family focus and discussions of outpatient care reflect current trends in psychiatric nursing. A Patient Speaks and A Family Speaks boxes present short vignettes with the patient's and family's perspectives of the caregiving process. Competent Caring: A Clinical Exemplar of a Psychiatric Nurse boxes feature the experiences and personal insights of practicing psychiatric nurses. Medical and Nursing Diagnoses boxes and Detailed Diagnoses tables emphasize the interdisciplinary approach to patient care by presenting NANDA diagnoses relevant to specific disorders and describing the essential features of the related DSM-IV-TR diagnoses. Nursing Treatment Plan Summary tables present care plans including patient goals with nursing interventions and rationales. Patient Education Plan and Family Education Plan tables include key information that you need to share with the patient and his or her family to facilitate shorter hospital stays and more outpatient care. Therapeutic Dialogue boxes offer examples of nurse-patient interactions. Clinical examples include selected nursing diagnoses. Focus Points provide a comprehensive, point-by-point review of the important information in each chapter.

Psychiatric Mental Health Nursing

This full-color book uses a concise format to provide a source of fundamental psychiatric/mental health nursing information for students working in psychiatric/mental health facilities. Nursing process is the framework within which delivery of nursing care is described for individuals diagnosed with disorders from the DSM-IV-TR 2000. A CD including learning activities, case studies with critical thinking questions, assessment tools, nearly 60 psychotropic med drug monographs, chapter review questions, care plans and critical pathways and client education teaching guides is included. The book also contains 21 sample Client Teaching Guides containing information related to psychotropic meds and psychiatric illnesses that can be reproduced for clients.

Psychology and Psychological Medicine for Nurses

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes the Principles and Practice of Psychiatric Nursing textbook and Virtual Clinical Excursions 3.0.

The American Handbook of Psychiatric Nursing

Featuring a clear writing style and a reader-friendly approach, this popular resource focuses on the therapeutic skills expected of the psychiatric nurse. Using the psychotherapeutic management model as a framework, it takes a practical, clinical approach to nursing by integrating clinical realities with the theory taught in nursing schools, emphasizing those duties for which nurses are primarily responsible. This fourth edition features a new full-color design, patient education content, and expanded student worksheets with case studies and critical thinking questions - making it an even more effective learning tool. A separate unit on the continuum of care discusses care settings and case management. An entire unit on pharmacology includes drug side effects and nursing interventions. Each chapter begins with learning objectives to point students to important concepts within. Key terms are presented (where appropriate) in a boxed format for easy reference to facilitate the understanding of chapter content. Case studies help the reader conceptualize the development of effective nursing care strategies. Family Issues boxes are included in selected chapters to facilitate awareness of the issues families must confront when a member suffers from mental illness. Clinical examples drawn from the authors' own experiences are interspersed throughout the text to provide realistic illustrations of specific content. All boxes and tables with pharmacology content are highlighted for emphasis and accessibility. Nursing care plans highlight nursing care for selected disorders. Critical thinking questions throughout the text expand clinical reasoning skills. Key concepts are listed at the end of each chapter to recap important content. Key terms are defined in a comprehensive glossary in the back of the book. A new chapter on Alternative and Complementary Therapies presents valuable information about the various alternative/complementary therapies associated with mental health and illness. A new chapter on Spirituality addresses how spiritual beliefs can affect patients and their treatment. The new full color design is more reader-friendly and accessible. Patient and Family Education boxes in selected disorders chapters highlight important information. Updated DSM-IV-TR content is included. An expanded student study guide in the back of the book features perforated worksheets, multiple-choice study questions, case studies, and critical thinking questions to facilitate comprehension of the content. A new website includes printable drug cards.

Handbook of Psychiatric Nursing

This outstanding resource provides comprehensive and straightforward coverage of psychiatric nursing. Using a balanced nursing-medical approach, it presents strong baseline coverage of the DSM-IV-TR and related treatments, while continuing to focus on what psychiatric nurses actually do. The book weaves important themes throughout the text after introducing fundamental concepts early on. These areas include legal/ethical issues, research, growth/development, and cultural implications, as well as psychopharmacology, psychobiology, and communication. Takes a holistic approach with a strong emphasis on nursing process and interdisciplinary interventions. Full color design makes the book visually appealing and engaging. Objectives, placed at the beginning of each chapter, emphasize the most important concepts. Key Terms are listed at the beginning of each chapter with page number references, and are highlighted in bold the first time they appear in the chapter narrative. DSM-IV-TR Criteria boxes present the DSM-IV-TR criteria for particular disorders. Nursing Care Plans provide guidelines for care. Each care plan includes a brief case study, followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. Clinical Alert boxes emphasize information critical to the safety or well-being of the client. Nursing Care in the Community boxes discuss community perspectives on various disorders and issues. Case studies, with detailed depictions of psychiatric disorders, help students conceptualize the development of effective nursing care strategies, and include critical thinking questions that promote independent investigation. Client and Family Teaching Guidelines boxes highlight the issues families must confront when a member suffers from mental illness. Understanding and Applying Research boxes summarize research studies related to disorders and explain application to nursing interventions. Nursing Assessment Questions boxes present questions that should be included in the assessment of a particular disorder. Clinical Symptoms boxes summarize the symptoms that indicate a certain disorder. Collaborative Diagnoses boxes present DSM-IV-TR and NANDA diagnoses relevant for a certain disorder. Additional Treatment Modalities boxes summarize various modalities and interventions that are used in conjunction with nursing interventions in the treatment of a particular disorder. A bulleted Chapter Summary concludes each chapter, summarizing

the most significant ideas to remember. A glossary at the end of the book provides concise definitions of key terms presented in the text. Includes a separate chapter on Psychobiology that covers basic neuroanatomy, as well as the psychobiological aspects of psychiatric disorders. A separate chapter on Complementary and Alternative Therapies describes current therapies used in the treatment of physiological and psychological health problems, and demonstrates the importance of providing holistic nursing care. Completely updated content throughout, including the DSM-IV-TR taxonomy and 2003-2004 NANDA nursing diagnoses. Cultural Issues and Spirituality chapters combined to form Chapter 5: Cultural and Spiritual Issues. Three developmental chapters (Children and Adolescents, The Adult, and The Elderly) combined to form Chapter 8: Growth and Development Across the Lifespan. Therapies content combined to form Chapter 19: Interactive, Activity, and Electroconvulsive Therapies. Chapter 4: Legal and Ethical Implications in Clinical Practice thoroughly revised with a more clinically relevant focus. Chapter 20: Psychopharmacology thoroughly revised to include up-to-date research and the newest drugs available for treatment of psychiatric disorders. Includes multiple-choice review questions at the end of each chapter for immediate reinforcement of chapter content. Answers are provided in Appendix D. Rationales for all critical thinking questions that end case studies are available on the book's Evolve website. Content on family therapy has been increased throughout (e.g. Substance-Related Disorders and Eating Disorders chapters) in response to reviewer comments. New content on "designer" or "club" drugs added to Chapter 13: Substance-Related Disorders. Drug monographs, available on the Evolve website, provide information on the most commonly prescribed psychiatric medications.
